THE AMERICAN FLORIST

America is "the Prow of the Vessel; there may be more comfort Amidships, but we are the first to touch Unknown Seas."

Vol. XXXVI.

CHICAGO AND NEW YORK, JANUARY 28, 1911.

No. 1182

THE AMERICAN FLORIST

TWENTY-SIXTH YEAR.

Copyright, 1911, by American Florist Company
Entered as Second-Class Matter Nov. 11, 1891,
at the Post Office at Chicago, Illinois,
under act of March 3, 1879.

PUBLISHED EVERY SATURDAY BY

AMERICAN FLORIST COMPANY,
324 Dearborn St., Chicago.

Long Distance Phone: Harrison 7465.

Registered Cable Address: Ameflo, Chicago.

Subscription, United States and Mexico, \$1.00 a
year; Canada \$2.00; Europe and Countries
in Postal Union, \$2.50. Subscriptions
accepted only from the trade. Vol-
umes half yearly from August, 1901.

Vice-President; BENJAMIN HAMMOND, Fishkill-
on-Hudson, N. Y., Secretary.

Our Supplements

Subscribers should see that they get copies of
the fine supplementary illustrations showing
high grade design and decorative work. These
fine supplements should be carefully pre-
served, as they mean much to the retail florists
in dealing with their customers, illustrating as
they do the various kinds of work that the
everyday florist is called upon to perform.

The papers in which the supplements appear
should be likewise preserved, as they contain
much valuable data with regard to these special
illustrations. Subscribers should see that they
get every issue as otherwise they may miss
some of this high grade work.

HALF HOUR CHAPTERS FOR PLANT GROWERS

Gardenias.

The gardenia seems to be regaining
its popularity with the better class of
trade and is being used more and more
in the finest lines of work. They are
not at all difficult to grow but require
plenty of heat and are the prey of in-
sects, especially scale and mealy bug,
and must be carefully watched. They
are strong feeders and should be grown
in good rich soil and when blooming
require frequent waterings of liquid
manure. The greatest trouble encoun-
tered by growers is the dropping of
buds which often occurs during the
winter season. This is invariably
caused by a check in the growth of
the plant or a dropping of the temper-
ature. The propagation of these
plants may be started at any time
after the first of the year and as they
require plenty of bottom heat to suc-
cessfully root, is better done while
heavy firing is in progress. The cut-
tings should be made from good strong
healthy growths, not too hard, but of
ripened wood. A little spagnum moss
may be added to the sand and a bot-
tom heat of 85° maintained. The cut-
tings should be kept very close and
shaded for a week or two and sprayed
several times daily, and under these
conditions almost every cutting will
root in three or four weeks.

Palms.

After the Christmas holidays the
palms should be given a thorough look-
ing over and cleaning. Those that
have been used for rentals will need
to be trimmed up and washed, for they
are sure to be damaged more or less in
handling and become very dirty where
they are placed in halls, especially if
used for decorations where dancing is
one of the features. Care should be
taken in washing palms not to pinch
the leaves too hard or damage may be
done them. We remember placing a
young helper at this work and among
the plants washed was a boarder a
Cycas revoluta that had a few scale
upon it, and in removing them he
pinched the pinne so hard that many
of them turned white. In trimming
damaged palms only cut out what is

actually necessary to make the plant
look well. We have seen men do this
who ruthlessly cut off whole leaves
when only a small part was damaged.
This is entirely unnecessary for the
palm is a very slow grower and when
cut this way will take years to make
a presentable plant and in some cases
is ruined forever.

Small Ferns.

The last few years has seen a great
call for small ferns to fill the many
orders for fern dishes and in making
up baskets of potted plants. To the
ordinary grower who only uses a few
hundred it will probably be far better
to buy the stock when small and grow
them on. They can be purchased in
mid-summer quite cheap and can be
potted and are easily cared for from
that time on until wanted in the fall
or early winter. But to those that
would like to raise their own, if they
have a good warm moist house it is
not difficult. The soil should be thor-
oughly sterilized, preferably by steam,
having been first sifted and then
placed in shallow seed pans with good
drainage. The soil should be well wa-
tered and the fern spores spread upon
the top. The pan should then be
placed in warm close quarters and covered
with a light of glass to prevent
evaporation, and this should remain on
the pan until the fern leaves begin to
show. The top of the soil should never
be watered. The pans if possible
should be kept where they will not
dry out. Standing on wet ashes in
a closed case is the preferable po-
sition, but should they dry out the pan
can be placed in a dish of water, al-
lowing it to stand long enough to
absorb water until the top of the soil
is wet. After the spores have been
planted about two weeks there will
appear what looks like a green scum
on the soil, and care should be taken
that this is not disturbed, for from it
will be later seen the small fern fronds
grow. After the plants have reached
a height of half an inch they can be
pricked out with a pointed stick a
number together and placed in flats,
still being grown warm and later in

the season again divided and reset. In early summer they will have shown their true character and can then be divided into single plants and placed in 2½-inch pots and grown on for the fall trade.

Gladioli.

While we do not believe in planting other crops into the carnation or rose benches where those planted are doing well, for if they are, they will need all the room and nourishment that the bench will provide, but it often happens that a section of the bench is not producing as well as it ought, or perhaps some new variety is not proving a success, then a catch crop is of great avail and will make up a little for the loss. Gladiolus bulbs are a splendid thing to use in such a place. Get the light colored varieties and in case there is an outlet for extra grade flowers procure the best strains like America which make beautiful spikes of bloom when grown in the greenhouse. These bulbs can be planted between the rows of the other plants just below the surface and will only require that they be kept growing straight. Bulbs planted now should be in bloom in May.

Stocks for Decoration Day.

Where there is a demand for cheap bouquets and bunches for Decoration Day, stocks make one of the most useful plants to grow. While these are commonly known as ten weeks stocks, yet the better varieties will take much longer than that to grow and get any quantity from each plant. The colored varieties will take from two to three weeks longer than the white. To be sure and have them in bloom for that day the seed should be sown before February 1 and the colored varieties a little earlier. As soon as the seedlings are large enough they can be planted out in flats where they will grow much better than in pots and about the first of April planted into the benches. When the center bud shows itself this should be pinched out, causing the plant to throw fine long spikes of flowers.

Dahlias.

The grower of Dahlias will be sure to have some varieties that he is desirous of increasing his stock more rapidly than by the division of the roots, and one of the easiest and most rapid ways is by rooting cuttings. The old roots can now be planted out in a bench and they will shortly send up young shoots. These can be cut off and made into cuttings and being placed in a warm propagating bench will very readily root, when they can be potted in small pots and grown on and will give nice plants for the summer planting. This makes a very nice way to grow plants for sale, for small pot-grown plants are very easily and safely shipped.

PITTSBURG, PA.—A state charter has been granted the Neff National Floral Co. at Bellevue, with a capital stock of \$75,000.

BELLINGHAM, WASH.—The dwelling house and greenhouse of S. M. Wile were destroyed by fire January 12, which originated from an overheated furnace. They will be rebuilt as soon as all settlements are made.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Value of Our Supplements.

One of the features of the play, "The Fascinating Widow," presented by Julian Eltinge, is a wedding scene. While performing at Cleveland, O., Mr. Eltinge visited the store of the Jones-Russell Co. and inquired if it would be possible to have made a floral wedding ring. He was told that it would and was shown the beautiful illustration published in THE AMERICAN FLORIST, issue of January 7, as a supplement. He immediately ordered one made like the ring illustrated, which was the first wedding ring ever carried in a procession in Cleveland. This only proves the value of these beautiful suppl-

Z. D. Blackistone.

ments and the manner in which they can be used to great advantage. The ring was displayed in the store window and attracted great attention.

Plant Baskets.

SEE SUPPLEMENT WITH THIS ISSUE.

The demand for plant baskets reported from all parts of the country during the holiday season, is proof that the arrangement of plants in this manner is appreciated by plant lovers, and is a very important factor in the increasing business. Baskets of all the different shapes and sizes lend themselves to arrangements which can be very handsomely combined, and they can also be procured in many materials and colors, but care should be taken that the color of the basket harmonizes with the colors of the plants used. A pan of zinc should be made to fit the basket, if one does not accompany it, and the plants set in this and filled around with soil and then thoroughly watered. The demand for these baskets, although of course greater at Christmas and Easter when so many blooming plants are sold, yet there is a constant demand throughout the season for well put up combinations, which gives the plantsman an opportunity to attractively present plants that would not find purchasers as specimens. In making up these bas-

kets there is an opportunity to use plants that have grown one sided or those that the foliage has been lost at the base, the use of small ferns and other decorative stock furnishing that in which the plant is deficient. No special directions can be given in regard to the plantings of these baskets, for the plantsman can use all of the blooming plants at his disposal, care being taken, of course, to have the colors harmonize, not only with the baskets, but with each other, and although the customers as a rule are very partial to the baskets that are filled to overflowing, yet if fine specimens are employed, an arrangement not overcrowded, but with enough ferns to properly finish them, is much handsomer. A single flowering plant with other highly colored foliage plants is a very effective arrangement, and not so expensive as where a wealth of flowering plants are used. With the handle baskets, a bow of ribbon gives the arrangement a finishing touch that is greatly appreciated, but care must be taken in the selection of the color of the ribbon, and that this feature is not overdone. It can be carried to such an extreme that it detracts rather than adds to the beauty of the offering. These plant baskets are not necessarily all made up expensively, for there can be obtained small shallow willow baskets of the sizes that will hold the several bulb pans and a pot of Von Sion narcissus or tulips placed in one of these coverings is very attractive and they materially help the sale and add but little to the expense. A few branches of boxwood placed in the soil around the edge of the pot is a great addition, and will last as long as the plant. The supplement with this issue illustrates a beautiful handle basket of spring flowering plants nicely finished and decorated with bows of gauzy ribbon, and is a handsome example of this kind of arrangement.

Bargain Sales.

Referring to the question of "Bargain Sales," which was dilated upon from a retailer's standpoint in the issue of THE AMERICAN FLORIST of December 3, page 922, we have just had the pleasure of an interview with the foremost flower merchant of the country, Chas. Thorley, 562 Fifth avenue, New York city.

Mr. Thorley's broad-minded and distinctive business methods have led to great achievements in the artistic floral world; his name is famous in flower circles from the Atlantic to the Pacific. His knowledge of the ins and outs of all that pertains to the final disposing of things that are grown for beauty and adornment is probably without an equal, hence, when we get his opinion on things connected with the trade, we are getting something of real value.

Asked as to the effect of bargain sales of flowers, Mr. Thorley said: "When flowers can be placed in the hands of the poor, by selling them cheaply at bargains, I look upon it as a work of charity, and no harm, but good, is accomplished. I would rather see the flowers actually given away for that purpose, however; in fact, I would subscribe liberally towards a fund that would be used for the purpose of purchasing the surplus flowers in times of flooded market conditions, and distributing them to the poor.

Considering the large amount of money invested, ours is the worst organized industry of any, worse than the peanut industry. The methods used by growers in disposing of their flowers is mainly responsible for these bargain sales; prices are juggled with, according to the whims, or beliefs, of middlemen. Retailers who are onto their business have fairly accurate knowledge of crop conditions and refuse to respond to the tactics of the middleman when prices are made exorbitant; the result is quickly seen in the over-supplied market, and the speculator, or department bargain sale man, sees his opportunity and grabs it. Understand, this does not affect me in the least, and, personally, I don't care what other people are doing, but there will never be a satisfactory solution of the flower-buying problem until there is an open market where growers or their own agents present what they have for sale each morning, where they will sell for actual cash only, and sell everything out clean each day. When this method is adopted, values will be steadier all around and in their proper ratio as governed by the law of supply and demand. Until that time we shall continue to be harassed by the at present prevailing method of inflating values according to the supposed necessity of the retailer, rather than to the actual supply in the market."

Mr. Thorley has observed closely the conditions that prevail in the markets of England, France and Germany, and knows whereof he speaks and, we think, our readers will appreciate the fact that the above quoted remarks are quite pertinent to the question.

Preparing Greenhouse Soil.

ED. AMERICAN FLORIST:

I have 125 loads of sod taken from a meadow, and plenty of cow manure and also dry sheep manure. What is the best way to prepare this for the greenhouse to grow carnations and chrysanthemums? How much air slacked lime should be added? Should the sheep manure be mixed with the soil in the spring or when filling the benches? SPECTATOR.

The best way to prepare soil for greenhouse purposes for carnations and chrysanthemums is by composting it in the fall if possible, if not, early in the spring. The proportions should be one-fourth cow manure to three-fourths sod. Make a layer of the sod about nine inches deep; on this scatter a layer of air slacked lime, enough to make it white, then put on three inches of manure. Then nine inches of soil and again the manure, making the pile about five feet high, which is as high as can be conveniently worked. In making such a compost heap it is better to keep the sides nearly straight and the top flat so that it will not shed the rain, but allow it to soak in. When filling the benches the soil and manure should be thoroughly mixed and the sods broken up. If the soil is very black and heavy it will probably stand considerable more lime. The sheep manure can be used as a mulch, on the carnations during the late winter and spring when the plants need a stimulant, and on the chrysanthemums when they set their buds. W.

ROSWELL, N. M.—Frans O. Sander-son, formerly with the Alameda Greenhouses, is now in charge of the new greenhouses of the Roswell Floral Co.

PEOPLE WE KNOW.

Jackson T. Dawson.

In awarding the second George Robert White medal to Jackson T. Dawson, the Massachusetts Horticultural Society has honored and recognized the ability and work of one of the greatest and most successful horticulturists in this country. This medal, illustrated in THE AMERICAN FLORIST, issue of December 10, 1910, page 978, is of gold, and is awarded to the man or woman, commercial firm or institution, in the United States, that has done the most during the year or in recent years, to advance the interest in horticulture in its broadest sense. The first award having been made last year to Prof. C. S. Sargent, director of the Arnold Arboretum, in recognition of his eminent service in horticulture.

Jackson T. Dawson.

Second Recipient of the White Medal Awarded by the Massachusetts Horticultural Society, January 7, 1911.

Mr. Dawson, in the propagation, culture and knowledge of trees and shrubs, has shown himself a genius and has acquired note not only in America but all over the world. He first saw the light of day in York, England, in 1841, coming to America when he was eight years of age and went to live at Andover, Mass., with an uncle who had a nursery, and as a boy was a great student of plant life when working on his uncle's property. A few years later he became associated with the Hovey establishment at Cambridge, Mass., at that time one of the noted nurseries of America. At the breaking out of the Civil War he enlisted and went to the front where he honorably served his adopted country. During his service in the south, he studied closely the flora of that section of the country and gathered and sent home many seeds.

In 1871 he accepted a position under the late Francis Parkman, at the school of horticulture of the Bussey Institute. Two years later, Dr. Parkman was succeeded by Prof. C. S. Sargent, with whom Mr. Dawson has labored ever since in raising and cultivating the trees and laying out the

grounds of the Arnold Arboretum. Here he has propagated hundreds of thousands of trees and shrubs, many of which have been distributed and decorate the parks and grounds of this country. His knowledge of trees and shrubs, and his ability as a propagator and in grafting, has given him a noted reputation among the horticulturists of the world. As a hybridizer of roses, especially with the multiflora, rugosa and Wichuraiana types, he has produced many valuable seedlings for which he has received various medals. His life work has been the development of the Arnold Arboretum, the greatest tree garden of this country. He is an ardent member of the Grand Army of the Republic, past president of the Boston Gardeners' and Florists' Club and has served the Society of American Florists as a member of the executive committee. He is one of the most genial and affable men to meet and can count his friends by the hundred who will be pleased to know of the honor bestowed upon him.

Z. D. Blackistone.

Z. D. Blackistone, recently appointed vice-president of the Society of American Florists for the District of Columbia, though yet a young man, is a striking example of "sand" and business ability.

He was born in St. Mary's County, Maryland. After passing through the public schools he entered Charlotte Hall Military College, and graduated with honors in 1890. During the next two years he was engaged in various occupations, always having in mind a suitable field for life work.

In 1892 he took a position with the well-known firm of Gude Bros., of Washington, D. C., where he remained for seven years. While riding one day on a street car, he saw a vacant store on Fourteenth street, and it struck him that it would be a good location for a florist. He got off the car, went in and made inquiries, and without any premeditation or advice, agreed to pay \$10 for its use from October 15 to November 1. He says that up to that time he had saved but \$10, which was in the Union Savings Bank, at that time located next door to Gude Bros.' store. He withdrew the money and paid his rent. Although, like many other men, he had a hard struggle during the first years of his business career, he won out. In 1890, he removed to his present location, corner of Fourteenth and H streets N. W., where he has been eminently successful. His store is generally recognized as one of the most artistic of the many good stores of the capital city.

In addition to his fine business ability, Mr. Blackistone is noted for his suavity and good taste. He is married and has several children, and one of his notable characteristics is his fondness for his family.

A. F. F.

WILMINGTON, DEL.—H. P. Potter reports the holiday trade as about the same as done during Christmas, 1909. There was a good supply of roses, carnations and violets as well as bulbous flowers and the quality was better than last year, the prices ruling about the same. No marked increase in the demand for any special flower or plants was noted.

Florists' Hydrangeas.

The plants of Hydrangea Otaksa and other nearly related varieties of the old *H. hortensis* render the production of such fine specimens as those depicted in the illustrations herewith quite easy. Many growers do not take the trouble and time necessary to propagate and grow on plants but depend on stock purchased from other growers. Where the conveniences are not of the best this is decidedly the most profitable and best thing to do as they are soon grown and out of the way. The plants are usually bedded out in protectors and may be potted and started at any time, some growers making it a point to begin at the new year. Care is necessary in handling them not to break off the buds that are formed on the ends of the shoots as these contain the flowers in embryo and their loss means the loss of the flower trusses later.

Any good soil will do for the plants as it is easy to make up any deficiencies later by feeding with liquid manure, but it must be in good heart and firmly placed. After potting give one thorough soaking of water, enough to moisten every particle of soil, first standing them on a level floor, and when they have drained a little take them to a cool house. Here they should remain as long as possible in order to give the roots a chance to get hold of the new soil, but the time they can remain depends upon when they are needed. If they are wanted for Easter, which this year falls upon April 16, then they will have to go right into heat at once, moderate heat it is true at first, but still enough to start them growing or there will be no chance of having them on time. Memorial day plants may be kept in the cool house another couple of weeks and started, say the end of February. From 45° to 50° is warm enough at night for the first two weeks and after the growth gets well away then more heat can be applied as it is seen whether the plants are likely to be on time or not. It is much easier at the finish to keep the plants in good condition by taking them to a cooler and drier house than it is to force them into flower at the finish, very high temperatures leading to poor color in the flowers, so start in time.

As the growth develops it will be easy to see how the plants are coming out as to flower and shape, and a little manipulation of the growths early in the season is well repaid by the better specimens produced. Room again and light are important. Good specimens cannot be produced when the plants are stood close together and only moved apart when the foliage touches. Let them be so arranged that light and air reach every part of them and only start so many plants that there will be room for when fully developed. As the foliage develops, the roots naturally become more active and feeding will be necessary. Soot water is an excellent fertilizer if given in change with liquid made from shredded cattle or sheep manure and the plants will take a lot of it when the pots are filled with roots. They need it too as the great heads of flowers and the foliage make a great demand upon the roots which cannot be filled if the latter are tightly packed in poor soil. All through the growing season and until the flowers show color the heads must be sprayed daily, in ordinarily bright weather twice a day when

hot and the atmosphere must be kept moist by freely dampening around the pots and under the benches. These few simple details carefully carried out will enable anyone, no matter of how little experience, to grow this, one of the finest decorative plants, to perfection.

Are We Progressive.

Paper read by S. S. Skidelsky before the Philadelphia Florists' Club January 3, 1911.

If I could prove to the satisfaction of the craft that at the bottom of most of our failures lies the inexorable cause of ignorance, inefficiency and a disregard for the little details which go a good way towards the make-up of the sum and substance of a successful business undertaking—I should indeed be proud of my achievement. I shall not venture, however, to treat the subject in an exhaustive manner for fear that I might fail in the attempt.

With your permission I will read a letter which appeared a few months ago in one of our trade papers. It read: "Can you tell me what is the matter with my violets? I am enclosing a few leaves, and if you can give me any information regarding them it will be appreciated. I have a greenhouse 22x70, chiefly in violets, and there is something wrong with them. We also have our sweet peas in the same house, and I am enclosing some of them. They are not doing as well as they might. Will you tell me what to do with them? I am located in eastern Missouri." And this from a citizen of Missouri, who, according to the popular belief, should have been "shown" before he undertook the growing of violets and sweet peas—not after. I need hardly add that the Missourian in question represents a type not at all uncommon amongst us.

The question has often been asked, are we tradesmen or professionals? If I remember rightly, a paper on this subject has been read before, and de-

bated upon, in our own club. This question had often occurred also to me, as it has to many others, and the answer, if we pause long enough to consider it from every conceivable viewpoint, leads invariably to a counter question, namely, what does it matter, tradesmen or professionals?

The mere classification of a business, and a business it is with all of us, can neither enhance nor detract from its true merit. What should really concern us most is, are we competent, efficient and well-equipped to undertake an important work, and make a success of it without altogether trusting in our lucky stars? The Missourian who made a failure of his violets and sweet peas, and cannot even tell what "ails them," might as well have undertaken the construction of an aeroplane or the preparation of a brief in an important case before the supreme court. The results, to be sure, would have proven equally unsatisfactory. Can we imagine, for a moment, a competent machinist, a cabinet-maker, or an attorney or a physician doing their work on the mere assumption that if one does "not succeed, he must try and try again?" Hardly. And yet this is precisely the method employed by many and many a man in the florists' trade or profession.

"The florist business looked mighty good to me," remarked an ex-coal dealer in a western town, one day, to me. "I sold out my business," he continued, "and built a range of six houses. Not knowing a thing about growing, I engaged a man who claimed he knew it all, with the result that I lost heavily the first season. The season following I hired another fellow, a carnation grower, and planted four of my houses to carnations, and two with miscellaneous bedding stock. As bad luck should have it, we had a dry season, the plants made poor growth in the field, and when benched they began to wilt and to stem-rot. Neither of us knew what to do about it. Another failure stared me in the face, but I was determined to make the best of it, and so put in a batch of lettuce to help pay for the coal at least, let alone

A WELL FLOWERED HYDRANGEA.

HYDRANGEAS AT THE DONALDSON GREENHOUSES, MINNEAPOLIS, MINN.

money-making. Well, sir," concluded the would-be florist, "if you know of anybody looking for greenhouses, please send him around. I'll sell out cheap." Now here is a case of a man who, because the florists' business looked good to him, did not at all hesitate to dispose of his coal business, and to embark in something he did not know anything about.

Can we imagine a carpet-weaver or a doctor undertaking their respective work without any training, but simply because the carpet business or the M. D. profession looked good to them? Hardly. But horticulture, evidently, puts no obstacles in the way of the novice. On the contrary, it seems to allure coal dealers, carpenters, machinists, clerks and, if I may change Milton's verse, it invites all, "All hope cherish, ye who enter here." Men and women, too, who know no more about flower or plant culture, than they do about bridge building, often embark unhesitatingly in the florists' business, trusting to mere pluck or luck, with the result, as might be expected, of failure in the end.

The thought has often occurred to me that but few professions or trades, if any, are being conducted on the "hit or miss" principle to the extent in which the florist business is being conducted. To be sure, we have very competent and able growers everywhere. We can point to men who have

achieved success because of their ability and foresight. There are rose growers, carnation growers, plantmen, specialists in every branch, many of whom are well known to all of us. But such men, we must admit, constitute but a handful as compared with the number of incompetents. I will hazard the assertion that to every successful carnation or rose grower, to every man who knows not only how to do things, but why and when to do them as well, there are dozens at least, who grope in the dark, who know nothing about soils, about the use and abuse of fertilizers, about the requirements of plants, about the proper handling of bulbs and seeds, who in brief are utterly unfit for the work they are doing. My own observations during nearly a quarter of a century of road life among all classes and conditions of florists have led me to but one conclusion, and that is that our business, notwithstanding the tremendous progress it has made, lacks in those fundamental elements, which are so necessary in order to insure its permanent healthy growth. The florist who makes a failure of his roses, for example, and cannot diagnose the cause of the failure in order to apply the remedy, or to nip the very failure in the bud, proves conclusively that he had not studied his trade or profession. In other words, he has not the theoretical knowledge or scientific basis upon which to work

out his practical results. On the other hand, the man who makes a success of his plants and is equally at sea to explain the whys and wherefores, is no more to be commended than he who, through mere chance or accident, hits upon a streak of good luck. The "hit or miss" principle accounts equally for the results in both cases. It was a "miss" with the one, and a "hit" with the other, while the law of cause and effect underlying both, is a mystery or a closed book to either.

The question naturally arises, Why do people venture into a trade or profession, the essential knowledge of which they do not possess? Why give up a paying coal business and build greenhouses without first mastering the art of growing? Why so many failures everywhere, while those really successful, because of a thorough training, intelligent observation, deduction and application, are comparatively few? Is it because the florist business "looks so mighty good?" Granted. Then that much more reason why we should bend all our energies and put forth our best efforts towards equipping ourselves in every way in order to build our success upon a more solid foundation.

The farmer who tilled the soil for generations past, and who thought he knew all about it, as his fathers did before him, is just beginning to realize that he has yet much to learn, that his primitive methods of farming wont

do, if he is to keep pace with the progress of the times. In this connection it may not be amiss to quote a few lines from an article of Gantt, in the *Engineering Journal*, having a direct bearing upon the subject under consideration. "In the United States our super-natural resources have enabled us to make phenomenal progress without regard to the teachings of science, and in many cases in spite of our neglect of them. But we have reached a point where we must recognize that the proper application of science to industry is of vital importance to the future prosperity of the country." The progressive farmer has evidently arrived at the same conclusion, if we are to judge by the number of farmer boys filling the halls of the state agricultural colleges, the farmers' institutes, the agricultural departments of the high schools, the university extension courses, etc. The experimental stations established in various states, in most cases as a result of the pressure brought to bear by the farming element upon state legislatures, is but an additional proof that the farmer is not only awakening, but that he is wide awake to his interests. He is not content to let "well enough" alone, but wants to accomplish the best results possible. He wants to know something about the chemistry of the soil, about the ways and means of improving it, about diversified crops; in brief, he realizes that in order to increase and to improve his product, he must combine brain and brawn, and work out his problems upon scientific principles.

In his annual report, Secretary of Agriculture Wilson tells us that "since October, 1908, the number of institutions in the United States giving instruction in agriculture has increased from 545 to 875. Departments of agricultural instruction have been established in thirty-eight public high schools. Two hundred and fourteen institutions now give teachers' training courses in agriculture. Farmers' institutes are now organized in every state. The attendance at the institute meetings was 2,395,908. Ninety-nine movable schools of agriculture were held with an attendance of 66,977." These are interesting facts.

Now, what the farmer has accomplished or is striving to accomplish, should not be beyond the reach of the horticulturist as well. If the farmer deems it wise and to his interests to send his son to an agricultural college, and to take advantage of a university extension course, often brought to his very doors, as has been the case in some western states, why should the horticulturist neglect his opportunity to broaden out and to equip the rising generation with a more thorough knowledge of the details of the profession in which they are engaged? Our business has grown to gigantic proportions, and the capital invested is beyond the dream of the florist of only a generation ago. Just think of it—twenty years ago Boston supplied Chicago with cut flowers. Need I tell you that Chicago no longer depends upon the Hub for her supply of cut flowers? Our progress in a commercial way has indeed been phenomenal, and while we have ample reason to congratulate ourselves upon the success achieved, we must at the same time not overlook the fact that our business growth, unless we increase our means and efficiency, cannot possibly continue along successful lines.

Take the labor problems for example. Scan through any of our trade papers and you will readily see that on an average there are three good positions open to every competent man. I think I am safe in making the assertion that the man who can manage a greenhouse and can produce the stock possesses an asset far greater than that of the boss who invests his money in the greenhouses and worries about the weekly pay-roll besides. I will go farther and say that no profession (granted that we are ornamental horticulturists, and not mere tradesmen) is as much in need of professionals as the florist profession is. Good and competent men, men who know how to do things, are wanted everywhere. Such men are scarce.

But to come to the point. Since we have reached the stage in our commercial development beyond which we cannot go unless we increase our means and improve our efficiency, is it not high time that we make the effort to have well-equipped horticultural schools where young men, our future ornamental horticulturists, may take a course of training, and, like the wide-awake farmer, learn to know the details of their business more thoroughly than their predecessors? It seems to me that horticulture in general is of sufficient importance to assert its rights, like manual training or any profession taught in our special schools, colleges and universities. A horticultural school under the leadership of a competent head, and a staff of well trained instructors would not only teach the young man something about the elements of soil, phosphates, hydrogen, the proper use and application of fertilizers, the nature of pests, fungus, and the right way of fighting and overcoming these evils, but it would also teach him system and method, two most potent factors in the success of any business.

We all know only too well the difference between intelligent, systematic

work and that of the sloven who, like the proverbial bee, keeps continually at it, but unlike the industrious insect, accomplishes but poor results. System and method are indisputably the means that were in a great measure responsible for the success of many of our prominent growers of today. Peter Henderson represented a striking example of what system could accomplish in a business way and no less an authority than the great English peer, Gladstone himself, tells us that "the man with a method and system accomplishes more in a week than the sloven will in a month."

Our business demands that we devise means and ways of conducting it in a business way. We can no longer remain passive to our own interests, nor dare we ignore the methods which the progressive and wide-awake farmer sees fit to employ in order to adapt himself to the exacting business conditions that confront him today. The cry is already heard that the "big fellows" are swallowing up the little ones. Translated into other words, it simply means that the progressive horticulturist is forging ahead, while the one who cannot see beyond the limit of his own shadow is dropping by the roadside. It is merely a question of the survival of the fittest.

In a recent announcement in the "Outlook," the editors promise for the near future a timely article on "The new science of business." "There is a new thing in the world of industry," they tell us. "It is the efficient application of exact scientific principles to present business methods. It has been applied in machine shops and foundries, in cotton mills and paper mills, in bleacheries and dye works, in printing and lithographing establishments, and in other businesses. The science of management can be applied to every department of every business." There certainly cannot be any question about it, nor can anyone doubt the urgent need of horticultural schools every-

FLOWERS AND BUDS OF CARNATION BRIGHT SPOT.

VASE OF NEW CARNATION BRIGHT SPOT, GROWN BY NIC. ZWEIFEL. NORTH MILWAUKEE, WIS.

where, if the scientific principles are to be applied in our greenhouses, as well as in the machine shops.

STURGEON BAY, WIS.—At the annual meeting of the Wisconsin State Horticultural Society held at Madison, D. E. Bingham of this city was elected president of the society.

EXETER, N. H.—James E. McAlpine, of Boston, is to erect a greenhouse 60x400 feet on the tract of land which he purchased a year ago on the north end of the town. The boilers and building material have arrived and construction will be begun at once. When completed it will be one of the largest greenhouses in this section.

TERRE HAUTE, IND.—N. B. & C. E. Stover state that the holiday trade was some better than last year. The very cold weather necessitated very heavy wrapping. The demand for cut flowers at Christmas is certainly falling off, while for blooming plants it is increasing year by year. We attribute this to the doubling up of prices on cut flowers. While we believe in asking a fair price, and can get it, yet when you have to charge \$24 a dozen for American Beauties and \$2 a dozen for carnations, the people simply will not pay it and will buy a plant instead. We could have sold quite a lot of American Beauties had the advance quotations been that at which they actually sold, but the advance prices were so high everyone was scared and we can safely say that not over three dozen of these roses were sold in this city. We could have sold several hundred had the advance prices been what they sold for in Chicago.

THE CARNATION.

Carnation Bright Spot.

Among the carnations that are being disseminated this spring, one that is receiving much favorable comment wherever shown is Bright Spot, which is herewith illustrated. It was raised by Nic Zweifel of Milwaukee and those who have had the pleasure of seeing this beautiful variety in its home at the houses of the originator and disseminator at North Milwaukee, Wis., are very enthusiastic in its praise. This variety resembles Mrs. Thomas W. Lawson at its best, but the color is a little deeper and very pleasing. When shown at the Indianapolis convention of the American Carnation Society in 1909 it scored 24 points, out of a possible 25, for color. It is a pure bright dark pink and the color is very even. The flower is very large, measuring $3\frac{1}{2}$ inches in diameter, and is of fine substance, built very high in the center, and of splendid form, being an excellent shipper and having exceptionally good lasting qualities. Unlike Mrs. Lawson, the stems are good and long and also stiff and strong, holding the flowers erect. The calyx is exceptionally strong and well formed, keeping the flower intact, and a split calyx is so rarely seen that it can safely be said that it never splits. It is an early and profuse bloomer, producing flowers of the best quality throughout the season, and the originator states that it will produce 25 per cent more flowers than Mrs. Lawson. At the convention of the American Carnation Society, held at Pittsburg in January, 1910, it was awarded first honors in the class

for 100 best dark pink. It is certainly one of the finest dark pink varieties yet seen, and outclasses any variety now grown, and any grower looking for an improved variety of this shade should make a trial of this splendid production.

Propagation and Culture.

Everything should be on hand for taking care of the cuttings as soon as they have made sufficient roots in the sand. Plenty of pots should be arranged for if it is the intention to carry them along in pots. It is a long stretch from January to the time when planting out can be safely carried on early in May. Cuttings planted in flats or benches at this early date are very liable to suffer toward the end of this long period. We therefore favor potting the early propagated stock into $2\frac{1}{4}$ -inch pots. They can then be given another shift some time during March to prevent them becoming hard and woody. Live fresh soil is essential for potting the young stock, but do not let it contain fresh manure of any kind, the manure having a tendency to promote a soft rapid growth, a thing to be avoided at this early stage of the plant's existence. Everything possible should be done to encourage a sturdy vigorous growth, but it must not be a forced one in any sense of the word. A fresh soil in which the roots will work freely but not over-fast, is what is needed, but do not use the soil while in a wet cold condition, but place some of it in a place where it can dry out and warm up a bit before using, also seeing to it that there is enough dried up to take care of each batch of cuttings as they come along.

As soon as the cuttings begin to root out in the sand they are ready for potting. Do not allow them to remain in the sand longer than necessary, because after once the roots are formed they grow very rapidly and it takes a very short while for them to become weak and spindly. Stock being rooted to supply a rooted cutting business will have to remain in the sand to get heavier roots than what are necessary with those to be grown on at home, but even in this case should the present demand be light the cuttings will more than repay for planting in soil in flats and sold later from the soil. When taking the cuttings from the sand have a jar of clean water and dip the roots into it, washing them clean of sand. We have followed this plan for several seasons and find it very beneficial to the young plants and a safeguard against fungus and stem rot. The cuttings should be potted firmly to make the roots hustle a bit to get through the soil, the plants being very much better off for it. A soil that is soft and spongy, allowing the roots to pass freely through it, will not produce as good plants nor will they be as sturdy as when grown in soil that is good and firm. After potting the next thing to figure on is the right kind of bench room to accommodate the young plants. They need a light airy bench in a cool house, it being ruinous for them to be set in partial shady places or where it is at all stuffy so that they do not get a free circulation of air. Water well after potting, then allow them to dry out well between each watering. If some of the plants dry out quicker than others, they should be taken care of as they require it, but do not let the watering be general unless it is absolutely necessary, and at every general watering a good syringing can be given, the plants reaping great benefit from it, but avoid the light sprinklings day by day which does more damage than good. The propagating should be pushed along as quickly as the proper cuttings are obtainable, but do not use the same sand for more than one batch of cuttings. It more than pays to renew it after each lot of cuttings are taken out.

We are now getting many cloudy days following one another, which makes extra care a necessity in the culture of the flowering plants. Watering being the one most essential thing, is also one on which we can most easily go wrong, particularly at this season of the year. An over-abundance of water during a dark cloudy spell quickly starts the calyces bursting. The temperature is also very important just now. Keep a sharp lookout to have the temperature even at all times, as there is not anything that will prolong the vigor of the plants as an even growing temperature.

A very particular part of the general routine work is that of cutting the flowers. Cut early in the day, for the following day's shipment or use, and when cutting do not allow bunching to be done and the bunches left laying around on the benches. It is better to have a receptacle of clean water handy in each house to put the flowers in. This will keep them stiff and fresh and save several trips to the cellar. When the blooms are left around for the wind and air to seal up the ends of the stems, they are on

a good way to go to sleep. In bunching the flowers do not mix them, but bunch the fancies by themselves and the seconds and other grades each by themselves. C. W. JOHNSON.

New England Dahlia Society.

The annual meeting was held in Library Hall of the Massachusetts Horticultural Society January 11. President H. W. Kendall presiding. The reports of the secretary and treasurer were read and the following officers elected:

J. K. Alexander.

President New England Dahlia Society.

J. K. Alexander, president.
N. Allen Lindsay, vice-president.
Prof. G. W. Bullard, Medford, secretary.

Loring M. Bates, treasurer.
H. L. Winters, W. C. Brady, Geo. L. Stillman, A. L. Brown, Edward F. Dwyer, executive committee.

The meeting was one of the largest ever held by the society and many interesting subjects were discussed. The amendments presented at the last annual meeting were acted upon.

Grass Under Trees.

ED. AMERICAN FLORIST:

Last spring I planted "Shady Nook" grass seed in lawn under a large oak tree. It came up very sparsely and in the drought burned up very rapidly in spite of waterings and several re-sowings. Can you inform me of the reason and any efficacious remedy? New Jersey. H. G.

If H. G. has had trouble in making grass grow under trees, he has one comfort at least in knowing that there are others. It would seem that he has gone about the matter systematically by sowing a suitable brand of grass seed, the fact that it burned up is due to the excessively dry summer of last year. The same would have been true if the seed had been sown in the open in spring unless the sprinkler had been kept going continuously, or nearly so. It is a good opportunity now to say that grass seed should never be sown in spring if it can be avoided, and the choicer the seed, the more reason why

fall sowing is necessary, even though it be sown directly before the ground freezes up for the winter, but preferably earlier so it may germinate and get a good stand before cold weather sets in. By fall sowing the grass has a chance to get ahead of all weed seeds, the latter will win by spring sowing, and the grass must be given a chance to get ahead. We sowed a quantity in December with this object in view, and expect great pleasure in watching it sprout before the ground would be dry enough in spring to be fit for sowing. If the oak tree is in a prominent position, why not try planting lily of the valley under it? We have used many thousands in this way, the foliage remains green as long as the grass, with the added charm of seeing them grow in spring with the crop of bloom always sure for the Decoration Day needs, and the way the roots increase and multiply is a revelation, especially if the best imported roots are obtained, and the flowers will then be better than any grown under glass. Lily of the valley will thrive equally well under pine or spruce trees, and a blanket of manure each fall, left on in spring, will keep them vigorous and strong beyond belief. E. O. ORPET.

Clothing Bare Spaces Under Trees.

The planting of bare spaces under the wide-spreading branches of specimen trees in such manner as to produce a carpet hardly less attractive than green, velvet turf is by no means free from difficulty, writes a correspondent in the Gardeners' Magazine, but this is not so great that it cannot be surmounted. There are plants of lowly growth that will thrive in positions where the supplies of food and water are scanty and where the amount of light is reduced to a minimum, but they are few in number. The lists of plants usually given as suitable for growing under the shade of trees are of but little service to the inexperienced, for they appear to have been prepared not so much for clothing the bare spaces immediately around large trees occupying prominent positions in the pleasure grounds, as the planting of shady yet open areas in woods and plantations contiguous to the garden. We find in these lists such things as pontic rhododendrons, berberis aquifolium, the common holly, and the common laurel, which will grow freely enough in comparatively open spaces in the plantation or woodland, but are quite unsuitable for planting around large evergreen oaks, conifers that have lost their lower branches, and other trees that might be mentioned. We, of course, find plants in the published lists that will thrive in such positions, but as they are not specially distinguished, those who require help are greatly perplexed when they turn to them for guidance, and, as often as not, make an unsuitable selection. It is reasonable to assume this is the case from the many failures that have been met with.

In the planting of bare spaces that are within the influence of the roots and branches of specimen trees, the endeavor should be to make a carpet rather than form a shrubbery. Probably there is nothing to surpass certain of the green-leaved ivies for this purpose. The common ivy will soon make a good carpet, but the leaves are a little too sombre in tone. The

Irish ivy is vigorous in growth, and the color of the leaves is bright and pleasing. It is, indeed, so well adapted for the carpeting of large areas that were it not for the existence of an ivy known as Emerald Green one would be justified in saying that nothing better could be desired. The last-named is free in growth, and has leaves that are hardly so large as those of the Irish ivy, but are of a more vivid green. Both for clothing bare spaces and walls it has no superior. Ivies appreciate proper attention, and during the earlier stages they should have the assistance necessary to enable them to become established quickly. The soil around the trees will have long since become exhausted, and the first step should be to spread a good layer of well-rotted manure over the surface, and fork it in to a depth of five or six inches provided the roots will allow. In all cases the dressing of manure should be applied and worked in with a fork. The distance at which the plants should be put must be determined by their size, and the best advice that can be given is to put them far enough apart to thinly cover the surface.

The St. John's worts are also most useful for the purpose, and the best of them is perhaps *Hypericum calycinum*. This attains a height of ten or twelve inches, is dense and uniform in growth, and produces rather large yellow flowers with some freedom for a considerable period during the summer months. Not less valuable are the periwinkles, and the best of those with green leaves is *Vinca major*, which has its attractions enhanced by pleasing blue flowers. *V. minor* is also of much merit for carpeting purposes, and, as in the case of the larger-growing species, bears blue flowers. There is also a form with white flowers, and one with double blue flowers. The green-leaved forms are the best for spaces around trees with wide-spreading branches, but for planting around trees of erect growth the variegated form of *V. major* is of special value. It soon forms a dense mass, and its rich golden variegation is highly effective. Both the St. John's worts and the periwinkles should have the soil prepared for them in much the same manner as advised for the ivies.

At Woodside, Chenies, the residence of Adeline Duchess of Bedford, a quite distinct method of clothing bare spaces has been adopted. Closely adjoining the rock garden, which forms so delightful a feature, is an ancient Cedar of Lebanon, with branches that extend over a wide area. Around the trunk of this venerable tree a low rockery was formed and planted with such hardy subjects as are known to thrive in comparatively shady positions, and not to require very large supplies of water.

SPRINGFIELD, ILL.—Miss Belle Miller reports an increase of 25 per cent in the Christmas trade. The supply of roses, carnations and violets was not equal to the demand and better retail prices were obtained. While the call for bulbous flowers was good, there was plenty of stock. The quality of all the flowers was much better than usual. There was an increase in the demand for the better grades, especially fancy roses, lily of the valley and orchids which sold at better prices than ever before.

OBITUARY.

Samuel C. Moon,

Samuel C. Moon, one of the most prominent nurserymen in the country, died January 21, at his home, near Morrisville, Pa. He was in the 57th year of his age and had been ill only a short time.

Mr. Moon was the son of Mahlon Moon, the pioneer nurseryman of Bucks County. He was born at the old Moon homestead, where he passed away. The nursery conducted by Mr. Moon has been in operation since 1848, and contains many rare plants and shrubs, including the largest purple beech tree in the United States. A born nurseryman, Mr. Moon was devoted to his profession.

A widow and one daughter, Miss Jane C. Moon, survive. Two brothers, William H. Moon and James M. Moon, also survive, both of them being nurserymen.

The funeral took place January 25, at 1:30 o'clock in the afternoon.

P. H. Anderson.

P. H. Anderson, proprietor of the Anderson Floral Co., of St. Cloud, Minn., died very suddenly January 10, 1911. He was ill but a few days, having a severe cold that developed into pneumonia, which rapidly turned for the worse and he passed away.

Mr. Anderson was born in Sweden, 41 years ago, and came to America upon reaching his majority, coming to St. Cloud and was employed by the Rev. E. V. Campbell, proprietor of the Campbell greenhouses. Eight years ago he purchased the business of Mr. Campbell and removed the houses to their present location, where he has been prosperous, his business extending to many adjoining cities. Last summer, accompanied by his wife and children, he visited his old home in Sweden. Personally, he was a most pleasant, genial man and had many friends. He was a member of the Masonic, Elks, Maccabees, Workmen, Red Men, Eagles and Eastern Star lodges.

He was married 15 years ago to Miss Anna Wilson, and she and their two children, Harold and Elsie, a brother, Lewis Anderson, of St. Paul, and a brother and two sisters in Sweden, survive him.

Henrich C. W. Siebrecht.

Henrich Christian Wilhelm Siebrecht, father of Henry A. and William H. Siebrecht and their sister, Mrs. Carl Meyer, died on Monday, January 16, at Astoria, Long Island City, where he had made his home with his son, Wm. H. Siebrecht, since the death of his life 10 years ago.

Mr. Siebrecht was 92 years old, and had enjoyed good health during his entire long life, hardly knowing what sickness was. He passed away evidently without pain—simply slept away. He first came to this country on a visit to his two sons, who were then in business at the corner of Fifth avenue and Forty-second street in 1870, after which time, he with his wife, made nine round trips between here and their home in Germany, living there and here at intervals during many years, but finally made their home here and settled in Old Astoria.

Mr. Siebrecht, besides being a wide-awake and progressive farmer, was also a manufacturer of damasks and fine linens, in which line he was considered quite an artist in his day in designing new patterns. This was before the time of machinery for weaving such goods. Notwithstanding his busy career in these lines, he found some time for horticulture, especially the raising and cultivation of fruit

trees. He was quite an amateur nurseryman, always had a small nursery in his garden. Endowed with an extraordinary strong constitution, and with the love of outdoor life and plain and regular living, no doubt, these were material factors for his good health and long life.

Besides three children, he is survived by 18 grandchildren and 19 great-grandchildren.

The funeral services were held at the home of his son, Wm. H. Siebrecht, Astoria, Long Island City, Wednesday, January 18, at 8 p. m. The interment was at St. Michael's Cemetery, Long Island, beside his wife in the family plot.

College Point, N. Y.

Anton Schultheis has long been known as one of the foremost growers of flowering and decorative plants and cut flowers, for the New York trade; he also ships a great deal of stock to all parts of the country and his business, like all well-regulated and personally-supervised industries, grows perceptibly larger each year.

Just how many square feet of glass there are on Mr. Schultheis' land has not been computed exactly but there are 36 good-sized houses all told, besides an immense number of heated frames for erica culture, the latter being preferable to houses during a greater part of the year.

While special efforts are always made to have heavy supplies of suitable stock for the Christmas and Easter holidays, the establishment is so conducted as to have something marketable every day in the year. Lily of the valley as a cut flower is grown all the year around, four houses being devoted to that purpose. Longiflorum lilies are almost a continuous crop and of late years, cattleyas have been going out steadily until, at present, several houses are filled with such as are best adapted for commercial purposes, such as *C. Mossia*, *C. trianae*, *C. gigas* and *C. Schroderae*. Among flowering plants available for present use are fine examples of lilac, in *Marie Legraye* and *Chas. X.* varieties; *camellias*, *cyclamen*, pansies of tulips and pots of carnations. The decorative stock embraces well-grown ferns of the Boston, Scholzei and Whitman types, and *Cybotium Scheidii*; *Pandanus Veitchii*, well colored; *dracenas* in the broad-leaved varieties and *araucarias* in several sorts, all in grand condition.

Coming along for Easter are thousands of azaleas in bush, standard and pyramidal form; *rhododendrons*, *ericas*, *genistas*, *acacias*, *boronias*, *gardenias*, *hydrangeas*, *bougainvilleas*, *lilies*, *tulips*, *hyacinths* and *roses*. Trained roses have always been a specialty here and the stock gives every promise of being perfect as ever. All the best and latest varieties are included in the collection and a few really new ones are being tried out on a limited scale. The lilies look good so far, no sign of disease or refusal to start being apparent.

Mr. Schultheis is ably assisted in the management of the place by his son, Anton Schultheis, Jr., who takes charge of the selling and collecting end of the business. Anton is also much interested in a seven-seater Packard touring car purchased last summer, and in which the family takes a great deal of pleasure, he acting as chauffeur and mechanic.

PETERSBURG, VA.—William S. Young reports that the Christmas business will show an advance of 20 per cent. The quality of the flowers was better than last year and the demand exceeded the supply, the retail prices being much better. The demand for bulbous flowers was only fair.

CARNATION DAY next Sunday, January 29.

RENEW subscriptions promptly so that no copies of the papers may be missed.

Our Supplements.

Subscribers should see that they get copies of the fine supplementary illustrations showing high grade design and decorative work. These fine supplements should be carefully preserved, as they mean much to the retail florists in dealing with their customers, illustrating as they do the various kinds of work that the everyday florist is called upon to perform.

The papers in which the supplements appear should be likewise preserved, as they contain much valuable data with regard to these special illustrations. Subscribers should see that they get every issue, as otherwise they may miss some of this high-grade work.

Society of American Florists.

REGISTRATION OF ROSE.

Public notice is hereby given that Jackson and Perkins Company, of Newark, Wayne County, New York, offer for registration the rose described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

RAISER'S DESCRIPTION.

Yellow Baby Rambler.—Abelle Webster-Pate (Thalia X M'lie Eugenie Verdier) Lambert X Rugosa America, (Harvard Gardens '94). Seedling from Peter Lambert, Trier, (Treves), Germany. Citron-yellow, to deep orange center; dwarf polyantha; foliage and habit like Mrs. Cutbush.

ADDITIONAL S. A. F. APPOINTMENTS.

Committee on School Gardens: Wm. R. Smith, Washington, D. C.; C. L. Seybold, Baltimore, Md.

State Vice-Presidents:

Colo.—L. E. Johnson, Colo. Springs. Conn.—W. R. Pierson, Cromwell. Florida—C. D. Mills, Jacksonville. Kentucky—H. G. Walker, Louisville. Maine—William Miller, Bar Harbor. Nebraska—John J. Hess, Omaha. N. Y.—A. C. Zvolanek, Bound Brook. N. Y.—West—S. A. Anderson, Buffalo. Texas—Eugene Corley, Dallas. Wis.—J. E. Mathewson, Sheboygan.

H. B. DORNER, Secy.

January 19, 1911.

American Rose Society Spring Exhibition.

One of the most important positions in a public exhibition is that of manager, and Eber Holmes of Montrose, Mass., the well known rosarian, has been appointed to that position for the coming spring exhibition. There will be two sets of judges appointed, owing to the show being divided into two exhibits, Division B being separated from the rest of the exhibition. The time set for this is Friday, March 31. The exhibits in all classes except Division B are to be staged not later than 2 p. m. Saturday, March 25, and will continue Saturday, Sunday and Monday, March 26-27. Division B will be staged Friday, March 31, not later than 1 p. m. and will continue until the end of the exhibition. On Tuesday, Wednesday and Thursday, the space occupied by the Rose Society will be devoted to the exhibits of the American Carnation Society.

The list of special prizes is growing and these will, as usual, increase as the date of the exhibition approaches. The representative of the National Gardeners' Association has reported that many private gardeners will endeavor to make a showing of what they can do, compared with the commercial growers, in the way of choice products, and they are invited to come and send whatever they have. This is very nice, and they will be given the most consideration and the hand of fellowship, for the American Rose Society stands for "A rose in every home, and a bush in every garden."

The Rev. Dr. Spencer S. Sulliger, of Vancouver, Wash., president of the society known as the Rosarians of the state of Washington, visited the last year's show of the National Exhibition in London, and will read a paper at our coming annual meeting. Richard

Vincent, Jr., of White Marsh, Md., who attended the International Exhibition of Horticulture at Brussels, Belgium, will also prepare a paper upon the "Roses of Europe."

BENJAMIN HAMMOND, Sec'y.

Massachusetts Agricultural College.

The short course in floriculture at the Massachusetts Agricultural College opened January 3 with a smaller attendance than had been expected. During the course this year an unusually large number of outside speakers had been engaged so that the course seemed to be an especially attractive one and one which would appeal to a large number of practical men.

The following have registered for the course: John F. Freehan, Great Barrington; Roy A. Hatch, Cliftondale; Errol L. MacDonald, Seekonk; Waldron K. Nason, Jamaica Plain; Maude M. Perkins, Newburyport; Frank B. Place, Dighton; Etta Rotman, Millis; Louis V. Schmidt, Jamaica Plain; Guilford Smith, Bar Harbor, Me.; William M. Post, Danbury, Conn.; Warren Kinder, Charleot, Pa.

The first talk was given last week by Mr. Cobb, sales manager of Lord & Burnham Company, who spoke of the Lord & Burnham type of construction. Mr. Cobb showed a large number of drawings by means of the reflectoscope, of private and commercial ranges which his firm had built. He also spoke of the details of construction, to which they attach especial importance, and he gave a very clear idea of the important factors to be considered in greenhouse construction.

On January 6, R. O. King of the King Construction Company spoke on their construction. Mr. King's talk emphasized the original ideas which have been brought out in the King construction and he showed by lantern slides a large number of commercial ranges which they have constructed. Mr. King spoke especially of their iron frame truss construction and explained the theory on which their houses are built.

The first part of the week the afternoons were devoted to a study of the Lord & Burnham construction as shown in the college range, and on January 7 the observation trip was to the large range of the Montgomery Rose Company in Hadley, which was built last year by the King Construction Company.

Free Lectures on Horticulture.

The Massachusetts Horticultural Society has issued its annual program of lectures and discussions on horticultural subjects to be given at Horticultural Hall, Saturday afternoons beginning January 14. The list of subjects and speakers is as follows:

January 14—Gardening for and by Amateurs. By J. Otto Thilow, Philadelphia.

January 21—The Local Plant Doctor. By Prof. H. H. Whetzel, Ithaca, N. Y. (The John Lewis Russell Lecture.)

January 28—New England Market Gardeners and Their Competitors. By Prof. L. C. Corbett, Washington.

February 4—Summer Blooming Bulbs. By Isaac S. Hendrickson, Floral Park, N. Y.

February 18—The Horticultural Awakening of New England. By J. H. Hale, South Glastonbury, Conn.

March 4—The Outdoor Window Garden. By John D. Twombly, Winchester.

March 11—The Outlook Countryward. By Prof. L. H. Bailey, Ithaca, N. Y.

March 15—Story of an Old Orchard Reclaimed. By Dr. G. M. Twitchell, Auburn, Me.

A change in the hour of the lectures is made for this course at the request of a considerable number of persons who find it inconvenient to attend in the forenoon. It has been decided therefore to hold these meetings at two o'clock in the afternoon. The lectures are free and all interested are invited to attend.

On Saturday, January 7, at twelve o'clock, the usual inaugural meeting will be held at which the new president will take office and the annual reports of officers and committees will be presented.

The first exhibition of the society for the new year will be the Midwinter Flower Show, February 24, 25 and 26. Wm. P. Rich, Secy.

Soil From Chrysanthemum Beds.

ED. AMERICAN FLORIST:

Will you kindly inform me how to treat the soil from my chrysanthemum beds. Will it be suitable for potting the spring stock? Can it be used in next year's carnation beds.

SUBSCRIBER.

The soil that is removed from the chrysanthemum beds and benches should be piled up out of doors, where it will be subjected to the weather and can be frozen. The chrysanthemum is a very rank feeder, and when it grows good and strong generally takes all the richness out of the soil. The soil, after standing out long enough to become sweet, can be used for potting up the spring stock, but if the plants which are potted in it need a rich soil, some rotted manure should be added. It would not be advisable to attempt growing carnations in any old soil, for good new fibrous loam is required in growing this crop. W.

Detroit Florists' Club Programme.

The Detroit Florists' Club have arranged and printed a neat programme which includes papers to be read by S. S. Skidelsky, February 20; Ferdinand Kolbe, on "Carnations," March 6; Herman Knapp, March 20; Barney Meyers, "Adaptability of Wooden Benches Contrasted with Results with Cement and Solid Beds," April 3; Robert Unger, "Bedding Plants," May 1, and addresses by Irwin Bertermann, February 6; Philip Breitmeyer, May 15, and H. B. Dörner, June 19, and other features.

Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Ads., See Ready Reference Section.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

Situation Wanted—As foreman: all around florist, where Am. Beauties are a specialty preferred. Key 376, care American Florist.

Situation Wanted—By young man (24) under foreman: four years' experience in roses, carnations and mums; good references; state wages offered. Key 380, care American Florist.

Situation Wanted—By seedman and plantsman as seedman: 10 years' English experience four years' American; good address; state wages offered. Key 373, care American Florist.

Situation Wanted—Practical gardener with experience in vegetables, flowers, fruit, grapes, stock, fowls, has good recommendations, wishes position; married. Address Box 542, Whiting, Ind.

Situation Wanted—Young lady, with experience in the retail florist business, wishes to secure situation as saleslady or designer in a retail flower store in Chicago. State wages when writing. Key 381, care American Florist.

Situation Wanted—Bulb grower and salesman, employed 11 years' experience in traveling (U.S., England, Germany, Sweden, etc.), wishes to secure another situation as buyer or salesman; excellent references. Address Key 377, care American Florist.

Situation Wanted—By nurseryman from Scotland, married, with 30 years' experience in Scotch nursery; well up in bedding and grafting, and with thorough knowledge of the propagation of fruit, forest and ornamental trees, shrubs, conifers and roses; good correspondent and salesman and accustomed to superintend landscape work. Address JAMES W. LAIRD, Proctorville, O.

Help Wanted—All around young man with some experience in greenhouse and hotbeds; must be willing to do anything around a truck garden; state wages with board and lodging in first letter. WILLIAM HILD, Milesville, S. Dakota.

Help Wanted—Gardener for place of ten acres near Chicago; must have good practical knowledge of ordinary landscape gardening, fruit and vegetable culture, and general care of home grounds. Address Key 368, care American Florist.

For Sale—Small but good florist business; 1,500 feet of glass; cottage; 50 ft. length of hot beds; in fast growing town in Oklahoma; no competition; \$1,200 if taken at once. Key 369, care American Florist.

For Sale—At great sacrifice; three-fourth acre, six-room house, cellar, cistern, pressure water, chicken house, stable, greenhouse, 100 ft. glass; no stock; hot water heat; good market; no competition within 70 miles; splendid chance for young man; must be sold; make offer; write JOHN L. BRADY, Medicine Lodge, Kansas.

For Sale or Rent—In Chicago's most fashionable suburb in Evanston, Illinois, greenhouse property with improvements, consisting of 6,500 sq. ft. of glass, complete, in good condition, including two frame residences; suitably located for retail business. For terms and particulars apply to JOHN P. HAHN, 1572 Sherman Ave., Evanston, Ill.

WANTED

A partner to take a half interest in a prosperous retail flower store in the business district of Chicago, or would sell the entire business. If the right party is looking for a good thing and means business, address

Key 374, care American Florist.

For Sale.

Best equipped Flower Shop on the most prominent corner in New York City, is offered for sale at a great sacrifice. A fine opportunity for a live man. Address or apply H. W., 103 E. 29th St., New York

Store Manager Wanted.

A thoroughly reliable man to act as manager, married man preferred; must be thoroughly experienced in the retail florist business and accustomed to meeting Chicago's finest trade.

Key 379, care American Florist.

FOR SALE.

An up-to-date Florist Plant; modern greenhouses; 70,000 feet of glass; 12 acres of land; large brick dwelling house, heated by steam; two barns. Everything in first-class working order.

W. W. Coles, Kokomo, Ind.

Grower and Manager

An experienced grower of all lines of commercial greenhouse stock is open to engagement as manager or foreman of a modern establishment. References of the best character and full particulars on application. Address

Key 360, care American Florist.

Store Manager Wanted With \$5,000 Capital

Must be capable of conducting a large store business established many years in a prosperous city in the mid-west. Applicant must be competent also to market advantageously the considerable greenhouse output of high grade plants and cut flowers. Address

Key 378, care American Florist.

GREENHOUSE FOR SALE.

Consisting of 6 greenhouses 16,000 feet of glass, all built within the last three years and 15 acres of land, located on steam and electric railroad in a prosperous and growing town about 25 miles from Cleveland, O. Double strength glass. Garland gutters with iron supports, 50 h. p. boiler, 350 barrel cistern, city water. Good stock of plants, bulbs and flowers. In all respects a most desirable property. Will be sold at a bargain. Price: \$11,000; part cash, balance on time. 344 The Arcade, Cleveland, O.

BEGONIAS

Flowering Kind

Rooted cuttings, \$1.75 per 100.

Express paid.

S. D. BRANT, Clay Center, Kans.

Louisville.

A new company was formed and bid in the Anchorage Rose Co.'s plant for a song and the creditors, outside of the ones who hold mortgages, will likely not get a cent. The new company have employed C. W. Reimers to take charge of the place. A few weeks ago the place was frozen, owing to there not being water to supply the boilers.

At the most notable social event, the Weisinger-Castleman wedding, the decorations were by Jacob Shulz, and were very elaborate. The church was decorated with palms and large quantities of Easter lilies.

Prof. Ernest Walker, formerly with F. Walker & Co., is now located at Fayetteville, Ark., and is secretary of the Arkansas State Horticultural Society.

Henry Fuchs will move to the store formerly occupied by Nanz & Neuner.

Mrs. C. B. Thompson is better but unable to be at the store.

Beutel & Frederick, who have been leasing Wm. Mann's establishment, have bought land and will build this coming season.

Mrs. C. W. DePauw has been successful with roses this winter.

Simon Pontrich will add about 10,000 feet to his range next spring.

The Kunzman Floral Co. have added a fine new delivery wagon.

H. G. W.

Don't Forget, in the Rush

That You'll Need Stock Later on.

For example, there's your

Manetti

For winter grafting. We offer English at \$12.00 the thousand; French at \$10.00. Both grafted: 3 to 5 millimeters; smooth, evenly graded, disbudded, well-rooted stocks, especially selected for florists' grafting.

Lily of the Valley

Reimschneider's Exposition, \$14.00 the thousand (1.70 to the case).

Perfection, \$12.00 the thousand (2.00 to the case).

Holsatia, for storage and later forcing, \$11.00 the thousand (3.00 to the case).

Write and make known your wants. We are Growers for the Trade, and sell only to the Trade. Use printed stationery.

Lilacs

Imported, not-grown, for cut flowers; bushy, suitable for 7 or 8 inch pots, 50c each; \$5.00 the dozen. Charles X only.

Half-Standard Roses

Baby Rambler and Mrs. Cutbush, 50c each; \$5.00 the dozen. No better at any price. Full Standard Baby Rambler, same.

Bush Roses

Fine assortment leading H. P.'s like Brunner, Charta, Druschki, etc.

Also Hybrid Teas, Ramblers, Dorothy Perkins, etc.

Carnation Dorothy Gordon

—the Facts About Its Parentage

PRACTICALLY every florist who has ever grown "Dorothy Gordon," or has had any close knowledge of it, knows that it is a distinct strain, differing from Enchantress in various ways—yet we hear it said, every now and then, that the two varieties are identical. No one who really knows the facts will make the assertion, but for the benefit of those who may honestly believe such similarity to be the case, we wish the truth of the matter clearly understood.

"Dorothy Gordon" is a seedling—Lawson on Enchantress. It was originated near Philadelphia, and we bought the entire stock of rooted cuttings from the originator after observing it carefully and giving it a thorough trial—growing it for market, and comparing it with other carnations, especially Enchantress.

"Dorothy Gordon," while possessing practically all of the merits of both its parents, is almost entirely without their faults. For example, it is more vigorous; "Dorothy Gordon" has produced regularly ¹³ more flowers for us than Enchantress did.

Then consider the color. "Dorothy Gordon" is a trifle darker—a warm, rich pink that never fails to attract attention. When the blooms first appear, they are a trifle light, but they quickly come darker, and the plants do not require any more attention thereafter than do other varieties to keep them in good shape.

The stems of "Dorothy Gordon" are long and stiff, and its keeping qualities are unusually good; flowers often remain in salable condition four days or more after cutting. We have found the market demand for "Dorothy Gordon" to be most excellent and the price has always been higher than we could get for any other variety.

We sold a large quantity (130,000) of rooted cuttings last year, most of which are now giving excellent satisfaction to the owners. We expect shortly to print some expressions that we have received from prominent florists in various parts of the country who know "Dorothy Gordon" by personal experience, so that you may judge the matter from all sides.

Meanwhile another big lot of rooted cuttings, which we started for the 1911 trade, is being rapidly taken up—if you want to "get in" on bigger carnation profits, we recommend that you place your order NOW while the

stock lasts and the reduced price of

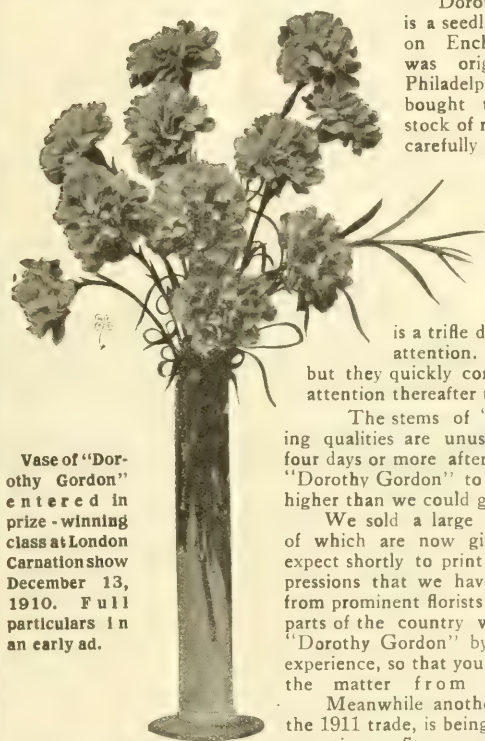

\$6.00 per 100; \$50.00 per 1000

still prevails. And, if you are doubtful and want to know more about the facts at first hand—and nobody is more anxious for you to do this than we are—then there is one of two things we'd like for you to do—come to Wyncote and see "Dorothy Gordon" growing in our houses, and see, from our own books **HOW** and **WHERE** and **for how much** we've been selling the cuttings and the flowers; or, if you're far away to do that, drop us a line and let us tell you the name of a florist nearer you who grows and knows "Dorothy Gordon" for himself.

You'd better do one of these two things pretty quick, though; for one of these days the planting season will be past. Let us hear from you by return mail—give us a chance to prove the facts.

When in Philadelphia Be Sure to Look Us Up.

Joseph Heacock Company, Growers of Palms, Orchids, Carnations, Roses. **Wyncote, Pa.** Railway Station: Jenkintown.

A GENERAL SHORTAGE.

It hardly seemed possible a month ago, with the counters piled up with roses and other flowers, that in four weeks everybody would be singing that old song of "stock scarce," but it has always happened, year after year, that toward the end of January, there would be a great shortening up of all the flowers; the rose growers would be off crop, and the carnationists with a small cut, prices trending upward day by day, and a general hustling on all sides to fill orders. The few hours of sunshine, on what pleasant days the weather man hands out, are not at all conducive toward bringing about a heavy cut to replenish the empty refrigerators, for a trip around the wholesale stores finds the ice boxes nearly empty, and the cut is shipped out almost as soon as the stock arrives. The roses are showing the effects of the dark weather, not only in the reduced quantity, but also in the quality. While there are many fine American Beauties to be seen, yet the blooms lack the bright color which they had up to the first of the year, and there are many that are not up to form. Killarney is not of the best color, many of them being extremely light, and what few My Marylands are being received are much better than the Killarneys. The demand for flowers for design work keeps the shorter grades picked up as fast as they come in from the greenhouses. All the different grades of roses are short, and the buyers are often content to take pink when they want white, for they really have to take what they can get. Carnations are of good quality, but with the roses being short, the demand is increasing and the prices advancing. The only cheap product being the splits, of which they are quite a number, but

Fancy Carnation Blooms

Phone Central 3373.

35-37 Randolph St., CHICAGO

they are bringing a price that many growers would be glad to obtain at other seasons for first-class stock. Violets are plentiful enough to fill orders. Orchids are in good supply, and can be procured at prices that tempt the retail stores to make them a feature in their window displays. The quality of the bulb stock improves every day, some very handsome trumpets are being offered, and the different colored tulips are coming in, La Reine, Proserpine, and Yellow Prince are to be found, and some very showy Couronne d'Or were seen. Mignonette of fine grade, freesia, marguerites and calandulas are among the many flowers to be found, and help to supply the shortage in other flowers.

Lilies in fair supply, and callas also, and find good sale. Sweet peas are of good quality, and about equal to the demand. Lily of the valley is meeting with good sale, and some very handsome blooms are to be obtained. Paper White and Orange Phoenix narcissus are in good supply. The high prices of stock forces the retailers to use many blooming plants in their window displays, and very handsome specimens of azaleas and cyclamen are shown in the down town windows.

NOTES.

At Vaughan & Sperry's we noticed a particularly fine grade of American Beauty and other roses, also cat-tayas, of which they are receiving a large quantity.

ROSES

Extra fancy KILLARNEY, WHITE KILLARNEY,
RICHMOND, BRIDE, BRIDESMAID, and
AMERICAN BEAUTIES.

CARNATIONS

HOERBER BROS.

Wholesale Growers of Cut Flowers

51 Wabash Ave.,

Long Distance Phone,
Randolph 2758.
Automatic 41770.

CHICAGO.

C. L. Washburn, of Bassett & Washburn, in an inspection recently made of the stock in the greenhouses at Hinsdale, found the roses in splendid condition, heavily set with buds, and thought it would probably be but little more than a week before they would again be having plenty of stock. This firm at present are cutting a fancy grade of White Killarney roses and carnations of good quality.

The bulb stock which the J. B. Deamud Co. is furnishing their customers, is of very fine quality and a varied line of tulips and narcissus are always on hand. A novelty which this house is supplying is a very dainty lupin, which is a very exquisite addition to the select flowers of this season.

A. L. Simmons, the well-known florist of the West side, says the latest improvement on Sixty-third street is the new system of street lighting, consisting of posts placed at intervals of thirty feet, and extending from Wentworth to Normal avenues, bearing six electric lights.

Kyle & Foerster are filling a large number of orders for carnations that rival any to be seen in the market. The Killarney roses that this firm is offering are of A1 quality, fine buds on long stems, with splendid foliage.

A very novel design in flowers was ordered of Strail & Hahn the past week. It was a beer keg with tap inserted and was placed upon the table of the banquet of the United Brewers' Protective Association.

H. A. Fischer, of Kalamazoo, Mich., was in the city this week on business. Harry reports a rushing holiday trade, the sales of last month exceeding that of any former year.

Poehlmann Bros. Co. is showing a splendid grade of Proserpine tulips and Princess of Wales violets, which are especially worthy of note.

ORCHIDS

:: A Specialty ::

A fine stock of Cattleyas,
Gardenias, Cypridiums,
Assorted Orchids, Valley,
Violets, Beauties, and all
fancy flowers always on hand.
Decorative stock and supplies
of all kinds.

CHAS. W. MCKELLAR

51 Wabash Avenue.
CHICAGO.

George Perdikas, 286 Wabash avenue, is enjoying a very busy season. The demand for flowers for funerals has been very large.

Max Cohen is the latest addition to the large force at the Poehlmann Bros. Co. store, having entered upon his duties January 18.

Louis Schrada, of Muscoda, Wis., is spending a few weeks in the city visiting with his cousin, Frank Kral, 1907 Halsted street.

Miss Hayes, on January 23, returned to her duties at E. H. Hunt's, after a week's illness.

Art Christiansen, formerly with H. C. Rowe, has accepted a position as salesman with Paul Blome, 1361 North Clark street.

E. C. Amling and family left January 25 for Orange, Calif., where they expect to remain until the latter part of March.

Ulrich E. Helle, formerly with Holm & Olsen of St. Paul, Minn., has accepted a position with Canger & Gormley.

Miss M. C. Gunterberg is receiving a large quantity of double violets of good quality.

Extra Fancy Cattleyas

Beauties, Orchids, Valley, Violets

Killarney, Pink and White, Richmond, Bride and Maid
Boxwood, Ferns, Leucothoe and Mexican Ivy
and Fancy Carnations in good supply.

Plenty of all other
casonable stock.

VAUGHAN & SPERRY

LONG DISTANCE PHONE
CENTRAL 2571

52-54 Wabash Ave., CHICAGO.

The employees of the Peter Reinberg store were given an enjoyable time by Manager Matchen January 22. The boys were invited out to the house, where luncheon was served, the party consisting of Joe Welsh, John Lozer, Nicholas Wuestenberg and L. Hoekner. After the inspection of the crops at the greenhouses, which had produced good appetites, all returned to Mr. Matchen's house where Mrs. Matchen had provided an ample dinner, which was greatly enjoyed. The appetites, according to rumor, rather surprised the hostess, for "Stogie" is said to have made way with a whole loaf of raisin bread.

The carnations that Henry Van Gelder is receiving are of A1 quality, especially Enchantress, which were particularly noticeable. Two additional telephones were installed this week, making three now in use. In speaking of the new lease which they recently secured of the entire second floor of the building they now occupy, Henry says he now is ready to talk business with anyone that is looking for space. J. C. Craig, and his force of assistants are kept very busy at his store, 176 Wabash avenue, with funeral and decorative work. Mr. Craig had charge of the flowers at the funeral of the late Chief Horan, and speaks very highly of the work of the florists, for some magnificent designs were made for that funeral.

The Chicago Carnation Co. will, in the near future, build three new greenhouses, 30x300 feet, all of modern construction. As soon as the present lease on the store, which they now occupy, expires, they will move into larger quarters, where they can more properly take care of the ever-increasing business.

Stollery Bros., the Wilson avenue florists, on January 24, arranged the decorations both at the house and church for the Bidwell-Connelly wed-

ding. The decorations called for a large number of cut flowers, especially Killarney roses and Easter lilies.

Jupiter Bros., who are appearing at American Music Hall this week in the mystery act, continue to entertain the audience by producing fresh cut flowers from out of the empty air and distributing them to the audience.

G. H. Pleser, of Kennicott Bros. Co., recovered sufficiently from his recent illness to be out on January 21. This firm is now offering a splendid grade of Couronne d'Or tulips and fancy carnations.

Nicholas Armbrust, a pioneer florist of Forest Park, was removed to a local hospital this week, where an operation will be performed, it having become necessary to remove a tumor.

Hoerber Bros., are one of the growers that are in fairly good crop, and were enabled to fill a large number of orders this week for a choice grade of roses and carnations.

Mrs. L. Hoekner, of the Avenue Floral Co., 3810 Ogden avenue, who has been seriously ill, is improving

steadily, and an early recovery is looked for.

E. F. Winterson will go to St. Louis this week to attend the National Bowling Congress, to which he is a delegate and chairman of the executive board.

Frank Vogt, who formerly conducted a store on Cottage Grove avenue, is seriously ill with typhoid pneumonia at his home on West Lake street.

The Alpha Floral Co., 176 Wabash avenue, have a very attractive window display, in which orchids are an important feature.

Frank Klimmer, son of the late J. F. Klimmer, is confined to his bed with a severe attack of rheumatism.

Arthur Paulous recovered sufficiently from his recent illness to be able to be around, and was seen in the local market this week.

Vieter Bros. are cutting a choice grade of American Beauties, White Killarney and other roses.

Zech & Mann are receiving some tulips and narcissus of extra good quality.

A Grand New Carnation

Bright Spot

Outclasses everything heretofore grown in the dark pink class.

Won first honors in the 100 class for the best dark pink at the A. C. S. meeting, Pittsburg, January 1910, also at the Chicago Flower show, November, 1909.

It is a pure bright dark pink of even shade, size $3\frac{1}{2}$ inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

Price per 100, - \$ 12.00 Price per 5000, - \$400.00

NIC. ZWEIFEL, North Milwaukee, Wisconsin.

At a meeting of the wholesale men held on January 18, a committee, consisting of C. N. Dickens, Nic. Wietor, Phil. Schupp and J. Foerster, was appointed to ascertain from each wholesale florist in the city the amount of rent he is paying, the date his lease expires, and such other information as would aid the committee in formulating the plan for securing the lease of the proposed building on Market and Lake streets. C. L. Washburn, who was made chairman of the committee at a previous meeting, thinking that some other could better fill that posi-

tion, appointed George Reinberg to act in that capacity. A meeting was held at noon Tuesday, January 24, and another at the same hour on the following day, and another meeting Wednesday evening, January 25, at which it was expected some definite arrangements would be made. The above mentioned committee made their report at this meeting, particulars of which will be printed in next week's issue.

John J. Stuppy, of the Stuppy Floral Co., of St. Joseph, Mo., is in the city getting prices on material for four new greenhouses, 30x300 feet. This firm

does both a wholesale and retail business, and has 200,000 square feet of glass.

Visitors: A. K. Butchart, Winnipeg, Can.; E. E. Stewart, River Junction, Mich.; John and Elmer Walker, Youngstown, O.; L. L. Lamborn, Alliance, O.; A. C. Brown, Springfield, Ill.

HAGERSTOWN, MD.—Part of the greenhouses of William Bester & Sons was blown in by the terrific windstorm and hundreds of panes of glass were broken.

A FAMINE IN FLOWERS.

There is a famine in flowers in this market, with carnations and roses very scarce. Carnations are of a very fine grade. Killarney roses were badly off color last week, but have regained their natural color. Violets are very fine and enough to fill all orders. There are a few Easter lilies and callas which clean up readily. American Beauties are very shy. White and yellow tulips are now in and are selling well. Sweet peas of fine grade and all colors are being received. Cut greens enough to fill all orders.

NOTES.

Holton & Hunkel Co.'s store-room has a sad appearance in the afternoon, as all the stock is cleaned up in the morning. F. H. Holton and H. V. Hunkel each blew themselves for an

STOCK VERY SCARCE.

Dark and cloudy weather has prevailed all week and stock is very scarce, and the wholesalers clean out almost as soon as shipments arrive. Many of the retailers are so anxious to get stock that they assist in opening up the boxes when they arrive at the commission houses. Violets are selling well. The graduating exercises will take place during the coming week, and there will also be quite a few weddings.

NOTES.

The retailers' banquet at the Marquette Hotel, January 23, was a very enjoyable affair. The wholesalers had been sent special invitations. C. C. Sanders was toastmaster, and during the remarks the wholesalers explained the scarcity in the market, attributing the very high prices to the lack of supply. Good music was interspersed throughout the evening.

Mrs. M. S. Myers, at Suburban Tracks, is enjoying a nice business. Her father, George Wampler, of Ottawa, Kans., is making her a visit. Miss Edith Phillips posed as a bride and Miss Isabelle Schultz as a bridesmaid in Grimm & Gorly's window display of bridal flowers.

A SCARCITY OF FLOWERS.

The scarcity of flowers still continues the feature of the market. White roses are particularly scarce, there being not one-fourth enough for the demand. Richmonds are also very shy, coming in mere handfuls, where shipments ordinarily would amount to two or three hundred at a time. American Beauties are also very scarce, with prices away up; \$9 per dozen was the price all last week, and on Monday last for the specials, and very few at that. Killarneys were more plentiful, but prices were well held, with nothing worth handling under \$8. White tulips, fortunately, were to be had in fair quantity, and helped out the situation, being used in place of roses for funeral work. White lilac has sold very well, taking the place of roses as a cut flower. Cattleyas are very much in evidence, and prices rule low, particularly in hundred lots. Carnations, like all other flowers, have been far short of the demand, and as much as \$8 has been obtained for the specials. Daffodils are more plentiful, as is lily of the valley, the new crop now coming in from several growers. Sweet peas were much affected by the dull weather, and only about one-third of the usual cut is coming to the market, select stock is held at high figures. Judging from the out-of-town demands, the scarcity extends over a large radius, as orders are constantly arriving for flowers far in excess of the stock on hand to fill them, and the commission houses are severely taxed to keep their trade in a measure satisfied.

NOTES.

D. T. Connor, the live agent of the Lord & Burnham Co. for this district, reports a new iron frame, cement house for John Stephenson's son, of Old York road, which is to go up immediately. It is to be seventy-two feet in width, by four hundred in length, and the ridge pole thirty feet in height. This is to be erected in a portion of the nursery, a short distance from the old plant; a new boiler and house for the same is also in the contract. Mr. Connor also reports a house for Stevenson Bros., of Baltimore, Md., a modern iron frame, 43x206. Sundry small jobs are also under way, and considerable new work is in sight for the coming summer.

The Exhibition Committee of the Florists' Club desire to make a good display at the next meeting, when W. H. Tappin, of Brooklyn, will read a paper on the carnations of today. Those having new varieties which they want to place before the public, should send them, care of David Rust, Horticultural Hall, express prepaid, to arrive Tuesday, February 7, when they will be properly staged for the inspection of the members and the judgment of the club's flower committee. This will be a very interesting meeting and all those interested in the divine flower should attend.

The Habermehl's decorated Horticultural Hall one day last week in the most superb manner. It is said to have been one of the best decorations ever seen in this city. It was for a large, private ball, in honor of a popular debutante. The window decora-

tions of this firm, at their Bellevue-Stratford store, are worth going along distance to see.

Letters have been received from Robert Craig, who is now in the Isle of Pines. He reports the weather grand, a wonderful change from the wintry region he left behind.

Pennock Brothers had a fine window of cattleyas and Adiantum Farleyense arranged on a foundation of cork bark. It attracted much attention.

John Westcott and wife sailed for Bermuda on January 19, to spend some weeks in that sunny clime. K.

Pittsburg.

ROSES STILL SCARCE.

The market still remains about the same as last report, excepting carnations, which are coming in more plentiful, are helping out the rose situation fairly well. Funeral work is very plentiful and it keeps the retailers hustling for stock. With a few more days of sunshine, like the present, stock will be more plentiful. Special American Beauties were very much in demand Friday and Saturday, with very few to be had.

NOTES.

The Pittsburg Florists' and Gardeners' Club will hold their next meeting, February 7. There being an election of officers at that meeting a good attendance is expected.

Gustave and J. W. Ludwig, North Side, are going to open a new store at 502 Federal street. They have leased a large store room and will show a very up-to-date store.

James Laskey, of this city, is opening a flower stand in the Pennsylvania railroad depot at Uniontown.

C. F. Young, Canton, Ohio, was a business caller in town Friday.

STOCK SCARCE.

The condition of the flower market at the present time is as follows: Roses are very short in supply and prices have advanced until they have reached the figures of a special time, such as Christmas or Easter. Carnations have shortened up and the price has also advanced. Lilies are scarce and very hard to obtain in any large quantity. Lily of the valley is coming into the market in good condition, and there is usual amount for the season. Various kinds of bulbous stock are being sent into the market in large quantities and the prices obtained are a little better than they were a week ago, and on account of the scarcity of roses and carnations the salesmen are able to dispose of the stock which is shipped to them by the growers at fairly good prices. At the same time the growers of roses are not satisfied. While admitting that they are receiving good prices they say that they are not cutting many, but do not seem to realize that if they were getting a good supply, they would not receive the prices ruling at the present time.

NOTES.

The Gardeners' and Florists' Club held their regular meeting Tuesday evening, January 17. It was a ladies' night and installation of officers for the coming year. There was a very large attendance, numbering about three hundred. Interest in the club seems to be increasing. There is a better attendance at the meetings, and at the present time, with the ten admitted at the last meeting, the club reports a membership of over four hundred, and the finances show a good balance on the right side. It is intended to have a banquet next month.

William Caharer, who was taken to the hospital for an operation about ten days ago, is getting along nicely, and expects to go to his home during the coming week.

It is reported that Morey Bros., situated at Oak Square, Brighton, have closed up their greenhouses. H. C. W.

Monmouth County Horticultural Society.

The seventh annual banquet of the Monmouth County Horticultural Society was the largest the society ever held. One hundred and twenty-five members and guests were present. The table decorations consisted of orchids, roses, carnations, Lillium Harrisii, frezias, Roman hyacinths and narcissus. The dinner was excellent and the serv-

ice was most commendable. The proprietor of the Globe Hotel in which the banquet was held can be congratulated on having served a dinner superior to any ever furnished in Red Bank to this or any other society. The large dining room was beautifully decorated and brilliantly lighted and the guests were seated at fourteen tables. Over fifty more asked for invitations but on account of space could not be considered. Arthur Herrington made such a clever toastmaster that

those who did not know him took him for a professional. Mr. Herrington in his address before calling on the different speakers stated that the Monmouth County Horticultural Society was second to none in the state, and Charles Totty, Madison, N. J., said that the great success of the National Chrysanthemum show at Madison was largely due to the Monmouth County Horticultural Society. All in all the dinner was a great success, and the committee, especially the chairman, Richard Applegate, are to be congratulated on their good work.

N. BUTTERBACK, Sec'y.

SHORTER SUPPLY.

There has been a somewhat less supply in some lines of cut flowers during the past week, consequently prices have had a tendency to be firmer. The solid week of dark, damp weather that prevailed a short time ago is now having its effect. Roses particularly, are not quite up to their usual standard of excellence, but a few more days of sunshine will restore normal conditions. The demand for all varieties of roses has been such as to keep them cleared out nicely, and without any undue slaughtering of prices. The shorter grades particularly, have been going out readily and at what is considered very satisfactory figures. Brides and Bridesmaids, not being so numerous any more in this market, have been in exceptionally good demand at times. Carnations have also enjoyed a fairly steady call, prices have been firm and a slight advance over last week's prices has been possible most of the time.

Violets are very plentiful and, with the weather is favorable, as has been the case lately, they have been easily unloaded to the street merchants though at rather low prices. Sweet peas, when good, have moved quite well. The inferior stock is the most difficult to realize on. Cattleyas have been too many for the needs of the retailers and low prices have prevailed. Other orchids are in very limited quantities only. Gardenias are in regular supply still and no change in values is noted. Tulips are more numerous and, as the season advances, the quality improves very much and they clear out fairly well. Callas are finding a steady demand and bring good averages. Lily of the valley is not running quite brisk enough to use up the supply steadily. Lilies continue good sellers when first class, the poorer flowers are not wanted unless they are offered at a low price. Paper white narcissus is still very plentiful; Campernelle, Golden Spur and Princes are all coming in regularly and do much better than the white. Smilax is much too plentiful and is going down, good strings being freely offered at from 75c to \$1.00 per dozen.

NOTES.

Although roses are not as plentiful as usual, a few dealers are receiving quite heavy consignments daily. W. F. Sheridan is handling regularly plenty of first-class Killarney, H. E. Froment is in daily receipt of plenty of good Richmonds. Traendly & Schenck have a constant supply of Killarneys and American Beauties. M. C. Ford receives regularly, My Maryland and American Beauties in quantity. P. J. Smith gets Brides and Bridesmaids, and the Penock-Meehan Co. in addition to regular consignments of Killarney, have always on hand a supply of the yellow rose, Melody.

The space at Canal and Washington streets, for so many years used by the plant growers as an early morning market, is now used by the city as a depot for the Street Department's wagons.

It is believed now, that the plant market, during the coming spring, will be held somewhere near the Williamsburg bridge, Fifty-ninth street and East River. This would seem quite out of the way for the Jersey growers but very convenient for the Long Island men.

Carl Stumm, retailer, Nineteenth street and Fourth avenue, and who has been in that location for the last seven years, is under the impression that the doing away with hotels in this neighborhood and replacing with business and office buildings, has not been conducive to any betterment for the florist's business.

The North Westchester County Horticultural Society held their annual banquet at the Castleton Inn, Mt.

Kisco, January 19. M. O'Brien, president of the society, acted as toastmaster, and a most enjoyable evening was spent. Visitors from New York included the Rickards Bros., McTaggart and Maynard.

Frank Valentine, one of the uptown florists, is already making plans for the decorations for a ball to be given on March 28, in Majestic Hall, One Hundred and Twenty-fifth street and Park avenue. The affair is to be given under the auspices of a political association, of which Mr. Valentine is the leader.

The Greek ball, held in Grand Central Palace on January 18, was one of the greatest social events of the season. Over 2,000 were in attendance and the affair was run from start to finish with pleasant smoothness. Many in the trade other than Greeks were in attendance and enjoyed it immensely.

A. Moltz & Co. have taken additional space next to their quarters at 57 West Twenty-sixth street. By taking out partitions, and re-arranging their offices, a greatly increased floor area has been secured and a large new ice box made more room necessary.

The many friends of H. A. and W. H. Siebrecht will learn with regret, of the death of their aged father, which occurred recently. The deceased had reached the ripe old age of 92 years, coming here from Germany almost 50 years ago.

C. H. Totty, William Duckham and Schultz of Madison, N. J., attended the dinner of the Monmouth County Horticultural Society at Redbank, N. J., January 18, and report having had a splendid time.

Wm. Amos, Jr., well known to the frequenters of the Cut Flower Exchange, is ill in St. John's Hospital, Long Island City.

R. Vincent, Jr., White Marsh, Md., will give an illustrated lecture at the February meeting of the New York Florists' Club.

The Nassau County Horticultural Society held their annual dinner at Schleicher's Hall, Glen Cove, N. Y., January 25.

Hart, the Madison avenue florist, who was burned out, is temporarily located in a basement near to his old stand.

Visitor, Mrs. A. Lindstrom, Stamford, Conn.

Washington.

EVERYTHING OFF CROP.

Business has been good during the past week, but there has been a notable scarcity of good cut flowers, particularly roses and carnations. Wholesale prices for roses have been pushed up to \$1.00 and \$12.00 per 100 and even at that price many of the roses look as though they had gone through a bleaching process. Orchids, violets and sweet peas are arriving in more liberal supply and good quality. The weather for the past few weeks has been fair and mild and favorable to growers. The prevailing excuse for the shortage and high prices is that "everything is off crop."

NOTES.

Z. D. Blackstone executed an elaborate decoration January 20 at Rauscher's for a cotillion given by Mrs. Oliver Cromwell for her daughter, Miss Louise Cromwell. Experts have pronounced it the most beautiful and elaborate affair of this season. The scheme of decoration was very original and attractive. For the receiving party a rustic garden was created, beautifully decorated with roses, smilax and mosses. The stairways were beautiful with borders of azaleas and ferns and palms were banked in every available nook and corner. The table decorations were largely of poinsettias.

CUT FLOWERS

28 Willoughby Street,

TEL. 4591 Main. BROOKLYN, N. Y.

A recent visit to the range of Theodore Dietrich, Congress Heights, disclosed some very interesting features. He makes a specialty of single violets, sweet peas, nigronette, snapdragons and stocks. His range is admirably local and all that he grows finds a ready sale in the best stores of this city.

On the night of January 14 J. H. Small & Sons executed a very notable dinner decoration at the home of John R. McLean. There were nine tables and on each table there was a magnificent display of American Beauty roses, the like of which has never previously been seen in this city.

D. I. Saunders, one of the oldest florists of this city, has been practically forced out of business. A street has been opened through his property and his remaining greenhouses have been left in such a deep hole that he has decided to abandon them.

Albert Esch, at his range on O street near North Capital street, has a splendid line of small ferns suitable for table decorations and also many fine flowering plants. He expects to make extensive improvements at an early date.

On the afternoon of January 21, a fire in the basement of F. H. Kramer's F street store created quite an excitement. Fortunately it was subdued before it had made great headway. The loss was but nominal and business was soon resumed.

Miss Rosie Ethel Norton and Rollins Keen were married on January 18 at the home of the bride's parents in Anacostia. The bride is the daughter of Robert H. Norton, for many years a faithful employe of Alex. B. Garden.

The range of the American Rose Co., which previous to the advent of A. Gude & Ero. was the largest range in this district, is now being dismantled and the glass and pipe is being advertised for sale.

C. P. Grose, who started in business several years ago near the Congressional Cemetery, has built up a good business and intends to enlarge his range this year.

John Gutman, of Congress Heights, who has recently erected a fine new greenhouse, is showing fine features in primroses and other pot plants.

DETROIT, MICH.

Brampton, Ont.

Notwithstanding the bright sunny days we are having this month, all are troubled with the same. New Year's complaint, "shortage of stock."

Richard Jennings has found Mrs. C. W. Ward carnation so gratifying that he intends to cultivate it largely during 1911. Mr. Jennings' establishment is in fine trim at present, and he is contemplating a visit to his native land in the summer to be present at the convention.

Judging by the many agreeable comments the Killarney rose has at last come into its own. The pink and white Killarney have become great favorites with the Canadian public. The Canadian Queen is more popular than ever, and blooms sent from here to London, Eng., in November were used in the decorations at the Lord Mayor's banquet.

The six new houses at the Dale Estate have been fitted up and the young stocks for Easter taken in. The tulips and daffodils forced at this establishment are quite up to the usual mark, although the bulbs were not taking in appearance last autumn.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Dureya, New York, Second Vice-President; C. E. Kendell, Cleveland, O., Secretary and Treasurer.
Annual convention at Milwaukee, Wis., June 20-22, 1911.

MINNEAPOLIS, MINN.—J. E. Northrup has been indisposed this week.

FIELD seed corn, well cured and of high germination, is reported scarce in the west.

FEBRUARY 2 is the date set for the hearing on the proposed government seed bill at Washington, D. C.

SEEDSMEN who have not already written their congressman with regard to the proposed government seed bill should do so without further delay.

VISITED NEW YORK.—C. B. Coe, representing D. M. Perry & Co., Detroit, Mich.; W. J. Fosgate, Santa Clara, Calif.

MISSOURI is now afflicted with a seed bill (Senate Bill No. 36) and every Missouri seedsmen should write his state representative for a copy.

DETCB bulb farmers in Holland are reported to have agreed on uniform selling prices for the various grades of mixed and named hyacinths.

CHICAGO.—Prices on the board of trade January 25 for grass seed were noted as follows: Timothy, \$9 to \$10.75 per 100 pounds. White clover, from \$22 to \$30.

VISITED CHICAGO: A. J. Brown, Grand Rapids, Mich.; John A. Moe, representing the Gurney Seed & Nursery Co., Yankton, S. Dak.; E. E. Stewart, Rives Junction, Mich.

IN the protest of the International Forwarding Co. of Chicago before the board of appraisers January 11, 1911, claiming that giant spurry seed was free of duty as "grass seeds," the protest was sustained.

HOLLISTER, CALIF January 18.—This section of the state has had copious rains during the past week, and if these are followed by late spring rains the seed crops should be fair; but it is believed there will be a shortage as stock should have had a month's growth at this time. Instead, growth is only starting and a large amount of planting remains to be done.

Some Bids on Government Contracts.

Washington, D. C., January 23.—Nothing has yet been made public here regarding the awards of contracts for government seeds, but the following is a summary of the figures of some American bidders:

W. W. Barnard Co., Chicago:
Garden beans, \$2.75@3 per bushel.
Tomato, 45@55 cents per pound.
Beet, 14@15 cents per pound.
Braslan Seed Growers Co., San Jose.
Lettuce, 15 cents per pound.
Onion, 35 cents per pound.
Beet, 10½ cents per pound.
Kale, 25 cents per pound.
Parsley, 9½ cents per pound.
Parsnip, 8 cents per pound.
Turnip, 10 cents per pound.
Carrot, 16-18 cents per pound.
Garden peas, \$2.54 per bushel.
E. B. Clark Seed Co., Milford, Conn.:
Green garden beans, \$2.75@3.25.
Wax beans, \$3.25@3.60 per bushel.
Wrinkled peas, \$3.50@5.25 per bu.
Smooth peas, \$2@3.25 per bushel.
Coy & Son:
Cucumber seed, 25 cents per pound.
Hogue-Kellogg Co., Vevoria, Calif.:
Pole beans, \$5@5.75 per bushel.
Dwarf lima beans, \$6@6.50 per bu.
Pole lima beans, \$5.75@6 per bu.
S. M. Isbell & Co., Jackson, Mich.:
Garden beans, \$2.85@3.25 per bu.
Radish, 12½ cents per pound.
N. B. Keeney & Son, Le Roy, N. Y.:
Surplus garden beans, \$2.85@3.25.
Jerome B. Rice Co., Cambridge, N. Y.:
Dwarf beans, \$2@4.25.
Vaughan's Seed Store, Chicago:
Garden beans, \$2.65@2.75 per bu.
A. F. F.

Government Seed Contracts.

CONGRESSIONAL DISTRIBUTION BIDDERS.

On January 17, at 2 p. m., bids for supplying seeds for the 1911-12 congressional distribution were opened and read item by item by the board of awards, composed of the assistant in charge of the office of seed distribution, the assistant seed superintendent and the chief clerk of the Bureau of Plant Industry, in the presence of the acting chief and acting assistant chief of the bureau and members of the seed trade, including representatives of Jos. Breck & Sons Corporation, Boston, Mass.; Chas. Johnson, Marietta, Pa., representing Denaiffe & Sons, Carignan, France, and the Routzahn Seed Co., Arroyo Grande, Calif.; F. W. Bolgiano, Washington, D. C.; A. L. Rogers, of Rogers Bros., Alpena, Mich.; Fred H. Hunter, representing Waldo Rohnert, Gilroy, Calif.; and John C. Bodger, representing John Bodger & Sons Co., Los Angeles, Calif. Bids covered both surplus stocks and growing contracts. The quantity of surplus seeds, especially flower seed, offered this year was greater than formerly. The prices on all seeds are normal except for sharp advances in peas, some varieties of beans, beets and carrot. The bids of some of the foreign firms on a few items are lower than the American bids, but the chairman of the board of awards announced that it has been the policy of the department to give preference to American seedsmen in all cases where it was not clearly to the disadvantage of the government.

Connecticut Horticultural Society.

The first business meeting of the year was held January 13 at the County Building, Hartford. On the center table President Huss had a handsome display of Chinese primroses, all in bloom, as well as two orchids in flower, Lælia anceps and Lycaste Skinnerii. The judges, J. A. Weber, T. B. Brown and William A. Kinne, awarded a certificate of merit for the primroses, and a diploma for the orchids.

George B. Baker, of New Britain, then briefly outlined his method of primrose culture. President Huss recommended that the seed be sown in succession, in pans or boxes, in light soil, well firmed, up to a quarter-inch of the top of the receptacle; then put on glass, and prick off into other boxes when they show a few leaves. He said that a greenhouse is not necessary for the purpose; for they can be grown in frames. Keep them cool in the frames, and shade during the summer. They are generally grown from seed, but may be propagated by cuttings. Those plants exhibited by him were from seed sown in March. John Gerard, of New Britain, informed the meeting that one ounce of seed of one of President Huss's primrose plants with violet blooms is worth nearly \$100.

At the chairman's request, the secretary read a pamphlet entitled "A Visit to the Arnold Arboretum," by W. J. Bean, of the Royal Gardens, Kew, London, reprinted from the bulletin of miscellaneous information of that institution. This paper was a most lucid and engaging account of what the writer saw in what he designated as "the richest collection in the world of the hardier northeast American and north Asiatic woody plants." President Huss told of the great work of Professor C. S. Sargent, the director, and of his own visit there some time ago, and of the genial personality of Jackson Dawson, a co-operator with the director.

Dreer's Double Petunias.

OUR DOUBLE PETUNIAS, for more than half a century, have been the acknowledged standard. The strain this season is equal in high quality to its predecessors, and is well known to the trade.

We offer 15 distinct varieties, in strong, 3-inch pots, which will quickly furnish an abundance of cuttings. Strong, 3-inch pots, 75c per doz.; \$6.00 per 100; the set of 15 for \$1.00.

Seed of our **SUPERB STRAIN OF FRINGED PETUNIAS**. Double, 75c per 500 seeds; \$1.50 per 1000 seeds. Single, 50c per trade pkt.; \$1.00 per 1-lb oz.; \$1.50 per ½ oz.

Our Quarterly Wholesale Price List, issued January 1st, offers

a full line of seasonable Plants, Seeds and Bulbs.

The above prices are for the Trade only.

VAUGHAN'S SEED STORE,

25 Barclay St., NEW YORK. 84 and 86 Randolph St. CHICAGO. 803-805 W. Randolph St.

Baltimore.

STOCK VERY SHORT.

The past week has shown a very unusual condition of the cut-flower market in the almost phenomenal shortage of stock, good, bad and indifferent. Roses, carnations, lily of the valley, gardenias and violets have all been way under the demand, and the default has been not localized, but general. One experienced rose grower, who has five to six thousand plants, says he was not cutting 100 blooms a day. We have experienced comparatively mild weather with very little sunshine and much fog. Trade would have been quite notable but for the shortage of flowers.

NOTES.

On January 17, there was a great Democratic meeting at the Lyric theatre in the afternoon and a banquet in the Fifth Regiment Armory at night. The decorations at the theatre were effective and were arranged by Edwin A. Seidewitz. At the armory the job presented difficulties. The building is very capacious, but Saml. Feast & Sons, who had the work, devised to restrict the too ample area. The space which contained the tables was surrounded by a screen of heavy material of a rich deep red and supported by white columns surmounted with clusters of electric light, with strings of smilax festooned between them, the cloth being covered

with southern smilax. Along the wall were groups of fine palms and other decorative plants. The head table was decorated with smilax and baskets filled with ferns, dracaenas and begonias, and many flat baskets of roses and other flowers and silver candelabra were distributed along the tables, with crimson shades, and at each plate was a neat boutonniere. There were over 1,100 guests, and the banquet was considered a great success, the decorative effects being counted as novel and effective.

SISTERSVILLE, W. VA.—E. Houston & Son have rented the store in the Morrison building and will fit up for a florist's shop.

TO THE TRADE

HENRY METTE, Quedlinburg, Germany.

GROWER and EXPORTER on the VERY LARGEST SCALE of all CHOICE VEGETABLE, FLOWER and FARM SEEDS. (Established 1777.)

Specialties: Beans, Peas, Cabbages, Carrots, Kohl Rabi, Leek, Lettuces, Onions, Peas, Radishes, Spinach, Turnips, Swedes, Asters, Balsams, Begonias, Carnations, Cinerarias, Gloxinias, Larkspur, Nasturtiums, Pansies, Petunias, Phloxes, Primulas, Scabious, Stocks, Verbenas, Zinnias, etc. Catalogue free on application.

Market Gardeners

Greenhouse Vegetable Growers and
Market Gardeners' Association.

B. L. Watts, State College, Pa., President;
H. F. Hall, Grand Rapids, Mich., Vice-Pres-
ident; S. W. Severance, 505 Illinois Life
Building, Louisville, Ky., Secretary; M. L.
Rutenik, Cleveland, O., Treasurer.
Annual meeting at Boston Mass., 1911.

ACCORDING to the January Crop Re-
porter about 39.9 per cent of the crop
of potatoes raised in 1910 for market
were in the hands of the growers and
10.7 per cent in the hands of the dealers
on January 1, 1911, as compared
with 40.2 per cent and 9.7 per cent
respectively held on January 1, 1910,
and 33.5 and 11.3 respectively on Jan-
uary 1, 1909. The figures would indi-
cate that the total amount of potatoes
for market in growers' hands in the
important producing sections on Janu-
ary 1, 1911, was about 13 per cent less
than the amount as held a year ago
and 48 per cent more than two years
ago.

Prices of Indoor Fruits and Vegetables.

New York, January 21.—Mushrooms,
40 cents per pound; cucumbers, 20
cents each; lettuce, \$1.50 per dozen
heads; tomatoes, 35 cents per pound;
radishes, 85 cents per dozen bunches;
asparagus, \$7 per dozen bunches; rhu-
barb, \$1 per dozen bunches; grapes, \$1
per pound; string beans, 35 cents per
quart; peas, 35 cents per quart.
Chicago, January 21.—Mushrooms,
15 cents per pound; cucumbers, \$1.25
to \$1.75 per dozen; lettuce, 20 cents to
30 cents per pound; radishes, 10 cents
to 40 cents per dozen bunches.

Lettuce Notes.

Occasionally we find a good grower
sending poor lettuce to market and it
is interesting to study the causes.
About the poorest lot we ever saw
was produced by a man who had an
excellent reputation for fine lettuce.
He changed his houses from solid beds
to benches and upon these benches
grew chrysanthemums, followed by let-
tuce. Of all the mistakes a grower
can make this is the worst, for chrys-
anthemums are rank feeders and
mighty little is left for the lettuce. In
this case fine plants were benched in
modern houses and that is as far as
they went—they were still plants six
weeks after instead of fine one pound
lettuce. And as regards quality this
lettuce was as tough as paper. An-
other man operating solid beds worked
one-quarter of the space in one house
when the ground was just a trifle too
moist. The result was as above—a
complete failure alongside the luxuri-
ant beds on each side. The same earth,
same plants, same treatment, just a
little error in operation. A third party
smoked his houses too hard—immedi-
ately after planting this crop was
checked as above. Overgrown plants
are a very frequent cause of trouble,
often causing bad failures.

MARKETMAN.

Cincinnati.

FAIR BUSINESS.

Last week business was fair, but
there was not a normal supply of
stock. As a natural result, prices
on flowers advanced. The weather
had very much to do with this state
of affairs. The weather man served
us up with rainy and cloudy weather
the early part of the week, and with
cold weather at the end. Roses

seemed to have felt the effects of the
weather more than other flowers, at
least as far as quantity is concerned.
They still hold up the general good
quality they have had for some time.
American Beauties were in fair sup-
ply, and sold readily, especially the
short and medium grades. Carna-
tions, too, have felt the effects of
the weather, and under a strong de-
mand show a shortage. The call is
especially for white and the lighter
shades, but is shifting, as McKinley
day approaches. Single violets of
quality sell out every day. The dou-
bles are moving too, but at low prices
for this time of the year. Enough
lily of the valley is on hand to fill
orders. Liliun longiflorum and callas
find a ready market. Owing to the
shortness of supply of other flowers,
Paper White narcissus and Roman
hyacinths find a steady market. A
few jonquils are offered and sell
quickly. Poinsettias continue to ar-
rive, but move slowly at low figures.
Sweet peas clean up every day. The
supply of decorative greens in all
lines is ample, in fact, more than
ample.

CLUB MEETING.

The Florists' Society held a special
meeting in its club rooms in the
flower market, January 23, to hear
the report of the Flower Show Com-
mittee. The guarantee fund is now
\$13,000.80, with more to be heard
from. The week beginning November
13, 1911, is the time set for the show.
The committee will report a schedule
at the next meeting.

NOTES.

Paul Berkowitz and wife arrived on
Monday. Mr. Berkowitz is represent-
ing H. Bayersdorfer, Philadelphia.
Other callers were Harry Nicholson,
Chicago Carnation Co.; Lester F. Ben-
son and family, of Indianapolis, Ind.
Wm. Gardner was in town the latter
part of last week. He reports that

Geo. Staff, one of the growers at
P. J. Olinger's, is boosting a bowling
club among the New Castle florists.

Louis Pfeiffer discovered an inci-
dent blaze at his home on Highland
avenue, Fort Thomas, and he suc-
ceeded in extinguishing it before much
damage was done.

Miss Margaret Weiland, of Evans-
ton, Ill., is visiting her brother, Peter
Weiland, at New Castle, Ind.

Wm. Speck is consigning some very
fine liliun longiflorum to C. E. Critch-
ell.

Mrs. Henry Glins left on January 17
for a few weeks' stay in Boston.

Tom Windram has returned from
Leesburg, Florida. H.

ORLEANS, FRANCE

CARNATION

Mrs. G. W. Ward

The most prolific and profitable variety in the market, producing more flowers and bringing a higher price than any other Carnation. The Commercial Value of this variety has been further demonstrated by the highly satisfactory results obtained by last year's purchases.

MRS. C. W. WARD

is a free and perfectly healthy grower, producing perfect flowers on long stems as early as September 1st.

The color is the clear, deep pink so much in demand.

**Rooted Cuttings: \$6.00 per 100;
\$50.00 per 1000.**

ALMA WARD, Large White. Rooted Cuttings :
\$7.50 per 100. \$60.00 per 1000.

Cottage Gardens Co.,

QUEENS, LONG ISLAND, NEW YORK.

Cleveland.

STOCK LIMITED.

Business has been good the past week considering the limited amount of stock on hand with which to fill orders. Roses have been decidedly short, particularly in the shorter grades. Carnations, although more plentiful, have just about been equal to the demand. Sweet peas, Roman hyacinths, narcissus, stevia and tulips are part of the daily stock. Callas and Easter lilies have a good call. Lily of the valley is slow to move. Calandulas and daisies arrive only in limited quantities. Adiantum and asparagus is quite plentiful, and meets with an excellent demand. Boxwood is used freely; case lots being the rule. Southern smilax for decorations has been in demand the past week or two. Violets are moving rather slowly.

NOTES.

We would again call the attention of all florists and growers in and around this city to the flower show at the Florists' Club rooms, February 13. Everybody is invited, and as many as possible should attend and help make the show a success. Remember it is not necessary to be a member of the Florists' Club to attend, as the show is for the benefit of all.

Bramley & Son are having a lot of funeral work, which keeps both of their autos going all the time.

Out of town shipments have been good lately, supplies being a part of most orders.

Nauman & Son are sending in a quantity of bulbous stock, both cut and in pots. C. F. B.

The Nursery Trade

American Association of Nurserymen
W. P. Stark, Louisiana, Mo., President;
E. S. Welch, Shepandoah, Ia., Vice-Presi-
dent; John Hall, Rochester, N. Y., Secy.
Thirty-sixth annual convention to be held
at St. Louis, Mo., June 14-16, 1911.

VISITED NEW YORK.—Kroeschell, Bos-
koop, Holland.

THE death of Samuel C. Moon, of
Morrisville, Pa., is recorded in our
obituary column this week.

AUSTIN, TEXAS.—Harvey C. Stiles,
formerly of Raymondville, but now lo-
cated at Coahuila, Mexico, has been
engaged by the state department of
agriculture to inspect the nursery stock
of the Mexican nurserymen and flor-
ists who desire to do business in Texas.
Special efforts are being made to pre-
vent the introduction of the orange
maggot, which is Mexico's worst enemy
to the orange industry. Mr. Stiles is
a thoroughly posted entomologist, be-
ing engaged as horticultural representa-
tive of the governor of the state of
Coahuila at the present time.

American Pomological Society.

The Tampa Board of Trade, the
Florida Citrus Exchange and the Flor-
ida State Horticultural Society are
leaving no stone unturned in their
efforts to provide instruction and pleas-
ing entertainment for the members of
the American Pomological society, at
the forthcoming meeting in Tampa,
February 9-11. Recent advices state
that a fund of \$2,000 has been raised
for the entertainment of the members
and delegates. Excursions to regions
of interest to northern fruit growers
and trips by water, rail and motor
have been arranged to noted citrus and
tropical fruit sections. An extensive
exhibit from Cuba will be a display
of native fruits, vegetables and flowers
in season at this time of the year.

The programme and meeting will be
one of the most noted in the history
of the society. It is twenty-five years
since this national organization met in
Florida, and this is an important op-
portunity for northerners to see the
products and resources of the state at
reduced expense and exceptional ad-
vantage. Programmes may be secured
by writing to the Secretary, John
Craig, Cornell University, Ithaca, New
York.

Albany, N. Y.

In the report of Raymond A. Pear-
son, state commissioner of agriculture,
to the legislature the past week, men-
tion is made of nurseries in the state
and the work of the department in
connection therewith. During the past
year 572 nurseries were inspected and
trees and plants to the number of 116,
640,977 passed upon. San Jose scale
was detected in some of the stock and
17,081 trees affected were destroyed.
More than 12,000,000 seedlings in-
ported were examined. Agents of the
department have been diligent in hunt-
ing down the gypsy moth, which has
done much damage in Massachusetts.
The agents have visited a score of
places in the state where the presence
of the moths was reported and their
nests were destroyed. In the work
against the brown tail moth 3,726 nests
were destroyed. The commissioner
makes mention of the State Fair at

A BLUE ROSE

The Greatest Rose Novelty of the Century

It flowered with us this sea-
son and was greatly admired.

The New Rambler (Violet Blue),
hailed by the German rose growers
as the forerunner of a genuinely
cornflower blue rose, is a seedling of
Crimson Rambler, very vigorous and
hardy, and free blooming.

Send for description and price.

Syracuse, where last September the
attendance was about 200,000 and the
sum of nearly \$70,000 surplus receipts
was turned over to the state treasury.

R. D.

Tarrytown, N. Y.

The twelfth annual dinner of the
Tarrytown Horticultural Society was
held at Hotel Tarry January 18.
About 75 members and friends sat
down to the elegant repast provided.
The dinner was excellently served and
everything from the caviar down to
the coffee was enjoyed immensely. The
tables were beautifully decorated with
ferns and flowers. Killarney roses and
novelties in carnations from the Pier-
son greenhouses and W. C. Roberts,
Ossining, N. Y., being very conspicu-
ous.

During the dinner music was ren-
dered from piano and violin until cof-
fee was served, then the president of
the society, J. H. Brunger, introduced
Chas. H. Tibbets as toastmaster for
the evening, that gentleman accepting
the honor with a short and somewhat
humorous address. Among the speak-
ers who were called upon were J. Aus-
tin Shaw, who besides reading an origi-
nal poem, read extracts from imagi-
nary letters received from Sec. E. W.
Neubrand, John F. Dinkel, F. R. Pier-
son, A. D. Raymond, M. Odell, T. Ever-
itt, F. Conine, J. Sperry and W.
Tricker.

Roses for 1911

Dark Pink Killarney.

A sport of Killarney, similar in habit, but more highly colored than Killarney at its best. When Killarney is pale, Dark Pink Killarney is bright and cheerful.

Grafted plants only, from 2½-inch pots.
\$20.00 per 100; \$150.00 per 1000.

Lady Cromwell.

A shell pink sport of My Maryland that for pleasing color is unsurpassed. A wonderful producer and a color that sells.

Grafted plants only, from 2½-inch pots.
\$30.00 per 100; \$250.00 per 1000.

Radiance.

Strong in growth and making plenty of stem. Cerise pink in color.

Grafted plants. \$18.00 per 100; \$150.00 per 1000
Own root..... 10.00 per 100; 90.00 per 1000

Double Pink Killarney.

Originating with Robert Scott & Sons, who supply us the wood for grafting. Stronger in growth than Killarney, and with at least ten more petals. A wonderful improvement.

Grafted stock only,
\$30.00 per 100; \$250.00 per 1000.

Mrs. Aaron Ward.

By far the most pleasing of the yellow roses now on the market. A general favorite, and one which will be widely grown, for yellow roses are in demand.

Grafted plants. \$25.00 per 100; \$200.00 per 1000
Own root..... 12.00 per 100; 100.00 per 1000

Melody.

We have reserved for our orders own root plants of this choice novelty. No grafted plants.

From 2½-inch pots,
\$30.00 per 100; \$250.00 per 1000.

Prince de Bulgarie

The best prices for cut flowers should be the standard for judging roses, and this rose has been the money getter. Strong and vigorous in growth, and with its beautiful shell pink bloom it has sold on sight. One of the best roses grown.

Grafted plants. \$30.00 per 100; \$150.00 per 1000
Own root..... 15.00 per 100; 120.00 per 1000

**Killarney, White Killarney,
Richmond, My Maryland,
Kaiserin Augusta Victoria.**

These are the old standards, and we are headquarters for young stock.

Grafted plants. \$15.00 per 100; \$120.00 per 1000

We Can Still Supply

IN FIRST-CLASS CONDITION:

Araucarias

OUR SPECIALTY.

We are the largest importers of these lovely decorative plants, the **Araucaria Excelsa, Robusta Compacta and Glauca**, 6,000 of the choicest last spring importation now ready for immediate shipment. It is of no use to look elsewhere for cheaper prices. We now control and will control the market of the Araucarias in the future.

Araucaria Excelsa, raised from top cuttings, no seedlings. Plants, 5-5½-6-7 in. pots. 15-18-20-25-30 in. high. 3-4-5-6 tiers. 2-3-4-5 years old. 50c. 60c. 75c. \$1.00, \$1.25 to \$1.50 each. We give big value for your money. Just think! An elephant, 6-in. pot, 4 years old, 4-5-6 tiers, 20-25 in. high, for only 60c to \$1.00; a jumbo, 6-in. pot, 5-year old, 25 in. and over, as wide as a bushel basket, 5-6 tiers for only \$1.00; and what do you think a holy terror, 30 in. and over, 5-6-7 tiers, worth \$200, for only \$1.25 to \$1.50.

Robusta Compacta, Excelsa Glauca, 6 in. pots, \$1.00, \$1.25, \$1.50 to \$2.00 each.

We also have the nicest **Araucaria Robusta Compacta and Excelsa Glauca**, a house full, for only \$1.25 to \$1.50, mostly double.

Frimula Chimensis, mostly white, 5½ in., \$2.50 per doz.

Jerusalem Cherries, or **Solanum** 6-in. pots, 25c. 35c. 50c. Full of ripe berries.

Dracena Bruni, 25 to 30 in. high, 6 in. pots, 40c. to 50c. Highly recommended for store and house decoration: stands heat, cold and dust.

Latania Borbonica (Chinese Fan Palms), 30 to 35 in. high, 6 to 7 in. pots, 50c. 75c. to \$1.00 each.

Lilium Multiflorum, our own importation from Japan, raised from 9-10 in. bulbs, started in 6-in. pots last October; have kept cold; now about 5 to 8 in. high, just right for Easter, 25c to 30c each, by the dozen or hundred.

Azalea Indica, Easter (Jrching; Verranenna Professor Volters, Empress of India, Schryveriana, double variegated 60c, 75c. \$1.00 to \$1.50; Mme. Van der Cruyssen, Simon Mardner, pink, Niobe, white, Apollo, red, 60c, 75c. \$1.00, \$1.25 to \$1.50. In large plants we have Niobe, Helena Thielman, Bernard Andreas Alba, white, Mme. Van der Cruyssen, and others, \$1.50, \$2.00 to \$2.50. Deutsche Perle, Verranenna and Simon Mardner, showing color, some with few open flowers, 75c to \$1.00.

Kentia Forsteriana, in fine shape, 6-in. pots, 30-35-40-45 in. high, 4-5-6 years old, 75c. \$1.00, \$1.25, \$1.50, \$2.00 to \$2.50 each.

Kentia Belmoreana, 30-35-40 in. high, 5-5½-6-7 in. pots, 5-6-7 years old, \$1.00, \$1.25, \$1.50 to \$2.00 each.

Kentia Belmoreana, combination plants, 25 to 30 in. high, made up of 3 plants, 6 to 7 in. pots, \$1.00, \$1.25, \$1.50 to \$2.00; 4-in., 20 in. high, 20c to 25c.

Our Ferns this year are exceptionally very fine **Boston, Scottii, Whitmani and Scholzei**, 5½ and 6-in., 35c. 40 and 50c; 7-in., large bushy plants, 75c to \$1.00. As big as a bushel basket, \$1.00 to \$1.25. Remember, all our Ferns are pot-grown, not lifted from benches.

Neph. Gladiolus, a new beautiful fern, an improvement on Scottii, much shorter and bushier than Scottii, 5½ in. pots, 25c.

Pteris Wilsonii, 3 large bushy plants in 6-in. pan., 30c to 35c per pan.

Ferns for Dishes, big assortment, 2½ in. pots, at \$4.00 per 100.

Adiantum Hybridem, 6 in. pan., 25c to 30c.

Asparagus Sprengeri, 2½ in., 3c; 4-in., 10c.

Cocos Weddelliana, 3-in. pots, 15c. 18c and 20c.

Spirea Gladstone, started, in 5½ to 6-in. pots, at 15c. 20c to 25c.

Cineraria Grandiflora Hybrida, Aschmann's so well-known superior strain, which brought as high as one dollar a plant wholesale last Easter. Now is the best time if you want good plants for Easter. We have a very large stock of 4-in., ready for a shift into 6-in.; price, only \$1.00 per 100; 3-in., \$3.00 per 100.

Mention if ship with or without pots.
Cash with order, please.
All plants must travel at purchaser's risk.

GODFREY ASCHMANN

Wholesale Grower and Importer of Potted Plants. 1012 W. Ontario St., PHILADELPHIA, PA.

ASTER SEED

Do not forget to try **Smith's Peerless** white and pink, the best strain known. We also have many of the standard varieties in early, mid-season and late. Write for catalogue with prices.

Use our COLOR CHART in describing them, PRICE, \$1.00 POSTPAID.

American Florist Co., 324 Dearborn St., CHICAGO

Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

Morehead Steam Traps

† The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

† It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

† The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

† By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department "N" Detroit, Mich.

WHAT THE USERS SAY

Test at 14° Below Zero with Heavy Wind Blowing

FERGUSON BROS., Omaha, Neb., write as follows.—It might interest you to know the test is obtained with the Kroeschell Greenhouse Boiler and Kroeschell Piping system.

We have just had a night of 14° below with a stiff wind blowing and we carried the house at 52° with the boiler at 170°. The house is piped for 50° and as we are using a cheap grade of lark, the result speaks for itself.

We were told by the dealer when we ordered the coil that we could not burn it, so we bought a car of good coal to help along if the slack would not give results, but it was not necessary. The Kroeschell Generator certainly helps the circulation and the new method of piping for hot water is a surprise to some of the greenhouse men in this vicinity.

**VAUGHAN'S,
SEED STORE**
Chicago New York

Davenport, Ia.

Business the past week has been fair, with just about enough to use up all the blooms the dark days are producing, funeral work using up nearly everything in sight. Carnations and roses are good, but not quite enough coming in to go around. Violets, Roman hyacinths and Paper White narcissus find a ready sale. Lilies, frezias, single daffodils and tulips are also seen in some of the store windows. Sweet peas are also getting a little more plentiful. Trade so far this winter has been up to all expectations and one will find the florists of this locality mostly in good humor—the only group they have is against their old enemy, the coal man.

FLORISTS' MEETING.

The January meeting of the Florists' Club was held January 12 at the home of Wm. Knees and as usual a fine attendance turned out, nearly every member of the club being present. Bulbs, Easter and spring plants, was the topic for the evening, every member being called upon for a talk along these lines, and many fine points were thus brought out. The committee on the annual banquet, Harry Ellis, chairman, reported that everything was progressing nicely and that the annual affair would be held at the Watch Tower Inn on or about March 16, and arrangements were being perfected to eclipse anything yet attempted. The president appointed a committee of three, Ludwig Staff, A. Anderson and Wm. Goos, to nominate a list of officers for the annual election, to take place at the regular meeting in March, after which the club adjourned into the dining room, where a fine supper was in waiting, having been prepared by Mrs. Knees and her daughters and a jolly social hour was spent. Harry Ellis' invitation to meet at his home in Davenport February 9 was accepted.

NOTES.

Some of the boys were kept on a jump to keep things warm in the recent blizzard. But all pulled out O. K. Two degrees above zero and a wind blowing at 62 miles an hour is no joke with the best kind of an equipment.

A. Anderson is very proud of a red carnation seedling which he had on exhibition at the club meeting, and well he may be, for it surely is the finest red ever seen here.

Wm. Knees of Moline is cutting some very fine gladioli, which are finding a ready sale.

Moline, Ill., will spend some \$40,000 on her parks this summer. T. L. E.

Colorado Sends to New York for Its Finest Greenhouses

That is to say she has been sending to our New York factory at Irvington. But now with a factory at Des Plaines, near Chicago, we will make all shipments direct from there and cut out the freight cost for that extra 1000 miles haul. That will be a decided advantage.

This particular group of houses we erected for Mr. A. Coor, at Golden, near Denver. It is located at the very base of the Rocky Mountains. It was planned in ridge and furrow fashion so that it would fit as compactly as possible into the space between the building on the right and another one, out of sight, at the left. The result is certainly very effective.

It is Iron Frame construction.

It is fully described and illustrated in our new catalogue. Before you do a thing about building, you want to send for this catalogue.

Treat your plants right! Use, Sunlight Double Glass Sash

A 3/8 inch layer of dry still air between the two layers of glass, affords ample Protection in the coldest weather.

This transparent blanket eliminates all mists, boards or coverings of any kind, and does away with the hard work.

Plants get all the light all the time which makes them grow faster and sturdier and puts them on the market weeks in advance of those grown under single glass sash. Glass is held in place without putty. Can't work loose. Easily replaced.

10 degrees below zero

Winter A. Lyon, Lyndonville, Vermont, writes:

Bate Evaporator Easy to Install. It Will Save Time and Money

Does the work thoroughly. Makes fumigating an easy task. Fumigating will not have to be done so often. Can be put on the pipes any place in the house. Takes only a minute to fasten it to the pipes. This system of fumigating does not leave any tobacco odor on the flower. Not one drop of the insecticide is wasted, all being properly evaporated. Try one and be convinced.

Single pan. 60c; per dozen \$6.60; in larger quantities, per pan, 50c. The following sizes we carry in stock: 1-inch, 1 1/4 inch, 1 1/2 inch, 2-inch. Larger sizes made to order.

Stamford, Conn.

A well dressed, gentlemanly looking man, rather short in stature, gray mustache and fair complexion, stepped into the florist store of Mrs. A. Lindstrom, January 9. Approaching that lady he said, "Good morning, I presume you do not know who I am." "No, sir," replied Mrs. Lindstrom. "I do not remember seeing you before." "Well," the stranger said, "I am around gathering in a few accounts, but let me see if you can guess who I am." Mrs. Lindstrom, immediately thinking of some one to whom she owed an account, said, "Are you Mr. Vaughan?" "Well, well," replied the stranger, you have guessed it first time." The stranger then went on to explain that, owing to the bank troubles in New York, he was pressed for money, his funds were tied up and he was out getting what he could from his customers. Finally, he said, "Let me see the last statement I sent you." Mrs. Lindstrom went to her desk, found the statement and showed it, saying, "I will give you a check for the amount." "No, no," said the stranger, "the check would be no use to me; I could not get it cashed, the banks are in trouble; give me the amount in cash." Not having the full amount, Mrs. Lindstrom gave him \$27, all the cash she had in hand, the stranger credited the amount on the statement, took an order for some supplies and departed, promising to call again.

Not receiving the supplies she had ordered, Mrs. Lindstrom wrote Vaughan's Seed Store about the matter; on receiving word that no order had been placed, she journeyed to New York, where she learned that a sick game had been played and she was \$27 to the bad.

Fancy working a game like that on a widow; such a rascal ought to be in jail for the rest of his life, look out for him!

THE H. A. STOUTOFF CO., MOUNT VERNON, N. Y.

Nassau County Horticultural Society.

The regular meeting of the society was held at Pembroke Hall, January 11, with President S. J. Trepass in the chair. Winners for the day were: Cauliflower, J. Elmslie; lettuce, V. Cleres; tomatoes, J. McDonald; carnations, V. Cleres, cultural certificate; cauliflower, F. Petrolia, cultural certificate; tomatoes, V. Cleres, honorable mention. Ernest Westlake was elected corresponding secretary and Henry Cliff member of the executive committee. Some very fine orchids were exhibited by Julius Roehrs Co. Prizes for next meeting will be for 12 white, 12 pink, 12 red carnations, also special prize for vase of 12 Alma Ward roses. The annual dinner of the society will be held at Schleicher's Hall, Glen Cove, Wednesday, January 25. O. E. A.

Indianapolis.

The annual meeting of the Indiana State Florists' Association was held at the Commercial Club, Indianapolis, January 10, with an attendance of about 50 members, the following officers for the year being elected:

George R. Gause, president.

H. Junge, vice-president.

A. F. J. Baur, secretary.

H. S. Wiegand, treasurer.

Action was taken toward extending an invitation to the American Rose Society to hold their meeting next year at Indianapolis. Plans were also adopted whereby the floral exhibits at the state fair may be improved, and a committee appointed to confer with the State Board of Agriculture.

A very interesting display of flowers was made. Baur & Smith exhibited their new creation Pochontas and other exhibitors were Stuart & Haugh, Rodenbeck Bros., Bertermann Bros. Co., A. J. Pettit, H. White, E. Temperley and Chicago Carnation Co.

Providence.

The Florists' and Gardeners' Club of Rhode Island held its annual dinner in Swarts Lodge Hall, January 16. Previous to the dinner the club held a short business meeting and the following officers were elected for the current year:

Robert Johnston, president.

Eugene Appleton, vice-president.

William E. Chappell, secretary.

William Hill, treasurer.

The members of the club and their guests to the number of one hundred assembled at the tables which were beautifully decorated with plants and flowers. After full justice had been done the repeat, ex-President Chappell was introduced as toastmaster who in turn introduced the following speakers: Prof. H. J. Wheeler of the Rhode Island College, Thomas J. Grey of Boston, Charles W. Smith, secretary of Rhode Island Horticultural Society, Michael Sweeney, James B. Canning, Charles McNair, H. Howard Pepper, John Burke and James Burke. The addresses were interspersed with vocal and instrumental music. The committee in charge of the dinner were Alex. Macrae, James Dillon and H. C. Neubrand.

Syracuse, N. Y.

As a result of the organization of a new Rose society in this city, Syracuse will have three important flower shows this year, unless present plans miscarry. There will be one in May, for sweet peas; another in July, for roses; and a later one for chrysanthemums, perhaps in the early fall. The Rose society was formed at a meeting of prominent florists and gardeners held at the Y. M. C. A., January 21. Harry L. Youell acted as temporary chairman, and Earl A. Peter was temporary secretary. Rev. Dr. E. M. Mills, an authority upon roses, read an interesting paper upon shows he had attended recently, and pointed out what a good thing flower shows in this city would prove. The following committee was appointed to draw up a constitution and by-laws and to report at a meeting to be held February 7: H. L. Youell, George E. Thorpe and J. C. McNally. All the florists and gardeners are enthusiastic over the new organization, and a number of them have given assurance to the officers that they will work hard to make it a success.

Dealers in this city report an unusually brisk business the week of January 22. The city grammar and high schools held their graduating exercises and the demand for roses, which have been quite scarce, was large. Several dealers say they were unable to fill all their orders. A. V. B.

The Superior Standard

RETURN FLUE FIRE BOX BOILER

contains more heating surface, and less water space than any other steel boiler.

$\frac{1}{2}$ of the heating surface is in the tubes.

Ask the man that knows the one using different style boilers — names are yours for the asking.

After using our boiler one season, you will say like all others: "Nothing but 'Superior' for me."

This boiler has given better satisfaction than any other boiler on the market

MADE IN NINE (9) SIZES FOR HOT WATER.

GREENHOUSER'S OBSERVATIONS

The New Insecticide Law.

Truly the lot of the manufacturer of insecticides will not be a happy one under the new regulations, as outlined in THE AMERICAN FLORIST, issue of December 31, 1910, page 1150. Nor will the grower who has a liking for certain proprietary insecticides and has become familiar with their use, be any happier to find that he will not be able to procure them if manufactured outside his own state. The way of our lawmakers are weird and wonderful, and far beyond the comprehension of a plain grower like "Greenhouser." Suppose, for instance, that an Illinois grower has for years been using an insecticide made in Kentucky. He is not particularly interested in knowing the exact formula from which this has been made. Indeed, he probably would be all at sea if confronted with the names and quantities of the various chemicals included in its manufacture. But he does know that it is perfectly safe to use on the crops he is chiefly interested in, and that it is effective in destroying the insects that infest these crops.

He may have paid a higher price for these conveniences than the actual cost of the raw material, but he knows that by doing so he is paying for the knowledge and experience of skilled chemists employed by the manufacturers of the insecticide. He is obtaining in a condensed and handy form what will cause him consider trouble to obtain and mix for himself. But under the new regime, if we have read aright, this will all be altered, and he will have to begin his experiments all over again, either with chemicals of whose nature he is ignorant, or with a ready made article purchased and prepared in his own state. Of course, he will have the satisfaction of knowing, to the one-hundredth part of a grain, how much of certain constituents his mixture contains, and this will doubtless tide him over many difficulties and rough places. Again, any insect that would not be content to be decently poisoned with a decoction so carefully prepared in the state in

which he has been born and reared, would surely be hard to please.

How much the ultimate consumer is benefited by all these regulations, it would be difficult to say, but, certainly manufacturers, shippers and jobbers are already unnecessarily harassed by state and federal regulations along many lines. Not one consumer in a hundred, who uses insecticides, is sufficiently conversant with the nature of the ingredients used to form an intelligent opinion of their value from such data as ordered by these new regulations. But "Jacks-in-office," state officials, and bright youths straight from college, revel in them, and gloat over such details—and "caveat emptor" never was perfect law anyway.

The Horticultural Inspector.

Two full fledged horticultural inspectors in a western state, armed with microscopes of, I am not sure, how many indicated horsepower, descended upon a consignment of plants that had already been inspected, and possibly also disinfected, at New York, shipped across the continent at a high cost by express, and then kept waiting for several days, until the aforesaid inspectors could make it convenient to come. And all they found was one plant louse (aphis). And the waiting grower, knowing that every hour the plants were kept about lessened his chances of success with them, felt like breaking up the council of two that sat in judgment upon that offending aphis, by telling it to take it to a taxidermist. But the majesty of the law forbade, and presently the august assemblage came to the conclusion that although the aphis had no business there and should have remained in Belgium or Holland or wherever the plants came from, yet, his—or her—presence did not constitute a sufficient misdemeanor—within the meaning of the act—to necessitate the destruction by fire, or otherwise, of the whole consignment, and gave it a clean bill of health. And when the plants were placed in the greenhouse of the aforesaid grower, many white

flies—for which the inspectors were supposed to search diligently—and also a few larvae of the gypsy moth, were discovered by the hirelings of the grower. But that is another story. The plants thrived abundantly, and when in flower, had again to be shipped to a neighboring town at a distance of about four miles, whereupon it became necessary that the grower again call in the inspectors, who again came at their leisure, the while the plants were drying up in their packing cases, and the purchaser thereof waxing hot under the collar, because of their non-arrival. But eventually the plants got safely on their journey, the white fly and the other impedimenta were still unsuspected by the inspectors and went with the plants, but the majesty of the law had been upheld, the proper amount of red tape had been wound and unwound, and with the happy consciousness of a work well done, the inspectors went home. All of which goes to show the importance, one had almost said the necessity, of the horticultural inspector.

Retailer and Grower.

Much of the friction existing between retailers and growers of stock comes from a misunderstanding of each other's troubles and trials, and although they would, in many cases, like to come together and make an amicable arrangement, they are prevented by just these misunderstandings from doing so. Speaking to a successful retailer recently, he gave it as his opinion that one of the principal causes of trouble was the lack of variety in most growers' stock. For instance, one man finds a good demand for, say, Easter lilies one year. In consequence he doubles his orders for bulbs the next season, while perhaps another grower, who noted the first one's success, also grows a quantity. Then because the retailer cannot dispose of about three times the number the following season, he is reviled by the grower. Had the same number of lilies been grown and a number of hyacinths, tulips or daffodils, or all of these, then a better variety would have been produced and all would have sold.

In some localities, where one grower handles carnations extensively and another roses, the cut flowers, as well as the plant stock, are apt to be lacking in variety. Some retailers hardly know what they do want, yet they acknowledge the lack of variety and ask their growers to give them something new. If the grower, on the other hand, works up something novel, he is immediately told that "our people don't know it. We will take it and try it out, and pay for it if it sells." Poor consolation this for the grower, who has perhaps worked a whole season to get it. Still, there can be no denying the fact that the retailers, in many small towns especially, are suffering from the want of variety in their offerings, and it is up to the grower to try and relieve this as far as possible. We have several of our best customers (retailers), who ask us for special lines and give their orders for these in advance, long enough in advance for us to grow the stock. Now, although this is not always possible, it is mighty comforting to know that if our stock turns out good, we

are sure of a market. We offer this as a suggestion to others, for it has certainly worked well with us, allowing of a quick clearance of stock at Christmas and giving satisfaction on both sides.

The Help Problem.

There is a saying in England that "an old poacher makes the best gamekeeper," and a man who has been through the mill himself from the ground up in the florists' business, usually has some feeling for the boys and young men that are working for him, and gets the best out of them that is in them. Certainly there are some men, excellent financiers and good at heart to the people who are working for them, but they fail to get the best out of their help, and then cry out that there is no good help to be had. There is little enough of it we grant. The average young American does not like the growing of flowers and plants as a living, and in consequence the actual growing end of the business is getting more and more into the hands of the Scandinavian, German and British immigrants in the east and middle west, and of the Japanese and Chinese on the west coast.

And these nationalities are surely ousting the native born American more and more from the business. It cannot be denied that the early work of a young man or boy in the large growing plants is of an unpleasant and uninteresting nature. There is not the variety in the work that there is in the old country "nursery," or on private estates, consequently, if he can possibly get anything else to do, our young hopeful soon removes himself as far away from a greenhouse plant as possible. Again almost every grower has his own fads and his own way of doing things, and young men, trained in a different school, find it difficult to "get along" with him. Could we only look at things from the standpoint of the "man lower down," we would often be less harsh in our judgment of him. Speaking personally, we consider it far preferable to get boys and young men and break them in to their work rather than to take on men with sheets of references from previous employers. But this, of course, does not help the problem that is facing many owners of greenhouses, viz., how to get help that can be trusted, even under a good foreman or superintendent, to handle a house or two of stock.

We were wanting a man with experience in the growing end the other day, and asked a local seedsman to send along anyone who seemed at all likely. In less than a week at least a dozen "experienced" men called, but a walk through part of the greenhouses with them showed each one to be quite incapable, and, as we have had to do many times before, we gave the job to a younger man, and will have to let him grow into it. And here we would like to warn anyone who is on the lookout for help against the "rounder." He has usually, according to his own story, worked in almost every city in the Union. He speaks of the heads of large firms he has worked for by their first name, in order to show his familiarity with them, and knows their business, past, present and prospective. Beware of the rounder, friends. He is no good himself, as a rule, and can do more to

stir up strife and dissatisfaction among a bunch of men than a terrier in a pack of hounds. He will probably have a tale to unfold about your place to the next prospective employer he meets, but this is better than letting him either work you or work for you. GREENHOUSEUR.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Flowers for St. Valentine's Day.

Although St. Valentine's day is not one of the great flower days of the year, yet there is always a demand for more or less of nature's beauties on that day and by a little attention this can be greatly increased. Valentine's day is full of sentiment, and there is nothing in the world more able to express that feeling than the beautiful products in which the florist deals. The loving swain on that day is sure to desire something by which he can express his devotion or amorous feelings, and it is an opportunity for the florist to cultivate the use and the presentation of flowers on this occasion. The forms in which they can be arranged are innumerable and opportunity is presented to use all the ingenuity and artistic ability with which the designer is endowed. A nice display of beautiful flowers and attractive features for the few days before February 14 are sure to draw the attention and augment the sales. The smaller flowers are sure to be in demand. Violets will surely have a call for a nice bunch of these sweet flowers in a suitable box tied with a handsome ribbon is a most suitable valentine for any young person to send to his admired. Forget-me-not is especially appropriate, and is often grown in considerable quantities near the larger cities especially for this day. This little blue flower, almost insignificant at other seasons, is full of sentiment at this time, and is always in great demand where obtainable. Lily of the valley is another flower that will meet with call for its pure white bells and delicate fragrance are sure to appeal to the admirer, and besides, as this flower is classed by so many as among the most select, it is especially sought on this day. Roses, of course, are always in demand and are used not only in cut flowers but in many ways in made up work, bouquets, baskets, etc. Pansies are particularly sought by many for their pleasing little flowers known by so many under the old English name of heart's ease, appeal very strongly to the sentiment of the day. Orchids are always in favor and particularly at this season.

There will be more or less demand for flowers made up in forms and these should be so arranged as to carry out the idea of the season both in the best thought and ability. Corsages and bouquets will be mostly sought and with the wealth of flowers at hand and by the aid of beautiful ribbons can be made most attractive. The old fashioned bouquet with its paper bouquet holder is again quite in vogue and is made a special feature by some. Our illustrations will give an idea of how beautiful the bouquets for Valentine's day can be made and artistically trimmed. Baskets and hampers

ST. VALENTINE'S DAY BOUQUET ARRANGED BY CHARLES THORLEY, NEW YORK.
Composed of Red Roses, White Lilac and Cypripediums, Tied With Nile Green Chiffon and Baby Ribbon.

will be necessary, both of flowers and plants and can be so arranged as to be particularly attractive and appropriate for the day. The red heart generally made of carnations and pierced by the arrow, either gilded or wound with white ribbon of fine texture, has always been one of the particularly appropriate designs for Valentine's day. The lover's knot is one of the latest floral valentines, and can be made very beautiful and effective and will be thoroughly appreciated when well arranged. Other features which are seen are the floral envelope tied with ribbons, Cupid's bow and arrow, and the decorated fan. These arrangements if put up in good taste, and displayed where those who observe the day may have their attention drawn to them, are sure to meet with approbation and attract many whose thoughts had never extended beyond the paper valentines of the swains and admirers of years ago.

St. Valentine Suggestions.

Today at St. Valentine's shrine few lovers go to pray. The present day Romeo finds a dozen American Beauties or orchids quite more effective and much more to his taste and his lady's, than toil-worn rhymes. Today so many effective little ways present themselves in arranging flowers appropriately for this occasion. In all cases daintiness should be the keynote.

SUPPER DECORATION.

For a buffet supper decoration take a flat basket for the center piece, mound with moss ten inches high, a sort of tapering pyramid, cover with ivy leaves evenly and smoothly all around, arrange lily of the valley in a loose graceful bunch at top—using the valley foliage in a wreath around the blossoms. At even intervals from each other place six hearts. A piece of cardboard—if nothing in any way of wire frame is available—can be used to advantage by covering it with moss. On this the carnations (red) should be worked. The size of hearts should be in keeping with the size of the table. Around the base of the basket make a garland of lily of the valley, extend red satin ribbon from each heart across table, letting it fall over edge, knotting the ribbon ends in a loose effective knot, using pretty sprays of ivy in each knot, also place sprays of the ivy between each ribbon to which a tiny red carnation heart is attached.

CUPID'S BOW.

Cupid's bow and arrow can be artistically made of violets, using lily of the valley at the dart of the arrow. The bow can be made of wire, covering it carefully with violets, suspended from two mounds made of red roses shaped in heart fashion—also use a heart shaped mat of red satin on which red rose petals should be sewed—or pasted, if possible. As a finish place a fringe of green around the mat. For souvenirs hollow hearts made of red satin with red rose petals sewed on, turning them up as much as possible, and at the same time keep the lines, fill with candied violets. Where the dent of heart turns place a dainty bow of red gauze ribbon.

A VALENTINE SHOWER.

This is made of three good sized hearts of red roses. At the point an

ST. VALENTINE'S DAY BOUQUET BY CHARLES THORLEY, NEW YORK.
Enchantress Carnations and Lily of the Valley, Tied With Pink Chiffon and Baby Ribbon.

immense red satin bow is so arranged that it can readily be unloosened. The hearts are attached at the upper part so as to make an opening of good size where valentines, mottoes and other souvenirs can be placed which are distributed by pulling the ribbon and precipitating the valentines on the table where each guest scrambles for her particular one. The hearts, made of red rose buds, should be suspended from carnation streamers interspersed with red rose buds and foliage. This should hang over the center of the table, under which a mirror should be placed to reflect it. Bank around the mirror with asparagus vine in which place small hearts made of red rose buds. Each guest receiving a heart made of red rose buds tied with a shower of tiny ribbons to which a motto is attached with name of guest.

FOR A DANCE.

The valentine tree is a pretty novelty. Use a good sized tree, and wind the trunk and branches, wherever possible, with wide satin ribbons. Tie a large bow at the end of each branch and use tiny showers of red ribbon, to which attach carnation and rose bud hearts and valentines. Continue this to the upper branches, using red candles with heart shades. The ring shaped heart made of rose buds, with long ribbon attached, to slip over the arm is convenient when dancing, and makes a pretty favor. Large hearts made of roses and maiden hair with wide red ribbon make the wall effective. From each end of the room cornerwise extend wide ribbons, which are gathered in the center under the chandelier where a shower of carnations arranged in a parasol fashion is so placed that when the favors are desired, the parasol is tipped to drop the carnation favors.

THE ROSE.

Roses in the South.

It is necessary at this time to study your plants carefully. The varieties that break quickly after cutting will require light and frequent doses of fertilizers. A change of fertilizers is also needed. Alternate with sheep manure, dried blood, liquid manure and wood ashes. A little nitrate of soda may be added to the liquid manure, say a three-inch pot full to forty gallons of water, but I would not advise putting this mixture on pink roses else the color is liable to suffer. Those varieties like Kaiserin and My Maryland that are slow in the short days should have no feed and just enough water to keep them from going to rest entirely.

My Maryland in the middle section of the South has shown decisively that it is only a fall, spring and summer bloomer. Last month it made an enormous crop, but with the exception of a few stray ground shoots it has shown no signs of breaking. In the extreme South it does much better and will stand about as much fertilizer as any other variety.

January and February are the best months to propagate young plants, although in March good success can be had. See that the propagating table is thoroughly cleaned and whitewashed before filling in the sand. After being hammered down with a brick, there should be at least four inches of sand on the table. For the pure tea varieties and Richmond it is not necessary to have bottom heat as they root very readily without it. The hybrid teas

and American Beauty are harder to handle and require bottom heat to get best results. A two-eyed cutting from the flowering wood is a fine foundation for a good plant, but such cuttings are hard to get without sacrificing the flowers. Cuttings, taken with a heel, from the selected bush, little better than half ripe, are the more generally used and make strong, thrifty plants in a short time. The cuttings need a good protection from the sun's rays while rooting. A muslin shade on rollers is the best thing to use. A light spraying with a fine hose every bright morning and also at noon on very warm days keeps the foliage and wood fresh and plump. Water in thoroughly at first and then only as needed to keep the sand nicely moist. From twenty to thirty days is the time required to root them and for the last week water may be given a little more sparingly. It is hardly necessary to say that absolute cleanliness must prevail in the propagating house.

WM. LEAR.

Rose Propagating.

Too much care cannot be taken from start to finish when propagating any kind of wood, and with the rose it might truly be called a science to turn out a perfect lot of stock for benching in early summer. Every detail must be carefully looked after, giving the proper attention to each. It is not a difficult matter to root the cuttings—the principal thing is to select the proper wood and to have it root in the proper temperature, the next important step being to pot off the cuttings at the right time. To begin with, the cutting bench should be overhauled and repaired; the benches should be washed thoroughly, and the house cleaned up "spick and span." If there is no way to temper the water, a good plan would be to sink two barrels in a convenient place near the faucet. They can be kept filled and the water will soon come up to the temperature of the house.

The best medium to root the cuttings in is a rather coarse grade of sand—bank sand is to be preferred, as it is quarried and seldom contains any vegetable matter. If it is screened the same as for ordinary masonry work it will be fine enough. About three inches of sand is deep enough to root the cuttings and it should be firmly packed, given a good soaking and packed again; in fact, much depends on the firmness of the sand and it cannot be packed too hard. Keep the surface of the sand perfectly level, and have bottom heat enough to bring the temperature of the sand up to 70°. The overhead temperature, or the temperature of the house proper, should be from 58° to 60°, or about the temperature of the rose houses at night.

When selecting the wood the strong blind wood can be used, wood that has just reached a ripened stage; it can be still a little soft at the tips, showing a little of the reddish color that disappears just as it ripens. Make heel cuttings of two or more eyes; the cuttings, if in the proper stage of growth, can be made up three or four inches in length, with from two to three eyes, and the foliage needs no trimming scarcely if one has plenty of room in the propagating house, and it is important to allow the cuttings a certain amount of room to lessen their chances of an attack of fungus.

Do not select any but the healthiest wood; remember you will reproduce just what you take off in the way of diseased wood, only the trouble will be exaggerated from year to year. Avoid twiggy wood, wood carrying mildewed foliage or red spider, for to use either will be a waste of time, and one had better buy their stock, either grafted or on own roots, from a reliable source, than to do the propagating in a slipshod manner. Do not take off much wood at a time, just enough to work off before it has a chance to become wilted. Select a cool, shaded place where there is no draught, and place the wood on some clean paper, sprinkle thoroughly, then trim up the cuttings with a very sharp knife, removing only the foliage that prevents their going deep enough in the sand. The cuttings should go from an inch to two inches in the sand, according to their length, the average cuttings will take about $3\frac{1}{2}$ inches between the rows, and should be placed about an inch and a quarter to an inch and a half apart in the rows. Use a stick that will fit neatly across the bench, 3 inches wide and three-fourths of an inch thick, an old table knife is a good thing to open up the row, using it as one would a saw instead of pulling it through the sand, for the latter way disturbs the sand too much. Do not open up the sand deeper than you wish to insert the cutting, and press the sand with the tips of the fingers firmly on each side of the rows. After placing several hundred in the sand, give the sand a soaking and mark where the watering was left off.

The propagating house must be kept shaded, and the best plan we have yet tried is to have screens made of cheap cotton cloth. These screens can be made wide enough to protect the cuttings, and six to eight feet long, and should be supported a foot to 18 inches above the plants. They can be arranged so as to lift quickly at the front, so the cuttings can be sprayed or watered, and can be removed after the cuttings begin to root, early in the morning and then in the middle of the afternoon, making it possible to harden up the cuttings (another important detail), whereas with a shaded roof the shading cannot be removed. Spray the cuttings daily during all clear weather, and do not let the sand become dry at any stage of their rooting period. When they begin to root, the watering can be slowed up somewhat, as the sand then needs only be a little damp, as within two or three days after root action starts they should be potted, the roots need not be longer than half an inch, when potting, for at this stage less roots will be broken and the roots will develop in the soil instead of the sand. If fungus should make its appearance in the bed, remove all the plants affected and reduce the water supply; this will not occur if a little air is allowed to circulate at all times, and a little lime is kept in the water barrels. If watering from a faucet, drop a lump the size of one's thumb in the watering pot; it may discolor the foliage a trifle but will do more good than harm; otherwise avoid draughts, keep the doors closed and the heat confined under the sand by the use of curtains. There should be a separate coil of pipes arranged to keep the house at the proper temperature, regardless of the coil used to bring the sand up to the best rooting

temperature. American Beauties will root readily providing real hard wood is not used or wood that is too soft, wood of medium ripeness being preferred. There are usually a number of canes on the Beauties remaining blind that can be used for propagating, and if the eyes found through the central portion of these canes are used, they will be found to root evenly; too near the butt they will drop their foliage, the tips for a foot or so back will be too soft, unless as is sometimes the case the growth has been checked, ripening the canes their full length. Give the Beauty cuttings all the room possible in the sand, at least do not let the foliage from one row overlap the one next to it. If, after the holidays, one's plants are cut back hard, it would be taking a great risk to rob the plants of any growth whatever for cuttings; better wait till they get to going good again, as there is yet plenty of time to get up a good stock of plants.

The plants should not be crowded after heavy cutting in midwinter; do not allow the temperature to exceed 58° at night and even on nights that are quite cold, a little air can be allowed to circulate. Now is the time when the stock will go back rapidly if not given every care. Avoid excessive feeding and overwater-

ing. If one has a house off color as to foliage, the foliage showing the effects of over-watering or feeding, keep the water off, reduce the temperature, and give plenty of air until they show unmistakable signs of healthy growth; many a discouraging looking lot of plants can be brought around with patience and a little extra care. Get out of the rose growing business, unless you have the time, the patience, and a love for the work; otherwise the results will be 0. E.

The Best Lily of the Valley.

ED. AMERICAN FLORIST:

We wish you would kindly advise us what lily of the valley pips are best for forcing, Holland, Belgian or German and why? Please state also length of time each kind requires for forcing.

ENQUIRER.

I have had but little experience in the forcing of Holland and Belgian lily of the valley, therefore I cannot recommend either. This leaves the German pips, which I find most satisfactory for my trade. From cold storage it requires from three to four weeks to mature.

J. T. BUTTERWORTH.

German lily of the valley is the best for forcing. New importations require about 24 days at 70° to 75° degrees.

HOUSE OF HYDRANGEAS AT ESTABLISHMENT OF J. W. DUDLEY & SON, PARKERSBURG, W. VA.

ing after heavy cutting, spray thoroughly when you do do it, and only on the brightest of days; do not forget to have the temperature at least 70° when starting to syringe. One cannot help being caught now and then with a wet house, by a bright day doing the reverse act; then it will do no great amount of harm if the fires are kept going and considerable air kept on throughout the day. If they are still wet when night comes, the houses should be run about two or three degrees warmer, with air circu-

later in the season they come quicker, about 21 days. German pips seem to be better matured on account of climatic and soil conditions. For very early forcing I prefer those from light sandy soil, for storage and later forcing those from heavier soil. B.

I force nothing but the German lily of the valley, either Hamburg or Berlin pips. The Berlin pips are used for early forcing while the Hamburg pips are preferred for late bloom. The pips in January and February, of the new

crop, usually take from 25 to 30 days. After that time they will bloom in about three weeks as the pips have been well frozen and had more of a rest and force much better as well as more quickly. JOHN MCFARLAND.

I regret I am not in a position to give the necessary information regarding the best lily of the valley for forcing for I have never had any Belgium lily of the valley and the only Holland lily of the valley I have tried, was not of sufficiently good quality to give it a fair test, and I have always used German lily of the valley. The time it requires to force German lily of the valley varies at different seasons of the year. When first secured it requires nearly four weeks to force it; whereas after it has been in cold storage six months it takes from 18 to 21 days, and after it has been in nearly a year, it forces in 14 to 16 days. I do not see why the Holland or Belgium grown lily of the valley should not be just as good as the German, if it has had the same age and good culture.

WALTER P. STOKES.

We find the German the best lily of the valley for forcing; in fact, at the present time we have nothing else. We have never grown the Belgian, but Holland pips we have tried a number of times and consider them unfit for forcing. In our opinion they are good only for outdoor planting. In some cases this lack of forcing qualities may be due to the variety, but mostly we believe it may be attributed to the Holland soil and climate, because a number of the Holland growers have advised us that it was grown from stock imported from Germany. As to the length of time it takes the pips to come into bloom, this varies from three to four weeks, according to the season, and also to the temperature of the house, which in the winter, when we have fire heat we can regulate, but in the extremely hot summer weather we cannot control the temperature.

A. N. PIERSON.

Bulbs for Christmas.

ED. AMERICAN FLORIST:

Can you inform us what bulbs we can have in bloom for Christmas? Are there any red tulips or Dutch hyacinths that can be brought in to bloom by that time? Will Orange phoenix grow in water and will it bloom by the holidays? H. G.

Paper White narcissus and Roman hyacinths are the bulbs most readily forced for Christmas. Duc von Thol tulips can also be brought into bloom by that time. The bulbs should be procured as early as possible and immediately potted and buried in order to induce root action. If sufficiently rooted they can be brought into the heat five weeks before Christmas and grown warm and in a shady location but under the best possible treatment the stems will be very short. The early varieties of Dutch hyacinths can also be bloomed by Christmas in the same manner, but they are also very apt to be disappointing. Orange phoenix can be grown in water in the same way as the other polyanthus narcissus but probably cannot be brought into bloom by Christmas in this manner. They are easily brought in by the holidays if grown in soil and in the same manner as Paper White narcissus if the bulbs are procured early enough.

GENISTA FRAGRANS IN 9-INCH POT FOR EASTER.

Genistas for Easter.

If the directions previously given have been carried out, no further pinching will be needed and the late plants can go straight away for flowering. The roots will have taken a good hold of the new soil and a little feeding may be given, increasing this by degrees until the flowers show color. Standard plants like that shown in the accompanying illustration are best for not being trimmed or clipped in too closely; the plants are more graceful when allowed to make a more or less natural growth which would be out of place in the ordinary bush shaped plant as grown for market. Anyone desiring to grow such plants should select young specimens with as straight shoots as possible and run them straight up to the desired height when they may be stopped and a head gradually formed by stopping the side shoots as they appear. It will take at least two seasons' growth to get well furnished specimens from the time the young plants are selected for the purpose and each year, of course, they will improve. Summer is the time for growth and as soon as the flowers are past the shears may be used to clip them into shape. Then

let them grow naturally, only stopping any shoots that seem to be taking an undue lead at the risk of spoiling the symmetry of the plant. The genista is a stronger feeder than the majority of hardwooded plants and to get the best results must never be allowed to suffer for want of manual sustenance. Guano, changed occasionally to soot water, is good feed for the plants, but practically any good fertilizer, properly used, will be suitable. It is a good, clean growing plant, not especially subject to insect pests, and its culture will well repay anyone who takes it up intelligently.

KOKOMO, IND.—W. W. Coles has gone to Houston, Texas, to put into shape his recent purchase of land there for orange grove purposes.

MANSFIELD, O.—The Berno Floral Co. will open a floral shop on South Park street. It is intended to have a big opening March 6, with a fine display of flowers.

LAREDO, TEX.—Miss Bettie F. Atlee has started a general florist business with cut flowers and plants and contemplates building a new greenhouse this year. The present winter is the first for four years that there has been either ice or frost.

MEMBERS OF THE TENNESSEE HORTICULTURAL SOCIETY AND STATE NURSERYMEN'S ASSOCIATION AT NASHVILLE, TENN.

Illinois State Florists' Association.

The sixth annual meeting of the Illinois State Florists' Association will be held at Champaign, Ill., commencing February 8 and ending February 10 at noon. Wednesday and Thursday, February 8 and 9, are the two main days. The banquet takes place on the evening of February 8. Among the addresses to be given will be one by J. C. Vaughan entitled "Live Issues for the Florist." Another address will be given by E. G. Hill on "Some of the New Things." Mr. Hill's opinion of the new plants which are being offered for sale to the florists this year should be worth the price of a trip to Champaign alone. H. B. Dorner will give a talk on the work done at the Experiment Station. This work at the Experiment Station has now reached its second year on carnations and consists of the same number of carnation plants being grown in small sections in the benches. These sections or controls are fed with commercial fertilizers, and compared with the same number of plants fed with the usual manure which the average grower would use, such as cattle manure, sheep manure, etc. The idea is to determine the best method of growing carnations in a commercial manner, whether by the use of the regular commercial fertilizer or by the use of the ordinary manures, to see which will produce the best results. Mr. Dorner having kept a record of the number of flowers cut from each little section. The growing of carnations in the most profitable manner is a vital point of interest to each florist. Also the point to decide whether the grafted rose plants or own root rose plants are the best. As both grafted and own root roses are grown in an experimental way so as to compare one with the other. Both of these are interesting points to every grower, and the trip should be made to investigate and hear the results of the experiments.

The Illinois State Florists' Association has joined with other commercial bodies in this state and secured an order from the Board of Railway and Warehouse Commissioners to reduce the express rates in this state 20 per cent. The express companies have got out an injunction against the Board,

C. L. Washburn.

President Illinois State Florists' Association.

claiming that it has no jurisdiction in this matter, but this will soon be decided. Other matters which the society have carried out will be reported on by the various committees. There will be an exhibition of various new varieties in roses and carnations which are being offered to the public this season. The E. G. Hill Co. has promised to show their new pink rose, Rose Queen, and also the new yellow rose, Mrs. Aaron Ward. This latter rose has been quite freely distributed in the east and has proven an exceptionally pretty rose. It seems to be a very free bloomer and the public has taken to it in good shape. The Hill Co. will also show some of their new varieties in carnations. The Chicago Carnation Co. has promised to exhibit all of their new varieties and a number of other growers have promised to bring in their new things. Baur & Smith, Indianapolis, Ind., will exhibit Pocahontas, their new carnation.

The banquet promises to be a very pleasant affair. Phil Foley has promised to be there with a brand new

stock of stories and this meeting will be a good opportunity for all of the members to become acquainted with each other, making new friends. All are invited to come, whether they are members or not. It only costs \$1.00 per year to become a member or \$10.00 to become a life member. The work which the association is doing is well worth the small expense of the dues and has been carried on without pay by the officers, most of the work having been performed by the secretary, J. F. Ammann.

At Nashville.

The trade has been rather quiet for a week or more. In fact it has been more or less dull ever since the holidays. The rose crop is off just at present but have been in great abundance. Geny Bros. had so many fine Killarney roses that for a time they were shipping to points further south. Carnations are fine and coming in abundantly. The weather has been so fine that some violets are blooming without any protection whatever. There has been a good sale on pot plants with an excellent variety from which to choose, azaleas, primulas, all kinds of bulbous flowers and ferns in endless variety.

The Tennessee State Horticultural Society and the State Nurserymen's Association, two organizations of allied interests, have just concluded the best and largest meeting in their history, at Carnegie Library, the Horticultural Society meeting one day and the Nurserymen's Association the day following. After an address of welcome by Mayor Howse, papers were read and discussed that were of general interest to fruit growers and an able and interesting paper on "Ornamental Trees and Shrubs" was read by Tom Joy of this city. Percy Brown of Spring Hill was elected president and the following vice-presidents were elected: for the state at large, Robert Morris, Nashville; W. M. Wood, of Bristol, for East Tennessee; Prof. John Daniel, of Nashville, for Middle Tennessee; Prof. W. H. Rochell, of Jackson, for West Tennessee. Prof. C. A. Keffer, of The University of Tennessee, Knoxville, was re-elected secretary and treasurer. The Horticultural Society closed its deliberations Thursday evening to meet Friday morning as the State Nurserymen's Association, the membership for the most part being identical, the two organizations working together. The address of

Prof. H. A. Morgan, of the University of Tennessee, "Science in Agriculture and Horticulture," was very interesting and instructive. Percy Brown in an address on "Cooperation and Organization" advised the stimulation of a "get-together" movement on the part of all state organizations interested in biological lines, that the federal and state organizations may have money enough to accomplish things and numbers enough to carry weight when legislation is wanted along these lines. The discussions on the problem of unskilled labor in the nursery business and cold storage of nursery stock was participated in by Robert Chase of Huntsville, Ala., W. P. Stark, of Louisiana, Mo., and S. W. Crowell of Roseacre, Mass. Other important and interesting matters were discussed, making the meeting one of the most instructive the organization has ever had. A. J. Fletcher, of Cleveland, was elected president of the Nurserymen's Association; vice-presidents as follows: At large, Henry M. Camp, Jr., of West Tennessee; J. H. Boyd, Memphis; Middle Tennessee, Charles R. Givens, Murfreesboro; East Tennessee, A. I. Smith, Knoxville; secretary and treasurer, Prof. G. M. Bentley, Knoxville. A smoker was enjoyed by the horticulturists, the nurserymen and their friends at the conclusion of the sessions. A quantity of fine apples that had been on display were distributed.

European Horticulture.

Authors' Flowers.—Keats and Shelley and Wordsworth had each a golden word for every flower they knew. The daisy belonged to them and to Burns; and to Sir Walter Scott the bracken, the harebell and the heather were a part of the "cellar air" of Scotland. Edward Fitzgerald was passionately fond of nasturtiums. Ruskin loved lilies, and great Florentine iris, and vine leaves, but his was a taste so catholic as to include the little prunella, which he called a "brownie flower." Hunted from lawns, crowded away into waste places, and forced to find foothold by dusty waysides and ditches, it is curious that this little blossom should have been praised by men so different, temperamentally, as Ruskin, Thoreau, and Emerson. Like Thoreau, Tennyson loved blue flowers. The Brownings, the Rossetts, Swinburne, Morris, Austen, were all garden lovers. Longfellow and Whittier were lovers of the New England flora, and Lowell was at his best when he wrote of the dandelion. Bryant was the gentleman's friend, and Hawthorne that of the arethusa. Dr. Holmes chanted the praise of box, and next after this cared for the little grape hyacinths or "blue bottles" that lurk about in gardens made in colonial days. SARAH ANDREW SHARP in *A White Paper Garden*.

Felling Trees by Wire.—A German inventor has discovered the way to fell trees by incandescent wires. His invention consists of an ordinary steel wire one millimetre in diameter, with a small attachment worked by a motor. The wire saws rapidly and evenly through the tree trunk, being heated to the burning point by the friction. During the first trial of the wire-cutter a tree 40 inches thick was cut through in less than six minutes. One of the advantages of this machine is that it cuts a tree close to the ground, or in the ground, through the roots. It produces steam instead of sawdust, and leaves a clean, smooth cut covered by a layer of charred wood so extremely thin as to show through it the recorded age of the tree.—*Journal of Horticulture*.

A Notable Witch Hazel.—No collection of hardy shrubs is at all representative without the witch hazels, and of them *Hamamelis mollis* is certainly the most decorative. It is now flowering freely in some gardens, and its curious yellow flowers, with twisted

petals, arranged upon leafless and drying-looking twigs, are sure to attract attention. Indeed, any plant having the courage to flower in the dead of winter naturally receives more than usual notice owing to its precocious nature. Witch hazels have long been cultivated in our gardens, and probably the best known are *H. japonica* and *H. virginiana*. They may be of the former known as *arborea* or *Hamamelis mollis*, a native of China, is of the more recent introduction than the others mentioned; resembles mostly the variety *arborea* when in flower, but is quite distinct from all others in its soft felt-like foliage. All of them seem to thrive quite well in ordinary garden soil, although preference is shown for that of a sandy nature, and a sunny position. There is one unfortunate mistake sometimes made in planting these shrubs, and that is in not choosing a suitable background to show off the flowers to the best advantage. The writer has seen cases where *Hamamelis* has been planted as a solitary specimen in the open on a lawn, where the flowers have not shown well owing to the lack of contrast. An ideal position is in front of some dark evergreen subjects.—*The Garden*.

Dahlias for Decorative Cut Flowers.

As an interested member of the New England Dahlia Society, I should like to make an appeal to the authorities in behalf of the dahlia as a decorative cut flower. I raise a few Cactus varieties, and recognize the difficulty of keeping long-stemmed specimens fresh enough for exhibition; but I also know that it can be done with some varieties. The flower is too beautiful on a long stem with its own leaves and possibly a bud, to have its head nipped ruthlessly off on a stubby short stem, and plumped in a bowl, as it is at exhibitions. Some will say that many of the most beautiful flowers do not have a good stem. Then I say do not grow that particular variety, but give its place to another just as beautiful with a stem. Why should that not be one of the conditions of a perfect flower? Certainly it is a beauty of form. If picked at night and plunged into cold water, care being taken not to wet the flowers, a good many of the best varieties are in condition to be handled and arranged very effectively in vases in the morning, and will keep nearly a week in the own garden. I have seen many of the best varieties very small, but always I had splendid specimens in the house.

The ones that proved the best, in my collection, for beauty of form, size, length of stem and ability to hold their heads up instead of drooping were: C. E. Wilkins, Mauve Queen, W. T. Rodgers, Mrs. W. H. Raby, William Marshall, Etruria, Lusitania, Imperial, Victorian, Kathleen Bryant, Mrs. George Stevenson, and Rev. Arthur Eridge. Surely people who grow a great many plants could add many more to the list that could be used to advantage as cut flowers as well as for exhibition. The dahlia will surely be more popular as soon as people find out how attractive it can be when not deprived of half its charm. I hope to see a class next year for dahlias on their own stems, with foliage, each vase to contain two specimens of the same variety. There are many reasons why it is desirable that the value of the dahlia as a cut flower should be demonstrated at exhibitions besides the one already stated. Nine people out of every ten who visit exhibitions probably do not know, cannot know, the habits of every flower shown. Imagine, then, the disappointment of the average person buying an expensive bulb of a variety seen at an exhibition, nursing it all summer, only to find when it finally blooms in the fall, that although the flower is very beautiful, it has a stem not more than

three inches long in the midst of foliage, and the branch it is growing on, just below the point, is at least an inch thick; besides this, the flower persists in doubling over. Or, again, it may have a good stem on the bush, but with all the care in the world you cannot make it stand up; unless it is plunged way to the flower in water, it will wilt and droop.

That is the kind of variety that would better be eliminated from catalogues, and I believe our best growers would rather grow fewer varieties and have those of the best, if they could; but they dare not risk displeasing a customer by not filling his order as placed; and not many customers are willing to have something substituted for what they order. They want what they want; but, in my opinion, it is the business of the exhibition to make them want right. But, most of all, do we, who love the dahlia, owe it to the flower itself that it shall be shown in all its beauty in the most artistic form possible.—M. M. H. in *Dahlia News*.

Glen Cove, N. Y.

The fifth annual dinner of the Nassau County Horticultural Society was held January 25, and was one of the most pleasing affairs the society ever had. The dinner was participated in by almost 70 members and their friends and when the cigars and coffee were reached President S. J. Trepass, in a brief speech, presented the retiring president, J. Duthie, with a piece of jewelry in behalf of the society. After gracefully accepting the gift, Mr. Duthie, in accordance with the promise made last year, presented the president, Mr. Trepass, with a ten-dollar gold piece for having won the most first prizes during the year, the second prize will be mailed to Mr. Wilson, he not being present. President Trepass, after acknowledging the gift of the gold, introduced the toastmaster of the evening, J. Austin Shaw, who made an efficient toastmaster, keeping the guests well entertained until time to run for the last train, with his poetry and by the choice of subjects for the different speakers upon whom he called.

The Rev. John Gammack spoke on the relationship between religion and gardening; R. Angus for the Tarrytown Horticultural Society; W. H. Waite for Yonkers Horticultural Society; W. Duckham for Morris County Gardeners' and Florists' Society; H. A. Bunyard for the S. A. F.; Chas. H. Totty for the Queen of Autumn. Mr. Totty immediately offered to the society for their next show, gold and silver medals for the best six sprays of the chrysanthemum Jack Everitt, Arnold Coolyear for the nurserymen; Mr. Bowne for the local club; Geo. Burnett for the bald-heads in horticulture; S. S. Butterfield for the trade press; W. E. Maynard for the horticultural press; W. Spelling for the seedsmen; Chas. Lenker for the common people; Mr. Davis for the local press. Interspersed among the oratorical efforts were songs by W. Rickards and Andrew Wilson; German and Scotch imitations by R. Schultz; an amusing monologue by W. Kinnear and skirling martial music on the bag-pipes by James Tough. Among those present from a distance were G. Burnett, R. Schultz, Chas. H. Totty, W. Duckham, A. Wilson, J. A. Shaw, W. E. Maynard, H. A. Bunyard, J. Ebel, J. Machiff, R. Angus, W. J. Waite, W. Spelling, W. Rickards, and THE AMERICAN FLORIST representative.

BROCKPORT, N. Y.—Mrs. H. Belden was compelled to give up her greenhouse business last year on account of illness and as she was the only one here there is now an opening for a florist at this point.

THE AMERICAN FLORIST

1885 TWENTY SIXTH YEAR 1911

Subscription, United States and Mexico \$1.00 a year; Canada \$2.00; Europe and Countries in Postal Union, \$2.50. Subscriptions accepted only from those in the trade.

When sending us change of address always send the old address at the same time.

Advertising rates on application.

From the first issue the AMERICAN FLORIST has accepted only trade advertisements.

Advertisements must reach us Tuesday (earlier if possible), as we go to press Wednesday.

We do not assume any responsibility for the opinions of our correspondents.

RENEW subscriptions promptly so that no copies of the papers may be missed.

We are in receipt of advance sheets of the cut flower sections of the National Flower Show schedule, which indicates that it will be ready for general distribution very shortly. For copies of the premium list address John K. L. M. Farquhar, Secretary National Flower Show Committee, 6 South Market Street, Boston, Mass.

PRESIDENT ARMUS, who recently attended the meeting of the National Flower Show committee at Boston, says plans for the big exhibition are progressing very favorably and that all indications point to the greatest horticultural display ever made in this country, with a record-breaking attendance.

Illinois State Florists' Association.

There will be a two days' exhibition held in connection with the meeting of the Illinois State Florists' Association at Champaign, February 8-10. All are invited to send flowers for this exhibition. Competent judges will be in charge. Anything new in roses or carnations, scoring 85 points or better, is entitled to the society's certificate. All flowers should be shipped to arrive not later than the morning of February 8, in care of B. Franks, Champaign, Ill. J. F. AMMANN, Sec'y.

Ladies' Society of American Florists.

The following committees have been appointed to act for the Ladies' Society of American Florists at the National Flower Show:

Prize committee.—Mrs. Chas. H. Maynard, Mrs. J. A. Peterson, Mrs. I. L. Powell, Mrs. R. Wittman.

Theater committee.—Mrs. W. H. Elliott, Mrs. W. J. Stewart, Mrs. Peter Fisher, Mrs. B. Hammond Tracy.

Reception committee.—Mrs. Albert M. Herr, Mrs. Julius Roehrs, Jr., Mrs. Chas. H. Totty, Mrs. J. C. Vaughan.

MRS. CHAS. H. MAYNARD, Sec'y.

Society of Horticultural Science.

The seventh annual meeting of the Society of Horticultural Science will be held at Tampa Bay Hotel, Tampa, Florida, February 9, 1911. Among the papers which will be read on different topics by eminent authorities the following are particularly interesting: "Factors which determine color in the forcing of roses," by M. A. Blake, New Brunswick, N. J.; "Pollen physiology," by J. B. S. Norton, College Park, Md.; "The rest period of plants," by W. L. Howard, Columbia, Mo.; "A mechanical and rapid scheme for the grouping and tracing of varieties," by R. S. Mackintosh, State College, Pa.

Massachusetts Agricultural College.

The special lectures before the short course in floriculture during the past two weeks have been especially interesting and inspiring. Friday, January 13, J. Otto Thilow spoke on "Active Floriculture stimulated by the Amateur." Mr. Thilow also gave a thorough description of the greenhouse ranges on the H. A. Dreer property near Riverton, N. J. He was enthusiastically received by the students and his talk was full of valuable suggestions. January 20, C. F. Boyle, who has charge of Galvin's Boylston street store, gave a lecture demonstration on design making. He spoke of the present demand for designs, especially galax wreaths and gave a demonstration of the manufacture of these wreaths with their various decorations, sprays, pillows, crosses and bridal bouquets. During the week the floricultural students were at work on various designs and there was a public exhibition of their work Saturday, January 28. Each student in the course made a galax wreath and decorated the same with roses, carnations, violets or other flowers. They also made one fraternal design or pillow. The short course men had table decorations in addition to this design work, and these were on exhibition at the same time. W. H. Elliott of Brighton spoke on roses January 27 and Eber Holmes of Montrose spoke on the same subject February 3.

Sterilizing Greenhouse Soil.

With the rapid growth of the larger cities and the opening up of suburban property, the land in the vicinity of many greenhouse proprietors has been rapidly bought up, divided into lots, and residences erected, and while this may be of advantage to them while in progress and streets are being cut through it is but a short time when the obtaining of new soil becomes a most serious problem. It then becomes necessary to make long hauls from farther back in the country, either by load or the shipping in by railroad, from miles distant. There is no question that, under modern methods of cultivation, new soil is an absolute necessity, but the old soil gathers in immense piles and must be disposed of and new soil obtained, which is an expense. The soil itself is but the storehouse from which the plants extract the ingredients necessary for their growth, and these can all be replenished, but one of the great drawbacks of old soil is that it has become full of vermin, fungous spores and bacteria. With the difficulty of getting new soil to replenish the greenhouses growing more year by year, it will be necessary to find some manner by which the old soil can be treated to make it as good as new. The only practical arrangement known that will thoroughly kill all animal life and fungous growths is by sterilization, and after this has been done, the necessary ingredients for plant life may be added and the soil replenished. The 20th Century Sterilizing Furnace placed upon the market by F. W. Walker of Louisville, Ky., has reduced to a minimum the cost of sterilizing soil for all purposes. It is portable and can be easily carried from place to place, handy to manipulate, and all the soil is thoroughly heated without having to stir or rehandle. It has good capacity, one furnace practically sterilizing 16 2/3 cubic yards per day. It has given good satisfaction and thoroughly done the work for which it is intended.

Concrete Construction.

ED. AMERICAN FLORIST:

Can you give me the address of any person who has successfully constructed benches of concrete and the method of constructing the same? Are there any objections to concrete benches or walls? Where iron bars are used could not the outside walls be made of cement blocks, the bars laid on top and filled in with slush concrete and the plate dispensed with? In a row of low, separate houses could not the gutter be moulded on the dividing wall?

J. N.
Concrete benches are successfully constructed by many greenhouse proprietors and in an article upon this subject in THE AMERICAN FLORIST, issue of April 17, 1909, p. 587, which was accompanied with detailed illustrations, Elmer D. Smith, of Adrian, Mich., fully explains such construction. No serious objections have ever been made to concrete construction in greenhouse work. It will be impossible to dispense entirely with the plate for it will be necessary to have wood on which to bed the lower lights of glass. It is a question whether a gutter could be satisfactorily constructed of concrete. It would have to be strongly reinforced and would be very bulky and heavy, and with the necessary strip of wood onto which the lower end of the sash bars would be fastened, very little would be gained in indestructibility.
W.

Meetings Next Week.

Buffalo, N. Y., February 7, 8 p. m.—Buffalo Florists' Club, 185 E. 11th street.
 Butte, Mont., February 10.—Montana Florists' Club, Columbia Gardens.
 Chicago, February 8.—Gardeners' and Florists' Union No. 10615, 10 and 12 Clark street.
 Danversport, Ia., February 9.—Tri-City Florists' Club, home of Harry Bills.
 Dayton, O., February 6, 8 p. m.—Dayton Florists' Club, 37 East Fifth street.
 Detroit, Mich., February 6, 8 p. m.—Detroit Florists' Club, Cowie building, 42-44 Gratiot avenue.

Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.
 For Plant Ads., See Ready Reference Section.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

Situation Wanted—As foreman; all around florist, where Am. Beauties are a specialty preferred. Key 376, care American Florist.

Situation Wanted—By first class decorator and storeman; ten years in last position; references. Address Key 352, care American Florist.

Situation Wanted—By single man, 24, in carnation section or where a general line of stock is grown; 7 years' experience. Key 385, care American Florist.

Situation Wanted—By seedsmen and plantsmen as seedsmen; 10 years' English experience four years' American; good address; state wages offered. Key 373, care American Florist.

Situation Wanted—First class storeman and decorator wants position in good store, preferably in New York; eight years' reference from last employer. Address Key 383, care American Florist.

Situation Wanted—Practical gardener with experience in vegetables, flowers, fruit, grapes stock, fowls, has good recommendations, wishes position; married. Address Box 542, Whiting, Ind.

Situation Wanted—As foreman or manager in up-to-date commercial place, wholesale or retail, by competent grower of first class stock; life experience; middle aged, married. J. H., 712 Greendale St., Meadville, Pa.

Situation Wanted—Bulb grower and salesman, employed 11 years' experience in traveling (U. S., England, Germany, Sweden, etc.), wishes to secure another situation as buyer or salesman; excellent references. Address Key 377, care American Florist.

Situation Wanted—Specialties and supplies. Young man with twenty years' German and American experience in commercial floriculture, landscape gardening, fruit and vegetable culture, seeks engagement as agent or representative with reputable house, under salary, commission, or both, for Missouri. HENRY ROHRBACH, 3227 Washington Ave., St. Louis, Mo.

Situation Wanted—By nurseryman from Scotland, married, with 30 years' experience in Scotch nursery; well up in bedding and grating, and with thorough knowledge of the propagation of fruit, forest and ornamental trees, shrubs, conifers and roses; good correspondent and salesman, and accustomed to superintend landscape work. Address JAMES W. LAIRD, Proctorville, O.

Help Wanted—Good general man for store. Address Key 394, care American Florist.

Help Wanted—Man to do the work in small city park; one who can do some ornamental bedding; will pay \$60 per month for 10 months. Address PARK BOARD, Garden City, Kansas.

Help Wanted—All around young man with some experience in greenhouse and hotbeds; must be willing to do anything and a truck driver; state wages with board and lodging in first letter. WILLIAM HILD, Milesville, S. Dakota.

Help Wanted—At once experienced grower of all lines of commercial greenhouse stocks, bedding plants and vegetables; wages \$60 per month, increased to \$75 next fall when will be expected to take charge of small up-to-date plant.

SASATCHWAN GREENHOUSE, Prince Albert, Saskatchewan, Canada.

Partner Wanted—\$1000 will buy half interest in paying, old established seed business, well located in large growing, active city, center of many suburbs, and contiguous to large farming area. Active associate desired to cooperate in extending the business. Address HARRIS-DIBBLE COMPANY, 71 West 23rd Street, New York City.

For Sale—Small but good florist business; 1,500 feet of glass; cottage; 50 ft. length of hot beds; in fast growing town in Oklahoma; no competition; \$1,200 if taken at once. Key 369, care American Florist.

For Sale—At great sacrifice; three-fourth acres, six-room house, cellar, cistern, pressure water, chicken house stable, greenhouse, 1000 ft. glass; no stock; hot water heat; good market; no competition within 70 miles; splendid chance for young man; must be sold; make offer. Address JOHN L. BRADY, Medicine Lodge, Kansas.

For Sale—Greenhouse property; wishing to change climate on account of rheumatism. I offer for sale my business consisting of about 12,000 sq. ft. of glass, four greenhouses, seven acres, two city blocks of land, good 5 room dwelling, heated by steam from greenhouse boiler, barn, artesian well; place in good repair; located at St. Peter, Minn., a city of 5000; no opposition; good soil; write to ST. PETER GREENHOUSES, St. Peter, Minn.

WANTED

A partner to take a half interest in a prosperous retail flower store in the business district of Chicago, or would sell the entire business. If the right party is looking for a good thing and means business, address

Key 374, care American Florist.

WANTED

An A No. 1 florist to take charge of large greenhouse. Must be competent; permanent position; single man preferred.

Also two assistant vegetable gardeners, write

C. F. APPELEGATE,

Mt. Pleasant State Hospital, Mt. Pleasant, Ia.

Store Manager Wanted
With \$5,000 Capital

Must be capable of conducting a large store business established many years in a prosperous city in the middle west. Applicant must be competent also to market advantageously the considerable greenhouse output of high grade plants and cut flowers. Address

Key 378, care American Florist.

GREENHOUSE FOR SALE.

Consisting of 6 greenhouses, 16,000 feet of glass, all built within the last three years, and 13 acres of land, located on steam and electric railroad, in a prosperous and growing town about 25 miles from Cleveland, O. Double strength glass, Garland gutters with iron supports, 50 h. p. boiler, 350 barrel cistern city water. Good stock of plants, bulbs and flowers. In all respects a most desirable property. Will be sold at a bargain. Price: \$11,000; part cash, balance on time. 344 The Arcade, Cleveland, O.

For Sale

Five modern greenhouses with complete stock of ferns, plants and mums, also a Kroschell boiler, piping, 150 new hotbed sash, one horse and four wagons. Will lease the ground, store and 6 room flat (hot water heat) on favorable terms for five years with privilege of buying or renewal of lease. \$5,000 cash and balance of \$3,000 on time takes this fine paying business that has been established for over 20 years and has a good steady trade. Reason for selling, owner expects to leave the city. Possession about June 1. Apply in person or by mail or phone to

PETER SROCZYNSKI,

1525 N. Harding Ave.,

Phone Humbolt 299. CHICAGO.

Trade Directory For Names

THE AMERICAN FLORIST COMPANY'S Trade Directory for 1910, fully revised to date, with thousands of new names and changes of address now ready for distribution. It contains 670 pages, including complete lists of the Florists' Seedsmen and Nurserymen of the United States and Canada, arranged both by states and towns and all names alphabetically. Also lists of Foreign Merchants, Firms which issue catalogues, Horticultural Supply Concerns, Parks, Cemeteries, Landscape Architects, Experiment Station Horticulturists, Botanical Gardens, and much other conveniently indexed and invaluable trade information.

# The "Spencer" Type of Sweet Peas

## Burpee's Special Re-selected Stocks for 1911

"Spencer" Sweet Peas are a great specialty with us! We were the first to grow the seed in America—the stock having been entrusted to us before introduction, even in England, of the original **Countess Spencer**. We have grown "the original Beauty" and its many "sportive" children with painstaking care each season since. There are but few other growers who can supply an equal assortment of **True Re-selected "Spencers"** that are uniformly of such choice quality. Seedsmen and Florists can see how superior our stocks now are by the trials at **Fordhook Farms** next June or July, while those who may be in California are invited also to inspect the growing crops at our **Floradale Farm** in the beautiful Lompoc Valley. Every planter's garden, however, is really a trial ground, and we shall be quite content if any "Doubting Thomas" will send us only a portion of his order and **note the difference** in character of flowers produced.

 You can buy so-called "Spencer" Sweet Peas at half our price—but the result will only be disappointment—and when in flower you will surely admit that you would gladly have paid even double our prices to have had the **Burpee-Quality** of the **True Spencer Type!**

|                                                                                                                       | Per pkt. | Per oz. | Per ¼ lb. | Per lb. |

Buy Direct of the Grower and Get Fresh Stock

## BASSETT & WASHBURN,

Office and Store: 76 Wabash Ave., Chicago

Greenhouses: Hinsdale, Illinois

#### Chicago.

##### A GREAT SHORTAGE OF STOCK.

The bright pleasant weather, which the growers are so anxiously awaiting, seems very slow in coming, for the days are dark and mostly cloudy, and the cut at all the houses is greatly reduced. "One of the greatest shortages the dealers have ever experienced in recent years" is the way that one of the wholesale merchants states the present condition of the flower market, and the same state of affairs must be existing all over this section of the country, for the demands are being received from all directions, and in many cases it is not a question of price, but to get the stock. In some cases the retailers have made a personal visit, traveling from a distance, to see why they cannot procure the necessary stock, failing to understand why the market is so short. Roses, especially white and pink, are picked up and shipped as fast as they arrive at the stores. The only roses seen in the retailers are American Beauty and Richmond, all the Killarneys, My Maryland, Bride and Bridesmaid finding an immediate purchaser. Carnations are receiving an extra heavy call, the shortage of roses, of course, making an extra demand for this, the second choice. But they, too, are being received in smaller quantities than usual, which rather aggravates the situation. White carnations are bought up at once and the light colors find early sale. McKinley Day, while not observed to any appreciable extent in the city, caused an extra call the last of the week. Violets are quite plentiful and orchids are in much greater supply, which enables the retailer to fill extra nice orders in a satisfactory manner. Sweet peas are none too plentiful; the dark weather seems to have also had its effect upon them. Lilies and callas are offered and find

good sale. Lily of the valley is of extra fine quality and the demand is fully equal to the supply. Bulbous flowers are becoming more plentiful and of better quality. Tulips are very fine and are especially useful during the shortage of roses and carnations, and are greatly appreciated. The narcissus are late this year, there being little seen as yet but Trumpet major, Campanules and Paper Whites, the larger flowered varieties and Von Sion not yet appearing in any quantity. There is a fine lot of freesia, some extra good mignonette and Roman hyacinths upon the market which fill in nicely. The retail stores are all enjoying good trade, society functions being at their height and there is also considerable funeral work. Preparations for St. Valentine's Day are in progress.

#### NOTES.

Vaughan's Nurseries, Western Springs, Ill., acquired the 80 acres adjoining their property which they had leased during the past year, the increased demand for nursery stock rendering this course necessary. This addition gives the firm a total of 120 acres, strictly for nursery purposes and will be devoted to popular trees, shrubs and hardy herbaceous perennials. John Canger, the hustling proprietor of Canger & Gormley's, is kept very busy in arranging the many orders for wedding and dinner decorations that this firm is executing. During the shortage of roses and carnations a large number of tulips, jonquills and other spring novelties are used in the decorations and are giving splendid satisfaction.

At Vaughan & Sperry's we noticed a fine display of bulbous stock of all kinds, freesias are arriving in splendid condition and in such quantity that they are able to fill all orders. This firm is enjoying exceptionally good

business, the shipping trade being excellent.

The Chicago Carnation Co. continue to receive a large number of orders for rooted carnation cuttings, and up to the present writing 65,000 have been delivered. The new variety, Washington, is greatly admired and is in good demand.

Exceptionally good business is being enjoyed at the store of A. Lange on Madison street, and the flowers are as usual of the best quality and the fine display which is made in the window is always attractive to the shopper.

Kyle & Foerster are offering a splendid grade of Couronne d'Or and La Reine tulips, which are arriving in quantity. Sweet peas are also being received in good condition and a large supply was seen at the store this week.

Henry Mundt, a pioneer florist of Forest Park, died at his home January 25, at the age of 52 years. The funeral was held from the residence January 29 and was largely attended. The interment was at Concordia cemetery.

Peter Reinberg is filling a large number of orders for a choice grade of American Beauty roses, which are arriving in such quantity that they are able to take care of all calls for them.

George Reinberg is cutting a fancy grade of Richmond and White Killarney roses. The lilies that this firm is offering are of extra fine quality and are eagerly sought for by the best trade.

Fred Liebermann resigned his position as head shipping clerk at Vaughan & Sperry's and will take charge of the store which he recently purchased from Mrs. E. Lundberg at 1611 Wells street.

The new show window which is being placed in the store of H. C. Rowe in the Palmer House will add to the attractiveness of the store.

# ROSES

**Extra fancy KILLARNEY, WHITE KILLARNEY,  
RICHMOND, BRIDE, BRIDESMAID, and  
AMERICAN BEAUTIES.**

## CARNATIONS

**A large quantity in all the leading varieties. Our stock  
is all of a high grade quality and is bound to please.**

**No Order Too Large.**

**No Order Too Small.**

# HOERBER BROS.

**Wholesale Growers of Cut Flowers**

**51 Wabash Ave.,**

Long Distance Phone,  
Randolph 2758.  
Automatic 41770.

**CHICAGO.**

Edward and Harry Dale of Brampton, Ont., spent the greater part of last week in this city, returning home January 28. They visited the Chicago Carnation Co.'s greenhouses at Joliet, Bassett & Washburn's range at Hinsdale and the Peter Reinberg establishment in this city.

Hoerber Bros. are cutting a fancy grade of carnations in all the leading varieties, with Enchantress and Winsor showing up remarkably well. In roses, Richmond, Killarney and Bride are arriving in splendid condition and are sold at an early hour.

Clifford Pruner is again seen at his desk at E. H. Hunt's after having been confined to his home with a severe attack of la grippe. A. F. Longren, the traveling representative of this firm, helped out at the store during Mr. Pruner's illness.

Weiland & Risch are headquarters for carnations, and a fancy grade of all the leading varieties can be seen at the store this week. Their growers are certainly deserving of much credit for the splendid stock that they are sending to the store.

The J. B. Deamud Co. is enjoying exceptionally good business and a large quantity of bulbous stock is sold daily. The carnations that this firm is receiving are of extra good quality and sell as soon as placed on sale.

Chas. W. McKellar is receiving a fine grade of Dendrobium noble, vandae and other choice orchids. Cypripediums are arriving in quantity but the heaviest crop of Cattleya trianae is about over.

Fred Nichols resigned his position at the Geo. Reinberg store January 21, and left for Peoria the following day to take charge of the store he recently purchased in the Ray Hotel.

T. E. Waters, with the A. L. Randall Co., returned January 27 from a successful western business trip.

## Fancy Carnation Blooms

### THE PLEASING KIND

Our Carnations are arriving in splendid condition, and give satisfaction.

# PETER REINBERG, 35 Randolph St CHICAGO.

the flowers and reaching a number of people who probably would not have thought of it.

The deep thinking and sanctimonious office force of a flower store sometimes forget themselves and breathe the same atmosphere as others. On a recent date one florist was speaking of a beautiful cattleya they had seen, when the office forget finances, and said, that a cat-lay on her desk and covered all the papers with hairs, much to her displeasure.

A visit at the Wm. Scott Co. recently found their stock in good shape, some fine pans of bulb stock, also azaleas and cyclamen, making their show house very attractive. Business being reported good by R. A. Scott.

The next meeting of the Buffalo Florists' Club will be a busy one. Nominations for officers will be in order, also a debate which has been arranged by chairman McClure of the essay committee.

"I am surprised at John Kramer. He should have known that his nose was not as solid as Kasting's zinc counter." "Back up to the counter next time, John."

Wm. F. Kasting has been a busy man, a trip to Albany and Boston taking about a week. President Asmus of the S. A. F. called and reported things booming.

From reports of different growers everything looks good so far in Easter stock. Before we know it everyone will be talking Easter.

L. H. Neubeck has been cutting some very fine lilies.

Visitors: S. Green, of H. Bayersdorfer & Co., Philadelphia; Arnold Reuger, Chicago, and the representative of Schloss Bros., ribbons, N. Y., not forgetting more bulb men.

BISON.

North Manchester, Ind.

The Northern Indiana Florists' Association held its quarterly meeting at North Manchester, Ind., January 18. The local florists, J. J. Martin and Harry White, entertained the visiting members at the Young Hotel. After a sumptuous banquet the meeting was called to order by the president, N. N. Dederick, in the parlors of the hotel, where business was at once begun and continued in a long and interesting session, to the material benefit of all present. The exhibits were not so large as was anticipated but what was shown was far above criticism. Harry White of North Manchester showed fine White Perfection and Victory carnations, Johnson Floral Co., Kendallville, a collection of several varieties of carnations; Wagener Floral Co., Columbia City, a pink seedling rose with long, stiff stems and Enchantress carnations from a two-year-old bed, both of which were declared "all right." Stewart & Haugh, Anderson, showed violets which were marvelous, with stems almost a foot

#### A TRYING PERIOD.

The month of January just past will be remembered as a period quite trying to the retailers and most unpleasant and unprofitable for the wholesalers, because of the general shortage of roses and carnations. Local growers, like most others throughout the country, were off crop with these two staple items. Retailers, however, by the free use of galax, cypas and magnolia leaves for funeral work were enabled to greatly reduce their real and fancied difficulties. Violets, too, were fine and always plentiful, and offered at such reasonable prices that made them an important factor in solving the question of supply and demand in the better class of flowers during the shortest and coldest days of the year. Bulbous flowers are now appearing in daily increasing quantities, but no surplus is yet apparent except in the one item, Roman hyacinths, and they seem to keep losing in popularity in this market.

#### NOTES.

Chas. Warneke has just completed, in a novel and beautiful way, the decoration of his store and increased its size by a room 16x32 feet. His prosperous business has encouraged him to make plans for an extended European trip soon after the spring trade is ended. Miss Josephine Mero of this establishment spent last week in Grand Rapids.

M. Bloy, undismayed by the loss by fire recently of his stable, is rebuilding and increasing its size to a two story structure 20x50 feet. His auto that was destroyed in the same fire will be replaced soon with a larger and better one. His business is splendid and fast increasing.

Harry G. Smith, formerly of Grosse Pointe, has opened a floral store on North Woodward avenue opposite the Evergreen Cemetery. All in the trade wish the genial Harry much success in his new enterprise.

Louis Charvat has been quite seriously ill with stomach trouble, but is now much improved and considered out of danger.

Herman Knappe, who has been for some time ill, is now doing well and expected to resume his work before long.

B. Schroeter expects to occupy his new and beautiful residence on Helen avenue some time next week.

Earl Metz, of Mrs. Freeman's store, Toledo, visited the trade last week.

J. F. S.

### Cleveland.

#### MORE STOCK ARRIVING.

The more days of sunshine the past week has helped wonderfully, for more stock arrived during the latter part of the week than for some time past, and wholesalers were able to fill orders more satisfactorily. Roses, however, still remain very much short of the demand. Sweet peas have been rather a disappointment to some growers, and one or two have thrown out big lots to make room for other stock, not enough sunshine caused them to go to the bad. Callas are coming in quantity and find a ready market. Paper White narcissus and tulips are abundant. Lily of the valley is plentiful and the quality exceptionally fine. Violets do not move any too well. Smilax is good and greens of all kinds seem to be in sufficient supply to meet all demands.

#### NOTES.

An enthusiastic meeting took place at the Florists' Club January 23. Several new members were admitted (this is getting to be a regular thing). The financial standing of the club is improving wonderfully, as the new secretary, F. H. Friedly, is a hustler, receipts for the evening being \$25.00. Come and join us in a bowling match,

**U S Budlong's  
E Blue Ribbon Valley.**

telling funny stories, or pitting your wits against the rest in a friendly game of cards. Next meeting night, February 13, which is the night of the big show.

O. Reep, North Olmstead, is sending in a fine lot of tulips of all colors, daffodils and other bulbous stock.

John Bleckschmidt has a new boarder, who arrived January 22. It is a fine boy. Mother and babe are both doing nicely.

Jas. Eadie Co. are cutting a fine lot of tulips of all colors at their greenhouses which are exceptionally fine.

M. Gaul of the Cleveland Cut Flower Co. is laid up with rheumatism and unable to attend to his work.

A. M. Coe has been appointed administrator of his father's estate.

I. Kennedy has been very ill for some time.

MARKET IMPROVING.

There is some improvement in the condition of the cut flower market, and more material is coming in; but neither in quality nor quantity is it up to a high standard of requirements. For the past week roses about kept pace with demands, or at least there was such an opportunity for apportionment that there was no acute complaint; carnations were more abundant, but by the end of the week the stock was pretty well cleaned out. Violets were in good supply, and some, perhaps, went to waste; valley, lilacs and gardenias were not at all overabundant. Trade was fairly active, there being a great many entertainments, dinners, etc., and the opera season, which makes occasion for many social affairs, has opened. The weather has been extremely soft, with warm rains and southerly winds. The moisture is penetrating the long dried soil and the springs and water courses are recovering their lost volume. There is practically no frost in the ground and outdoor work goes on apace. Doubtless, this condition is not to be continued for very long, the chances being that we will wake up soon to a renewal of winter temperature and rude storms.

George W. Williams, for several years a member of the City Park Commission, has been elevated to its presidency to succeed the late General Ferdinand C. Latrobe. Mr. Williams is a lawyer, active and vigorous, enthusiastic as to the work of the board, and with a great interest in public playgrounds, which are run as adjuncts to the park operations. The selection seems well received.

John J. Perry, as a matter of course, was elected manager of the Florists' Exchange and congratulated on the success his operations have achieved for it in the past year. Mr. Perry has gained the confidence of growers and consumers alike, and is building up a shipping trade which, naturally, ought to center in this city.

James Hamilton has had some shipments of carnations of remarkably good quality which bring top prices.

#### STOCK NEARER DEMAND.

The cut flower supply is getting a trifle nearer the demand but prices have not softened to any great extent. The stock of roses is showing again although American Beauties are still not equal to the demand, and prices are still at the top for the season. Killarneys are more plentiful and some grand stock is seen. White Killarneys are still very scarce, as are all white roses. Richmonds are a trifle more plentiful but sell up clean every day. Carnations are in such demand and the shipments so light that very seldom is any stock carried over into the next day, there being a good shipping for all colors. The sweet peas are also in much better supply and move lively, as they are great favorites with the public. Freesia is now a staple and finds a ready sale. Some growers do this plant so well and others send in such poor, trashy stock. A trip to town once in awhile to look with "open" eyes over the market would be time and money well spent for a good many growers. Daffodils, tulips and narcissus are now seen in quantity and are all finding a ready sale. The daffodils are a dollar lower than last week, while the Paper Whites are held at half a dollar higher. Lilies have been scarce the past week, local crops being off. Some very fine eastern stock saved the situation. Violets are about equal or a little above the demand; prices of the singles have softened a trifle. Orchids are not quite so plentiful as last week and prices have hardened. Lillium Roseum is now seen in the market almost all the time and finds a fair demand as a fancy flower. There is a good sale for all kinds of greens, asparagus plumosus and adiantum selling up close all the time. The retail men say that there are quite a number of luncheons and dinners, which, with other entertainments incident to the season, is keeping up a demand that compares favorably with that of last year. The wholesale men say the shipping trade is good.

#### NOTES.

The trade were very much shocked to hear of the death of Samuel C. Moon—such a genial gentleman, such a useful member of the craft, one who was so well versed in everything pertaining to his profession; a man in the prime of life but a few weeks ago. The pleasant outing of the Florists' Club to the old historic Morrisville Nursery, where they were so well entertained, has always remained a bright spot in the memories of those fortunate enough to be present.

The Leo Niessen Co. state they can scarcely get enough good stock for the demand, which must surely be large, judging from the great number of boxes seen opened up here every morning. An additional line here is choice New York or Hudson River violets. Their bunches of 100 blooms are certainly choice and would grace any store.

Berger Brothers are handling fine Richmond roses. Exceptionally fine Lady Campbell violets are a feature. Several growers who carry and deliver their stock make this house their morning headquarters and 7:30 to 8:30 is a busy hour here.

Ed Reid's special American Beauties have been a leader the past week and two. He said "They are everything anybody could desire only there was not enough of them."

The Florists' Club five played a match with the Jenkintowns on the club alleys on Monday night last, the Florists winning by 88 pins. Robinson was high man, making a total of 607, with high game of 224. The return match will be played on the Jenkintown Club alleys on February 13.

### Pittsburg.

#### STOCK MORE PLENTIFUL.

Business has been very good the past week, with stock a little more plentiful. The few days of sunshine are having a telling effect on the market. McKinley day created quite a demand for carnations, greater than any previous year. No rise in prices moved a bulk of them and made it possible for all to wear a flower and make the annual custom more popular. Bulb stock of all kinds is very plentiful.

#### NOTES.

Randolph & McClements' wagons and autos can be seen plying in all parts of the city, the last week being a very busy one for them.

Syracuse, N. Y.

Between 3,000 and 5,000 carnations were sold by Syracuse florists and worn in this city Sunday, January 30, McKinley day. The morning was bright and clear and spring-like, and of the city's great procession of church-goers there were few men or women who did not wear the carnation. Dealers said that a greater number were worn than on any McKinley day for a number of years. Early Sunday afternoon a heavy rainstorm set in and lasted until evening, spoiling the late day trade for the dealers. Warren E. Day, who recently opened a new store in the Onondaga Hotel building, said that he had sold more than double the usual number of carnations for a Sunday. "Also," he said, "the trade in these flowers on Saturday afternoon and night was astonishingly heavy, many people having bunches of carnations sent to their homes in order to have the flowers to wear to church next day."

PRICES STILL HIGH.

The condition of the flower market remains about the same as last week. Roses are very scarce and bring high prices. Carnations have shortened up and prices have advanced. This is especially true of the white and lighter shades, which is undoubtedly due to the scarcity of white roses, resulting in an increased demand. Sweet peas have shortened up and are selling very readily for more money. Bulbous stock is coming into this market in good supply, and is selling at as good a price as is usual at this time of the year. The wholesale dealers report a very good business, and the condition of the market is in their favor, as the salesmen in the flower markets sell their daily receipts of stock early in the morning, and buyers later in the day are forced to the wholesale stores for the flowers to meet the wants of their trade in their respective localities. The retailers report a good business, for while the supply is short, the demand is not extra heavy, and they are able to dispose of their stock on hand at good prices, and that is more satisfactory than to have a lot of material laid on their hands unsold, but if the demand was much larger it would be almost impossible to procure flowers of some varieties to supply their customers.

NOTES.

All the flower lovers in this vicinity are looking forward to the National Flower Show which is only a little more than a month away, and the report is that preparations are progressing favorably, and it is the general opinion that it will be the largest show of the kind ever held in this country, and that it will be national in character as well as in name.

Fred L. Hardy, of Natick, has gone into voluntary bankruptcy with liabilities of \$5,619 and his assets are \$200.

Thomas Pegler is handling the usual good quality of flowers from his consignors and reports business good.

Lester Mann is bringing in a large quantity of bulbous stock and other flowers from the houses at Randolph.

E. J. Rokean reports a very good business in the line of stock which he carries.

H. C. W.

CHARLESTON, W. VA.—The annual meeting of the West Virginia Horticultural Society was held January 25-26 in the rooms of the State Board of Agriculture. The usual fruit exhibition was held and important papers read and discussed.

## New York.

## A SATISFACTORY MARKET.

The cut flower business is running along quite smoothly these days, stock is not too plentiful, prices are averaging fairly well and, excepting perhaps, those who buy stock for speculative purposes, everybody is content, and how rarely does such a condition prevail in this market? All the varieties of roses that are coming in are clearing out quite satisfactorily. There was a day or two in the middle of last week when the weather was decidedly unpropitious, that they dragged a little, and which tended to reduce the averages for the week. Aside from that, roses have done well and Killarney is assuredly the favorite over all other roses. Demands for carnations are keeping fairly even with the supply, prices holding quite steady. Violets, while not realizing fancy prices at all, manage to clean out at some figure or other. Single varieties are, we believe, making slightly better averages than the double varieties. Lilies are getting rather more plentiful and are selling just a trifle cheaper than they were. Callas are suffering no depreciation in value as yet. Tulips are plentiful but they sell out fairly well, with little change in values. Narcissus, white and yellow both, are meeting with fair demand. Gardenias are somewhat scarce as yet. Orchids are plentiful enough for what demand there is, second grade flowers are offered at extremely low figures. Lily of the valley is a rather unsatisfactory proposition, the demand is erratic. Sweet peas are, if anything, not quite so numerous as they were one week ago and sell fairly well. Lilacs are more plentiful; some of it coming in now is very good, indeed. Cut branches of forsythia are a feature in some of the stores. Pansies, forget-me-not, snapdragon, wall flowers and marguerites are all coming in regularly. Asparagus and adiantum are all available in quantities; in fact, the smilax continues to be a little too plentiful for the regular demand and accumulates to quite an extent.

## NOTES.

The many friends of Wm. Amos, one of the most prominent men of the Cut Flower Exchange since its inception, will hear with regret of the death of his son, Wm. Amos, Jr., after a short illness. The funeral took place January 29, interment being in Mount Olivet cemetery. Mr. Amos was 39 years of age and leaves a wife and five children. Almost five years ago the father relinquished the greenhouse establishment at Woodside to his son, who has just died, and since then has resided in Amityville, N. Y.

Abram's, a Brooklyn retailer who for over twenty years has had a stand in the neighborhood of Hoyt and Fulton street, assumed control of the plant and flower departments of the Abraham & Strauss department store on February 1. Weir's have had charge of these for a few years.

A stockholders' meeting of the Greater New York Florists' Association will be held February 6. Manager Crawbuck reports that the past year has been a most prosperous one for the association, and that at the annual meeting a ten per cent dividend will be declared.

Chas. Trepel is home again from a vacation trip spent in the northwest. We understand that in the near future Mr. Trepel will establish a plant and flower department in the Gimbel store similar to those he is now operating in Loeser's and Bloomingdale's.

The retail business at Seventy-third street and Lexington avenue, long known under the firm name of J. B. Nugent & Son, is being moved to 789 Madison avenue. A consolidation of the Nugent brothers has been made

and hereafter the firm name will be Young & Nugent.

R. E. Savage, Broadway, near Eighty-fifth street, has been showing many tastefully arranged baskets of bulbous flowers lately. Cattleyas and gardenias were also conspicuous in their window arrangements.

Lappos Bros., Ninety-third street and Broadway, report business with them very good this season. They have been in this vicinity for almost twenty-five years and have built up quite an extensive trade.

The Rosemary Flower Shop, Ninety-first street and Broadway, although opened but about four months ago, is meeting with a good measure of success and the owners are much encouraged with business results so far.

The Boulevard Floral Co., Broadway, near Eighty-eighth street, is showing very attractive windows of flowering plants. This firm has been located here during the last twelve years.

Chairman J. Lewich, of the outing committee of the Florists' Club, has called a meeting of the committee for 7 p. m. in the club rooms on the night of the next meeting, February 13.

A. L. Fortunes, for fifteen years a collector and dealer in florists' greens at New Haven, Conn., has opened a store for the sale of hardy ferns, etc., at 93 Broadway, Brooklyn.

The stock and fixtures of The Boston Florist, corner Thirty-fourth street and Fifth avenue, was sold January 30 by order of a marshal in execution of a judgment.

In the show window of The Smart Set, Broadway, near Eighty-third street, a large vase of the new rose Melody was a special feature one day this week.

The third annual dinner of the New York and New Jersey Association of Plant Growers was held in the Cafe Martin, Thursday evening, February 2.

Kessler Bros., wholesale plantmen and florists, are handling some extremely good specimens of bougainvillea and double flowering cherries.

Ordonez Bros., retailers, have moved from 825 to 900 Sixth avenue, where they have much more commodious quarters than formerly.

Hoffmeier, Broadway, near Eighty-seventh street, is featuring spring flowers quite extensively in his window displays.

A. Moltz & Co., wholesale florists, have added two new telephones to their establishments, a sure sign of progress.

A directors' meeting of the Cut Flower Exchange will be held Saturday, February 4.

Phil. Kessler is home again from a pleasant trip to Bermuda.

Visitor: H. C. Geiger, of the Florex Gardens, North Wales, Pa.

## Washington.

## BUSINESS EXCEPTIONALLY GOOD.

The business of the past week was exceptionally good. There were many elaborate decorations for dinners, balls and luncheons and an enormous amount of fine stock was used. Although January weather has been much more favorable to growers than the closing weeks of the past year, there is yet a shortage of good tea roses and carnations. Tulips and narcissus are now in good supply and help out well in the shortage of roses and carnations. There are also many good flowering azaleas, which in some instances are broken up and used in dinner decorations. There is nothing doing here on "carnation symposiums," excepting that the crimson varieties go slow. All good pink and white carnations sell well. There are many fine single violets in the market and they seem to be preferred to the double varieties.

On January 28 the A. Gude & Bro. Co. received from the Greenhouses 146,000 Princess of Wales violets. In addition to the large number they used in their retail trade they were able to supply a number of the other retailers. They also supply the local trade with many fine American Beauty roses and gardenias.

A notable feature of F. H. Kramer's F street store is the conservatory in the rear where he keeps a splendid stock of flowering and foliage plants. A fire in the store on the afternoon of January 21 caused a loss of about \$1,000.

George Field, the veteran orchid grower of this city, is rapidly recovering from a severe attack of rheumatism. It may here be mentioned that it is to Mr. Field that the trade is indebted for the American Beauty rose.

Alex. B. Garden, the well known grower, is showing exceptionally fine stock of Killarney roses, carnations and Yellow Prince tulips. His range is now in the best of shape and he is preparing some surprises for Easter.

During the past week J. H. Small & Sons have been very busy with elaborate decorations for social events. Their calls have been so numerous that it is impossible to here state them in detail.

Robert Bowdler, who has two stands in the Center Market which are well managed by his sons, has been sending in a great variety of flowering plants and cut flowers.

## The Seed Trade.

### American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L.H. Vaughan, Chicago, New York Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.  
Annual convention at Milwaukee, Wis., June 20-22, 1911.

EDW. DUNCAN is again with Wm. Henry Maule, Philadelphia, Pa.

MISS M. W. WILLIAMS, secretary of the Braslan Seed Growers' Co., San Jose, Calif., who was in Chicago for a week, left for the West February 1.

VISITED CHICAGO: Miss M. W. Williams and J. W. Edmundson, of the Braslan Seed Growers' Co., San Jose, Calif.; W. J. Fosgate, Santa Clara, Calif.

SANTA CLARA, CALIF.—The Kimberlin Seed Co. writes January 25 that they have had 10.81 inches of rain in this locality, which should be plenty to assure good crops. In some places the growing crops were damaged by flood.

MISSOURI'S proposed new seed bill (Senate Bill No. 36), if it becomes law, will make life in general very miserable for Missouri seedsmen with its \$1,000 fines and six months' prison penalty. These amateur law-makers are dangerous and should be put in irons. This proposed bill makes it imperative that all containers of seeds displayed in seed stores be branded in large, bold type, "Pure" or "Impure," and year of growth stated.

NEW YORK.—The MacNiff Horticultural Co., 62 Vesey street, are putting in a line of standard seeds and hereafter will do a general seed business in conjunction with their plant auction trade. The head of the company, R. W. MacNiff, was with the Peter Henderson Co. for 13 years, subsequently going to Wm. Elliott & Sons, in whose employ he was for eight years. With such experience, it goes without saying that Mr. MacNiff is fairly conversant with the seed business in all its details and his many friends will wish him all success in his new undertaking. Since commencement last August, his firm's business has been very satisfactory. The seed stores are beginning to feel the effect of spring weather quite materially. Orders are flowing in every day and night work has become necessary so as to keep up with them.

## Braslan Seed Growers Co.

Lettuce, Onion, Sweet Peas,

Growers for the Wholesale  
Trade Only.

**SAN JOSE, CALIF.**

W. ATLEE BURPEE, on the occasion of the recent National Board of Trade gathering at Washington, D. C., entertained twenty-one seedsmen and others at breakfast.

CHICAGO.—Prices on the board of trade February 1 for grass seed were noted as follows: Timothy, \$9 to \$10.75 per 100 pounds. White clover, from \$22 to \$30.

### Seed Prices Made at Washington.

While the official announcement has not been given out regarding the awarding of government seed contracts on recent bids, it is understood that the following prices prevailed on leading items mentioned: Onion, 35 cents and some lower, radish 9½ cents, lettuce 15 cents, carrot 16 to 18; also that some bids guaranteed delivery under bond. The above figures were made, it is stated, on both surplus and on new crop seeds.

### National Seed Testing Bureau.

The National Seed Testing and Analytic Bureau, Washington, D. C., has all the work that it can possibly do at the present time. The force of experts was increased recently so as to keep up with the demands made. The management is gratified with the character of samples sent to be analyzed. The purity is much higher than has been generally believed to be the case. In but one sample of clover seed has dodger been found and in that sample only a trace. The seedsmen are having trouble to get redtop grass seed up to standard, but the samples examined by this bureau have been free from adulteration. Europe has made repeated calls on the bureau for analyses. It is believed this bureau is a long step in the direction of aiding the seedsmen in their endeavor to get unadulterated seeds and at the same time a place where correct and unbiased information as to the quality of seeds can be obtained.

### Michigan Bean Jobbers.

The annual meeting of the Michigan Bean Jobbers' Association was held at Detroit, January 25 and 26. It is stated that Michigan grew 6,150,000 bushels of beans last year, easily outranking any other state in this specialty. The retail price of beans everywhere, excepting the selected, hand-picked article, is 10 cents a quart. While the crop was larger than in 1900, in some sections it was badly damaged by rains, so that the amount

of merchantable beans is no greater than a year ago, hence the wholesale price is not apt to show much of a change.

The report of J. A. Heath, of Lenox, president of the association, called attention to experiments that are being made in bean growing whereby the yield is greatly increased. The use of fertilizer was commended and Mr. Heath told of a farmer in Macomb county who by careful study and practice had increased the yield from 13 to 22 bushels to the acre. He thought the agricultural college should make extensive experiments along this line, for an increase of five bushels to the acre will mean \$4,000,000 more for the farmers each year.

V. P. Cash, of Riverdale, secretary of the association, said that eight years ago beans brought from \$1.25 to \$1.50, and during the last two years the price paid the farmers was fully 50 cents a bushel more than that. Judicious advertising has caused the people to eat beans and with the increased demand the price has advanced. Without organization this never would have been. There was an attendance of about 150. Chas. A. Heath, of the Albert Dickinson Co., Chicago, was among the speakers.

### Catalogues Received.

Seed Sterilization.

In a recent bulletin on seed sterilization and its effect on seed inoculation by T. R. Robinson, of the Bureau of Plant Industry, the following conclusions are reached:

As a preliminary to legume-inoculation experiments, seed disinfection should be practiced with special precaution.

Some method of treatment to eliminate chance contamination with the nodule organism is advisable in experiments where extremely accurate checks are necessary.

The usual methods of disinfection employing metallic poisons, such as mercuric chloride, are objectionable, it having been shown that these poisons cling to seeds even after they have been rinsed in amounts sufficient to be harmful and often fatal to organisms placed on the seeds for inoculation.

Hydrogen peroxide has been found to be effective in eliminating bacterial contamination, and its residual effect is much less harmful than that of the other disinfectants tested.

## OREGON GROWN ASTER SEED

Yamhill Co., Oregon is the natural home of the Aster, and any one desiring seed OF HIGH GRADE COMMERCIAL QUALITY will do well to try our seed for 1911. Ask for our new descriptive booklet.

pips, 83 cases trees, 24 cases bulbs, six cases trees and shrubs, three barrels and one case shrubs, one box orchids.

# Dreer's Seasonable Bulbs

The Begonias and Gloxinias we handle are produced for us by a specialist of many years' experience. You can buy cheaper, but not better stock.

## TUBEROUS BEGONIAS

Single In Separate Colors. Scarlet, Crimson, Rose, White, Yellow and Orange, 40c per doz.: \$2.50 per 100; \$22.50 per 1000.  
 Single In Choicest Mixture. 30c per doz.: \$2.25 per 100; \$20.00 per 1000.  
 Doubles In Separate Colors. Scarlet, Rose, White and Yellow, 60c per doz.: \$4.50 per 100; \$40.00 per 1000.  
 Doubles In Choicest Mixture, 50c per doz.: \$4.00 per 100; \$35.00 per 1000.  
 Frilled In Separate Colors. Scarlet, White, Pink and Yellow. These have wavy and frilled petals like some of the newer Petunias, \$1.00 per doz.: \$7.00 per 100; \$60.00 per 1000.  
 Duke Zeppelin. Rich scarlet 85c per doz.: \$6.00 per 100.  
 Frau Helene Barmes. New yellow, \$2.00 per doz.  
 Lalayette. Crimson-scarlet, \$1.50 per doz.: \$10.00 per 100.

## GLOXINIAS

Choicest Mixture, or in Separate Colors, as Blue, Red, White, Red with white edge, and Blue with white edge, 60c per doz.: \$3.50 per 100; \$30.00 per 1000.  
 New Emperor (Gloxinia Hybrid Imperialis). A new type, a cross between Sinigia Regina and the best types of Hybrid Gloxinias. This not only covers a full range of colors as in the ordinary type of Gloxinia, but the foliage also is very ornamental, the leaves being of a rich bronzy red color, with strong projecting white veins. The flowers all stand erect, thus showing to best advantage. We offer in choice mixture, \$1.25 per doz.: \$8.00 per 100.

## FANCY LEAVED CALADIUMS

We have the largest stock in the world. Over 400 varieties, including not only all the good standard sorts, but many new varieties never offered in quantity before.

This is one of the most valuable plants for decoration of the florists' store window during the summer months, and during recent years we have sold many thousands for this purpose. We especially recommend the choice rare and new varieties at \$15.00 per 100 for this purpose.

We offer special selections according to variety as follows:

Choice Standard Varieties. The finest collection ever offered at the price, \$1.75 per doz.: \$12.00 per 100; \$100.00 per 1000.  
 Choice Rare and New Varieties. A splendid assortment, especially valuable for the retail florist, \$2.25 per doz.: \$15.00 per 100; \$140.00 per 1000.  
 Rare New Varieties. The most recent introductions, \$3.50 per doz.: \$25.00 per 100.  
 Choice Mixture, \$1.50 per doz.: \$10.00 per 100; \$90.00 per 1000.

Gladiolus, Tuberoses, Ismene, Montbretias, Tigridias and other Summer Flowering Bulbs are offered in our **QUARTERLY WHOLESALE LIST**, and also a full list of Seasonable Plants, Seeds, etc. Write for it if you have not already received a copy. **THE ABOVE PRICES FOR THE TRADE ONLY.**

## SOFT WOODED PLANTS

We have rooted cuttings and 2½-in. of Ageratum, Alternanthera, Achyranthus, Myssum, Begonia Coleus, Daisies, Feverfew, Fuchsias, Heliotrope, Impatiens Sultan, Lantana, Lobelia, Moonvines, Petunias, Salvia, Santolina, Verbenas, Vincas, etc. Write us your wants.

**GEO. A. KUHLE,**

Wholesale Grower, PEKIN, ILL.

Edgebrook, Ill.

At the Geo. Wittbold Co.'s greenhouse plant consisting of 70,000 square feet of glass the stock is in splendid condition. There are 15,000 lilies giganteum, multiflorum and formosum doing finely and some magnificent blooms are being cut. In carnations all the leading varieties are grown, including Dorothy Gordon, which is certainly very fine. A new novelty in carnations, a scarlet sport of Harlowarden, looks very promising, having a very strong stem with a fair sized bloom. A large number of gladiolus are being forced, principally Francis King, Blushing Bride and Peach Blossom.

## Vaughan's Choice Cannas

If you want the best to be had in Cannas, Buy of Vaughan's Seed Store.

**HENRY METTE'S TRIUMPH OF THE GIANT PANSIES**, (mixed), the most perfect and most beautiful in the world, \$5.00 per oz., \$1.50 per ¼-oz., 75c per 1-16 oz., postage paid. Cash with order.

All seeds offered are grown under my personal supervision on my own vast grounds, and are warranted true to name, of strongest growth, finest stocks and best quality.

I ALSO GROW LARGELY SEEDS ON CONTRACT.

som. Dahlias are also being started from which to take rooted cuttings for the spring trade. In addition to this range of glass this firm has 80 acres of land devoted to growing of nursery stock which is under the supervision of Otto Wittbold, the capable and hustling superintendent.

AKRON, O.—Kenna Yoder has purchased a large farm near this city and will erect a large greenhouse.

HOLYOKE, MASS.—Gallivan Bros. have purchased a farm at Smith's Ferry and will grow flowers to supply their increasing trade.

## Market Gardeners

Greenhouse Vegetable Growers and  
Market Gardeners' Association.

B. L. Watts, State College, Pa., President;  
H. F. Hall, Grand Rapids, Mich., Vice-President;  
S. W. Severance, 505 Illinois Life  
Building, Louisville, Ky., Secretary; M. L.  
Ruetenik, Cleveland, O., Treasurer.  
Annual meeting at Boston, Mass., 1911.

### Prices of Indoor Fruits and Vegetables.

New York, January 28.—Mushrooms, 50 cents per pound; cucumbers, 15 cents each; lettuce, \$1.50 per dozen heads; tomatoes, 30 cents per pound; radishes, 85 cents per dozen bunches; asparagus, \$7 per dozen bunches; rhubarb, 75 cents per dozen bunches; grapes, \$1 per pound; beans, 25 cents per quart; peas, 35 cents per quart.

Chicago, January 30.—Mushrooms, 15 cents per pound; cucumbers, \$1.40 to \$1.50 per dozen; lettuce, 30 cents per pound; radishes, 15 cents to 45 cents per dozen bunches; rhubarb, 50 cents to 60 cents per dozen bunches.

### Stockton, Calif.

George Shima, a wealthy Japanese farmer, heralded throughout this section of the state as the "potato king," has cleared another fortune off his tracts of reclaimed land in the famous San Joaquin delta region just west of this city, his net profits being estimated at \$200,000.

Shima farmed 4,000 acres this year, practically all of which he planted in potatoes. Off the 4,000 acres he harvested 500,000 sacks of tubers which have sold as high as \$1.25 a sack. The estimated cost of producing the potatoes is 70 cents a sack. The potato king has disposed of all his crop save between 80,000 and 90,000 sacks, and if the market continues to rise his profits may exceed \$200,000.

This is Shima's seventh successful year as a potato grower. He has been in the business for many years, the first two seasons having come out even. He lost money several years ago but his profits in the long run have wiped out his losses and made him rich.

Shima has potato raising down to a science and employs an army of laborers. His launches and potato barges ply between Stockton and his island tracts daily. Some time ago he had an elegant home built in Berkeley and engaged a tutor to educate his children.

### Market Gardeners and Truck Gardeners.

The lecture delivered by Prof. L. C. Corbett of the Department of Agriculture, Washington, D. C., before the Massachusetts Horticultural Society, January 28, on "New England Market Gardeners and their competitors," emphasized the necessity of the market gardener cultivating a refined product and thus eliminate the real or supposable competition of the truck gardener. In reviewing the economic status of the more important truck crops, he said the potato, although the greatest of truck crops, is never mentioned as a competitor. In the cabbage, second in importance, the market gardener grows the more refined members such as brussels sprouts, Kohlrabi and the fancy cabbages of the savoy and red sorts. With the onion, the early bunchers will ever continue to be a factor in the market garden. Tomatoes are an important crop and the home-grown product out-

sells the southern field-grown in the same market. The growers having fortified their position by growing special types that differ in color, size, texture and flavor from the out-door product. The cucumber situation shows a competition between the frame crop and northern forcing-house product. The lecturer stated that the whole forcing industry, outside of the New Orleans district, was based on the White Spine variety, the great American field type, which he never thought the ideal forcing cucumber and advised the making of new varieties of the English sorts adapted to American conditions which will solve the competition once and for all. With lettuce, the Boston gardeners had adopted as their forcing sort a variety that does best in the open, and if the cultivation of the vegetable is to continue under glass, some sort must be produced with distinctive marks or character which cannot be acquired in the open. The Department of Agriculture is working along on this line, that the forcing and field industry may be placed on different foundations, and in determining the sorts distinctively adapted to forcing conditions, and improving the quality of seed.

### Cincinnati.

#### GOOD CONDITIONS.

The aggregate amount of flowers offered is about the same as at the last writing, nearly all lines are moving nicely, and most all are bringing good prices. Many advance queries as to Valentine's Day prices are already at hand. Blooming plants and ferns are moving well. Owing to the good weather that we are now having the cut will probably increase in a very short time. Roses of all kinds find a good sale, with the market somewhat longer on white than pink. Carnations are stronger. Enchantress, White Enchantress and Beacon are the leaders, the first two named being most in demand. Easter lilies and callas meet with a good request. The market on the former is easing up a bit owing to an increased supply. The quality, however, is good and there has been no trouble disposing of them. Lily of the valley is plentiful and not in especial demand. Tulips are now added to the list of bulbs special offered. Narcissus and Roman hyacinths enjoy a strong call for work. The home-grown single violets are in demand, while the doubles clean up slowly, none are realizing stiff prices for the time of the year. Orchids are offered in the wholesale houses. Greens are steady, with a strong out-of-town call for ferns, leucothoe sprays and green sheet moss.

#### NOTES.

B. Eschner, representing M. Rice & Co., is not traveling true to form. According to past performances he should have arrived in the city the day Bayard's man was here. He got in the middle of last week.

Last week Wm. Murphy received consignments of fine cyclamen and begonias from J. A. Peterson and Boston ferns from R. Witterstaetter.

When the supply of roses and carnations recently seemed shortest, C. E. Critchell was fortunate enough to re-

ceive many lots from the small growers in the southern and central parts of Ohio and Indiana.

Al. Heckman and Ray Murphy roll a series of 10 games at the Grand Alleys this week. It is a toss-up as to which one is the most enthusiastic devotee of the game.

Springfield seems to be a magnet that attracts Cincinnati florists. Last week J. A. Peterson, Ed. Foster and Julius Baer visited that place.

The hand of the clock at Murphy's shows that \$13,350.00 is now subscribed toward the flower show fund.

The Bowling Club will roll at Finke and Craig's alley on February 6. The attendance promises to be large.

Visitors: Martin Alexander, of Lion & Co., and Mathew Ruxton, of Nitschert Co. of New York, and A. Leganger of A. L. Randall Co., Chicago. H.

## A Grand New Carnation Bright Spot

Outclasses everything heretofore grown in the dark pink class.

Won first honors in the 100 class for the best dark pink at the A. C. S. meeting, Pittsburg, January 1910, also at the Chicago Flower show, November, 1909.

It is a pure bright dark pink of even shade, size 8½ inches, an early and continous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

### Hale Wouldn't Be Senator.

J. H. Hale, the millionaire fruit grower of South Glastonbury, Conn., who is known all over the country as one of the largest peach growers in the world, is perhaps the only man in the country who ever "turned down" a unanimous election as United States senator. Mr. Hale owns something like 350,000 fruit trees in Georgia. It cost him last year nearly \$160,000 merely to put his enormous crop on the market, but he is one of the most delightfully unostentatious men in Connecticut.

He has always been interested in movements for the betterment of his town and state. Some few years ago he was tendered the election as senator "on a silver platter," as he aptly put it. When waited upon by the legislative committee Mr. Hale literally held up his hands. "Gentlemen," he said, "I don't want to be elected to your august senate. Really I don't. I'd rather be a farmer. Besides—there's more money in it." And Mr. Hale, who has gained considerable prominence as a public speaker, says he is still "close to the soil."—Boston Herald.

### Planting Pine Tree Seed.

More than 700 pounds of pine tree seed already have been planted this season on the Angeles national forest, and R. M. Charlton, supervisor of the forest, has just received 400 pounds more.

This seed is being planted along the natural timber belt in the higher altitudes of the San Bernardino range. As a rule the pines re-seed themselves, but there are places where there has been a heavy growth in years long past that have little new growth on them. There are big trees scattered here and there, but no young ones coming on. This is because the ground is so thickly covered with pine needles and similar debris that the seed from the pines does not get sufficiently imbedded in soil to make a start.

The forest service this year is beginning a systematic plan to cover all such bare spaces with young growth. Small experiments have been made in planting seed direct heretofore, but this is the first time it has been attempted on a large scale. Reforestation has been carried on heretofore by planting out nursery stock.

The seed in some instances is harrowed in, and in others the ground is loosened up with a spade to give the young trees a foothold. As the 1,100 pounds to be planted this season will cover about 200 acres, the planting process is no small task. Although many years are required for pine trees to grow, the success of the planting will be evident the first year, for if a considerable number of the seeds obtain a good start, the seedling trees probably will survive.

In the lower altitudes of the forest along the foothills the more rapid growing eucalyptus are being planted, but the eucalyptus will not stand the cold of the higher altitudes, and there it is necessary to plant pines. Two varieties of seed are planted this season, the yellow pine and the Jeffrey

# Roses! Roses! Roses!

pine. It will require from 50 to 100 years for these trees to become sawlogs, but that is not what the forest service is aiming at on the Angeles forest. The conservation of the water supply for irrigating is more important than any other use of the mountains here, and the young pines will be useful for that purpose in just a few years. Their

Reeser & Youngstrand, Springfield, Ohio

# Roses for 1911

## Dark Pink Killarney.

A sport of Killarney, similar in habit, but more highly colored than Killarney at its best. When Killarney is pale, Dark Pink Killarney is bright and cheerful.

Grafted plants only, from 2½-inch pots.  
\$20.00 per 100; \$180.00 per 1000.

## Lady Cromwell.

A shell pink sport of My Maryland that for pleasing color is unsurpassed. A wonderful producer and a color that sells.

Grafted plants only, from 2½-inch pots.  
\$30.00 per 100; \$250.00 per 1000.

## Radiance.

Strong in growth and making plenty of stem. Cerise pink in color.

Grafted plants, \$18.00 per 100; \$150.00 per 1000  
Own root, 10.00 per 100; 90.00 per 1000

## Double Pink Killarney.

Originating with Robert Scott & Sons, who supply us the wood for grafting. Stronger in growth than Killarney and with at least ten more petals. A wonderful improvement.

Grafted stock only.  
\$30.00 per 100; 250.00 per 1000.

## Mrs. Aaron Ward.

By far the most pleasing of the yellow roses now on the market. A general favorite, and one which will be widely grown, for yellow roses are in demand.

Grafted plants, \$25.00 per 100; \$200.00 per 1000  
Own root, 12.00 per 100; 100.00 per 1000

## Melody.

We have reserved for our orders own root plants of this choice novelty. No grafted plants.

From 2½-inch pots.  
\$30.00 per 100; \$250.00 per 1000.

## Prince de Bulgarie

The best prices for cut flowers should be the standard for judging roses, and this rose has been the money setter. Strong and vigorous in growth, and with its beautiful shell pink bloom it has sold on sight. One of the best roses grown.

Grafted plants, \$20.00 per 100; \$180.00 per 1000  
Own root, 15.00 per 100; 120.00 per 1000

**Killarney, White Killarney,  
Richmond, My Maryland,  
Kaiserin Augusta Victoria.**

These are the old standards, and we are headquarters for young stock.

Grafted plants, \$15.00 per 100; \$120.00 per 1000  
Own root, 2½-in. 6.00 per 100; 50.00 per 1000

**A. N. PIERSON, Inc.,**

**Cromwell, Conn.**

## ROOM! ROOM! ROOM!

We Want to Spread Out Our Extensive Easter Stock

Therefore we sell—just look!—a fine selection of Decorative Plants, such as Araucarias, Ferns, etc., at bargain prices. Such stock is always in demand.

## Araucarias

OUR SPECIALTY.

We are the largest importers of these lovely decorative plants, the Araucaria Excelsa, Robusta Compacta and Glauca, 6,000 of the choicest last spring importation now ready for immediate shipment. It is of no use to look elsewhere for cheaper prices. We now control and will control the market of the Araucarias in the future.

**Araucaria Excelsa**, raised from top cuttings, no seedlings. Plants, 5½-6-7 in. pots, 15-18-20-25-30 in. high, 3-4-5-6 tiers, 2-3-4-5 years old, 50c, 60c, 75c, \$1.00, \$1.25 to \$1.50 each. We give big value for your money. Just think! An elephant, 6-in. pot, 4 years old, 4-5-6 tiers, 20-25 in. high, only 60c to \$1.00; a jumbo, 6-in. pot, 5-year old, 25 in. and over, as wide as a bushel basket, 5-6 tiers, for only \$1.00; and what do you think a holy terror, 30 in. and over, 5-6-7 tiers, worth \$200, for only \$1.25 to \$1.50.

**Robusta Compacta**, **Excelsa Glauca**, 6-in. pots, \$1.00, \$1.25, \$1.50 to \$2.00 each.

We also have the nicest **Araucaria Robusta Compacta** and **Excelsa Glauca**, a house full, for only \$1.25 to \$1.50, worth double.

**Jessieum Cherries**, or **Solanum** 6-in. pots, 25c.

**Dracena Bruni**, 25 to 30 in. high, 6-in. pots, 40c to 50c. Highly recommended for store and house decoration: stands heat, cold and dust.

**Latania Borbonica** (Chinese Fan Palms), 20 to 35 in. high, 6 to 7 in. pots, 50c, 75c to \$1.00 each.

**Lilium Multiflorum**, our own importation from Japan, raised from 9-10 in. bulbs, started in 6-in. pots, last October; have kept cold; now about 5 to 8 in. high, just right for Easter, 25c to 30c each, by the dozen or hundred.

**Ipomoea Noctiflora**, our so well-known pure white, waxy **Moonyline**, bearing flowers very fragrant and as big as saucers, 2½-in. pots, will make good stock for you to propagate from, \$5.00 per 100.

**Azalea Indica**, Easter forcing: **Vervaneana** Professor Wolters, Empress of India, **Schryveriana**, double variegated, 60c, 75c, \$1.00 to \$1.50; **Mme. Van der Cruysen**, Simon Mardner, pink, **Niobe**, white, **Apollon**, red, 60c, 75c, \$1.00, \$1.25 to \$1.50. In large plants we have **Niobe**, **Helena Thielman**, **Bernard Andreas** **Alba**, white, **Mme. Van der Cruysen**, and others, \$1.50, \$2.00 to \$2.50.

**Azalea Indica**, with buds advanced, showing colors, **Deutsche Perle**, **Vervaneana** and **Simon Mardner**, 60c, 75c, \$1.00 to \$1.25.

**Primula Chimensis**, mostly white, 5½-in., \$2.50 per doz.

**Kentia Forsteriana**, in fine shape, 6-in. pots, 30-35-40-45 in. high, 4-5-6 years old, 75c, \$1.00, \$1.25, \$1.50, \$2.00 to \$2.50 each.

**Kentia Belmoreana**, 30-35-40 in. high, 5-5½-6-7 in. pots, 5-6-7 years old, \$1.00, \$1.25, \$1.50 to \$2.00 each.

**Kentia Belmoreana**, combination plants, 25 to 30 in. high, made up of 3 plants, 6 to 7 in. pots, \$1.00, \$1.25, \$1.50 to \$2.00; 4-in., 20 in. high, 20c to 25c.

Our Ferns this year are exceptionally very fine **Boston**, **Scottii**, **Whitmanii** and **Schoelzelii**, 5½ and 6-in., 25c, 40c and 50c; 7-in., large bushy plants, 75c to \$1.00. As big as a bushel basket, \$1.00 to \$1.25. Remember, all our Ferns are pot-grown, not lifted from benches.

**Neph. Glazifolia**, a new beautiful fern, an improvement on **Scottii**, much shorter and bushier than **Scottii**, 5½ in. pots, 50c; 3-in. pots, 25c.

**Fertis Wilsonii**, 3 large bushy plants in 6-in. pan., 30c to 35c per pan.

**Ferns for Dishes**, best assortment, 2½-in. pots, at \$4.00 per 100.

**Adiantum Erythraea**, 6-in. pan, 25c to 30c.

**Asparagus Sprengeri**, 2½-in., 3c; 4-in., 10c.

**Spiraea Gladstone**, started in 5½ to 6-in. pots, at 15c, 20c to 25c.

**Cineraria Grandiflora Hybrid**, **Aeschmann** the so well-known superior strain, which brought as high as one dollar a plant wholesale last Easter. Now is the best time if you want good plants for Easter.

We have a very large stock of 4-in. at \$10.00 per 100; 6-in., at 25c, 35c to 50c, just right for Easter blooming.

**Crimson Rambler Roses**, 6-in. pots, 3 feet high, nicely staked up and best down, 50c to 75c.

Mention if ship with or without pots.

Cash with order, please.

All plants must travel at purchaser's risk.

Hot Water or Steam. 56 Sizes. Heats from 1,850 to 27,000 square feet. Send for Catalogue.

Lord and Burnham Co. New York, Boston, Philadelphia, Irvington, N.Y., C. O.

## Flower Colors

Use our COLOR CHART in describing them. PRICE, \$1.00 POSTPAID.

American Florist Co., 324 Dearborn St., CHICAGO

## Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

## Morehead Steam Traps

† The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist.

† It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

† The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

† By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO.

Department "N"

Detroit, Mich.

## WHAT THE USERS SAY

## Test at 8° Below Zero—No. 8 Kroeschell Boiler Carries 20,500 Square Feet of Glass

MUELLER & SCHROEDER Co., Milwaukee, Wis., write: Our heating system works to perfection. To our surprise, the new No. 8 Kroeschell boiler mastered the whole plant, consisting of five houses, 20x150. We only deemed it necessary to start our second boiler when the temperature went down to 8 degrees below zero.

We had expected to use both boilers in cold weather, but the one boiler did such excellent work that we did not run the two boilers until the very cold weather set in. It was a very easy matter to keep the temperature up in the very coldest weather and stormiest nights.

The five houses have 20,500 square feet of glass; the No. 8 Boiler is rated at 16,500 square feet of glass.

KROESCHELL BROS. CO., 452 W. Erie St., Chicago, Ill.

**HENRY A. DEER.**  
274 Chestnut St., Phila., Pa.

Seattle, Wash.

Since the holidays, business has been rather quiet, there being little but funeral work. Next month the nursery and seed business will begin, and the plant and cut flower trade improve. The weather here is such that in February sweet peas, nasturtiums and other annuals can be planted outdoors. The coldest we have had this winter has been 17 above zero.

**NOTES.**  
A meeting of the Seattle Rose Society was held in the Chamber of Commerce. Officers elected for the ensuing year were:

M. Sherbrooke, president.  
E. B. Bennett, vice-president.  
E. Stilwell, secretary and treasurer.

The president spoke of the society's work in the past, and of the preparations for a rose show and carnival to be held in June. The amateurs will be interested in the rose show, as it is for their benefit more than for the florists. He also stated that the park board is making a rose garden in Woodland Park where the new varieties of roses would be grown and properly labeled, that the public might know the best sorts adapted to Seattle.

The Interlaken Nursery & Floral Co. has gone out of business. J. J. Bonnell retains the nursery on the Interlaken boulevard and is starting a new nursery at Kirkland. A. L. Aabling will conduct a seed and nursery business to be known as the Aabling Seed Co. Mr. Aabling is no stranger to the business in Seattle, being formerly with the Pacific Seed & Floral Co. Two years ago he became interested in the real estate business, but he likes the old business better, and will be found at 89 Pike street.

The prospect for building this coming season looks bright. The Hollywood Gardens owned by Mrs. F. S. Stimson are to build a range at their new place at Darby across Lake Washington that will cost \$50,000 or more. The contract is let to the King Construction Co. Manager Gibson was thrown from his saddle horse and badly injured last November, but is improving.

The florists held a meeting in Rosaria Bros.' flower store for the purpose of having the laws so amended that they can do business without having the fruit inspector hamper them in shipping and receiving stock, for at the present time there is so much red tape it is impossible to comply with the law.

J. W. Thompson, park superintendent, had a bad accident at Summer last week. While running to catch a train he slipped and fell and badly dislocated his left shoulder, but he is able to be around and attend to his duties.

J. C. R.

ST. PAUL, MINN.—A fire destroyed the building at Fifth street south and Nicollett avenue, which was occupied by J. C. Eldredge.

## Colorado Sends to New York for Its Finest Greenhouses

That is to say, she has been sending to our New York factory at Irvington. But now with a factory at Des Plaines, near Chicago, we will make all shipments direct from there and cut out the freight cost for that extra 1000 miles haul. That will be a decided advantage.

This particular group of houses we erected for Mr. A. Coor, at Golden, near Denver. It is located at the very base of the Rocky Mountains. It was planned in ridge and furrow fashion so that it would fit as compactly as possible into the space between the building on the right and another one, out of sight, at the left. The result is certainly very effective.

It is Iron Frame construction.

It is fully described and illustrated in our new catalogue. Before you do a thing about building, you want to send for this catalogue.

|                                                    |                                                                                 |                                                                      |

## An Eleven Foot House

DON'T scoff at the small house. When room or needs are limited, one of our "eleven-footers" makes an ideal little proposition. This one is right close to the residence and you see how attractive it is.

Of course we can build it with curved eaves if you prefer, but on so small a house the gutter seems to be rather ornamental. Made as it is, with an Iron Frame it will last as long as the stone residence itself.

Send for particulars.

## Hitchings & Company

ELIZABETH, W. J. and  
1170 Broadway, N. Y.

## SUCCESSFUL FLORISTS

all over the country are using McCray Refrigerators. The circulation of air is so strong and steady that there can be no stagnation or dampness, so that your stock will always be fresh and fragrant. Furthermore the saving in ice will more than pay for the cost.

Florists'  
Supplies.

1129 Arch Street, PHILADELPHIA, PA.  
Send for our new catalogue.

Columbus, O.

All the florists here have been kept busy with funeral work the last few weeks. Stock has been in good supply and the demand about equal to it. There was not a great call for carnations on McKinley day, and it seems to grow less each year.

The Columbus Floral Co. is cutting a fine lot of carnations and reporting ready sale for them. This firm expects to add two houses, 35x400 each, in the spring.

The Munk Floral Co. has put in a line of supplies which was badly needed here.

C. A. Roth is cutting very fine single violets, sweet peas and callas.

E. Metzmaier has installed a McCray refrigerator.

R. M. B.

## Corrugated Shipping Cases

For Freight and  
Express Shipments.

STYLE S.C.

50 per Cent Cheaper  
Than Wood Cases.

These cases are made of heavy waterproof corrugated fibre board, and are accepted by railroads same rate and classification as wood cases. They will stand more rough handling, are much lighter, can be sealed with less expense than nailing covers on wood cases, and are supplied flat, effecting a great saving in storage room. We make them all sizes and for all purposes.

PLAIN OR PRINTED.

Illustration shows case made up, also case flat as supplied.

# 20th Century Soil Sterilizing Furnace

**For Sterilizing Soil, Killing All Weed Seeds,  
Insects, Worms and Fungus.**

It holds the soil to be sterilized at sides as well as top, and a very little fuel is needed. Made of heavy Sheet Iron, reinforced with Angle Iron, and is strong and durable. It is 2 feet high, 2 feet high and 9 feet long, and heats the soil thoroughly without having to be stirred or manipulated.

Price, 70.00, but will make a special offer to introduce to the first buyer in any locality. **SEND FOR CIRCULAR.** Patented Nov. 22, 1910.

## The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our **Extension Hose, Extension Rods,** and the **Mastin Whitewash Nozzle** for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

**J. G. MASTIN & CO.,** 3124 West Lake St., CHICAGO, ILL.

## Carman's Antipest

**INSECTICIDE AND FUNGICIDE  
For the Garden, Orchard and Greenhouse  
Non-poisonous and harmless  
to vegetation.**

**Kills Green Fly, Aphides, Bark Lice,  
Thrips, Weevils, Bag, Red Sucker, Scale,  
Wire Worms, Ants and Slugs.**

This is the Grower's Friend. Handy to use, cheap and effective, mixes readily in water. Destroys all insect pests and keeps down mildew. Circulars on application. \$1.50 per gallon. Also in quarts, half gallons and in bulk.

**PERFECTION CHEMICAL CO.,  
FLUSHING, N. Y.**

Approved by the New York State Agricultural Dept. Certificate No. 225, July 8, 1910

## Cattle Manure in Bags Shredded or Pulverized

Pure—dry—uniform and reliable! The best of all manures for the greenhouse. Florists all over the country are using it instead of rough manure.

**Pulverized  
Sheep Manure**

Absolutely the best Sheep Manure on the market. Pure manure and nothing else. The best fertilizer for carnations and for indoor top-dressing. Unequalled for all field use. Write for circulars and prices.

**The Pulverized Manure Company**

32 Union Stock Yards.

Chicago

### Wichita, Kans.

Holiday week showed the usual fair business with good stock for most demands. Since the first of the year the trade has been good and steady, with a few extra spurts for funeral work. Taken as a whole, the trade conditions have been fairly satisfactory in volume, and have kept stocks pretty well cleaned up. This has been especially true for the past two weeks, owing to cloudy weather, which seems to have prevailed so generally over the entire country that Wichita florists have had to do considerable skimming to find stock, even in the larger markets, with which to keep up their supply. Funeral work has provided a large part of the demand and this has provided an outlet for quite a lot of bulb stock. The territory around Wichita is still dry, no rain of consequence having fallen since October.

#### NOTES.

The new year landed with the first real blizzard of the season. The temperature down to 9 below zero and a wind of about 30 miles an hour. It was a test on heating equipment and construction. Except for a few isolated "corners," however, no serious cases of frost are reported. F. Kuechenmeister and W. H. Culp & Co.,

who have been using gas for fuel, were obliged to make a quick change to coal, owing to a gas shortage which affected the whole city and made coal hard to get for about 24 hours, till teams could be found for hauling.

A sort of epidemic of lagrippe seems to have followed the cold snap, and the florists have not been overlooked. C. P. Mueller's store force have all reported for duty, but indisposition was not absent either. With the force at Culp & Co.'s, it was some worse. For

the past 10 days three, and a part of the time four, have been absent, owing either to personal illness or illness in their families. W. I. CHITA.

GARDEN CITY, KANS.—Owing to insufficient and defective heating in the greenhouse which was used to propagate the stock for the parks, the plants were entirely destroyed by freezing early in January. The house belonged to President Norris of the Park Board.

## HALF HOUR CHAPTERS FOR PLANT GROWERS

### Dracaena Indivisa.

One of the most useful plants for the grower of bedding plants, especially for urns and baskets is the *Dracaena indivisa* and it also is very useful in the small stages for fern dishes or basket combination of plants. They are very easily raised from seed which should be planted during February and early March. Sow the seed rather thinly so that they will not have to be disturbed in too young a stage and they can remain in the seed flats until later when there will be more room and then they should be potted in 2-inch pots. They can be planted out in a bench in the house during the summer months and lifted when the bench room is wanted and fine plants procured for another season. The small plants for this season should be looked over and if necessary potted up and the plants carefully gone over, removing any scale if there are any upon them.

### Preparations for Spring.

The preparations for the spring should now be in progress, propagation in full swing, and the planting of seed beginning, and it is the time for the grower to stop and perfect his plans for the coming season if it has not been already done, and think of the shortcomings of the previous year. Every year some growers have quantities of certain kinds of stock to either throw away or dispose of at an extremely low figure, and have to buy other stock which could have been grown, at good prices. Of some varieties of the plants grown for flowers there is always an over-supply and of others a shortage, and of some varieties of plants there is always a demand, and when wanted good stock is unprocureable. This is the time to look over the last year's work and notes and plan to overcome these failings. It seems to be the practice of some growers to plod along year after year in the same rut, to grow just so many of each kind regardless of whether there is call for it or not, to put up all of the seed that germinates whether it can or cannot be made of use, with the result that the house is overcrowded with an im-

mense amount of stock that is poorly grown and will not bring the proper returns. A little time looking over the results of the past and noting these mistakes, purchasing the stock that is going to be needed when it can be bought at a low price, and thoroughly planning for the coming season's work is time well spent and will greatly assist in closing many leaks. This is the time to prepare for the spring sales, and it should be done now.

### Lilacs.

There is a growing demand for fine sprays of lilacs with the best trade, and if well grown are very taking and quite remunerative for the cut flowers always bring good values. The imported plants can be procured very cheaply and in both bush or tall forms, for either growing pot plants or for cut flowers. They force very quickly and easily; the plants should be started in cool temperature until the buds begin to swell, when they should be removed into a warmer home. They will require copious watering and constant syringing until the flower buds form, when the overhead watering should be stopped. They can be brought into bloom in three to four weeks after starting later in the season, so the plants that are desired for Easter should be kept in cold quarters for some time yet.

### Chrysanthemum Pot Plants.

The grower intending to grow pot plants of chrysanthemums should now be making ready to propagate them for where the plants are grown throughout the season in pots and are properly nipped back, it will be impossible nor is it desired to get the strong, rank growth which is obtained in the bench or stock planted in the open. Select the varieties that are close and short-jointed and have a good bushy habit and are amply provided with foliage. The varieties that make nice bush plants and are of easy culture are not many, the newer varieties that have been disseminated in later years have all been grown with the specimen bloom as the dominant feature. W. H. Lincoln, Golden Age and Robert Halliday for yellow; Helen Clay Frick,

May Forster, Polly Rose and Garza, white; and Glory of the Pacific, Cosmos, Mayor Weaver and Mizpah, pink, are all good varieties and fairly easy of culture. The cuttings should be struck by March 1, and potted in 2½-inch pots. As soon as the plant has obtained hold in the soil and begun to show growth the tip should be rubbed out with the thumb. Many growers wait until the plant has attained a height of three or four inches and then pinch back an inch or more. This is a mistake for it not only wastes so much of the strength of the plant but cuts back into the wood where it is much slower to break and starts more unevenly. By rubbing out the very small tip the plant itself receives but very little check and the breaks are much more even. This should be continued throughout the growth of the plant as soon as the shoots are four eyes long. The plant should not be allowed to get pot-bound but should be shifted on as rapidly as it needs to be.

#### Salvias.

The grower who wants fine large stock of salvia, it is not too early to get the seed planted. To have plants in 4-inch pots with buds showing by the bedding-out season, the seed should be sown by March 1, at the latest. This is especially so of *Salvia splendens*, the dwarf varieties such as Bonfire or Clara Bedman will form their buds much earlier. Zurich is a variety that is very popular with some growers; it is of a nice dwarf habit and an early and prolific bloomer. The seed should be sown thinly and placed in warm quarters and as soon as the leaves have formed potted in small pots and shifted along as fast as necessary. As soon as the plants are two and a half or three inches high the tips should be pinched out that they may break into bushy plants. If any stock plants have been saved they should be brought into heat, and the cuttings propagated. The plants after being potted should never be crowded, giving them plenty of light and air, and occasionally syringed to keep down red spider, which will attack them if the atmosphere is at all dry. The white-fly is very apt to gather on salvias and will quickly ruin them; the only remedy for this little pest is hydrocyanic acid gas.

#### Metrosideros.

A great variety of plants is an actual necessity at Easter and a plant that is sure to attract attention of the customer is the Bottle Brush (*Metrosideros*). It is a plant of very easy culture and the majority of the plants grown in this country are imported from Belgium. They can be very easily grown in this country but are used in such small quantities the culture would hardly pay. To have them in bloom for Easter they should be now placed in a cool house with a night temperature of about 45 degrees and later moved into a warmer house by the first of March, where the temperature will be about 65 degrees and they should be very handsome plants for the Easter trade.

HARTFORD, CONN.—The window of the store of Spear & McManus contained last week a beautiful display of different varieties of orchids, grown at the houses of the A. N. Pierson Co., of Cromwell.

## THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

### Orchids for Decoration.

The thing that militates most against the use of orchids in cut flower decorations in this country is the fact that so few species, outside of cattleyas, are grown. In British and continental countries the number of kinds grown by the trade for cutting greatly out numbers that handled by our growers who, naturally, will not grow species they cannot sell. Now cattleyas, fine as they are for personal wear and for use in large designs, are not, it must be admitted, so graceful as many of the smaller kinds, the beauty of which is well shown in the accompanying illustrations.

Take the beautiful *odontoglossums* of the *crispum* and *Pescatorei* sec-

Irwin Bertermann.

tions. There is nothing finer for cutting in the whole range of orchids. Growers say they cannot succeed with them because of the great heat of our summers. Possibly with the style of house now used there is something in this, but the writer remembers well when the growers on the continent of Europe said the same thing and, outside of the British islands, there were few good *odontoglossums* grown. But there are no finer *odontoglossums* in the world today than those grown by the continental men, especially those of Belgium. They, long ago, showed the Britishers what could be done with the Belgian leaf mould and some of the most magnificent varieties extant have come from the Belgian growers. We hope to see the time when some good private gardener will, by building the right kind of house and treating his plants properly, show the trade that these lovely plants can be grown, and grown well, in this country. Then trade growers will take them up and retailers will be able to secure a regular supply of flowers instead of the spasmodic and unsatisfactory supply they now receive.

*Phalenopsis* again is a lovely genus containing such gems for cutting as *P. amabilis*, *P. Schilleriana*, *P. Stuart-*

*iana* and *P. grandiflora* of the large flowering kinds to say nothing of a host of smaller but bright and effective species well worthy the attention of growers. *Dendrobium Phalenopsis* is hardly less beautiful than the *phalenopsis* themselves and far easier to grow. The old *Coleogyne cristata* is fine for cutting, easily handled, and presents a fine flowering return for the little trouble necessary in its culture. It thrives well in any fairly moist house in winter and in summer can be grown outside in a shady frame or pit. The *cyripediums* are a host in themselves from the well-known *C. insignis* to the beautiful long sepalled *C. caudatum* with its long tail-like appendages that look so fine in floral decorations. Then there are several species and hybrids of the *selenipedium* section, such as *C. Sedeni* and *C. Schlimii* that are very bright and telling in bouquets or other arrangements to say nothing of the beautiful hybrids related to *C. Spicerianum*, which are among the finest in the genus and quite indispensable to the cut flower grower.

A little bright color is always a fine addition to any orchid decoration so many species being of mauve and other neutral tints. *Lælia harpophylla* and *L. cinnabarina* are two of the brightest in the genus, and another very telling and beautiful plant is the showy *Epidendrum vitellinum*. *Sophronitis grandiflora* and its varieties are among the brightest red flowers in existence, but they are too short in the stem to use without wiring and, unlike the dendrobiums, have no long, stem-like pseudobulbs that can be cut with the flowers. *Dendrobiums*, as a genus, are peculiarly adapted for decoration owing to the bright and showy character of the flowers and the great freedom with which they are produced. *D. nobile*, *D. Wardianum*, *D. Pierardii*, *D. infundibulum*, *D. formosum* and almost any of the hybrid forms are useful and beautiful plants for the purpose indicated and each possesses some special merit. There are a great many other kinds that could be mentioned as suitable for creating beautiful effects such as those shown in the pictures. Their scarcity in short is by no means owing to lack of material, simply owing to the fact that those at command are not grown.

### Retail Store Management.

Paper read by Irwin Bertermann of Indianapolis, Ind., before the Detroit Florists' Club, February 6, 1911.

The retail flower business may well be classified in two well defined parts: The commercial and the ideal. It is most essential that the sterner force which propels the larger industries be combined with that more subtle and delicate artistic loving nature. It is not enough to master the art of buying and selling—it is necessary to live the veritable life of the flower; to love and to be able to personally arrange them in beautiful combinations, or to constantly teach others to imbue them with a masterful individuality. The retail storeman, to gain prominence, must be a composite of the Italian, with his love of art; the German, with his perseverance and perfection of detail; the Persian, with his knowledge of color; and, last but not least, the leader of the van, with salesmanship and push—our Yankee. Some of the flower dealers learn more toward

one qualification than to another. One well known retailer, who possesses a fine knowledge of figures and segregation, manages his business efficiently and in entirety from his office; another, with an innate taste for the beautiful, manages directly among the flowers and throws bookkeeping, figuratively speaking, to others. Suffice it to say that no matter which policy a retailer pursues personally, he must be most careful that not one or the other be forgotten in rounding out a business.

There is more commercialism in the flower business than there was ten years ago and there will be more in the future, so it behooves all who would be among the "survival of the fittest," harsh though that may sound, to adopt the bulwark of the larger American industries and apply system throughout. Individuality has its merits, and the storeman who arranges flowers with taste and skill is to be admired as a creator of the finer arts, but like all others, must become a unit where the great volume of trade is subservient to the iron hand. It takes no more exertion for a man to do a large business under a system than it does to do a very small one without such advantage, and if anything, the favor comes to the larger, as it is certainly more of a pleasure and a credit to manage it. The foreign trade papers are, or should be, a source of much learning. Years of plodding has taught the older countries an insight into perfected detail which is hard to discover among ourselves. Our goal has rightfully and honorably been the dollar, but for the sake of finer beauty and success, also more dollars, it is well to take notice of the beautiful wreaths, baskets and easel arrangements of Russia, Germany, France and England.

We are storemen in a wonderful country. The growers are producing elegant stock, so let the retailer show nature's productions in their most exquisite arrangement. The cost per hour of a well decorated window is in direct proportion to the amount of store rent paid. A well arranged window is one of the best advertisements a dealer may have, and it should always be of utmost importance to keep the same trimmed in excellent taste. Unlike other lines of trade, the florist has the finest material at hand, and rarely is it necessary to introduce other materials to make it attractive. In fact, goods other than those regularly supplied as accessories, should be discouraged in featuring a window. There is no better taste than flowers, and as we derive our livelihood therefrom, why promote other attractions? Harmony in color, by allotting a whole or a distinct part to one shade of flower, adds much to the general appearance of the window.

Many of the storemen are adding automobiles to their chattels and the consensus of opinion seems to have relegated the horse to the past. The urgent time calls; the long hours and the important events of life with which the retailers have to contend, make automobile delivery of peculiar value to the retailer, and its use should be encouraged as a useful, rather than an extravagant part of the equipment. Let it be omnipresent, though, that we are florists, and are not endeavoring to degenerate into a greasy garage manager, who can do repairing much better and more eco-

ORCHIDS FOR DECORATION.

Arranged on Pedestal by a London Florist.

nomically, while we are engaging a fancy customer.

Most important is it for the leading retailers to produce or to deal in novelties. It would be a grand thing were it possible to sell the same article each year, but destiny will not have it so. Catering to the public makes it imperative to have something new or novel at all times. The flowers need not be new from the trade standpoint, but it is requisite to have a refreshing change for the flower lovers. There are created styles in flowers and they keep changing. What was regarded as old and uninteresting a generation previous, may be a good selling article at present. Antirrhinum, bouvardia

and Bon Silene roses were favorites with our grandmothers, but are in style right now, made up with paper holders used during Napoleon's reign. Mignonette, pansies forget-me-not, and carnations will never grow old, but the grower and retailer should conspire to present something different at all times. Novel arrangements are as essential as novel flowers and no opportunity should be overlooked in placing before the public a new and meritorious combination of nature's wares. Corsage bouquets, made of older varieties of flowers, have grown wonderfully in demand, and are a source of much revenue to the present day dealer.

At least forty per cent of the storemen's business might properly be classified as counter trade, so the importance of packing flowers carefully, in a neat box of up-to-date pattern, and adding a few finishing touches in the way of ribbons, Farleyense ferns and flowers must not be overlooked. Counter trade is a certain barometer of the state of trade and, like that instrument, fluctuates quickly. The many details in connection with this important branch are often ably taken in hand by Fritz Bahr, Gertrude Blair, and other able retail correspondents of the florists' press. Their ideas may often be enlarged upon and the incentive given the fagged, but energetic, shopman is not to be underestimated. It is up to him to effect an opening for the great mass of flowers thrown upon the market by millions of feet of glass, and any suggestion in furthering their sale is of immense general value.

"Take care of your business and your business will take care of you," as Poor Richard's Almanac had it, is certainly an axiom worthy of every retailer. The flower business is not so conducive of financial results as are found in other commercial lines, but the instances are few in which the returns are not sufficient provided the above axiom is closely adhered to. Opinions differ greatly as to the best method of advertising. There are many effective ways. Some use newspapers, others magazines, some programmes, and others none at all in the way of printers' ink, but in actual energy in their display of flowers and in the class of goods furnished. All of those mentioned and others receive the support of the public if done in an energetic manner and supported in actual facts.

One of the most promising institutions—The Florists' Telegraph Delivery—is still in its infancy. The amount of business transacted mutually between cities is no small one, and with the plan, outlined by the president of the association, J. A. Valentine, generally accepted, this source of revenue should be greatly increased. No retail florist in the larger cities could afford to be without the protection and advantages thus offered at a minimum cost. A rough estimate of the exchange flower trade would put the total amount at three hundred thousand dollars in this country. So the importance of the undertaking is obvious.

Orchids and gardenias, articles de luxe a few years ago, have become staple articles in cities with over two hundred thousand population. Custom may complain at times that prices are high for fancy flowers, but still it is seemingly the unusual and the higher priced goods which satisfies. The flower standard grows higher each year, so the retailer in a city of five hundred thousand sells more than twice as much as when the city was half that size, as the patrons have grown proportionately richer. When recognition is taken that New York City's millionaires are now to be counted in the thousands, whereas twenty years ago there were perhaps less than one hundred, we can see the direct reasons for changing our business methods, and look forward to standards which will place the retail florist in the front row of industrial pursuits and gain respect as a representative type of American business men.

A progressive flower store, tasteful in appointment, absolutely clean, with efficient salesmen and flower workers attaining the reputation of handling meritorious goods, must be ably managed. The ideal manager, a rare individual, must possess the executive qualities usually attributed him. Further, he should have the fine artistic ability of a Thorley, Battles, Palmer or a score of others, who have won distinction for their class and whose work stands forth as a challenge to all who would do better.

### Propagating Carnations.

ED. AMERICAN FLORIST:

Can you inform me what would be the probable percentage of carnation rooting in a propagating house with the night temperature at 65° to 68° and a day temperature of 70° to 80°? Nebraska. J. W. M.

It is next to impossible to give an accurate account of the percentage of

### Bedding and Other Plants for Spring Sale.

The necessary work connected with the working up of the general line of plants for spring sales and bedding out commences to crowd rapidly along now. One of the leading features of this work just now is to get the geranium stock well in hand. Geranium plants to be salable, must be dwarf, stocky plants well in bloom. To get them in this shape they will need constant attention right along from now until they are either sold or planted out. Those that are intended for sale in 4-inch pots at Decoration Day or earlier, should now be potted into 3-inch pots, in fact, if this is not done by February 15, it is a question whether they will be in first-class shape for Decoration Day. The fall struck stock, after being held in 2 1/2-inch pots since last October, are now very much in need of a shift, and they will quickly take on a rapid growth after being potted up. If any of them have lengthened out too much,

ORCHIDS ARRANGED IN BROMELIAD.

rooting under the conditions stated, there being so many more conditions to be reckoned with, notably, the sand and the care. There is not any reason why the cutting should not root just as well as under the condition of 50-54 house temperature and 56 degrees bottom heat in the sand, but it would be at the expense of weakening the cuttings. A temperature as mentioned in the inquiry, would be a degree of forcing in every sense of the word, and it would not be at all natural to take cuttings from plants accustomed to a night temperature of 50 degrees, and subject them to 15-20 degrees higher. Considerable rotting among the young plants cannot fail to be the result.

C. W. JOHNSON.

nip out the tops to cause them to break out and become bushy. For this potting, the soil should have more life than that used in potting up the cuttings, but it will be a mistake to add manure in very liberal quantity. One part of well rotted stable manure to five parts of fresh soil, with a 4-inch potful of bonemeal added, to every wheelbarrow load of soil. Pot firmly, to encourage a short sturdy habit, also after the first watering in, allow them to get a little on the dry side before watering again; this should be followed up right along. Geraniums rebel very forcibly against too much water. An over-abundance of water will cause luxuriant leaf growth but at the expense of good trusses of flowers. They need a light, airy house

and to be grown cool, the general carnation temperature suiting them to perfection, and as the carnation is usually the one that has to make way for the geranium and other bedding plants, there is not any place better adapted for them. They can now be set pot thick, but as soon as they begin to draw up, they must be spaced out and given more room.

Pansies which are now in the seed flats, and are large enough to handle, should be transplanted into other flats, using a live rich soil. Allow enough space between the plants so that they will not have to be disturbed again before the outside conditions are favorable, for their being planted out in the cold frames, which is usually the latter part of March or early in April.

Verbenas, dwarf lobelia for bedding, and some of the speciosa variety for vases, centaurea, dwarf sweet alysum, ageratum, bellis, petunias and any other of the standard line of annual bedding plants should be sown now. The main points to observe, so as to secure a good stand of seedlings, are to use a fine soil that has been warmed through, not to sow too thickly, and not cover with soil any thicker than to cover the seed; also keep the soil in the seed flats just moist, never letting it become over dry or sodden with water.

This is the time for overhauling the vines intended for vases and window boxes. Vincas, that were lifted from the field and potted into 4-inch pots, are ready now for a shift into 5-inch; they may appear to be all right at present, but they are bound to suffer if carried through without any repotting. Some growers lift their plants from the field in the fall and plant them along the edges of their carnation benches; these must be potted up now to get established in the pots for spring work; they will not stand to be left where they are and planted direct to the vases, because they will wilt too much and drop their leaves. English Ivy is now very largely used as a vine for large vases and window boxes. These also should be now in pots. Plants lifted from the bench and planted direct to the vases are also not any more satisfactory than the vincas. The best place for these, for the time being, is along the edges of the benches where the vines can hang down, care being taken to guard against their getting bruised, as every damage mars the appearance of the glossy green leaves.

The alternantheras are beginning to make fresh roots again, and it might be said that the critical stage has been passed; from now on they will continue to grow, if given plenty of heat, and kept a little on the dry side. Any flowers that appear should be trimmed off, as they only retard the plants. If the plants have been carried over in flats, or planted out in benches, they can now be potted up, provided a place is available, where they can get a bottom and top heat of 70 degrees, which will start them into growth, so that by the end of March, when they are transferred to the hotbeds, they will have gotten a good start.

It is a little early yet to disturb the Echeveria, unless they have grown together and are becoming drawn. In such cases, they should be refatted and spaced out; also, if as many prefer, that these plants should be potted for selling, now is the time to attend

to this. The propagation and working along of the Mme. Salleri geranium for bordering should be followed up closely if the cuttings have not given the required number. The stock plants can now be divided, potted up singly and grown on the same as the young plants.

Heliotrope, fuchsias and other spring flowering plants need to be worked steadily along. They delight in a fine porous soil, a cool temperature and must be closely watched to keep them free from insects, to which they are very susceptible. Coleus and achyranthus can also be propagated now.

### Summer Blooming Bulbs.

Paper read by Isaac S. Hendrickson of Floral Park, N. Y., before the Massachusetts Horticultural Society, Boston, Mass., February 4, 1911.

I do not presume to bring to you anything particularly new or startling in this talk about summer blooming bulbs, but perhaps together we can bring out some interesting points on a subject that is old, yet ever new, for while bulbs are simply bulbs, always have been, and always will be, requiring about the same treatment in the way of culture, etc., that has been in vogue for all time; when we once take up the subject and delve into

PRETTY BASKET OF ORCHIDS BY A LONDON FLORIST.

They require a brisk bottom heat and after they are rooted should be given a light rich soil, and placed in a warm light house. C. W. JOHNSON.

### When to Propagate Verbenas.

ED. AMERICAN FLORIST:—

Will you inform me when is the proper time to propagate verbenas to have them in bloom, in 2½-in. pots in May?

SUBSCRIBER.

To have nice verbenas plants in bloom in May, the cuttings should be propagated early in March. Plants propagated the last of March or first of April may be had in bloom late in May if the weather conditions are favorable, but they will be small. W.

species, varieties, freaks, etc., there seems to ever be something new. It is like walking in a rose garden on a morning in June, as we walk we see the same kind of roses we have seen year after year, yet when we stop to examine our favorite "Jack," or "Mrs. Laing," or Frau Karl Druschki, we are led to exclaim was there ever such exquisite beauty revealed to any one before this particular morning. There is something very fascinating about bulbs to nearly every flower lover, and rightfully so, for no class of plant life can give more enjoyment. There seems to be something almost human and immortal in a bulb as we handle and examine it, and find that very often the perfect form of the future flower is

wrapped up and hidden in the heart of the bulb. When we buy seed from the seedsman, it requires almost a professional gardener's skill to bring forth the flower, but not so with the bulb, for when you receive it from the hands of the grower it already contains within itself the food for the future flower. I suppose that nearly everyone in this room today has cut a hyacinth bulb in half and discovered the tiny blossom in perfect form ready to push out in perfection of bloom when submitted to proper conditions. I shall never forget my sense of wonder when I first discovered this secret, and I have ever since held a peculiar feeling for a bulb. In speaking of summer flowering bulbs, we expect to deal in nearly every case, with what we call tender bulbs, or in other words a class of bulbs that must be planted in the spring, cared for during the time of bloom, which is usually during the warm months, and then lifted and stored in a warm storeroom or cellar away from cold and exposure, treated with almost as much care as a child, in fact, when we stop to think of it, there is something very human about all plant life and specially so with the tender bulbs, but I think you will agree with me when I say they are worth their extra care when we fully realize their possibilities in the way of bloom. To take our subject alphabetically, we will begin with

*Amaryllis formosissima*, called "Jacobean lily," or "Indian red daffodil." While this bulb is really a *Sprekelia*, and not an *amaryllis* at all, we seldom hear it called by its true name. It is a native of South America, and was first introduced in Europe in 1593, but owing to its being classed with the daffodils, and its nature not properly understood, it was soon lost to cultivation for a time until greenhouses and stove houses were brought into use so the tender bulbs could be protected during cold seasons. It is one of the first and brightest of the tender bulbs to bloom, they are hardly more than put in the ground when the bright red petals push their way through the brown earth in advance of any foliage, and when they are planted in quantity the effect is striking. It must be a sight to see them blooming in their natural haunts. Miller's Gardening Dictionary speaks of them as producing flowers two or three times a year, but this I do not know from experience. For garden culture, plant the bulb in May, and cover about three inches; when the foliage has ripened in the fall they must be lifted and stored in a warm place. We next come to the arums, which are often called "Snake lilies," "Black callas," "Monarch of the East," etc. For my part, I cannot see any particular beauty in these bulbs, the flowers of which emit a very disagreeable and offensive odor; however, there seems to be quite a demand for them, so the fact of their making a large bulb may account for it somewhat, or they may be useful for foliage effects after removing the blossoms. A bulb that should be better known and more freely planted is *Bessera elegans* or "Coral drops." It is a very small bulb, but the red flowers are borne on long graceful stems, which make a pleasing effect when planted in clumps, and are useful for cutting. They are native of Texas and Mexico. In connection with this bulb I would like to divert from the alphabetical order and mention two

other bulbs which are often classed with *Bessera*, and called the three Mexican gems, namely, *Cyclobotria flava*, a very graceful plant with bell shaped flowers, color, bright yellow dotted brown, and *Milla biflora*, often called "Mexican Star of Bethlehem," producing the purest waxy white flowers imaginable, often measuring about two inches in diameter. A class of summer bulbs recently come into prominence are summer blooming callas, or correctly spoken of as *Richardias*. Several new and valuable varieties have been produced, and introduced during the past few years, among them I will mention the following: *Aurata*, called the "Lemon calla," has a light lemon yellow flower with a chocolate patch in the throat, which brings out a conspicuous contrast of color, the foliage is spotted white. Mrs. Roosevelt is a late introduction and sometimes comes very fine; the flowers are white, tinged with lemon, not very free flowering. *Rehmanni*, largely advertised as the "Pink calla sensation," is a dainty little flower much smaller than most of the other callas, and I am

inclined to think it is useful as a novelty only. *Pentlandi* certainly produces a very beautiful flower of a rich golden yellow, but the bulb appears to be weak and not very prolific, so it appears that if a yellow calla is wanted (and I believe it is), we have everything that can be desired in the variety *Elliotiana*, "the peer of them all," not a new one by any means, but one that is not known as it should be. I have seen quantities of this calla on a commercial place grown and treated just about the same as one would treat potatoes, and the sight when in flower is indescribable; you can get some idea of it when I tell you the flower is nearly, if not quite as large as the ordinary white calla of the greenhouse, and the color a beautiful deep golden yellow, not simply tinted yellow or lemon, but actually golden yellow, and every bulb will produce a bloom; its time of flowering is July. It must be taken up in the fall, and cared for about the same as a *gladiolus* bulb.

*Cooperia pedunculata*, commonly known in the south as "Rain lily," or "Fairy lily," is a bulb that produces a

JAPANESE LONGIFLORUM MULTIFLORUM LILY.

As Grown by Samuel Pearce, Chicago.

EASTER LILIES AT THE DONALDSON GREENHOUSES. MINNEAPOLIS, MINN.

beautiful little white waxy, fragrant flower which opens usually at night, and remains open for three days and three nights, closing on the fourth day. In their native haunts it is said they often bloom two or three times a season, clusters of them springing into bloom immediately after every shower. In the north, they must be treated as other tender bulbs; they can be planted in May about three inches deep; they flower about August. They should be lifted in the fall, and kept in dry soil. *Cooperia Drummondii* or "Evening star" has a longer tube than the "Rain lily," but the flat portion is not as wide. It blooms later and the flower does not last as long, *Eucomis punctata*, "Pine-apple flower," does not seem to be very common, but it is really a most satisfactory bulb; it is a native of Cape of Good Hope, but does very well in the open ground, treated as other summer bulbs. It produces a wavy, crinkled foliage from the center of which shoots a stem about two feet high with a head of greenish white flowers with dark centers; not hardy, so must be lifted and stored.

While I understand that the subject of gladioli has been treated at a previous meeting of your society, I am going to ask that you bear with me for a few moments, as I feel I must touch on this very important, if not the most important, group of summer blooming

bulbs. First as to the pronunciation. I am free to admit that I incline to the old fashioned way of gladiolus, and I believe I have some good authorities to bear me out, but as I know some of my best friends are on the other side, perhaps we will have to compromise and adopt the language of the vendor on the street, and just call them "Glads." Whichever way we decide to pronounce the name, they are a class of bulbs demanding our attention now as never before, and with cause; for never before were such beautiful and vivid colors seen in any flower, and I believe that we are only on the threshold, so to speak, of what is in store for us in the way of color, size and beauty in the gladiolus, and where is there any class of bulbs or plants with the possible exception of dahlias, that will give us such a protracted season of bloom with so little care and attention? The bulbs can be planted with safety just as soon as the ground can be worked in the spring, and by planting in succession up to July, the blooming season will extend from July to October freezing weather. The progress made in the development of this "King of summer flowering bulbs" is certainly remarkable; where a few years ago a few small flowered varieties were now and then seen, and occupying only a small part of the seedsmen's catalogue, they are now grown by nearly

every flower lover, and the dealer is giving them more and more attention every year, and I believe the time will come when they will be as widely known as the rose, dahlia, sweet pea, etc., for they are indeed the "Orchid of the common people." Their low cost combined with their ease of culture puts them within reach of all. While they will yield good returns with ordinary treatment, they will surprise us if given a little special treatment in the way of good rich soil. I would advise planting the bulbs about four inches deep in garden culture, as they then will be better able to withstand any drought they may have to contend with, and will not be disturbed so easily by the wind, as is the case when planted shallow. It has been said that the matter of naming the varieties has been overdone, and I certainly agree in this, as I do not believe any other class of plants has been blessed with so many descendants, and perhaps you will be surprised when I say that I have in my possession an indexed book containing the names and descriptions of nearly 3,000 varieties; of course, most of these are from foreign catalogues. However, as the raising of new varieties from seed is so very easy, and so intensely interesting, we shall probably never see the end, and of course we do not want to if the future will bring forth varieties

of real merit, but the danger lies in the fact that many are raised and named by people who have no way of knowing, or do not take the trouble to find out, just how good or poor their pets are when compared with varieties already in commerce. The recently formed American Gladiolus Society, hopes to do some good work along these lines. Just a word in regard to the habits, etc., of the various varieties. We are very often asked why the light and more beautiful colored sorts are more expensive than the dark; my answer is—that in nearly nine cases out of ten, the light colored sort will produce only a small percentage of bulblets where a dark or inferior sort will produce an abundance, for example, the bulb I have here is a very ordinary variety, and one that is very persistent in its growth and habits. Observe the large number of bulblets. This other sample is a much finer variety, and note the absence of bulblets. Again, when we watch a customer selecting bulbs at the flower shop, we notice how only the very largest ones are taken, which is altogether wrong if we want a genuine mixture, as nearly every variety makes a different size and shaped bulb, and very often it happens that the choicest flowers are concealed in the smallest bulbs.

Considering that nearly every catalogue lists the *Ismene calathina grandiflora*, it seems that about every one must be familiar with it, either from personal experience or seeing it in a neighbor's garden, but I cannot refrain from speaking of it as a very useful and easy to handle bulb. It is very often called the "White amaryllis," a very appropriate name as it resembles an amaryllis flower in shape and habit very much. The bulbs do best when planted in May and covered over with soil to a depth of three or four inches; when during June and running into July they will produce their pure white fragrant blossoms very freely before the foliage appears. Another bulb that should be given more attention is what we usually call the summer hyacinth, or *Hyacinthus candicans*, or more properly speaking, *Caltenia candicans*. This bulb grown alone does not attract much attention, but when grown as it should be in masses of at least 25 or more, it makes a fine show, and splendid back ground for other flowers, and they will remain in flower several weeks. While it is a native of South Africa, it is considered quite hardy, but my experience has been that it is better to take it up altogether, and treat as a tender bulb, or cover well with a mulch. The bulbs grow readily from seed, and will sometimes produce bloom the second year, and always the third year. We now come to another important group of summer blooming bulbs, namely, *Liliums*, but as this subject has been fully covered in a recent lecture, I will not dwell at length, although there is temptation to do so, for where can we find a nobler, grander group of flowers than we find among the lilies; how their purity compels our admiration; how their fragrance charms and soothes and seems to carry us into another world. I must speak of two or three which really ought to be better known. *Hansonii*, which is a variety named in honor of P. Hanson, of Brooklyn, by Max Leichtlin, of Germany. It is a fine variety growing from two to three feet high with bright

green foliage, producing from four to 12 dark yellow flowers remarkable for their thickness of petals, and wax-like appearance. It will grow as easy as a tiger lily, and just as hardy; it flowers in June. Perhaps the hardy garden lily with the greatest future is *Henryi*, "the 'Yellow speciosum'." This lily has been brought to us from the mountains of China, and it is indeed a gem, as it will thrive without any special care, producing strong panicles of yellow flowers, resembling very strongly the much admired *speciosum* form.

*Lycoris squamigera*, or *Amaryllis Hallii*, or called by some "Magic flower," is a most interesting subject; the bulb is similar in shape and size to an amaryllis, but really belongs to the nerines. It can be planted either spring or fall, but I would prefer the fall, as there would be more time for the roots to form, as the foliage starts out early in the spring and grows quite rank until some time in July, when it begins to dry up, and any one not familiar with its nature would think it had died, but about a month later, as if by magic, the flower stalk springs from the ground for a height of about two or three feet, producing an umbel of beautiful lily shaped flowers three or four inches across, and eight to 12 in number, of a delicate lilac pink, shaded with clear blue. It is perfectly hardy, and makes a splendid acquisition to the hardy border. Cover about four inches.

*Montbretias* are coming more and more into prominence, and some of the newer sorts such as *Germania*, *Geo. Davison*, *Martagon*, etc., are very

charming and useful, and I believe are destined to be grown more and more for cutting, as they mix well with other flowers. *Tigridias*, commonly called "Shell flowers," owing to their resemblance to beautiful sea shells, are very interesting from a standpoint of color, form, etc., but their great drawback is the short life of the individual flower, which never lasts more than a day, therefore it is almost useless as a cut flower; however, by planting a number of them we are apt to have a few blooms at almost any time during the summer.

*Zephyranthes*, or "Zephyr lilies" are very close relatives of the *Cooperias* and may be grown in about the same way. There are several varieties and species, but the best ones are rosea, a rosy red color, and candida, pure white, the most beautiful of all. These both bloom late in the summer, and the bulbs must be taken up, and stored before freezing. They are very useful for planting in the borders.

CINCINNATI, O.—The Hotel Savoy distributed 2,000 carnations to their guests McKinley day.

RHINEBECK, N. Y.—Greenhouse construction will be active this year, as it is predicted that twenty new violet houses will be erected in this vicinity.

LOUISVILLE, KY.—The American Floral Co., with a capital stock of \$10,000, has filed articles of incorporation. The incorporators are J. S. Shrobanek, H. Oswald Georges, and Rudolph Shrobanek.

BASKET OF EASTER LILIES AND WHITE HYACINTHS.

By Andrew McAdams, Chicago.

### Easter Lilies.

Since the introduction of retarded bulbs the term Easter lilies has become somewhat of a misnomer as the beautiful and useful flowers of the various kinds of lily may now be grown at all times of the year and it is only a question of starting up bulbs at various seasons to maintain a succession the year around. Still Easter is the holiday of all others when they sell best and are most popular and nearly all growers pride themselves in having a good crop at that time. Although Easter comes comparatively late this year, yet as soon as the Christmas plants are out of the way the grower will have to think of Easter and prepare for it. Where it is necessary to depend upon a crop for a given date and be sure of its coming in there is, we believe, no variety to equal Giganteum for the purpose. *L. Formosum* is a good lily with handsome foliage and makes an elegant pot plant, but our experience with it, and we believe this coincides with that of other growers, is that the variety is not to be depended upon to come in regular. There will be some plants showing bud when only a few inches high, others will grow very tall before showing and a good deal of shifting about of the plants is necessary to keep them in regular batches.

To be in on time for Easter, Giganteum lilies should be well started by the new year and as the treatment is the same for all seasons, or practically so, it may be briefly described again for the benefit of beginners in lily forcing. It always pays to buy the best quality bulbs. The great percentage of loss from "culls" in any but the best renders the latter by far the cheapest in the end, to say nothing of the time, soil and pots used in potting the culls to be afterwards thrown away. For no matter how these are treated they never amount to anything and it is time and money wasted to keep them. For all but the earliest forcing we pot the bulbs at once on arrival in 6-inch pots, unless they are for making up into large pans, when we pot into the smallest size they can conveniently be got into and repot when they have made sufficient growth to determine how they will match with one another so as to flower simultaneously in the pans.

Soil is not an important factor in lily culture; provided it is not too heavy and that fresh, green manure is not mixed with it, any ordinary potting soil will do. We just leave the extreme point of the bulb above the surface of the soil when potting and always place a crock over the drainage hole as well as placing some of the rougher parts of the soil in the bottom. A good bed of ashes is fine to stand the plants upon after potting and also to cover them with, but in localities where oil is used for fuel these cannot usually be had and here we have to make the best of what is at hand by using sand or soil beneath and covering with straw. Before covering with either the bulbs are given a thorough watering and, when ashes are used as a covering, this usually suffices until the bulbs have rooted sufficiently to start in the houses. But where straw or litter is used, the evaporation is greater and at least two or three waterings are necessary, taking off the straw to decide whether they are dry or not and returning it afterwards.

The bulbs being kept dark, cool and moist by these means they will, as a rule, be well rooted before they grow much and such bulbs are the most satisfactory always. When they are taken out of the ashes or straw the shoots are usually whitish, showing the need of light and air, but these must be given gradually, the bulbs being shaded for a few days after housing. Among the most frequent mistakes made by beginners is giving too much water in the earlier stages before much growth has been made or the roots have attained a good hold of the soil. They are not usually in need of much moisture at this stage as the old bulb has a lot of stored up nutriment, while continual watering of the soil renders it water-logged and unfit for the tender young roots to enter. Let the soil

J. Jones.

President Pittsburgh Florists and Gardeners' Club.

dry out well every time between waterings and then give enough to soak thoroughly every bit of compost in the pot. Feeding too early is another mistake frequently made. There is no rule without exception, but if the soil in the 6-inch pots is good and fairly well manured, no feeding ought to be necessary before the buds show or rather before the growth flattens out on top preparatory to showing bud. The growth up to this stage has practically been taken care of by the watering and the nutriment in the old bulb, but the size and substance of the blooms will depend largely upon careful watering and feeding from this time on.

Again with heat, although the growth may be hastened some, very little real progress is caused by applying a forcing temperature much before the buds show. Up to this time we find that a temperature of from 60°-65° is ample and the growth made under these conditions and with ample light and air is the best possible. During the early part of the growing season the plants should be selected or graded so that all that are in the same condition are kept together. Syringing may then be carried on systematically, giving each section just the correct amount to keep the foliage in good condition without wetting the soil unduly. We like to get

the hose playing around them each way daily so that green fly gets no chance to take hold, but this, of course, is not possible in dull weather in the east and middle west. Circumstances alter cases and that grower of Easter lilies will be most successful who studies local conditions and the state of the weather and treats his plants accordingly rather than by only rule of thumb methods.

H. R. R.

### Cement Benches.

ED. AMERICAN FLORIST:

Can you inform me whether cement benches are a success and the proper way to construct them?

SUBSCRIBER.

Cement benches are very successfully constructed and used by many growers.

There are two ways of making concrete, one the wet system in which the material is mixed so that it is mud like, or the consistency of thick cream, so that it will flow free enough to fill the mold. The other is known as the dry system which is used in making concrete blocks. Here the material is only dampened enough so that the particles will hold together after being tamped firm and thus retain the form of the section being constructed when removed from the mold. These sections are then allowed to dry, but not reach their maximum strength until they have absorbed sufficient water.

In the first method the concrete thus formed is not porous, because the liberal amount of water has removed all the air between the particles which compose it. In the dry system the concrete is porous for the reason it is impossible to tamp the semi-dry material hard enough to dispose of the air spaces between its particles. These reverse conditions can easily be demonstrated by making two slabs. Take any ordinary flat such as is used for growing plants; make one with a light bottom into which pour the wet mixture and tamp another full of the semi-dry, and when both are sufficiently hard to handle, note the difference in the amount of water they will take up.

Our sections are made of ashes and Portland cement, four parts ashes to one of cement, and are so porous that we have to be careful that the plants do not become too dry at the bottom and sides of the benches. It is certainly a great relief not to have to repair benches before refilling. When properly constructed, with a good foundation of concrete under each post so there is no danger of settling, these benches should remain in perfect condition for many years.

The sills or side sections which are 54 inches long are reinforced with steel rods. The inside is made with a flange on which the bottom sections rest. The bottom sections are reinforced with steel rods at two outside edges, and at this point 2½ inches in thickness and at the center 1¼ inches. This system has been very satisfactory with us and we shall continue this form of construction until an improved method appeals to us.

ELMER D. SMITH.

MONTCLAIR, N. J.—Philip H. Cox, for the past eleven years, Superintendent of the estate of C. L. Bausher, has accepted a position with the Pierson U-Bar Co., where he began his duties February 1.

## Garden Scholarships.

The Missouri Botanical Garden has issued an announcement concerning the scholarships for garden pupils to be available on and after April 1. Applications and inquiries concerning admission to the garden as pupils are to be addressed to William Trelease, Director Missouri Botanic Garden, St. Louis, Mo.

## Personal.

W. E. Wallace, the noted English carnationist, with Mrs. Wallace, sailed on the S. S. Campania, February 4, for the United States, where they will visit leading carnation centers. E. G. Hill says Mr. Wallace is the Dorner of England.

Secretary John G. Esler, of the Florists' Hall Association, was struck by a street car in New York, February 3, and had his hip dislocated. The injury has been successfully treated at the New York hospital, Fifth avenue and Sixteenth street, where Mr. Esler remains under treatment.

GLASS continues very low.

ST. VALENTINE'S DAY can be made a great flower day by offering seasonal inducements.

The National Flower Show will be the greatest event of the kind ever presented in this country, and no florist can afford to miss it.

The annual proceedings and bulletin issued by the American Rose Society contains the account of the annual convention held at New York in 1910 with the papers read and illustrations of the exhibition held in conjunction with the meeting, with illustrations of the different exhibits and the premium list for the exhibition to be held in 1911. It is splendidly assembled and finely printed.

## Coal.

The coal business in the Chicago market is practically at a standstill, caused by the mild weather we have had so far this winter. Most of the prices being quoted are as low, and some lower than what is customary even during the summer months. A number of the selling agencies which last year at this time could easily handle 100 car shipments, are having trouble in disposing of 10 and 15 cars at present. Many concerns have called their salesmen off the road, as they claim there is not enough business to warrant keeping them out.

## Outdoor Flowers for Cutting.

ED. AMERICAN FLORIST:

We have some acres of good land and wish to know when and what to plant for summer cut flowers.

Illinois.

GROWER.

The best plants for this purpose in your location are found among the annuals, hardy herbaceous perennials, dahlias, peonies and gladioli. Good selections are as follows:

Annuals—Antirrhinum Large Flowering, white and other colors; Asters June-Flay, white; Crego, Hohenzollern, Upright Branching, white; Branching, white, lavender, flesh pink and rose pink, Smith's Peerless, white and pink (new) extra fine; Candytuft Giant Hyacinth-Flowered, Celosia plumosa Thompsoni Magnifica, Centaurea Cyanus, double white, double pink and double blue; C. Americana alba, C. imperialis alba, Gaillardia Lorenziana, Gypsophila elegans grandiflora alba, Mignonette Goliath, Stocks Bismarck and Giant Perfection, in colors; Sweet Peas, Dorothy Eckford, White Spencer, Countess Spencer varieties, Lady Grisell Hamilton, King Edward, Gladys Unwin and Florence Morse Spencer.

Perennials—Achillea The Pearl, Boitonia asteroides, B. latissuama, Chrysanthemum maximum, C. uliginosum, Cimicifuga Americana, Coreopsis lanceolata, Delphinium Mrs. Thompson, Gaillardia grandiflora, Gypsophila paniculata, fl. pl., Helenium Riverian Gem, H. Riverton Beauty, Helianthus multiflorus fl. pl., Hemerocallis, Iris, German and Japanese; Peltaria alliacea, Physostegia virginica alba, Scabiosa Caucasica, Shasta dairy, Tritoma Pfitzeri, Trollius.

Dahlias—A. D. Livoni, pink; Bonnard's yellow; C. W. Bruton, yellow; Countess of Lonsdale, apricot; David Harum, red; Gloire de Lyon, white; Henry Patrick, white; Holsatia, red;

Kaiserin Augusta Victoria, white; Lavine, white; Mrs. Chas. Turner, yellow; Pink Pearl; Queen Victoria, yellow; Santa Rosa, red; Strahlenkrone, red; Sylvia, pink; Volker, yellow; Wm. Agnew, red.

Peonies—Dorchester, shell pink; Duchesse de Nemours (Calot), white; Edulis superba, pink; Felix Crousse, red; Festiva, white; Festiva Maxima, white; Floral Treasure, pink; Jeanne d' Arc, light pink; Lady Leonore Bramwell, pink; Madame de Verneville, white; Officialis Rosea Superba, early red; Richardson's Rubra Superba, red.

Gladioli—America, Augusta, Breuchleyensis, Madame Monneret, Mrs. Francis King, Shakespeare and Silveretta.

## Greenhouse Heating.

ED. AMERICAN FLORIST:

Enclosed please find sketch of three connected houses, each 20x65 feet, with three feet of glass in sides of two outside houses. The south ends are glass, the north ends are wood and built up to shed. They are 11 feet from walk to ridge and each house has two rows of purlin posts upon which I wish to hang the flows and let the returns come back on side walls. I have a lot of 2-inch pipe which I would like to use for returns. Also tell me what size main to use, what size flows and how many 2-inch returns I will need to keep a temperature of 60° in each house. What rating must a sectional boiler have to run these houses, burning a slow fire, not pushing the boiler?

Mississippi.

J. B. A.

Use two 2-inch flows on each house on the purlin posts as proposed, and in the outer houses with the exposed glass in the walls put in nine 2-inch returns of which five should be on the exposed wall. In the middle house four 2-inch pipes on each wall will be sufficient. This amount of radiation should be sufficient to maintain a temperature of 60° when the mercury stands just below the freezing point, which is probably about the right estimate for southern Mississippi. If the weather is likely to be as low as 25° use two 2½-inch flow pipes in each house.

L. R. T.

## Meetings Next Week.

Baltimore, Md., February 13, 8 p. m.—Gardeners' and Florists' Club of Baltimore, Florists' Exchange Hall, St. Paul and Franklin streets.

Cincinnati, O., February 13, 8 p. m.—Cincinnati Florists' Society, Jabez Elliott Flower Market.

Cleveland, O., February 13, 7:30 p. m.—Cleveland Florists' Club, Progress Hall, 2610 Detroit avenue.

Indianapolis, Ind., February 14, 3:30 p. m.—State Florists' Association of Indiana, State House.

La Crosse, Wis., February 14—La Crosse Gardeners' and Florists' Society, Hotel Stoddard.

Lake Geneva, Wis., February 13, 8 p. m.—Lake Geneva Gardeners' and Foremen's Association, News building.

New Orleans, La., February 12, 2 p. m.—Germans Horticultural Society, Kolbs' hall, 127 St. Charles avenue.

New Orleans, La., February 16, 8 p. m.—deners' Mutual Protective Association, 118 Exchange alley.

Newport, R. I., February 15—Newport Horticultural Society.

New York, February 13, 7:30 p. m.—New York Florists' Club, Grand Opera House building.

Pasadena, Calif., February 17, 8 p. m.—Pasadena Gardeners' Association, Board of Trade rooms, West Colorado street.

Rochester, N. Y., February 13, 8 p. m.—Commercial Florists' Association of Rochester, 416 Cutler building.

Scranton, Pa., February 17, 7:30 p. m.—Scranton Florists' Club, Quercus building.

Springfield, O., February 13—Springfield Florists' Club, office of the Good & Reese Co.

## OBITUARY.

### John Bauscher, Sr.

John Bauscher, Sr., the oldest florist and gardener of Freeport, Ill., and founder of the business now conducted by his son, died of pneumonia January 26.

Mr. Bauscher was born in Frankfort-on-the-Main, Germany, March 7, 1834, and with his mother and two brothers came to America in the fifties. He learned the harness maker's trade and in 1864, being drafted, entered the army, making harness and saddles for the government. After the war he established a gardening and florist business in Freeport, a trade which he had learned under one of the best florists in Germany. From modest beginnings the business increased and twenty-four years ago he retired, his son, John Bauscher, Jr., succeeding him. He was one of the organizers and a prominent member of the Germania Society, and a member of the saengerbund.

He married in 1862 Miss Sophia Hoffman and she, with the four children, two sons and two daughters, survive him. He also leaves ten grandchildren and two great-grandchildren. The funeral was held at his late home January 29 and the interment was in Oakland cemetery.

### Gus Van Velsen.

After an illness of six weeks duration, contracted from exposure which developed into inflammatory rheumatism, Gus Van Velsen died at the Nyack, N. Y., hospital, February 3. He was a native of Holland, a son of Peter Van Velsen, the well known bulb grower of Haarlem, and came to America in the early nineties and was employed by Pitcher & Manda, Bobbink & Atkins and other firms near New York. He located in the vicinity of Nyack several years ago, and was employed up to within a few weeks of his being taken sick by the Palisades Nurseries at Sparkhill, N. Y.

JACKSON, MICH.—Henry M. Burt has completed arrangements for the erection of three greenhouses on Francis street. Two houses, 27x150 feet, with a show house, 24x37 feet, of modern construction, will form the new range.

## Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Ads., See Ready Reference Section.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

**Situation Wanted**—As foreman; all around florist, where Am. Beauties are a specialty preferred. Key 376, care American Florist.

**Situation Wanted**—By first class decorator and storeman; ten years in last position; references. Address Key 352, care American Florist.

**Situation Wanted**—By first class rose and carnation grower; single, preferred; state wages and full particulars. Key 387, care American Florist.

**Situation Wanted**—Young man, single, age 26, wants position on good private place; has a thorough knowledge of orchid growing. Address 732 N. 41st St., Philadelphia, Pa.

**Situation Wanted**—By seedsman and plantsman as seedsman; 10 years' English experience, four years' American; good address; state wages offered. Key 375, care American Florist.

**Situation Wanted**—First class storeman and decorator wants position in good store, preferably New York; eight years' experience from last employer. Address Key 383, care American Florist.

**Situation Wanted**—Young man, 26, thoroughly experienced florist and gardener, offers his services to flower store and nursery; best references. Address EDMUND VOHS, 84 Broad St., New York.

**Situation Wanted**—As foreman or manager in up-to-date commercial place, wholesale or retail, by competent grower of first class stock; life experience; middle aged, married. J. H. 712 Greendale St., Meadville, Pa.

**Situation Wanted**—Young man, German, 23, thoroughly acquainted with the trade, desires position as florist and gardener in nursery or private; best references. Address PAUL PIETZSCH, 84 Broad St., New York.

**Situation Wanted**—Man of general experience in all lines of work, greenhouses, fruit, flower and vegetable gardening, is open to engagement on private place. For further particulars address ERNEST GRANT, 122 Marengo St., Chicago.

**Situation Wanted**—Bulb grower and salesman, employed 11 years' experience in traveling (U. S., England, Germany, Sweden, etc.), wishes to secure another situation as buyer or salesman; excellent references. Address Key 377, care American Florist.

**Help Wanted**—All around young man with some experience in greenhouse and hotbeds; must be willing to do anything around a truck garden; state wages with board and lodging in first letter. WILLIAM HILD, Milesville, S. Dakota.

**Help Wanted**—A good practical florist, married, preferred; one who knows the business and can be working foreman; one who can water, pot, propagate, fill glass hampers artistically and posted in floral decorations; we do not grow roses or carnations, but handle thousands of them; have 25,000 feet of glass; city of ours is 150,000; state wages wanted and references in first letter. W. G. MATTHEWS, Dayton, Ohio.

**Partner Wanted**—Capable, sober and strictly honest young man with some capital, to engage with us in florist business in a No. 1 growing town; no competition; climate and healthfulness unsurpassed; investigation courted; that we are willing to put up money is evidence of our faith. SLOAN BROS., Greenville S. C.

**Address Wanted**—Mr. F. A. King please write Geo. R. LAWLER, Newport, Ky., regarding position.

**For Sale**—Greenhouse property; wishing to change climate on account of rheumatism. I offer for sale my business consisting of about 12,000 sq. ft. of glass, four greenhouses, seven acres, two city blocks of land, good 8 room dwelling, heated by steam from greenhouse boiler, barn, artesian well; place in good repair; located at St. Peter, Minn., a city of 500; no opposition; good outlet; write to ST. PETER GREENHOUSES, St. Peter, Minn.

## Greenhouse Man.

Experienced man thoroughly qualified in all lines of commercial floriculture, single, with reference; state age and salary expected. Address

P. O. Box 1296 Philadelphia, Pa.

## WANTED.

**Carnation Grower.** Applicant must be a man of thorough experience and be able to furnish first-class references. A splendid opportunity for the right party.

Key 388, care American Florist.

## WANTED

Good florist where a mixed stock is grown; one who can produce the goods. Wages \$15.00 a week to start with, and more to the right man when capability is shown. Address

ADOLPH DONART,

Coeur D'Alene,

Idaho.

## Store Manager Wanted

With \$5,000 Capital

Must be capable of conducting a large store business established many years in a prosperous city in the middle west. Applicant must be competent also to market advantageously the considerable greenhouse output of high grade plants and cut flowers. Address

Key 378, care American Florist.

## For Sale

Five modern greenhouses with complete stock of ferns, plants and mums, also a Kroschell boiler, piping, 150 new hotbed sash, one horse and four wagons. Will lease the ground, store and 6 room flat (hot water heat) on favorable terms for five years with privilege of buying or renewal of lease. \$5,000 cash and balance of \$3,000 on time takes this fine paving business that has been established for over 20 years and has a good steady trade. Reason for selling, owner expects to leave the city. Possession about June 1. Apply in person or by mail or phone to

PETER SROCCZYNSKI,

1525 N. Harding Ave.,

Phone Humbolt 299. CHICAGO.

# Why Are You Growing Carnations?

For profit, of course, which involves two things—pleasing your trade and making money. Now, are you keeping yourself posted, at first hand, about the new sorts, or are you sticking to old kinds simply because they made money for you years ago?

If you are taking somebody else's word for the merit of the new carnations, you're doing yourself an injustice, no matter whether the opinions you hear are favorable or not. It wouldn't cost you much to try at least **some** of the new ones that had "made good" for other growers and see what they would do in **your** houses; in fact, **that's** just what we want you to do with

## Carnation Dorothy Gordon

of which you've heard so much the last season or two. It has made money for us—we grew it for years before we advertised a single cutting for sale; it has succeeded for scores of others, enabling them to grow more flowers and make more money than they ever had made from other carnations.

But you need more proof than either of these that "Dorothy Gordon" is the carnation for you to grow. So we say, **try it out yourself**—put some of our rooted cuttings in your own range; see them grow and bloom, sell the flowers and feel the money—the **extra** money you get for Dorothy Gordon—padding out your pocket. **That's** the way to find out its worth—it's the **only** way that's fair to you and to us.

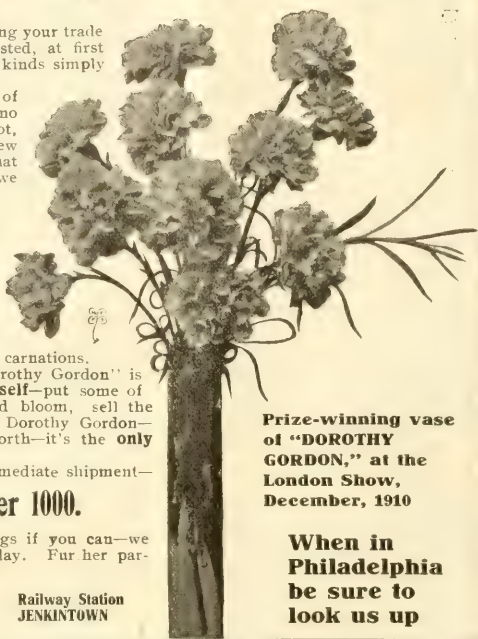

We've a choice but limited stock of plants ready for immediate shipment—

**Rooted Cuttings, \$6 per 100; \$50 per 1000.**

Come and see our stock of blooming plants and cuttings if you can—we always prefer that. If not, mail your order **now**—don't delay. For her particulars gladly furnished on request.

**Joseph Heacock Co., Wyncote, Pa.**

JENKINTOWN

Prize-winning vase of "DOROTHY GORDON," at the London Show, December, 1910

**When in Philadelphia be sure to look us up**

## NEW CARNATIONS

Immediate delivery on White House, the "King of the Whites." Will bring a higher price in the flower market than any other white. Princess Charming a beautiful light pink. Washington, a Lawson colored sport of Enchantress. Christmas Cheer, the ideal Christmas red. Bonfire, Hill's splendid scarlet. February delivery, \$12.00 per 100; \$100.00 per 1000.

## NEW ROSES

Lady Hillingdon, Mrs. Aaron Ward and Melody, three fine yellows. Rose Queen, the finest thing in pink. Radiance and Double Pink Killarney. Now booking orders for March delivery. If you did not receive our catalogue, write for it.

## CHRYSANTHEMUMS

Novelties and standard varieties. We carry 85,000 stock plants and can fill any order you favor us with.

**CHAS. H. TOTTY,**

**MADISON, N. J.**

St. Louis.

### CHANGEABLE WEATHER

The weather the past week was changeable, like midsummer at first and then cloudy and cold. Violets have become scarce and the price has advanced materially. Roses are still scarce, but carnations have become a little more plentiful. The supply in jonquills has increased and sweet peas are of better quality. Quite a few orchids are to be seen.

### NOTES.

The officers and trustees of the Florists' Club met last Saturday at the store of the Wm. C. Smith Wholesale Floral Co., to discuss plans for celebrating the silver anniversary.

The Catlin wedding was a grand affair. C. Young & Sons Co., the Elison Floral Co., and Miss M. S. New-

## 'MUMS FOR FLORISTS.

We are very strong on many of the Commercial and extra strong on the Exhibition varieties from 24 in. pots; place your orders early so as to secure early delivery.

We would also be pleased to fill your order for Aster Seed as we have one of the finest strains known as well as a good list of the standard kinds.

**ELMER D. SMITH & CO.,**

**Adrian, Mich.**

man had the decorating and flower work.

Wm. C. Smith, Wholesale Floral Co., has put in a steam heating apparatus. This firm is young, and a hustler.

Mike Mitchell, formerly of Little Rock, who succeeded John Quinn, is doing a nice trade.

W. J. & M. S. Vesey are now making regular shipments of orchids to this market.

The Red Bud Floral Co. have opened up a double store on Sixth street.

Geo. Hartman has a fine crop of violets.

W. F.

WORCESTER, MASS.—The Worcester County Horticultural Society will build a brick addition to their building on Front street, at an estimated cost of \$23,000.

# WASHINGTON

**The Dark Pink Sport of Enchantress**

**The Recognized Money Maker for Any Florist to Grow**

CHARLES H. TOTTY,  
Floral Novelties,

MADISON, NEW JERSEY, January 23, 1911.  
Chicago Carnation Co., Joliet, Ill.:

Dear Sirs:—The Washington cuttings reached us in good condition and are entirely satisfactory.

Yours very truly, CHARLES H. TOTTY.

KALISCH BROS. FLORAL CO.  
Cut Flowers and Plants,

ST. LOUIS, MO., Jan. 20, 1911.

Mr. Pyfer: Dear Sir:—Our opinion of your new carnation Washington, as to its qualities, is as follows: In the first place, it is no doubt the largest pink carnation we ever saw, and also has a long, wiry stem. It also keeps from three to four days longer than any other carnation we have ever handled, and the color is perfect for decorating purposes. If you can give us all Washington carnations on our order, we will appreciate it.

Yours very truly,

KALISCH BROS.

There is no question about this new Carnation **Washington** being the most profitable Carnation in this color. That is why all the large Carnation Growers near Chicago will grow **Washington** exclusively for dark pink. They have watched this variety the whole season and are convinced there is no better variety of this color. How can there be anything better than the Enchantress family? We all know they are the most profitable and easy to grow.

**Strong, Well-Rooted Cuttings, ready for early delivery:**  
**\$10.00 per 100; \$20.00 per 250; \$75.00 per 1000.**

**Chicago Carnation Co.,** A. T. Pyfer, Mgr., **Chicago**  
35-37 Randolph St.,

DES PLAINES FLORAL CO.  
Wholesale Florists,

DES PLAINES, ILL., Jan. 27, 1911.

Chicago Carnation Co., Chicago, Ill.:

Gentlemen:—I have seen blooms of Washington four different times this season, and have been to see it growing in your greenhouses at Joliet.

I noticed the habit was like the old favorite Enchantress; color was good whenever I saw it. I believe it will be a money maker. We have received two shipments of rooted cuttings of it so far, and must commend you on the quality of the stock sent us; they were very satisfactory.

Yours truly,  
DES PLAINES FLORAL CO.,  
per Harry Blewitt.

KRING BROTHERS,  
Wholesale Carnation Growers,

FAIRBURY, ILL., Jan. 19, 1911.

Chicago Carnation Co., Chicago, Ill.:

Gentlemen:—You may ship us 1000 more Washington and 500 Dorothy Gordon cuttings, providing you can ship on or before Feb. 1, 1911.

The 2,000 Washington in first shipment came in in the very best possible condition, and the cuttings were fine and are starting off nicely.

Yours respectfully, KRING BROS.

H. W. BUCKBEE,

Rockford Seed Farms—Forest City Greenhouses,

Chicago Carnation Company,  
35-37 Randolph St., Chicago, Ill.:

Gentlemen:—About two weeks ago I had the pleasure of personally looking through your establishment at Joliet.

There are so many new varieties of flowers constantly being offered that are not quite up to expectation, that at times one is apt to overlook a "Good One."

I did not expect to order many "Washington" when I left home, but before I left your place you will remember I placed a good order with you. "Seeing is believing"—I believe "Washington" is a producer. The color is right; the calyx is right; the stem is right; the foliage is right.

Second shipment of cut "Washington" blooms arrived yesterday in fine condition and are very satisfactory.

I believe George Washington would like this flower. I wish you success.

Very sincerely,  
H. W. BUCKBEE.

### Chicago.

#### STOCK RECEIPTS INCREASING.

The tide has turned and during the last week the amount of stock received increased greatly, and there was a much easier feeling among the dealers, who have been at their wits' end for the last two weeks in filling the orders received. The weather has now again turned dark and cold and there will probably be a shortening up if the kind of weather being experienced the beginning of this week lasts for any length of time, but the days are perceptibly longer and the crops have got a new start, and it is doubtful if much more difficulty will be experienced. Roses are a little more plentiful but have not fully recovered from the short, dark days which have been experienced but larger shipments were received during the latter part of last week. American Beauties are showing up much better, the quality improving with the brighter weather and the blooms are of fine grade. Killarney is of much brighter color and the flowers now being received are of fine quality. Richmond is grand and of the brightest shade. Some very fine My Marylands are also seen. Brides and Bridesmaid are of mid-winter form. Carnations are much more plentiful, and, as the rose question eases up, are not feeling the heavy drain and the prices are lower. Violets are beginning to be quite plentiful. Orchids are still in good supply with the prices holding at about the same figures. The stock of bulbous flower is increasing rapidly both as to quantity and variety. There is a large assortment of tulips of all colors, and both Von Sion and Golden Spur narcissus of splendid quality are to be obtained and some very nicely grown pans of these are to be seen. Paper White and Orange Phoenix narcissus

51 Wabash Ave., CHICAGO

and Roman hyacinths are in great quantity and unload slowly at times. There is a goodly quantity of other flowers, lilacs, freesia, marguerites, mignonette, calendulas, and antirrhinums are all daily offerings. Sweet peas are improving both in quantity and quality and beside the white and pink the other colors, lavender and purple, are now to be found. Greenhouse greens are still plentiful enough, there being a good supply of both kinds of asparagus and smilax, but the hardy green stock is getting depleted and the prices of hardy ferns has advanced.

#### NOTES.

Manager Pyfer of the Chicago Carnation Co. speaks very highly of Princess Charming, the new carnation originated by Henry Eicholz, of Waynesboro, Pa. This carnation has proved to be a wonderfully prolific bloomer with this firm and Manager Pyfer states that at the present time it is bringing a better price than any other variety in the market.

Andrew Anderson, the well known florist of Batavia, was seen in the local market on Saturday buying a large quantity of stock for funeral work which he had the day following. Mr. Anderson is contemplating the erection of two new houses this season.

Harry Nicholson, the traveling representative for the Chicago Carnation Co., returned recently from a successful western business trip. Mr. Nicholson attended several florists' club meetings while on the trips and reports having had an enjoyable time.

Arthur Weatherwax, with Wm. J. Smyth, Michigan avenue and Thirty-first street, is the proud papa of a baby boy which was born February 2.

Wm. Graff, of Columbus, O., accompanied by several of his friends, attended the auto show at the Coliseum last week, returning home February 6.

Wm. Timme has accepted a position as shipping clerk with Vaughan & Sperry and entered upon his duties February 6.

## POEHLMANN'S FANCY VALLEY EXTRA FINE HARRISII LILIES

We make these a specialty.  
Can supply them all the year.  
Once tried you will have no other.

The Raedlein Basket Co., 713 Milwaukee avenue, on February 4, received from their factories located at Ebersdorf, Germany, a shipment of baskets for the St. Valentine day trade. The violet hampers are particularly attractive and meeting with great favor and a large number have already been sold.

John Michelson, with the E. C. Ameling Co., is of the opinion that there will not be as many violets for the St. Valentine day trade as there was last year, for the heaviest crop is over. This firm is now receiving a large quantity of Killarney and American Beauty roses of exceptionally good quality.

Chas. Schaffer, superintendent of the O. M. Howard greenhouses at Glencoe, was a welcome visitor on February 2. Three houses, 24x150 feet, are devoted exclusively to the growing of Marie Louise violets and the entire

output is sold direct to leading retailers of this city.

W. F. Schofield, the North State street florist, is the possessor of a new Van Dyke delivery car which is now on exhibition at the auto show in the Coliseum. The car is attracting the attention of the visitors to the show as it is beautifully decorated with cut flowers and palms.

Fred Sperry, the junior member of the firm of Vaughan & Sperry, is confined to his home with a severe attack of the la grippe. This firm is now receiving a fancy grade of American Beauty roses and a large quantity of bulbous stock of all kinds.

E. E. Pieser of Kennicott Bros. Co. says that last month's business shows an increase of 20 per cent over that of January in 1910. The collections for the same month were very good and exceeded the gross amount of the month's business.

At J. A. Budlong's the stock is arriving in splendid condition and in much larger quantities than for some time past, this firm will soon have a large supply of My Maryland roses, as a large crop is now coming on.

O. Johnson of the Flower Grower's market has secured a three years' lease on the store now occupied by J. A. Budlong and will take possession as soon as the lease held by present occupant expires.

A. Dietsch Co., 2642 Sheffield avenue, is enjoying a very good trade and is kept very busy turning out greenhouse material for a number of orders which they have booked.

Peter Reinberg is filling a large number of orders for a splendid grade of American Beauty and Richmond roses in short, medium and long stems.

Carl Bachler, Thirty-fifth and Leavitt streets, reports business as good with plenty of funeral work.

# Extra Fancy Beauties

## Cattleyas, Tulips, Valley, Violets

Killarney, Pink and White, Richmond, Bride and Maid  
Boxwood, Ferns, Leucothoe and Mexican Ivy

Plenty of all other Seasonable stock. and Fancy Carnations in good supply.

# VAUGHAN & SPERRY

LONG DISTANCE PHONE  
CENTRAL 2571

52-54 Wabash Ave., CHICAGO.

The wholesale men held a meeting at Hoerber Bros.' store, February 4, in regard to taking over the lease of the proposed building on Market and Lake streets. A committee consisting of Aug. Boehlmann, chairman, C. M. Dickinson and Nic. Wietor were appointed to call on the wholesalers and get the signature of all those who favored the new location and also the amount of floor space each would require. This committee was to report at a meeting held on February 8.

J. Mangel, Wabash avenue and Monroe street, on February 3, arranged the decorations for the banquet of the Steel Corporation at the Blackstone hotel. Mr. Mangel also arranged the decorations for the silver wedding at the Booth home on the south side, which occurred February 4. The sale of azaleas at the auto show was a feature last week, upwards of 300 plants were disposed of during the exhibition.

The store of A. Lange, 44 East Madison street, with its 24 employees, is a busy place, resembling the proverbial bee-hive on February 4. The amount of funeral work which has been arranged since January 1, is far in advance of any similar period.

Boehlmann Bros. Co. is receiving a good supply of lily of the valley of A 1 quality. The Killarney roses that this firm is cutting are exceptionally fine, the color, foliage and stem being all that could be desired.

The Alpha Floral Co. have had an unusually good week at their store on Wabash avenue and Adams street, a large amount of funeral work keeping all hands very busy.

Paul Berkowitz, a member of the firm of H. Bayersdorfer & Co., Philadelphia, Pa., accompanied by his wife, spent a few days in the city this week. Bassett & Washburn are cutting a large quantity of formosum lilies of

## Fancy Carnation Blooms

### THE PLEASING KIND

## CHICAGO CARNATION CO.

A. T. PYFFER, Manager.  
Phone Central 3373.

35-37 Randolph St., CHICAGO

exceptionally good quality which are eagerly sought for by the trade.

M. P. Dilger, the Waukegan florist, was seen in the local market February 4 buying stock for funeral work for which he is having a good call.

John Kruchten is having a good call for gardenias, the popular flower that is used by many of the leading retailers in their high class work.

J. J. Ziska, formerly with the Chicago Rose Co., is now employed at the county building, having entered upon his duties February 6.

The J. B. Deamud Co. is supplying their customers with a splendid grade

of roses, carnations, tulips, lily of the valley and violets.

N. J. Wietor failed to put in an appearance at the store on February 7, being confined to his home with a severe cold.

Henry Van Gelder, of Percy Jones, is filling a large number of orders for carnations of exceptionally good quality.

Chas. W. McKellar is recovering from a severe case of blood poisoning which has been troubling him for some time past.

President Hutchinson, of the Horticultural Society, will sail for Europe February 18.

# BEAUTIES!

We are cutting heavily in **AMERICAN BEAUTY ROSES** and can fill your order on short notice. Also a fancy grade of **RICHMOND, KILLARNEY** and **WHITE KILLARNEY**. Plenty of all other seasonal stock.

## CHAS. W. MCKELLAR

51 Wabash Avenue.  
CHICAGO.

A number of visitors were present, including Treasurer Kasting, of the Society of American Florists, C. W. Scott, New York, and Nic Zwiefel, North Milwaukee, Wis., all of whom made brief addresses. Mr. Kasting stating that the National Flower Show would be a great event and that everyone in the trade should attend and if possible make an exhibit.

President Asmus, of the Society of American Florists, also referred to the rosy outlook for the national event and urged the members not to overlook the state meeting and exhibition at Champaign February 8 and 9.

P. J. Foley, of the transportation committee, reported progress in the matter of securing accommodations for the National Flower Show trip, the arrangements for which will be announced as soon as completed.

Alex. Henderson, of the entertainment committee, will endeavor to arrange for rose and carnation meetings next month.

EDWARDSVILLE, ILL.—J. A. Ammann has decided to give up his store in the Wilsey block, and to handle all the local business from his greenhouses.

#### Chicago Bowling.

On February 5 the Joliet team, of which P. J. Olsen is a member, defeated the local boys at Bensinger's alleys, winning out by nearly 100 pins. The local team started out strong and at the end of the second game were 13 pins to the good, the number however proved unlucky for them for the Joliet boys came back strong and won out by a good margin. Hoffman of Joliet bowled exceptionally well in the last game, making 225, the highest individual score for the day.

The second team consisting of Lorman, Liebermann, Graff, Schultz and Wolff were also defeated by a Joliet team, losing out by 150 pins.

Individual and team scores for games played February 5:

| Chicago.               | Joliet.               |

MORE STOCK ARRIVING.

Business the past week has been somewhat better and more stock arriving, enabling both wholesaler and retailer to better take care of their customers. It will be several weeks before roses will be very plentiful but meanwhile bulbous stock of all kinds is piling in. Tulips, hyacinths, all colors, and Paper White narcissus are arriving in quantity. Lilies appear to be quite plentiful and find a good demand; callas, too, are clearing up daily. Freesia is plentiful, but not much sought after. Calendulas, sweet peas and forget-me-not are generally sold before they arrive. Carnations are becoming a little more plentiful, but by no means in excess of a good demand. Retailers can now get a better assortment of flowers for all kinds of work as, with a fair amount of sunshine, stock ought to become nearer normal in supply.

### NOTES.

This is the third and last call before the big show opens at the Florists' Club rooms on Detroit avenue, near West Twenty-fifth street, February 13, 1911. All those florists who have not as yet done their little share, please remember that these shows are for the good of all, and everyone is asked to contribute their little mite, either by a small exhibit, or at least favor the Florists' Club with their presence. Remember it costs you nothing and you never get too old to learn or see something new that will interest you. Your brother florists are always experimenting and new varieties are coming daily.

Cleveland's City Forester has a unique way of advertising his profes-

sion. He has secured a vast number of pictures of individual trees, trees in groups, park driveways, etc., and also pictures of insects and bugs that he is daily fighting to preserve our beautiful parks; these he is showing in the different schools in stereopticon views, together with a very interesting and instructive lecture on the care of trees and their uses to humankind.

A beautiful floral piece seen at the funeral of Patrolman Renner was one made by G. W. Mercer, 2991 West Twenty-fifth street, consisting of five links of a chain, the center link being broken, the five links representing five chums. Much favorable comment was expressed as to the workmanship and the appropriateness of this design.

The Smith & Feters Co. have an advertisement in the local daily newspapers both morning and evening. This firm has gone in for this form of ad-

HEAVY SNOW.

Another brand of weather greets us. This time a heavy snow, which is putting a damper on the "posie" business; stock was coming in just about right the past week, but this sudden change will check it to a great extent. Lily of the valley is finding slow sale in this market; Greens of all kinds are plentiful, excepting adiantum, which is very scarce.

CLUB MEETING.

It was election and carnation night at the regular meeting of the Florists' Club, February 7. The following were elected: John Jones, president; P. S. Randolph, vice-president; H. L. Blind, treasurer; H. P. Joslin, secretary; O. S. Crall, assistant secretary; E. C. Reineman, John Bader, Neil McCallum, executive committee. F. Dörner & Sons Co., Lafayette, Ind., exhibited Pink Delight, Shasta, Lady Bountiful, White Perfection, Dorothy Gordon, Mrs. Ward and Beacon. A. T. Lerch & Co., Allison Park, exhibited White Lawson, Enchantress, White Enchantress, Winona and Mrs. Lawson. Baur & Smith, Indianapolis, Ind., exhibited Pochontas, which was awarded a cultural certificate. Nic Zweifel, North Milwaukee, Wis., exhibited carnation Bright Spot, which was awarded a certificate of merit.

NOTES.

J. E. Bonsall, Salem, Ohio, who grows summer roses for this market, has just returned from a very interesting and extended trip as far as Skagway, Alaska. After taking in the Yellow Stone National park, he proceeded to Portland and thence to Alaska, where he states the vegetation was a revelation to him. He spoke particularly of clumps of pansies as big as a wash tub, and stems as thick as a pencil, with flowers corresponding. He thinks it also an ideal climate for sweet peas, having never seen such fine specimens before. After leisurely visiting Southern California, he returned home to "take off his coat and get after his roses," which consist principally of Kaiserin Augusta Victoria and President Carnot. The McCallum Co. will dispose of them on the market.

Frank Myers, of Chestnut Hill, Philadelphia, who consigns American Beauties to The Pittsburg Cut Flower Co., was a recent visitor.

Frank Stafford, formerly with McRae & Jenkinson Co., is now located with Randolph & McClements.

E. C. Ludwig, North Side, has been very busy with funeral work.

SIoux CITY, IA.—Mrs. J. C. Rennison, wife of the late J. C. Rennison, died at her home in this city February 8. Her husband was one of the well known figures at the conventions up to 1906 when he died.

## New York.

Saturday morning, February 4, we were treated to a thunder storm, accompanied by a heavy downpour of rain. The thunder and lightning is rather an unusual thing for February and coming as it did, on a Saturday morning, it had, possibly, some slight effect on the cut flower business. Still, trade is quite good; there are few items indeed that are coming in very plentiful, and retailers seem to be having just about business enough to use up the visible supply from day to day, which is a satisfactory condition all around. A very noticeable improvement is apparent in the selling prices of some of the bulbous flowers, particularly Roman hyacinths and Paper White narcissus. Both of these were in too heavy supply for several weeks, and prices ruled low, too much so in fact to be very profitable items from the grower's viewpoint. Tulips and the yellow narcissus in variety are meeting with ready sales as a rule, and prices remain quite firm. Sweet peas are selling well, as also is lily of the valley, of the latter there is quite a cut of short stemmed flowers coming in, but it clears out at some price or other. Lilies, both longiflorum and rubrum are coming in quite heavily, yet no break in prices is made. Violets are not quite so plentiful, and values remain quite steady. Gardenias are few in numbers and clear out well. The cattleya crop is still in, so any advance in these is yet out of the question. Marguerites, yellow and white, both are showing up rather more numerous and bring from two to three dollars per hundred, according to their size. Snapdragon, wall-flower and forget-me-not are regular features in limited quantities. Carnations are cleaning out fairly well every day, with quite steady prices; the white and light pink sorts are the most sought after, reds and crimsons probably averaging the least of any. Roses of all kinds and grades continue to clear out satisfactorily; crops are not heavy, as a whole, and prices all around remain quite firm. Asparagus in bunches have also been in good demand; smilax, however, is not clearing out any better than has been the rule for several weeks.

## NOTES.

The Decies-Gould wedding which occurred on Tuesday called for quite elaborate floral decorations. Alex McConnell had charge and lilies were a principle feature. At the bachelor dinner, given by Lord Decies at the Ritz Carlton Hotel February 4, the center of the table was laid out as a miniature race track; the flower scheme on the cloth was done with scarlet carnations and rose-leaves of the same flower were hung on the walls.

The next meeting of the New York Florists' club will be held February 13, the Bowling club will meet on the afternoon of the same day at 3 p. m. at their alleys Twenty-third street near Sixth avenue. The outgoing committee at the request of chairman Fenrich will meet at the club rooms at 7 p. m. to lay out plans for the Summer festival, let all members of that committee attend as it is important.

Theo. E. Hahn, 2556 Broadway, executed the decorations at both the church and the home for the recent Johnson-Gilmore wedding the special features were white chrysanthemums and lilies; rather unusual for this season of the year. Mr. Hahn has been located here nine years and has established a lucrative business.

The legislative committee of the Florists' club is mailing a letter to the trade and kindred societies asking for their co-operation in getting a bill through the legislature at Albany asking for an appropriation for the building of greenhouses for the carrying out of experimental work.

Eugene Dailledouze is home from a ten days' trip among his western friends. He visited while away, Cincinnati, Richmond, Chicago, and several intermediate points. Paul and Henry Dailledouze are in Porto-Rico enjoying summer temperatures.

Chas. Habermann has one of the oldest established florist's stores on upper Broadway, he is at 2648 and has been in the same block for 16 years. He has a large well equipped store and does a very fine business.

The S. S. Pennock-Meehan Co. have put a man out to sell ribbons exclusively, this firm has been specializing on ribbons for some time and their line is complete for all florist requirements.

Retail store men say that business is not quite as good as it was one year ago at this time yet there is something doing all the time and the only real cause of complaint is the stock.

Frank E. Benedict, a landscape gardener and florist of Water Mill, L. I., has just died, aged 59 years. He was interested in 27 other lines of industry besides those mentioned.

Hartman's Rosary is the title of the store at 2654 Broadway. Mr. Hartman has been located here four years and besides local trade he handles quite a few out of town orders.

A son was born last week to Mr. and Mrs. Armin Kretschman, West Nyack, N. Y.

Visitor: Edward Tourill, Roslyn, Pa.

## Washington.

## BUSINESS GOOD.

Business continues good, though there is complaint from some quarters on account of the scarcity of good roses, other stocks are in fair supply. Carnations are not over-plentiful but their scarcity is largely supplanted by a liberal supply of tulips, narcissus and freesias. As previously intimated, good roses are needed here and dissatisfied growers might profitably take this market into consideration. The supply of single violets and sweet peas, and stocks and snapdragons are beginning to arrive in more liberal quantities. In plants, cyclamens, primroses, cinerarias and small table ferns are selling well.

## NOTES.

Patrick O'Mara, of New York, who once said that he was not, properly speaking, a seedsman, but had been compelled to associate with them all his life, was in the city February 2, attending a hearing before the Congressional committee on Interstate and Foreign Commerce. Doubtless his next public appearance will be in New Jersey, before a committee on dynamite and other high explosives.

The veteran superintendent of the U. S. Botanical Gardens, Wm. R. Smith, was looking over the retail district on February 4. Though he was here in "the good old days befo' the wah," the years seem to sit lightly upon him. He is a grand old man and will outlive a lot of the "boys."

George C. Shaffer has been so busy of late that his entire force has been on the run the last three or four working hours. He has a fine line of customers and this is the season when they show their appreciation of his efforts to please them.

The Washington Florists' Exchange, of which G. Milton Thomas is president and Albert Schnell manager, is doing a fine business. They have a great demand for roses and are on the lookout for several good shippers.

Geo. E. Cooke has been very busy during the past week with dinner decorations, having as high as six in one day. In addition to the activities at his store, Mr. Cooke finds time, occasionally, to bowl a good game.

W. Marche had a number of large orders during the past week for funeral work. He has also had an addition of one, a daughter, to his family and as everybody is doing well he is happy.

John R. Morgan, who has a range at Connecticut avenue and Grant road and sells in the Center Market, has recently been selling very fine primroses and other flowering plants.

C. E. Brooks, who conducts a nice retail store at 1527 Fourteenth street, New York, is receiving a fine line of carnations from Fred Hill, a grower of Fairfax county, Virginia.

John Boyle, who has greenhouses at Silver Springs, Md., and stands in the Center Market, this city, has been recently sending in a fine assortment of flowering plants.

F. H. Kramer has now a limited quantity of his rose Queen Beatrice. This rose is pronounced by experts to be the best keeper ever put on this market.

Mayberry & Hoover, a long established firm in the retail business on Fourteenth street, have recently been doing some very artistic decorating.

J. R. Freeman has a very remarkable display of foliage and flowering plants at his Thirtieth street store.

Wm. Ernest, the red pot man of this city, is making extensive preparations to supply the trade with all the pots it needs.

A. F. F.

**SOUTH SUNBURY, MASS.**—The Anderson greenhouse range, consisting of seven houses, and the dwelling house and barn on the state highway, has been sold to J. A. Bartlett.

**WATERBURY, CONN.**—Alexander Dalas is building a range of greenhouses on the property which he recently purchased. Emil Hansen, of Oakville, is a new employee.

## MICHIGAN CUT FLOWER EXCHANGE, Inc.

Wholesale Commission Florists and Florists' Supplies,

38-40 Broadway,

All Phone Connections.

DETROIT, MICH.

Nashville.

The unusually warm weather of the past few weeks has had a tendency to bring everything out too soon, and in imminent risk of being killed by subsequent freezes. The sunshine has been good, for the snows and everything under glass is blooming freely. Plants are in beautiful condition and the sale good, azaleas, cinerarias, cyclamens, hyacinths, Paper Whites, narcissus and other plants supply a large demand.

## NOTES.

The Joy Floral Company has a nice variety, such as mignonette, snapdragons and swainsona, and a fine crop of sweet peas. The latter is very popular, being a novelty at this season; orchids are on in perfection just now; American Beauty is off crop, but Killarney, both pink and white, are sufficient for all demands.

Geny Bros. are going right ahead with their building and enlarging. They are erecting, east of their present range, at the new location, a large house, 30x200, and expect to have it completed in the next thirty days, when it will be immediately planted in carnations. M. C. D.

Gold Fish.

Although gold fish were probably introduced into England from China so long ago as 1611, there was but little interest in them until about fifty years ago. The Japanese and Chinese, on the contrary, have indulged in the rearing and breeding of fish in confinement for many centuries, and as a result of careful selection have succeeded in evolving many extraordinary quaint and beautiful varieties, of which the specimens at the Japan-British exhibition afford interesting examples. While the Chinese appear to devote their attention chiefly to the production of fish of abnormal hues, the Japanese have achieved success mainly in the rearing of specimens of curious shape and possessing abnormal fins. The telescope fish—a variety of gold fish with projecting eyes and extensive tail—being an extreme example. So extensive is this form of pisciculture in Japan that the fish described may well be included among the products of that enterprising country. Some difficulty was necessarily experienced in transporting these rare fish from the Far East to their home at the White City, but so successful was the experiment that fully 50 per cent arrived in this country in perfect condition, and have now apparently become thoroughly acclimatized and have multiplied to such an extent that shoals of tiny fry may be seen darting hither and thither in the miniature lakes at the exhibition.—London Gardeners' Chronicle.

## The Seed Trade.

### American Seed Trade Association.

E. L. Page Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.  
Annual convention at Milwaukee, Wis., June 20-22, 1911.

TUBEROSE bulbs are in brisk demand and short supply.

WITHEE, WIS.—The P. S. A. Ferguson Seed Co., of Minneapolis, Minn., has purchased 1,600 acres of land, and will establish a seed farm near here.

MISSOURI's proposed seed bill is not likely to go through, a committee of the seed trade of the state which called on the senate committee a few days ago, having had this assurance.

VISITED CHICAGO: C. W. Scott, of the Yokohama Nursery Co., New York; Fred Hogue, of the Hogue-Kellogg Co., Ventura, Calif.; H. A. Johns, of the Sioux City Seed & Nursery Co., Sioux City, Ia.

W. C. LANGBRIDGE and Chas. P. Gueff, representing Jerome B. Rice Seed Co., Cambridge, N. Y., and many others, were in Chicago this week en route to the Cannery's convention at Milwaukee.

VISITED MILWAUKEE: W. C. Langbridge and C. P. Gueff, of the Jerome B. Rice Seed Co., Cambridge, N. Y.; C. N. Keeney, LeRoy, N. Y.; H. A. Johns, of the Sioux City Seed & Nursery Co., Sioux City, Ia.; Theo. Cobb and C. B. Coe of D. M. Ferry & Co., Detroit, Mich.

NEW YORK.—The terrific dynamite explosion which occurred on the Jersey shore February 1, caused much breaking of plate glass among the downtown seedsmen. The Peter Henderson Co. had three large show windows shattered. Burnett Bros. had their front windows blown out and smashed and a barrel, with spray pump attached, which was on display in one of the windows, was driven almost across the street by the force of the explosion. The Stump & Walter Co. had all four of their windows destroyed, while Wm. Elliott & Sons suffered only the loss of two small windows in the rear of the store.—Cannas and gladioli are reported short in supply. Gladioli America in particular.—Alex. Forbes and P. O'Mara have been in Washington, D. C., on legislative business.

JEROME B. RICE, JR., Cambridge, N. Y., was married last week.

D. I. BUSHNELL, of D. I. Bushnell & Co., St. Louis, Mo., has returned from Guatemala.

SIX Dutch travelers are reported to be making the Pacific Coast points this year as against two last year.

JOHN LEWIS CHILDS, Floral Park, N. Y., stopped off at Chicago a few hours February 4, en route to Los Angeles, Calif.

CHICAGO.—Prices on the board of trade February 8 for grass seed were noted as follows: Timothy, \$10 to \$11 per 100 pounds. White clover, from \$22 to \$30.

### Seedsmen Protest at Washington.

The American Seed Trade Association's committee on legislation, representatives of the Wholesale Seedsmen's League and others, met with the interstate and foreign commerce committee of the house of representatives in the room of the latter at 10 a. m., February 2. The following seedsmen were present, as individuals or as representative committeemen: Albert McCullough, Cincinnati, O.; Albert Dickinson, Chas. Dickinson, Geo. S. Green and Chas. D. Boyles, Chicago; Patrick O'Mara, Alex. Forbes, Henry Nungesser and Marshall H. Duryea, New York; W. Atlee Burpee, Philadelphia, Pa.; John W. May, Alexandria, Va.; Watson S. Woodruff, Orange, Conn.; D. I. Bushnell, St. Louis, Mo.; Henry Wood, Richmond, Va.; Alex. L. Rogers, Alpena, Mich.; Kirby B. White, Detroit, Mich.; F. W. Boigiano, Washington, D. C.; John A. Smith, Toledo, O.; A. E. Reynolds, Crawfordsville, Ind.; C. H. Breck, J. K. M. L. Farquhar and Curtis Nye Smith, Boston, Mass., and Prof. Wood, of the Maine Experiment station.

Chairman Watson S. Woodruff opened for the seedsmen, followed by Messrs. Green, Reynolds, White, Chas. Dickinson and others. It was apparent in all the councils of the seedsmen that no bill had as yet been offered on which the grass and garden seed men could agree, the latter maintaining strenuously that no good reason had been shown for a federal garden seed bill. While the grass seed dealers were satisfied so far as their line of trade was concerned, that Bill H. R. 20373, known as the "Import Seed Bill" and submitted to Congress last session, should be satisfactory to the public and to the Department of Agriculture and was satisfactory to them, though

they were satisfied to accept slight modifications. Attention was called to the report of Secretary Wilson a year ago, in which he stated that importation of grass seed adulterants had practically stopped. Regarding Bill H. R. 29163, the seedsmen agreed and several members of the house committee seemed, by their questions, to be in accord with them that this document, as proposed, was not required nor adaptable. At the close of the hearing the house committee assured the seedsmen that no attempt would be made to push the objectionable bill H. R. 29163 for passage. The seedsmen presented two rough revisions of each of the above mentioned bills for consideration by the house committee, neither of which included garden and flower seed in the list and carrying penalties in fines only. It appeared that the committee has come to realize that the proposition of making one law for the whole United States is a matter of too serious consideration to go into without thorough investigation.

Prof. Wood, of Maine, made the statement that while the knowledge acquired by seed testing had been greatly advanced in the results of tests for purity, yet, there were a number of stations that had not yet reached the point where there was that uniformity in the methods that would produce the same results. As to testing for germination, the results obtained in laboratory tests thus far had not been sufficiently uniform on which to base a law that would be just to the seedsmen.

The committee of seedsmen agreed to a man that there should not be at the present time any law controlling the garden seed trade, or at least not until there was more definite knowledge of how to make a fair one.

### Canadian Seed Growers Association.

The seventh annual convention of the Canadian Seed Growers' Association will be held in the Canadian building, Ottawa, Ont., February 16 and 17. The programme includes addresses by President Jas. W. Robertson and Prof. C. C. James, Deputy Minister of Agriculture, Toronto. Papers will be presented during the meeting as follows: "Plant Breeding in Scandinavia," by L. H. Newman, Ottawa; "The Improvement of Fodder Plants by Selection," by M. O. Malte, Ph. D., Seed Branch, Ottawa, formerly of the Scientific Staff, Svalof, Sweden, and "Systems of Multiplying Improved Seed Stocks in Europe," by L. H. Newman, Ottawa.

## John Dodger & Sons Co. Los Angeles, California

Wholesale growers of Sweet Peas,  
Tomatoes, Lima Beans, Lettuce, Asters,  
Cosmos and other Flower Seeds.

**Boston.**

The flower market in this city is very encouraging. Roses are still very scarce, and prices are high, particularly is this true of white roses, and at times it is impossible to get enough to supply the demand. Carnations are coming in a little larger quantities and the prices have dropped a little from last week. Sweet peas are still scarce and are bringing good prices. Bulb stock of all kinds is being sent into the market and is selling at a good price, about the same as last week. The demand is about equal to the supply on all staple varieties of flowers, and if the quality is good they find a ready sale. The salesmen in the flower market report that they are able to clean up all that are sent in from day to day. A great many flowering plants are being offered for sale in the market, and the demand for them is very good. Violets are getting more plentiful, and it will be but a very short time when, with longer days and more sun, all kinds of flowers will be more plentiful. Wall flowers are being raised more than formerly, and meet with a good demand.

**NOTES.**

The lecture in Horticultural Hall on Saturday, February 4 was given by Isaac S. Hendrickson, of Floral Park, New York, on summer flowering bulbs; before a fairly good audience, and the lectures this winter are attended by nearly twice as many people as formerly, owing to the change of them from morning to afternoon.

James Murray, assistant salesman for Pierce Brothers, of Waltham, buried his mother the past week, and the salesmen at the Boston Flower

 Lafayette. Crimson-scarlet, \$1.50 per doz.: \$10.00 per 100.

## GLOXINIAS

Choicest Mixture, or in Separate Colors, as Blue, Red, White, Red with white edge, and Blue with white edge, 60c per doz.: \$3.50 per 100; \$30.00 per 1000.  
 New Emperor (Gloxinia Hybrida Imperialis). A new type, a cross between Sinningia Regina and the best types of Hybrid Gloxinias. This not only covers a full range of colors as in the ordinary type of Gloxinia, but the foliage also is very ornamental, the leaves being of a rich bronzy red color, with strong projecting white veins. The flowers all stand erect, thus showing to best advantage. We offer in choice mixture, \$1.25 per doz.: \$8.00 per 100.

## FANCY LEAVED CALADIUMS

We have the largest stock in the world. Over 400 varieties, including not only all the good standard sorts but many new varieties never offered in quantity before.  
 This is one of the most valuable plants for decoration of the florists' store window during the summer months and during recent years we have sold many thousands for this purpose. We especially recommend the choice rare and new varieties at \$15.00 per 100 for this purpose.

We offer special selections according to variety as follows:  
 Choice Standard Varieties. The finest collection ever offered at the price, \$1.75 per doz.: \$12.00 per 100; \$100.00 per 1000.  
 Choice Rare and New Varieties. A splendid assortment, especially valuable for the retail florist, \$2.25 per doz.: \$15.00 per 100; \$140.00 per 1000.  
 Rare New Varieties. The most recent introductions, \$3.50 per doz.: \$25.00 per 100.  
 Choice Mixture, \$1.50 per doz.: \$10.00 per 100; \$80.00 per 1000.

Dreer's Select Gloxinia.

Gladiolus, Tuberoses, Ismene, Montbretias, Tigridias and other Summer Flowering Bulbs are offered in our **QUARTERLY WHOLESALE LIST**, and also a full list of Seasonable Plants, Seeds, etc. Write for it if you have not already received a copy. THE ABOVE PRICES FOR THE TRADE ONLY.

**E. S. MILLER,** Wading River, N. Y.

Syracuse, N. Y.

James M. Gilbert and S. T. Betts will probably be two of five vice-presidents to be elected by the newly organized Syracuse Rose Society. Henry L. Youell, George E. Thorpe and W. J. Menelly, the committee on organization, have prepared a constitution and by-laws and efforts will be directed toward affiliating with the American Rose Society. For the rose show, which will probably be held at the State Armory in June next, the society will have as its guests prominent authorities on rose culture from Cornell University, who will read papers, showing the best varieties to be raised in this climate. Sweet pea and chrysanthemum shows will be held later in the season, the receipts of which will be devoted to charity. All the Syracuse growers and florists are deeply interested. "Some of the best society people in Syracuse are interested," said Mr. Youell, "and I believe we shall have a society worthy of our city."

A chapter of the Home Planters' Association, Inc. of Rochester, has been formed for Syracuse and vicinity, with H. Youell, of No. 53S Cedar street, as secretary. There are no fees or dues and the membership is open to all those who are interested in civic improvement and the beautification of home surroundings.

I ALSO GROW LARGELY SEEDS ON CONTRACT.

Genesee street, joined the ranks of the benedictins, January 20, at St. Catharines, Canada, being secretly married to Miss Charlotte Myer, of this city, and news of the wedding has just leaked out. The groom is a roller skater of reputation, and he entered in a race in Buffalo the day before

he was married. He won the race and then jumped over to Canada and won a bride. A. V. B.

WORCESTER, MASS.—Walter L. Stowe is erecting a third greenhouse, 25x100 feet, on his property in the Merriam district.

## Market Gardeners

### Greenhouse Vegetable Growers and Market Gardeners' Association.

B. L. Watts, State College, Pa., President;  
H. F. Hall, Grand Rapids, Mich., Vice President;  
S. W. Severance, 508 Illinois Life Building, Louisville Ky., Secretary; M. L. Rutenik, Cleveland, O., Treasurer.  
Annual meeting at Boston Mass., 1911.

"THE Late blight of celery" is the title of Bulletin No. 208 issued by the Agricultural Experiment Station of California, which describes the growth and culture of celery and a description of this and other fungous diseases as well as insect enemies and experiments toward controlling and eradicating them.

### Prices of Indoor Fruits and Vegetables.

New York, February 4.—Mushrooms, 50 cents per pound; cucumbers, 20 cents each; lettuce, \$1.50 per dozen heads; tomatoes, 30 cents per pound; radishes, 85 cents per dozen bunches; asparagus, \$7 per dozen bunches; rhubarb, 75 cents per dozen bunches; grapes, \$1 per pound; beans, 25 cents per quart; peas, 35 cents to 35 cents per quart.

Chicago, February 6.—Mushrooms, 15 cents per pound; cucumbers, \$1.75 to \$2.00 per box, small; lettuce, 33½ cents to 35 cents per pound; radishes, 15 cents to 50 cents per dozen bunches; rhubarb, 35 cents to 50 cents per dozen bunches.

### Notes on Hotbeds.

At this time of the year hotbeds require consideration. While there are many people who claim hotbeds will soon be a thing of the past, we do not think so. The fact remains, that certain plants can be done better in hotbeds than anywhere else. Last season, owing to the enormous snow fall in February, we decided to produce our plants in the greenhouse. With a normal spring we might have done better; as it was, the big snow was followed by summer weather with the day temperature so high that good plants could not be produced in the greenhouse. We make a specialty of early head lettuce, producing the plants under glass, and in the many years' experience we believe we had the poorest lot of plants last year, started in the greenhouse. A greenhouse is all right to produce plants that will be again reset under glass, but to go outdoors with them early, to meet the reverses of our springs, a greenhouse is not the place. So our hotbeds are again under way. We will not enter into details, but the main points may be interesting to some.

Our hotbed site is on poorly drained ground, hence we work above ground entirely, as water will put out the heat in a hurry. We combine a plan of composting manure and hotbeds, that is, the hotbed frames are simply set on an immense bed of hot manure, to which we add constantly for more beds, until the entire yard is filled. Just as soon as the plants are moved to the field, the manure spreader is used to run the compost out on the fields and the site is plowed up and planted to some greedy crop, as celery, cauliflower or egg plant. Our object is two-fold, first we need the heat for

the hotbeds, and second, during the hotbed months it is generally difficult to draw manure into the fields owing to the danger of puddling the ground. Therefore we keep our teams busy hauling manure for the frames as explained.

We never have manure unloaded directly where wanted, as this produces an uneven job. The manure is piled a sufficient distance from the place where wanted, so that one turning over will place it. Being preheated it shakes out better, compacts better and will settle less. The heat is more moderate and durable than if allowed to last and burn up. The main points in preparing a bed is to thoroughly shake out each forkful, never placing a heap anywhere, to mix the coarse and the fine material, to mix the hot and the colder parts, in a word to spare no pains to have the body uniform, so as to produce a uniform heat from end to end and to have the mass even in texture to insure even settling.

MARKETMAN.

### Detroit.

#### STOCK IN GLUT.

Trade conditions are rapidly taking on a springlike aspect. The early part of last week found roses still scarce but daily the receipts of all other flowers increased until Saturday, when the wholesale house presented a decidedly lively appearance, with the tables heavily laden with thousands of carnations, tulips, hyacinths, freesias, lilies, narcissi, violets and even quantities of lilac added to the glut that brought joy to none but regrets to all concerned, for as yet the fair weather street fakirs have not commenced operations. Prices have dropped accordingly, particularly on the poorer grades, and only first-class stock could command a price that would be at all acceptable to the growers. Much of the poorer stock of carnations as well as many lots of bulbous stock could not be sold at any price.

#### THE CLUB MEETING.

A blizzard of unusual severity visited the city February 6, but it did not deter the club members from attending the regular meeting that evening. The chief feature was the reading of an essay on "Retail Store Management," by Irwin Bertermann, Indianapolis, Ind. The author was unable to present his address in person and that was much regretted, but his paper was received with unusual interest and was greatly appreciated. A resolution was adopted highly commendatory of the address and a committee appointed to convey to Mr. Bertermann the Club's action. At the next meeting, February 20, S. S. Skidelsky will address the members on a subject of his own selection. This, too, will be most interesting and a full attendance is expected. W. E. Cook, New York, who was present, promised to address the club at some future date.

The committee appointed at the last meeting to confer with the trade paper

correspondents with a view to getting more reliable reports affecting the local market made its report. This was followed by a spirited discussion in which one correspondent was highly censured for alleged inaccuracies in his reports covering a considerable period of time. It developed that the members were very appreciative of the high value of these reports when based upon reliable data not flavored with partiality to some and not burdened with unmerited prejudice towards others. After a full review of the matter in all its phases and many suggestions offered, a definite understanding was arrived at as to the proper course to pursue in the future.

M. Bloy exhibited a vase of well grown *Freesia Purity*—pure white flowers on long stems—and they were highly commended. J. F. S.

## A Grand New Carnation

## Bright Spot

Outclasses everything heretofore grown in the dark pink class.

Won first honors in the 100 class for the best dark pink at the A. C. S. meeting, Pittsburgh, January 1910, also at the Chicago Flower show, November, 1909.

It is a pure bright dark pink of even shade, size  $3\frac{1}{2}$  inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

## The Nursery Trade

American Association of Nurserymen

W. P. Stark, Louisiana, Mo., President;  
E. S. Welch, Sheandoah, Ia., Vice Presi-  
dent; John Hall, Rochester, N. Y., Sec'y.  
Thirty-sixth annual convention to be held  
at St. Louis, Mo., June 14-16, 1911.

VISITED CHICAGO: C. B. Knickman,  
representing McHutchison & Co., New  
York.

BALTIMORE, MD.—The city is ad-  
vertising for proposals for linden trees for  
the public parks.

Vaughan's Nurseries, Western  
Springs, Ill., acquired the 80 acres ad-  
joining their property which they had  
leased during the past year, the in-  
creased demand for nursery stock ren-  
dering this course necessary. This  
addition gives the firm a total of 120  
acres, strictly for nursery purposes and  
will be devoted to popular trees, shrubs  
and hardy herbaceous perennials.

### Westlake Park, Los Angeles

Having practically completed the  
improvement of Central Park, the park  
commission of Los Angeles, Calif.,  
will next turn its attention to West-  
lake park. This park is in the heart  
of the most aristocratic section of the  
city, is one of the show places of  
Southern California, but it has been  
badly neglected for several years and  
is beginning to show the effects.

The board will probably tear the  
park to pieces, as it did Central Park,  
and make it over. Many of the old,  
unhealthy trees will be condemned and  
removed and most of the top soil will  
be replaced with fresh new earth. New  
lawns will be made, and new trees and  
shrubs will be planted. Many other  
improvements are contemplated.

Commissioner Silent, who advocated  
this heroic but effective treatment, told  
the board today that it will be fool-  
ish to attempt to do anything with the  
park unless the board feels that it  
can spend at least \$40,000 on the  
work—Los Angeles Express.

### Baltimore.

#### UNFAVORABLE WEATHER.

Up to within a day or two the  
weather has continued unfavorable for  
good quality and satisfactory quantity  
of cut flowers, being dark, som-  
ber and foggy, the nights cool, if not  
extremely cold, and the days so over-  
cast as to require pretty steady firing.  
Roses are neither abundant nor su-  
perior; carnations, while more boun-  
tiful in supply do not reach high stand-  
ards of perfection; gardenias are short,  
and violets alone are more plentiful  
than needed. It would be hard to  
fill a good big order for A No. 1 roses,  
and reds are especially scarce. The  
general condition of trade would be at  
about the normal mark of the season,  
if there was enough really good ma-  
terial for requirements. There have  
been an unusually large number of  
debutantes this year, with the accom-  
panying expenditure for floral decora-  
tions. The opera has added to the  
activity. There have also been a  
number of funerals, which made  
heavy calls for good flowers. One  
seen on the streets a few days ago,  
the participants in which were evidently  
citizens of foreign descent, had a suf-  
ficiency of designs, wreaths, etc., to  
demand the employment of three  
flower-wagons to transport them.

#### NOTES.

A movement is assuming shape here  
looking to the improvement of our

Nurserymen and Florists  
BLOOMINGTON, ILLINOIS

Send list of wants for prices.

Wholesale catalog for fall issued Sept. 1st.

### Indianapolis.

#### BUSINESS QUIET.

Roses have been very scarce as the weather has been dark. Carnations seem to be the only flowers that are plentiful. There is quite a demand for spring flowers, such as sweet peas, Roman hyacinths, narcissi, mignonette, tulips, jonquils and lilacs.

#### NOTES.

The wife of Alfred Pahud died a few days ago. She underwent an operation which caused her death. Mr. Pahud has the sympathy of many friends in the trade.

A. Wiegand & Sons had a large decoration in Anderson, Ind., last week, at the Anderson Club.

The Bertermann Bros. Co. has bought a new automobile for light delivering. Smith & Young Co. have a fine lot of smilax which is ready to cut.

Hans Kipke is spending a few days in Chicago with friends.

Wm. Roepke, of Roepke & Rieman Co., was married last week.

Visitors: Fred Lempke, Chicago; M. Heller, New Castle, Ind.; Geo. Baldwin and G. L. Freeman, New York.

C. R. L.

ELKHART, IND.—Mrs. E. M. Bullock, who has been seriously ill since Christmas, is improving.

## Vaughan's Roses

In our cellars is as fine a collection of DORMANT ROSES as we ever have had the pleasure of handling. You cannot lay in your stock too soon for spring sales. Do not delay until the spring rush is on and then want orders filled hurriedly. Order today.

Prices, unless noted, on 2-year dormant stock, 1 o. b. Western Springs. Packing charged at cost.

# Roses for 1911

## Dark Pink Killarney.

A sport of Killarney, similar in habit, but more highly colored than Killarney at its best. When Killarney is pale, Dark Pink Killarney is bright and cheerful.

Grafted plants only from 24-inch pots.  
\$20.00 per 100; \$180.00 per 1000.

## Lady Cromwell.

A shell pink sport of My Maryland that for pleasing color is unsurpassed. A wonderful producer and a color that sells.

Grafted plants only from 24-inch pots.  
\$30.00 per 100; \$250.00 per 1000.

## Radiance.

Strong in growth and making plenty of stem.

Corse grafted plants, \$18.00 per 100; \$150.00 per 1000  
Own root, 10.00 per 100; 90.00 per 1000

## Double Pink Killarney.

Originating with Robert Scott & Sons, who supply us the wood for grafting. Stronger in growth than Killarney, and with at least ten more petals. A wonderful improvement.

Grafted stock only.  
\$30.00 per 100; \$250.00 per 1000.

## Mrs. Aaron Ward.

By far the most pleasing of the yellow roses now on the market. A general favorite, and one which will be widely grown, for yellow roses are in demand.

Grafted plants, \$25.00 per 100; \$200.00 per 1000  
Own root, 12.00 per 100; 100.00 per 1000

## Melody.

We have reserved for our orders own root plants of this choice novelty. No grafted plants.

\$30.00 per 100; \$250.00 per 1000.

## Prince of Bulgaria

The best prices for cut flowers should be the standard for judging roses, and this rose has been the money getter. Strong and vigorous in growth, and with its beautiful light pink bloom it has sold on sight. One of the best roses grown.

Grafted plants, \$20.00 per 100; \$180.00 per 1000  
Own root, 15.00 per 100; 120.00 per 1000

## Killarney, White Killarney, Richmond, My Maryland, Kaiserin Augusta Victoria.

These are the old standards, and we are head-quarters for young stock.

Grafted plants, \$15.00 per 100; \$120.00 per 1000  
Own root, 2 1/2 in., 6.00 per 100; 50.00 per 1000

## ROOM! ROOM! ROOM!

We Want to Spread Out Our Extensive Easter Stock

Therefore we sell—just look!—a fine selection of Decorative Plants, such as Araucarias, Ferns, etc., at bargain prices. Such stock is always in demand.

## Araucarias

### OUR SPECIALTY.

We are the largest importers of these lovely decorative plants, the Araucaria Excelsa, Robusta Compacta and Glauca. 6,000 of the choicest last spring importation now ready for immediate shipment. It is of no use to look elsewhere for cheaper prices. We now control and will control the market of the Araucarias in the future.

Araucaria Excelsa, raised from cuttings, no seedlings. Plants 5-5 1/2-6 7 in. pots, 15-18-20-25-30 in. high, 3-4-5-6 tiers, 2-3-4-5 years old, 50c, 60c, 75c, \$1.00, \$1.25 to \$1.50 each. We give big value for your money. Just think! An elephant 6-in. pot, 4 years old, 4-5-6 tiers, 20-25 in. high, for only 60c to \$1.00; a jumbo, 6-in. pot, 5 years old, 25 in. and over, as wide as a bushel basket, 5-6 tiers, for only \$1.00; and what do you think a holy terror, 30 in. and over, 5-6 tiers, worth \$2.00, for only \$1.25 to \$1.50.

Robusta Compacta, Excelsa Glauca, 6-in. pots, \$1.00, \$1.25, \$1.50 to \$2.00 each.

We also have the nicest Araucaria Robusta Compacta and Excelsa Glauca, a house full, for only \$1.25 to \$1.50, worth double.

Adiantum Hydrum, 6-in. pot, 25c to 30c.

Asparagus Sprengeri, 2 1/2 in. 3c; 4 in., 10c.

Spiraea Clostone, started, in 5 1/2 to 6 in. pots, at 15c to 25c.

Dracena Braunii, 25 to 30 in. high, 6-in. pots, 40c to 50c. Highly recommended for store and house decoration: stands heat, cold and dust.

Latania Borbonica (Chinese Fan Palms), 30 to 35 in. high, 6 to 7 in. pots, 50c, 75c to \$1.00 each.

Lilium Multiflorum, our own importation from Japan, raised from 2-10 in. bulbs, started in 6-in. pots last October; have kept cold; now about 5 to 8 in. high, just right for Easter, 25c to 30c each, by the dozen or hundred.

Ipomea Notiflorum, our so well-known pure white, waxy Moonvine, bearing flowers very fragrant and as big as a saucer, 2 1/2 in. pots, will make good stock for you to propagate from, \$5.00 per 100.

Washington's birthday is before the door. The public is accustomed to buy a cherry for this occasion. We have it raised on purpose for that day. Jerusalem Cherries, big plants with ripe, red berries, 6-in. pots. Look! only 25c, 35c to 50c each.

Azalea Indica, Easter forcing: Vervaneana Professor Wolters, Empress of India, Schryveriana, double variegated 60c, 75c, \$1.00 to \$1.50. Mme Van der Cruyssen, Simon Mardner, pink, Niobe, white, Apollo, red, 60c, 75c, \$1.00, \$1.25 to \$1.50. In large plants we have Niobe, Helena Thielman, Bernard Andreas Alba, white, Mme. Van der Cruyssen, and others, \$1.50, \$2.00 to \$2.50.

Azalea Indica, with buds advanced, showing colors, Deutsche Perle, Vervaneana and Simon Mardner, 60c, 75c, \$1.00 to \$1.25.

Primula Chinensis, mostly white, 5 1/4 in., \$2.50 per doz.

Kentia Forsteriana, in fine shape, 6-in. pots, 30-35-40-45 in. high, 4-5-6 years old, 75c, \$1.00, \$1.25, \$1.50, \$2.00 to \$2.50 each.

Kentia Belmoreana, 30-35-40 in. high, 5-5 1/2-6 7 in. pots, 5-6 years old, \$1.00, \$1.25, \$1.50 to \$2.00 each.

Kentia Belmoreana, combination plants, 25 to 30 in. high, made up of 3 plants, 6 to 7 in. pots, \$1.00, \$1.25, \$1.50 to \$2.00; 4 in., 20 in. high, 20c to 25c.

Our Ferns this year are exceptionally very fine. Boston, Scottii, Whitmanii and Scholastica, 5 1/2 in., 6 in., 35c, 40c, 50c; 7 in., large bushy plants, 75c to \$1.00. As big as a bushel basket, \$1.00 to \$1.25. Remember, all our Ferns are pot-grown, not lifted from benches.

Neph. Gleadowii, a new beautiful fern, an improvement on Scottii, much shorter and bushier than Scottii, 5 1/4 in. pots, 50c; 3 in. pots, 25c.

Pteris Wilsonii, 3 large bushy plants in 6-in. pots, 30c to 35c per doz.

Ferns for Dishes, big assortment, 2 1/2 in. pots, at \$4.00 per 100.

Cineraria Grandiflora Hybrida, Aschmann's, so well-known superior strain, which brought as high as one dollar a plant wholesale last Easter. Now is the best time if you want good plants for Easter. We have a very large stock of 4 in., at \$1.00 per 100, 6 in., at 25c, 35c to 50c, just right for Easter blooming.

Crimson Rambler Roses, 6-in. pots, 3 feet high, nicely staked up and beat down, 50c to 75c.

Mention if ship with or without pots.

Cash with order, please.

All plants must travel at purchaser's risk.

**VAUGHAN'S SEED STORE**  
Chicago New York

Albany, N. Y.

A feature of the next meeting of the Albany Florists' Club, to be held March 2, will be a banquet and trade exhibition of new varieties of carnations and roses. Growers in this section of the country are asked to send their favorites to President F. A. Danker, 42 Maiden Lane, in time for the meeting. Arrangements for this banquet and other details were discussed at the February meeting of the club, when it was decided to follow a precedent established last year. It is proposed to place the exhibits in suitable vases down the center of the dining table, where the members can see them all the time. The entertainment committee will provide a few extra numbers, such as songs and music by well known amateur vaudeville talent. At the meeting a communication was received from J. A. Shaw, secretary of the New York Florists' Club, asking co-operation in the passage through the legislature of a bill to appropriate \$50,000 for the construction of state experimental greenhouses. President Danker appointed Frederick Goldring to represent the local club in the matter, and he received instructions to work with the delegates of other florists' clubs in the state. Letters will be written to senators and assemblymen asking their assistance in the passage of the measure. Louis Schaefer, who travels extensively for a local seedhouse, gave a very interesting report of the Albany men how the Buffalo officers manage to keep up an enthusiastic interest in their monthly meetings. According to Schaefer, W. F. Kasting is entitled to a good deal of credit for his work in connection with the Buffalo club, and his recipe for maintaining interest is to have something on the program for each meeting. J. H. Snyder, Rhinebeck, wrote that he was unable to be present on account of the death of his mother, and President Danker advised as many of the members as could get away to attend the funeral services on the following Saturday. Patrick Hyde, John J. Berberich and Frederick Henkes were appointed a committee to visit sick members, and to report upon other cases requiring acts of charity. Fred Goldring and Charles Sanders were instructed to prepare suitable resolutions upon the death of Thomas B. Snare, who died on January 9, to be presented at the next meeting.

R. D.

## Henry Ford, the Big Automobile Maker of Detroit, Bought This House of Our Chicago Office Last Fall.

Wm. Roberts is the gardener—perhaps you know him? He is well known out Boston way. He says "these houses are just the very best that can be built. No man's money can buy any better." Roberts has worked in a good many different houses, and we have a notion he knows what he is talking about.

By the way, have you seen that New Catalogue?

If you think of building, you certainly want it handy by.

## There's No Use in Talking When You Are Up Against Facts.

The facts are these: In all our quarter of a century of greenhouse building, not one—no, not one—grower has ever gone back to a wooden house after having bought one of our Half Iron Frame Houses. Neither have they ever bought a Half Iron Frame after buying one of our Full Iron Frame.

Don't you go backward when the other fellows are doing their darndest to go forward. Get in line—and keep there.

These two "Iron Framers" were erected for B. Willig, Poughkeepsie, N. Y.

## Some Facts About The U-Bar

It was invented by two practical men—each standing high in his particular line. One a successful grower, who knows plant requirements from A to Z; the other a greenhouse builder of wide experience.

The main principle of the U-Bar these two men worked out first, and then came months of minor problems upon which the success of the construction depended quite as much as on the U-Bar itself.

Then an experimental house was erected and theories proven to be facts. Then and not till then was a single U-Bar house sold. You know that no construction has yet been perfected that can approach it for demonstrated lightness, attractiveness and durability. Send for Catalog.

## Use Sunlight Sash and be first on the market

Get the benefit of the big prices. Use Sunlight Double Glass Sash—see how much faster your plants grow—how much larger the crops!

The double layer of glass does it.

Between the two layers of glass is a 3/4 inch layer of dry, still air. This forms a transparent blanket that lets in all the light from sun-up to sun-down.

You never cover Sunlight Sash

You can throw away all mats and boards. The air cushion between the two layers of glass affords ample protection in all kinds of weather. Glass is held in place without party. Can't work loose, easily replaced.

## The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.  
The pump is of brass throughout, simple and powerful.  
The mixing device keeps the contents of the tank well stirred up from  
start to finish.

When the machine is filled to within six inches of the top, a few strokes  
of the pump will compress enough air in the tank to produce a continuous  
mist-like spray for 15 minutes.

All parts are made to gauge and may be bad for repairs.  
Ask your dealer about our **Extension Hose, Extension Rods,**  
and the **Mastin Whitewash Nozzle** for Bordeaux mixture.  
Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

**J. G. MASTIN & CO.,** 3124 West Lake St., CHICAGO, ILL.

**Nikoteen** The most effective and econom-  
ical material theretofore for spraying  
plants and blooms.

A SHORTAGE IN ROSES.

Exceptional business and unfavorable dark weather have made a decided shortage in roses, in American Beauties the cut is very limited, while Killamey, Richmond, Bridesmaid and Brides are not nearly plentiful enough to go around. The stock that is coming in is of exceptional good quality and a much larger cut is promised by the middle of the month. The cut of carnations is increasing daily and the quality of the best; prices are receding somewhat and will get down to normal soon. Violets are now at rock bottom and the cut-rate stores are in their glory with fairly good stock selling at three bunches of twenty-five each for fifty cents. Orchids are in heavy supply, good demand and at reasonable prices. Cattleyas trianae and Percivaliana, Laelia autumnalis, anceps and albida, Dendrobium Wardianum, nobile and crassinode, Lycaste Skinneri and cypripediums in variety give an idea of the extensive scale on which they are now grown in this section. Lily of the valley is fine and plentiful, lilies in fair supply and bulbous stock of all varieties, with a good assortment of flowering plants. With the exception of smilax, green goods are scarce.

NOTES.

There is an epidemic going the rounds and the bug is to get into the retail flower business; each few days sees a new victim, and all told, they number 65, though the civilian could number them on one hand. What an elegant field for new subscribers, but they balk at the two dollars per annum.

It has been arranged that the next florists' meeting, March 21, will be a social one, and your families and friends are invited to come with you. President Adams, whose vocal attainments are well known, has an elaborate programme, and the refreshment committee are well able to look after the inner man.

W. E. Mackay had a week's outing at Buffalo looking up stock. Manager Geraghty, of Dunlop's, also put in the week-end there.

Representatives of Bayersdorfer's and Rice's, of Philadelphia, and of Schloss Bros., New York, were here recently. H. G. D.

## ILLINOIS STATE FLORISTS

### Fifth Annual Convention.

The fifth annual convention and exhibition of the Illinois State Florists' Association was held in the buildings of the University of Illinois at Champaign, February 8 and 9, and while the attendance was not quite as large as that of last year, yet the enthusiasm and interest shown was of the highest quality. There were visitors from all over the state and from Indiana, Missouri, Iowa and Kansas. The meetings were well attended, especially during the second day, when the interesting papers were read, and these were all freely discussed, the essayists being closely questioned to explain their papers. Everybody was greatly interested in the experiments in carnation and rose culture which are being carried on in the greenhouses at the university and which was fully covered in the excellent paper read by Professor H. B. Dörner, and as soon as the session on the first day was closed there was a general movement to this splendid range of greenhouses, and the entire party remained until darkness gathered, inspecting the plants and carefully studying, to the best of their ability, the effects of the different fertilizers. The benches of plants are divided into small sections, each lot having been fed with different combinations of artificial fertilizers and an accurate account of the production and cultural effect of each section being carefully recorded. The thorough and practical manner in which this work has been done cannot fail to be of great benefit to all who are interested in plant culture. There was great interest taken by all those present in these experiments and as well in all the meetings and the work of the society.

The opening session was called to order in one of the rooms of the College of Horticulture on the afternoon of February 8 by President Washburn, and the routine business completed consisting of the president's address, reports of the secretary and treasurer and the advisory committee which were read and approved. A very spirited discussion on the advisability of

holding a banquet in connection with the conventions was participated in by those present. The report of the treasurer showed the receipts to be \$122.00 and the expenditures \$182.25, with a balance on hand of \$118.25. The advisory committee reported that during the year a new boiler had been installed, and a small new greenhouse built, and in addition to the experiments on carnations which had been continued, experiments of like nature on the culture of roses had been inaugurated.

The convention re-assembled on Thursday morning, Vice-President Loveridge occupying the chair. The attendance was much larger than on the opening session. The paper by J. C. Vaughan of Chicago on "Live Issues for the Florist" was then read, which was followed by a paper entitled, "Some New Things," by E. G. Hill of Richmond, Ind. Prof. H. B. Dörner then read a very thorough and interesting paper on the "Work at the Experimental Greenhouse," which he explained by the use of the blackboard, and this was followed by a very earnest and interrogatory discussion. After the reading of the papers and the discussion thereon a business session was enjoyed. The reports of the committee on the president's address and of the judges of the exhibition were read and adopted. On motion of C. L. Washburn it was voted that the secretary be paid a salary of \$50 per year, which was carried. The suggestion in the president's address that the date of the meeting be changed was then taken up by request of President Washburn, who desired that the executive committee be instructed to make the date later in the season but after considerable argument it was decided to leave the entire matter to the discretion of the executive committee. The election of officers resulted in the unanimous choice of the present officers:

C. L. Washburn, Chicago, president.  
Chas. Loveridge, Peoria, vice-president.

J. F. Ammann, Edwardsville, secretary.

F. L. Washburn, Bloomington, treasurer.

**Address by President Washburn.**

To the Members of the Illinois State Florists' Association:

This is our sixth annual convention and each year has seen a steady growth of this association. We, in this state, have had a very prosperous year and can congratulate ourselves in this respect when comparing ourselves with the trade in the east, and also with some other lines of business. Your association is becoming one of the recognized industrial associations of this state and was called on in conjunction with the Chicago Commercial Association, the Illinois Manufacturers' Association and a number of other associations to join in a protest to the Illinois Board of Railway and Warehouse Commissioners against the express companies regarding their high rates. After a long hearing of the case the Board ordered a reduction of 20 per cent on all express rates in this state. This action of the Board was immediately contested with an injunction on the ground that the Board had no jurisdiction over the express companies. This, however, will be decided in a short time and I am told that there is no doubt that the express companies will lose their case. They have gotten out the injunction to gain time and possibly compromise on a better basis. The work of this association devolves largely on the secretary, and as he must give up a large amount of his time without any remuneration whatever, I would suggest that the secretary be allowed a salary of fifty dollars per year. This will not begin to repay him for the time he is compelled to spend on the work of this society, but will help out a little.

The time of holding our meeting is inconvenient to most of us for during the latter part of January and the first two or three weeks of February, we are right in the midst of our busiest season and it is like pulling teeth to get a florist to leave his business when it is very active. I think if our meetings were held along in the first half of March, that more would attend, and certainly a larger amount of flowers would be available for an exhibit. A discussion of this point should bring out some good ideas on this subject.

The matter of federal inspection of plants and manetti at seaboard points should be taken up so that when an import shipment has once been inspected at the port of entry, there, that should be sufficient to carry it into any state. This is a matter which has bothered a number receiving shipments direct from across the water. Some of the committees which were appointed at our last meeting have only partially completed their work and I would recommend that they be re-appointed so as to be able to finish up what has been started. This association is very much indebted to the officers of this University for their courtesy and generous treatment of our work and needs. The work of the testing station here is a great attraction for all of us and should be a practical help for all growers.

**Secretary Ammann's Report.**

Your secretary begs to report that but one annual member was added to the list during the past year. We have, however, fared better in life members, as we have increased the number by enrolling six to date, these latter, however, are old members who simply

transferred from annual to life membership. Your secretary inaugurated a campaign for life members during the last year in response to which we have only added the above number. The matter of funds for our society is becoming quite an important factor, and your secretary is at a loss to know how to get the members to respond promptly with their dues; we now have over 100 members owing back dues from two to three years. It seems that with no expense, except for stationery, stamps and some printing, it requires the greatest kind of economy to show a small balance in the treasury. It is with much regret I make such a report, but this must, however, be impressed on our members, as with a depleted treasury any society, I feel, will soon find its doom. This organization stands for much

J. F. Ammann.

Secretary Illinois State Florists' Association.

good, and if the members at large will only show some interest, and have a little patience, our experimental work now being carried on at the station greenhouses, will be of great value when once disseminated. This work alone will repay us many times over for what little we contribute to this organization. So I beg the indulgence of the members just a little while longer; this is a great work and it takes time to work out even one experiment. I appeal to all those in arrears to be prompt in the payment of their dues. It is with deep regret I report the death of J. F. Klimmer of Chicago, who was a member of this association.

I am glad to report, through the efforts made by other organizations and by our worthy president, C. L. Washburn, the Interstate Railroad Commission has seen fit to lower the express rates 20 per cent, which I understand is to go into effect in the very near future. There is much more good to be accomplished along similar lines, but we should have the hearty co-operation of all the members.

Our experimental work, referred to above, is making good progress, and every florist in the state should visit the greenhouses here at Urbana sometime during the growing season, and thereby keep in touch with this im-

portant work. The secretary again extends thanks to the trade papers for their willingness to publish matters for the good of this association.

**The Exhibition.**

The exhibition was a center of attraction throughout the two days of the convention not only to the members of the association but to the public. The hall was open to everybody between the hours of three in the afternoon and ten in the evening, and many of the students of the University and the townspeople took advantage of the opportunity to look at the beautiful display. The novelties were of course the magnet for the tradespeople and there was always a group of interested spectators before the rose exhibit of the E. G. Hill Co., the vase of Washington exhibited by the Chicago Carnation Co. and the new varieties shown by the F. Dornier & Sons Co. The vase of variegated seedling shown by the Mount Greenwood Cemetery Association also attracted a great deal of attention. The display was certainly a great credit to the Florists' Association and the quality of the exhibits was of the highest.

**Judges' Report.**

ROSES AND CARNATIONS SCORED.

E. G. Hill Co., Richmond, Ind.—Mrs. Aaron Ward, coppery yellow rose, 86 points; Sunburst, coppery yellow rose, 90 points; Bonfire, scarlet carnation, 86 points.

Chicago Carnation Co., Joliet.—Washington, 87 points; Princess Charming, 86 points.

F. Dornier & Sons Co., La Fayette, Ind.—No. 113-07, 85 points; Gloriosa, 86 points; White Wonder, 85 points; all of which were awarded the society's certificate.

**HONORABLE MENTION.**

A. C. Brown, Springfield.—A very extensive display of carnations, including White Enchantress, Sangamo, Dorothy Gordon, J. Whitcomb Riley, Optimo, Mrs. C. W. Ward, White Perfection, Enchantress and pink seedling Clara Mae; also vase of Richmond roses.

Mount Greenwood Cemetery Association.—Seedling No. 4405-A and a vase of mixed seedlings, some of which look very promising.

Henry Baer, Peoria.—Vases of White Enchantress, Enchantress and Rose Pink Enchantress.

Chicago Carnation Co., Joliet.—Vases of Enchantress, May Day, Sangamo, White Enchantress, Mary Tolman and bright red seedling No. 186, which looked very promising.

Baur & Smith, Indianapolis, Ind.—Vase of crimson carnation Pocahontas.

Charles Loveridge, Peoria.—Vases of Rose Pink Enchantress, Enchantress, White Enchantress, Beacon and O. P. Fasset; violets, Princess of Wales and Gov. Herrick, and Golden Spur narcissus.

H. Washburn & Son, Bloomington.—Princess of Wales violets and several vases of Paper White narcissus.

August Jurgens, Chicago.—Several vases of Golden Spur narcissus.

Bassett & Washburn, Hinsdale.—Vase of carnation O. P. Bassett and vase of seedling carnations and Lilium Formosum.

F. B. Smith & Son, Danville.—Display of violets Gov. Herrick, cyclamen and Primula obconica.

Bertermann Bros., Indianapolis, Ind.—Vase of J. Whitcomb Riley and pink

CARNATION BONFIRE.

seedling carnation No. 25 which arrived in poor condition.

Vase of rose Rose Queen exhibited by the E. G. Hill Co. arrived in too poor condition to judge.

Asparagus Hatcherii, exhibited by J. C. Hatcher, Amsterdam, N. Y., is useful in covering and will be a valuable addition to the asparagus family.

GEORGE ASMUS,  
W. J. KEIMEL,  
JOSEPH KOHOUT,  
Judges.

#### Convention Notes.

Everybody wanted to see the carnation novelties and Washington was particularly the one everyone wanted to get a line upon.

W. N. Rudd kept the banqueters in good humor, but by the stock of cigars he laid in, some of those who could observe thought he intended to have the exercises extend into the morning.

John Evans was always the center of an interested group and he entertained everybody he met with tales and stories of his European trip. Keep them going, John; they will never grow old.

Dr. Burrill was the star after-dinner speaker; his stories and wit kept the tables in a roar of laughter.

When Phil Foley tried to sit in one of the school chairs and found that they were not built for two hundred pounders everybody smiled, and then when Harry Balsley went through the same experience the smile became audible.

The hotel found it very difficult to accommodate its guests; the arrivals on the early morning train had to be

content with cots, but the florists were fortunate, all securing rooms.

George Franks deserves credit for his hard work and he succeeded in adding to the comforts of many.

The photographer waited all the morning of the second day to get a group picture, but gave it up before the meeting adjourned.

President Asmus and Secretary Dornor did not miss any opportunities to boom the National Flower Show.

Many grasped the opportunity Thursday afternoon to visit the greenhouses in the vicinity.

E. G. Hill was, as usual, the wise counsellor; everyone had a question to ask him and he always had a ready and wise answer.

The collection of plants in the University greenhouses revived the memories of some of the older growers, and they had to scratch their heads to recall the names, once so familiar.

President Washburn's unanimous reelection was a sure sign of his popularity, which was shown all through the meeting.

#### The Banquet.

Members of the association and guests to the number of about 75 assembled in the dining hall of the Beardsley hotel Wednesday evening and participated in a bountiful banquet. W. N. Rudd officiated as toastmaster and his easy and fluent manner made the post prandial exercises a great success. The following were introduced, who entertained those assembled to almost the "wee hours" of the morning: C. L. Washburn, President Asmus of the S. A. F., E. G. Hill, S. P.

Atkinson, representing the Chamber of Commerce; J. F. Ammann; C. P. Mueller of Wichita, Kan.; Charles Loveridge, Dr. Burrill, H. B. Howard, Prof. E. A. White of the Massachusetts Agricultural College, Amherst, Mass.; Prof. H. B. Dornor and George Franks. Dr. Burrill, with his fund of stories, was particularly interesting.

#### Some New Things.

Paper read by E. G. Hill, of Richmond, Ind., before the Illinois State Florists' Association at Champaign, Ill., February 9, 1911.

As the rose has "right of way" by general consent, I will begin by considering a few new varieties, both European and American, which have recently come under my notice.

Juliet—(Wm. Paul & Son) is unquestionably the finest and most distinct of all new roses—it is a garden variety of strong growth, making heavy upright canes and has the good quality of flowering throughout the season. The color is a marvel of glistening yellow, crimson and pink. This variety should make not only a fine rose for the garden, but a beautiful market pot plant. It has a strong infusion of Austrian copper or Persian somewhere in its lineage.

Edward Mawley—(McGredy). This magnificent rose was pronounced by all who saw it at the National Rose Show at Regent's Park as being the very finest of all the hybrid teas. It is a glowing velvety crimson of shapely form, and good texture. If this variety will force, it will be a fine addition to our winter flowering sorts. No rose of recent years has had such a warm reception as was accorded this variety by the English public. It was named for Edward Mawley, the emi-

DISPLAY OF CARNATIONS AT ILLINOIS STATE FLORISTS' CONVENTION.

nent secretary of the National Society. It is worthy of trial under glass.

Rayon d'Or—(Pernet) is one of the most wonderful advances in color among the recently introduced roses and as seen growing by the thousands at Lyons, France in the raiser's garden, was a sight never to be forgotten. It is a distinct Pernetiana variety—dwarf in habit, free flowering, with a brilliancy in its yellow ground color that it is hardly possible to describe; it is frequently marbled and flaked with red. Mr. Pernet is justly proud of this production of his. It, however, belongs among the hybrid Austrian briars and it remains to be seen whether or not it will hold its foliage in our climate.

Beauty de Lyon—(Pernet) was the winner of the Paris Gold Medal last year and a notably strong growing hybrid. This and Juliet should, on account of their extraordinary vigor, make good garden varieties. The color is coral red, shading to yellow; a very strong heavy grower with ample foliage and a flower large, full and globular; a magnificent bedder.

Jonker J. L. Mock—hails from Holland and is one of the strongest in the family; it outgrows every other variety on our benches, and is constantly sending up heavy bottom breaks, each topped with a glorious flower in two tones of color, fiery red within, the outside of petals silvery, rosy white. Of fine rounding form; one of the largest in size; a grand rose. Awarded eight prizes in Europe.

Miss Alice de Rothschild—This is one of the Alexander Dickson varieties and as viewed in the nurseries at Newtownards looked like a veritable dwarf Marechal Neil. This should make a fine bedding or garden rose in this particular line of color, nothing being in greater demand than a deep yellow rose of fine rounded form for the border.

Mrs. Aaron Ward is a rose that compels admiration; first of all, it is a very free grower, producing very handsome glossy foliage in great profusion, which it holds grandly when bedded out, it is one of the freest varieties that we know, and throws good long canes readily; Admiral Ward, the

greatest amateur rosegrower in the country, names it as one of the six best bedders in our trying American climate; in the greenhouse it is a marvel of beauty, for beside having great strength of constitution, beauty and profusion of foliage, it forces readily, is extremely free, can be cut very tight for shipment, and opens beautifully; the color is a deep orange yellow seen in no other rose and develops into a large rosette-shaped flower, glowing orange in the center shading to a medium yellow on the edges; you all know of its popularity in the east; it will soon be found in every forcing establishment.

Another aspirant for favor in the yellow class is Alexander Scott's Melody; which is being accorded a very nice reception by the trade; it is notable for its freedom as a forcing variety, and for its good color; yellow will soon become as popular among

roses as among chrysanthemums, when once it is shown in handsome form and size; we can all remember the day when Marechal Neil and later, Perle des Jardines, were the most popular of cut roses, and a dinner was lacking in elegance without them: Sunrise, Sunset and Joseph Hill would still be fine property for the cut flower man if only they could be grown at a profit.

The Double Killarneys are awakening interest and will be found most useful for summer cutting owing to the additional petalage. Here is one of the very curious incidents regarding the sporting of roses (or other plants); these sports very often appear simultaneously with different growers, as if a given space of time allowed the variation to work to completion; you will remember that the white form of Killarney appeared at several places about the same time; we found it on several of our plants the same year that it originated farther east, though none of our sports proved pure white. Two years ago Richmond sported pink, not a very bright shade, but interesting, so we tried out a dozen plants of it; one of these pink Richmonds sported double, giving just twice as many petals as the average Richmond; early this year, this double Pink Richmond reverted back to the pure crimson scarlet but retained the fullness of petal, so that we now have a finely doubled Richmond which held its form without dropping for full two weeks; we hope to be able to fix this sport, believing that it will be valuable.

Orleans Rose—Here is what the market grower has been looking for a dwarf polyantha that promises to make an ideal pot rose—it is the showiest and prettiest of the pink "Baby" roses; a dainty little variety of beautifully rounded habit, huge bouquet of brilliant bloom, deep cerise with showy center of pure white, florets not crowded, but of beautiful arrangement. The color is irresistible, the plant grows like a weed, and the flowers are nearly "immortelle" in their lasting quality; we believe that they will outlast almost any other rose in existence, with their stiff, paper-like texture. This

VIEW OF EXHIBIT AT ILLINOIS STATE FLORISTS CONVENTION.

ROSE SUNBURST.

pretty little variety took Europe by storm, and will make a sensation as soon as shown in this country; I shall be greatly surprised if its introduction does not mark a new era in the pot culture of roses, and as if especially intended for a companion, is the inexpressibly lovely little *Zelia Bourgeois*, a pure white early flowering "Baby" that is as dense in its mass of snow color as a cherry tree in bloom, and of the utmost symmetry in habit.

*Excelsa*—A *Wichuralana* with the same color as the popular *Crimson Rambler*. This is a veritable crimson or red flowering *Dorothy Perkins* and Mr. Walsh is entitled to great credit for having raised this charming novelty; one of its chief beauties is its glossy persistent foliage, combined with its high color.

Wm. Paul's *Althea*, *Guillot's Marquise de Ganay*, *Pernet's St. Chaure*, *Lowe and Shawyer's Lady Hillingdon*, *Prince d'Arenberg*, (*Souperet* and *Notting*), and *Souv. de Gustave Prat* are all decidedly out of the ordinary, with several others quite as good; it is a notable year for new roses. I realize that there are other aspirants for popular favor both at home and abroad, but I am speaking only of those with which I have had some personal experience. I purposely refrain from mentioning our seedling, *Rose Queen*, which we are now disseminating, and also *Sunburst*, the French variety, which goes out next year, not because I could not say a great deal about them if I were to begin: "A man's seedling roses, and even his adopted novelties, become very dear to his heart."

Following the rose comes the carnation; after the recent symposiums in the trade papers, little is left to say, for they were sifted as the fine dust of the balance; among very recent novel-

ties *Pink Delight* and *Mrs. C. W. Ward* seem absolutely sure of permanent place, *Scarlet Glow* wherever it can be grown with a strong stem, and *Dorothy Gordon* as a substitute for *Rose Pink Enchantress*; it is not only a duty but a privilege to test the few offerings of the present year, as they have promise of outranking in their several colors, and we shall probably soon need substitutes to take the place of the four standards which are now so hard worked in every carnation establishment. *Wodenethe* is one of these aspirants for place, it will be sent out next year; it is probably the most perfect white carnation in existence and those who saw it in 1910 at Philadelphia and at the National Rose Show, will be ready to greet it with open arms when disseminated.

In chrysanthemums we can hardly wait for autumn to roll around to see the *Wells-Pockett* and other accepted novelties display their splendors; it is one of the keenest pleasures of the floral year, and the long wait only whets the appetite. Of last year's novelties, which we are impatient to see again, are the magnificent *Mrs. David Syme*, *R. F. Felton*, *Well's Late Pink* and *Glacier*; strongly entrenched already in favor with the trade as money making "commercials" are *Chadwick Improved*, lovely in its purity of color; *Chas. Razer* a grand white of perfect approved form for shipping; *Cranford Pink*, the pretty early English variety; *Elise Papworth*, a fine all round white for every purpose; *Heston White* and *Winter Cheer*, clean cut and close-clipped, perfect in color tone; to these will be added *Golden Gem*, round as a ball and compact, and the lovely new singles; what interest would be lost to the yearly procession should the "mum family drop out."

Among miscellaneous plants, *Julius Peterson* is to be warmly congratulated on his *Lorraine Begonia Cincinnati*; while surpassing the parent in beauty of habit and of color, its splendid keeping qualities make a satisfactory house plant of wonderful effectiveness and durability, where the parent variety always gave concern for fear it might speedily "go down" on removal from the greenhouse; *Cincinnati* probably ranks as premier of the entire list of pot plants.

*Wilhelm Pfitzer* of Stuttgart has given us a new white gladiolus, *Europa*, which in all probability will rank with America in necessary qualifications for the American trade; this is bound to meet a hearty reception.

Then there is the comparatively new *Heliotrope Centerfleur*; it is worth all the other varieties put together where a mass of glorious color, and waves of fragrance are desired; compact and clean, this variety will give the *heliotrope* a new place as a garden plant. Some cutflower grower will soon take up and grow successfully the lovely double *gypsophylla*, one of the prettiest things that I saw abroad; I am sure that its dainty beauty would make a place for it; it adds grace and elegance to any bunch of flowers where it is used. To *Antoine Winter* belongs the credit of producing the finest cannas in existence, excepting only *King Humbert*; his *Venus* was a revelation to every one who planted it, and now he has made a further record with *Mrs. Alfred Conard*, a lovely peach pink with petals as long as they are broad—the canna is no longer a foliage plant only, but is now a blooming bedder producing the most stunning color effects procurable.

Nothing can excite more enthusiasm among plantmen than the very excellent new hydrangeas raised by *Mouillere* and *Lemoine*; these varieties

of the Hortensia type are certainly of interest to all who use this useful plant for pot culture. They are crosses between Hortensia, Otaksa, Rosea and others of the class; there has been a long lapse of time between the old Hortensia and the present improvements. Bouquet Rose, Henri David, Mme. Mouillere, Radiant, Mont Rose—these are a few of the ten or a dozen distinct improvements in this noted family of plants.

A striking and beautiful novelty seen at Bruges, Belgium, was the new marguerite, Mrs. F. Sander; it looked much like a chaste and beautiful anemone flowered chrysanthemum; it is a glistening pure white flower produced on long stems. I can imagine no more useful plant either for the production of white flowers or as a pot plant. If it does as well in America as it was growing and flowering at Bruges, it will certainly prove a most valuable commercial plant.

This is far from a complete list of novelty offerings for the year, but enough to engage the time and attention of the progressive florist for the present.

DAYTON, O.—The Florists' Club at the meeting held February 6, decided to have the annual banquet for the members and their ladies at the Phillips, March 1. Horace Frank serves as toastmaster.

"I am going to plant a hickory tree.  
 And then, when I'm a man,  
 My boys and girls may come and eat  
 Just all the nuts they can!"

"And I shall say, 'My children, dear,  
 This tree that you enjoy  
 I set for you one Arbor Day,  
 When I was but a boy.'"

"And they will answer, 'Oh, how kind  
 To plant for us this tree!'  
 And then they'll crack the fattest nuts  
 And give them all to me!"

The green moss shines with icy glare,  
 The long grass bends its spear-like form,  
 And lovely is the silvery scene,  
 When faint the sunbeams smile.

Reflection, too, may love the hour  
 When Nature, hid in Winter's grave,  
 No more expands the bursting bud,  
 Or bids the flower bloom.  
 For Nature soon, in Spring's best charms,  
 Shall rise revived from Winter's grave,  
 Expand the bursting bud again  
 And bid the flower bloom.

GROWERS OF KIRKWOOD ENTERTAINED BY THE WM. C. SMITH WHOLESALE FLORAL CO., ST. LOUIS, MO., FEBRUARY 11.

## THE PLANTSMAN.

### Azaleas.

The azaleas for Easter will now demand a little attention. It is doubtful if any of the plants will have to be forced or grown in a warm temperature, for the middle of April is very near the time for the plants to naturally bloom. The plants should be given a nice, light location, and spaced far enough apart that there is a free circulation of air through and around them. All the young soft growths should be carefully pinched out as early as can be safely done, or they are very apt to blight the blooms. The plants will require plenty of water and frequent syringing. The earlier and mid-season varieties such as Verveneana, Mme. Van der Cruyssen and Niobe should be grown quite cool, but the late varieties like Bernard Andrea, Prof. Wolters and Dr. Moore may need a little extra heat. Care and judgment must be exercised to have them in condition at the right time. It is often a great question what to do with the plants that are carried over and do not find a customer. Many growers who know how to handle this class of stock and are well equipped, claim that they can produce a better plant the second year than can be bought on the other side, but it takes care and attention to produce this result. If the plants were just pushed into a pot carelessly when imported last fall, they should be repotted in good fibrous or peaty soil,

and given a good position that they may make their growth. They should be pruned into shape and never suffer from want of water. The summer weather is so dry in this country that they will need careful attention all the time, frequent syringing and copious waterings until later in season, when water can be withdrawn a little, in order to cause them to set their buds all at one time. To produce a good plant under our natural conditions is almost impossible, and it is a great question if it is not cheaper and better to throw the old plant away, and depend upon newly imported stock.

### Gloxinias

One of the most beautiful and attractive late spring and summer blooming plants for the greenhouse is the gloxinias. The flowers are of the most beautiful shades of pink, red and purple and even pure white. The plant is very ornamental, and the flowers although very fragile, are still useful and very decorative. They are grown either from seed or propagated by leaves, but the easier way is to procure bulbs which can be bought of any seedsman. In growing the seed the plant is very small the first year and will produce but very few flowers. The handsome plants are all grown from old bulbs. The bulbs should be planted in pots in a good fibrous loam with an addition of one-third leaf mould, the top of the bulb being just even with the soil, the pot being just large enough to hold the

bulb. The plants should be sparingly watered until active growth commences, and, in fact, the only real culture there is in growing gloxinias is in watering them carefully and with good judgment. The hose should never be used, but the plants always watered with the can, and care should be taken that the foliage is never wet, or it will be spoiled, and the appearance of the plant ruined. The plants should never become pot-bound until flowering time, but should be shifted as soon as the roots reach the pot. By starting a few at a time, beginning the middle of February, a succession of beautiful plants may be had throughout the summer. After the plants are through blooming they should be gradually dried off, and the pots placed upon their sides until thoroughly dry, and then the bulbs can be shaken out and stored until the next spring, when they can again be started.

### Cannas.

It is time that the canna roots should now be looked over, and if good strong plants are desired by June 1, the old stools should be divided and the young plants started. Especially is this so of the very dwarf and slower growing varieties. The old stock plants can be cut up to one bud each, but if there is plenty of stock, better plants will be obtained by using larger divisions. These divisions can be placed in pots just large enough to hold the root, or, where a quantity of each variety is grown, they can be placed in flats. A warm temperature

is best suited when they are first divided, and until the buds have broken and the young growths have appeared, when they can be moved into cooler quarters if desired, but the canna is a heat loving plant and does not do well in cold houses. They should never be planted outside until all danger of late frosts has passed.

#### Bouvardias.

The flowers of bouvardia are very useful in late fall or early winter, and to obtain good plants they should be started during February and March. Though they may be propagated by making cuttings of the growing shoots, yet the better and more expeditious way is by making root cuttings. When the plants are through blooming, they should be lifted and the earth shaken off, and the larger roots cut into pieces about an inch long. These can be inserted in the propagating bench, or in pans or flats of light soil covering them to the depth of about an inch. In a temperature of 60° every piece will quickly develop buds and grow into a young plant. As soon as well rooted they should be potted in small pots and grown in a temperature of 60°. By the end of May the plants can be planted out in a cold frame or the open ground or can be grown all summer in a bench in the greenhouse, but if in the latter should have all the air possible and a plentiful supply of moisture. They should be kept well pinched back to make the plants branch, in order to insure a profusion of bloom. Towards the end of September they may be lifted and brought into the house and can be grown either in pots or benches. They should be shaded for a few days until new roots have formed and then be grown in a temperature of about 50°. A great mistake which many growers make is in having them in too warm quarters. They are very subject to both mealy bug and green fly, and should be sprayed once a week with an insecticide. The old plants may be cut back and treated in a similar manner as the young stock. B. Humboldtii is a beautiful white variety with its long flowers and is fragrant, reminding one some of the beautiful *stephanotis*.

#### Coleus.

The stock plants of coleus should now be placed in a warm house where growth can be encouraged, and as soon as the shoots are long enough to make into cuttings the propagation should begin. Plants propagated during February will make fine plants to produce cuttings during April and May. If the cuttings taken now will furnish a good supply, the old plants may be thrown away and the young stock depended upon for the spring propagation. Look the plants over very carefully for mealy bug, for this pest is especially fond of coleus and soon ruins the nicest stock. If there are any on the old plants, syringe them heavily for a few days and get rid of them, and be sure to remove all traces of them from the young stock when placing them in the propagating bed, for if they once get a foothold on the young plants, it is very difficult to get rid of them. Coleus should always be grown in plenty of heat, at least 60°, for if attempted in a cool house a loss of leaves and a stunted plant is a sure result.

## THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

### February Flowers in New York.

This month, so far, has seen some notable examples of floral decorative work, untold quantities, almost, of flowers and flowering plants have been used, still the stock never seems to become depleted. The display windows of our larger florists are grand, a continuous show of all that is beautiful and choice in the floral kingdom and, it is quite easy to understand why a flower show that depends upon paid admissions can never be successful here, for the public are too familiar with the ever-changing and brilliant displays set forth by the retailers in their show windows.

At J. H. Small & Sons, the large high windows make big things possible, with a background of specimen palms and many asparagus, magnolias, forsythia, cherry and lilac in big sizes are being featured. In the foreground Dutch hyacinths, large pans of white and blue; tulips in pans, and mounds of cinerarias, chiefly in dark colors, together with azaleas, all tend to make an extremely attractive exhibit.

Alex. Warendorf combines cut flowers arranged in baskets with flowering plants, and his show is always attractive. Among the plants are medium sized bougainvilleas, camellias, cyclamens and azaleas of both the evergreen and deciduous types. The cut flowers include baskets of pink tulips and lily of the valley combined, baskets of violets and vases of *Primula obconica*.

At Thorley's massive window effects are always the rule, plants handled

dows and store entrance are decidedly effective these wintry days. Pans of bulbous flowers, azaleas, lilacs, cyclamens, orange trees full of blossoms, acacias, ericas and primulas of various types all artistically blended among palms, ferns and choice store plants, make this establishment one of the beauty spots of Fifth avenue. The above remarks will convey some idea of the flowering plants that are available for this particular season of the year, now a word or two about the cut flowers.

Roses we have in plenty, American Beauty, Richmond, Killarney and White Killarney, Bride and Bridesmaid, Mrs. Jardine, some Perles, Melody, Mrs. P. Morgan, My Maryland, etc., variety and color enough to meet the most exacting taste and, at many of the big social functions, the rose is still held supreme. Some say carnations are losing favor, crimson sorts are not seen so much nor are the red ones so popular, white and light colors are being used for many purposes though, and perhaps the remarks about carnations losing favor are rather far-fetched; still, we hear of extensive decorations being done in roses, and some being done in lilies, but we do not notice anywhere that carnations are the predominating flower, how about it?

For corsage wear there are three forms that are vying with each other for first place; first, there is the gardenia; second, there is the cattleya; and thirdly, there is the combination of single violets and cattleyas; these are all considered to be the correct thing for corsage. Double violets even are not much in vogue for that purpose just now. For the general routine of floral work, the spring flow-

VIEW OF NEW STORE OF OHIO FLORAL CO., CLEVELAND, O.

must be of the biggest possible and otherwise perfect. There are lilacs, bougainvilleas, forsythias, ericas, azaleas, rhododendrons and camellias interspersed amid specimen cybodium ferns and tall growing palms, a seeming forest of tropical verdure and blossoms.

Inside and outside of the Alex. McConnell store always presents an attractive appearance; the evergreens used in the walk flanking the win-

ers are now taking a prominent part. Narcissus Von Sion, the trumpets and Golden Spur, together with the Roman hyacinths all have a place in every management. Lilies, both white and pink, are being used extensively where massive effects are desired. Cattleyas are so common they are utilized in many ways that would not have been thought of a few years ago; of other orchids just now, the supply is quite limited.

For dainty table work we have sweet peas, wall flowers, freesias, forget-me-not, marguerites, white and yellow pansies and lily of the valley. For center pieces snapdragon or cut sprays of acacia are being utilized, while for massing there is an ample supply of cut forsythia, lilac, cerasus and prunus, in fact, decorators for all and every kind of formation find a wealth of most desirable material at hand. For funeral purposes, every flower in the list is perfectly eligible, also one flower not yet mentioned, and that is the calla, outside of a funeral occasion, the calla seems to be the one lonely subject that has no place.

#### St. Valentine's Day at Chicago.

The call for flowers for offerings for St. Valentine's Day kept the florists, especially in the down town stores, very busy all the first days of the week. The supply of flowers was excellent, and there was a large quantity of splendid seasonable stock from which the purchasers of something appropriate for a valentine might select their offering. There was, of course, the usual display of fine roses and carnations, but the greatest showings were in the smaller flowers, and there were quantities of violets, arranged in innumerable combinations with orchids and roses; sweet peas of all the different colors, and these were offered not only in pretty bunches and corsages, but, also, put up in small baskets tied with neat and attractive bows of ribbon that harmonized with the flowers. There was also to be found prettily arranged bunches of forget-me-not, the flower that particularly appeals to the beaux and belles on this day. Cattleyas were to be seen at all the stores but they were about the only variety of the orchid family that were offered in any quantity. White lilac was noticeable in all the windows, and some very handsome sprays were to be seen. Lily of the valley was used in quantity, in bunches and baskets and in combinations with other flowers, and there were also some very well grown pots of this popular flower. Bulbous stock was plentiful, and in great variety, and offered in all shapes, nicely arranged in baskets and growing in pots and pans. There was also a fine assortment of potted plants, azaleas being very attractive, and fine specimens of cyclamen, primulas, prunus and other spring flowering plants. The stores had very busy days both Monday and Tuesday, and the call being largely for arrangements kept all hands, proprietors as well as clerks, on the jump. There were some very pretty window displays and the flowers shown in attractive manner. Cupid, of course, was the typical figure used, and a showing of attractive auxiliaries such as boxes made in heart shape and in different colors, were features of the stores. Old fashioned and colonial bouquets were noticeable everywhere.

Hughes, on the west side, had his usual notable window, for the proprietor of this store has acquired a reputation for the beautiful manner in which he decorates and observes all the national and other holidays. A chariot in which was a young lady distributing valentines and drawn by fifty or more gaudy, large butterflies, was a grand feature. Another window was given to Lincoln, containing a handsome bust of the "great liberator" sur-

rounded with the national colors. Mr. Hughes also had prepared a special valentine box with a beautiful and characteristic cover and, as usual, his pithy and well-told story on a card to mail to his customers.

Canger & Gornley arranged a very pretty window, having nicely arranged baskets and hampers of plants and flowers and colonial bouquets. The baskets of bulbous flowers being especially well put up. Hanging in the window was a cupid and from this

and all the seasonable flowers were to be seen, as well as a splendid line of potted plants, including beautiful azaleas, primulas, cyclamen and some choice pots of prunus.

Samuelson had a most attractive window. A large figure of cupid with his bow of violets and red arrow was standing on one side, backed with a screen of smilax and the window was very effectively arranged, the color scheme being red, making a very bright display. Nicely arranged baskets and

GROUP OF MONTREAL GARDENERS AND FLORISTS.

Taken at an Outing at St. Agathe.

figure extended ribbons to all the different features. The arrangement was very effective and elicited many words of approbation from the passersby.

At Lange's all hands were as busy as could be getting out the many orders, and some very beautifully arranged valentine corsages and bouquets as well as special boxes were being arranged and forwarded. The usual fine assortment of high grade stock, which the store always carries, was attractively displayed.

John Mangel had his showy windows artistically arranged and a large quantity of excellent stock for valentine purposes was to be seen, as well as all the latest accessories for supplying his customers with the novelties of the season. Violets were made a great feature and large quantities of this sweet flower were displayed and sold, being sent out in attractive form. Bohannon had a beautiful assortment and particularly noticeable were the grand display of orchids; the splendid specimens of pot plants, among which were as fine a lot of lily of the valley as one would often see, and the nicely arranged old fashioned bouquets.

At Fleischman's the demand for the beautiful bouquets and corsages for which this house has acquired a reputation in arranging, was exceedingly large and the designers were kept busy putting up the calls for those for valentine offerings. A beautiful line of accessories, including handsome boxes and ribbons, were a noticeable feature. The call for valentine boxes at the E. Wienhoeber Floral Co. was very large

well grown pot plants, as well as the old fashioned bouquets, made a beautiful show. At Muir's were to be seen some very attractive features, notably the well grown pots of lily of the valley and other bulbs, which made the windows very showy. A fine assortment of the flowers adapted to the day were to be found with the usual beautiful accessories which this store always has in stock. W. J. Smyth had a very showy window, including some very handsome plants, and very well arranged old fashioned bouquets.

#### Diseased Carnations.

ED. AMERICAN FLORIST:

We forward you a diseased plant of Sagamo carnation. Can you inform us what is the disease and the remedy?

H. S.

Nebraska.

The roots and main stem of the plant appear to be in good health and we are inclined to believe that the trouble is due to some atmospheric condition, either by escaping gas or by fumes from the boiler. The light color of the green growth would also indicate a treatment of high temperature and insufficient light. There is a presence of stigmamose but we do not think this to be wholly responsible for the condition of the plant.

C. W. JOHNSON.

BROOKVILLE, MASS.—P. O. Burnham has purchased the land and greenhouse owned by Frank Swasey on West avenue.

WE are in receipt of the premium list for the twentieth annual exhibition of the American Carnation Society to be held in connection with the National Flower Show, Boston, Mass., March 28 to April 1. Copies may be had on application to Secretary A. F. J. Baur, Indianapolis, Ind.

THE New York Florists' Club has appointed a committee and is using every effort to aid the passage of the bill before the New York legislature, calling for the appropriation of \$50,000 to erect a suitable range of greenhouses at Cornell University for the purpose of carrying on experiments in the interests of commercial floriculture.

## For the Dahlia Experts.

Does Caleb Powers come from Ohio or is Ohio the native state of Caleb Powers? What's the matter with Caleb anyway?

## National Flower Show.

Final arrangements for the forthcoming Second National Flower Show to be held in Mechanics' Building, Boston, March 25-April 1, are assuming a very satisfactory aspect, and the new schedule is out and will be forwarded immediately to all parties interested.

Almost all the prominent men in the trade have already secured space, and the interest shown in New England and all over the country is very great. A number of very interesting exhibits are coming from foreign countries, and letters received by the management display considerable enthusiasm and a record-breaking attendance is assured.

No dealer can really afford to miss exhibiting in this show, as such an opportunity to present their products to the public was never before offered to the florist trade. A special point is being made to reach the estate owners in New England and from present indications many will attend. This will enable the exhibitors of ornamental plants an excellent opportunity of disposing of their exhibits after the show is over.

## Society of American Florists.

### DEPARTMENT OF REGISTRATION.

As no objections have been filed, public notice is hereby given that the registration of the rose, Yellow Baby Rambler, by Jackson & Perkins Company, Newark, Wayne County, N. Y., becomes complete.

### REGISTRATION OF GERANIUMS.

Public notice is hereby given that Robert Dukelou, of Rochester, N. Y., offers for registration the geraniums described below. Any person objecting to the registration or to the use of the proposed names, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

### RAISER'S DESCRIPTION.

Dr. E. M. Moore.—Cross between a large, soft pink, single flowered variety, name unknown, and a small dark red, single flowered variety, name unknown. Habit strong and vigorous. Leaves dark green,  $\frac{3}{4}$  to  $\frac{4}{5}$  inches long, and four to five inches wide, with prominent dark bronze zone. Flower clusters on stout spikes 10-12 inches long, prominently surmounting the leaves, with 75 to 100 flowers in a cluster. Individual flowers single,  $\frac{1}{4}$  to  $\frac{2}{3}$  inches across. Color bright vermillion with white eye.

A. B. Lamberton.—Parentage same as above. Habit medium strong. Leaves light green with faintly marked inconspicuous zone, three to  $\frac{3}{4}$  inches long, and  $\frac{3}{4}$  to four inches wide. Flower clusters on very stout spikes 10 to 12 inches long, and prominently surmounting the leaves with 35 to 40 flowers in a cluster. Individual flowers single,  $\frac{1}{4}$  to two inches across. Color bright orange pink with conspicuous white eye.

H. B. DORNER, Sec'y.

February 9, 1911.

## American Rose Society.

The time is drawing near when the big National Flower Show in Boston is becoming a fact. The entries in the first division of the exhibit, that is all but Division B, must be staged Saturday, March 25, 1911, not later than 2 p. m. Division B is to be staged

Friday, March 31, 1911, to be in place not later than 1 p. m. Division B is a display of cut roses to occupy 200 square feet of space and not to contain less than 200 blooms, and decorative greens of any kind, including plants, are permitted.

The Toronto Horticultural Society has sent word that they offer the American Rose Society, their silver and bronze medals as first and second prizes for the best specimens of hardy, climbing roses, exhibited at the spring exhibition. In judging, fragrance to count 33 points.

Eber Holmes, of Montrose, Mass., is manager in charge, and any inquiry for information regarding the show, addressed to him or to the secretary at Fishkill-on-Hudson, N. Y., will meet with prompt attention.

BENJAMIN HAMMOND, Sec'y.

## Massachusetts Agricultural College.

During the past week a variety of subjects have been considered by the students in the short course of floriculture, because of the absence of Prof. White, who attended the meetings of the Illinois State Florists' Association at Champaign, Ill., and visited large commercial places near Chicago.

F. J. Elder, heating expert of Lord & Burnham Co., Irvington, N. Y., spoke February 7 on heating problems, and illustrated his talk by a large number of blue prints, which made the talk very helpful and instructive. February 8, J. K. Shaw, who is in charge of the plant breeding work at the Massachusetts Experiment Station, lectured on the principles of breeding for the improvement of varieties, and February 10, he gave the class a practical exercise in crossing fertilization, carnations and primulas being used for this work. Prof. F. Wm. Rane, the state forester, gave a series of special lectures, February 9, morning, afternoon and evening, on forestry, and the floricultural students were required to attend these. H. D. Haskins of the Massachusetts Experiment Station spoke on commercial fertilizers for greenhouse work, February 10.

During the present week Eber Holmes, of Montrose, will speak on practical methods in rose growing, February 14, and C. H. Totty, of Madison, N. J., on chrysanthemum culture February 17.

## Meetings Next Week.

Boston, Mass., February 21.—Gardeners' and Florists' Club of Boston, Horticultural Hall, Detroit, Mich., February 20, 8 p. m.—Detroit Florists' Club, Cowie Building, 42-44 Gratiot avenue.

Buy Direct of the Grower and Get Fresh Stock

## BASSETT & WASHBURN,

Office and Store: 76 Wabash Ave., Chicago

Greenhouses: Hinsdale, Illinois

### Chicago.

#### UNFAVORABLE WEATHER.

This city seems to be under the same dark spell that is being reported in so many sections of the country, and a bright ray of sunshine is getting to be a rarity, for the days are dark and cloudy. In consequence, the supply of flowers does not increase rapidly and many growers who thought that they would be cutting heavily by the middle of February, are still getting far from what they expected. Roses are, however, in much better supply than they have been, and everything considered the quality is good. American Beauties are of very good color and long stem, but they are hardly up to the grade usually found at this season. Killarneys are coming in more plentifully and improving in color and very handsome flowers are being shipped in daily, and they are being received in large quantities. My Maryland are coming in heavier, as are Mrs. Jardine. In reds, Richmond is in fine shape and in quantity enough to meet most demands. White Killarneys are grand, and some excellent flowers are to be obtained. Brides and Bridesmaid are in good supply. The prices of all roses hold good and are about normal for this time of the year. Carnations are coming in larger quantities and some splendid blooms are to be seen, and the prices hold up well. Orchids are plentiful enough to meet all the calls. Violets are in good supply, and notwithstanding the heavy call for St. Valentine's Day, did not show a shortage. Lilies and callas are also in good supply, with prices remaining firm. Sweet peas are in fine condition, some beautiful long stemmed flowers of all colors being seen. Bulbous flowers are now in elegant condition and in good quantity. Tulips, narcissus and hyacinths all coming in fine shape. White lilac is to be ob-

## "The Busiest House in Chicago"

We are receiving fine line of Tulips, single and double Daffodils, besides everything else in the cut flower line.

51 Wabash Ave., CHICAGO

tained and some that is seen is very beautiful. There are a number of the smaller flowers now to be obtained. Antirrhinums, marguerites, calendulas and forget-me-nots all add to the great display at this season. St. Valentine's day caused quite a flurry on the market, the wholesale stores being very busy and the retail stores had about all they could handle the first two days of the week. There is a grand lot of pot plants to be seen. Some very nicely grown pans of tulips, narcissus and hyacinths are to be seen in all the stores, as well as azaleas, cyclamen and primulas.

#### NOTES.

Phil Schupp, the manager at J. A. Budlong's, says that he has several stores in sight, one of which they intend to occupy as soon as their present lease expires. For several years this firm have been crowded for space, and have worked under difficulties, and are now obliged to vacate the present premises and move to larger quarters, where they can more properly take

care of the splendid trade which they enjoy. The American Beauty roses that this firm is now cutting are of A1 quality and are mostly of a long stem grade.

Poehlmann Bros. Co. is cutting some very fine Killarney and other roses, also a splendid grade of sweet peas of which they have a good supply. A large quantity of bulbous stock of all kinds can be seen at the store this week. The Lily of the valley that this firm is cutting is of its usual good quality.

A. C. Kohlbrandt, with the E. C. Amling Co., says that they enjoyed a regular Christmas trade on February 12 and 13, which were exceptionally busy days.

E. H. Cushman, of the Cushman Gladiolus Co. of Sylvania, O., is in the city this week on business.

August Jurgens reports that an unusual percentage of early tulips were blind this season.

H. C. Rowe will have a fine store in the Palmer House when the improvements now in progress are completed.

**POEHLMANN'S FANCY VALLEY** } We make these a specialty.  
**EXTRA FINE HARRISII LILIES** } Can supply them all the year.  
Once tried you will have no other.

Vaughan & Sperry are enjoying a good shipping trade and a large number of boxes containing a choice grade of flowers are being sent out daily. This firm is now offering a splendid grade of cattleyas and a good supply of roses and carnations.

Peter Reinberg is still cutting a good supply of American Beauty roses of all grades. Tim Matchen, the manager at the store, says they soon will be cutting heavily in Killarney, White Killarney and Richmond roses as a large crop is about on.

Harry Manheim, the hustling store man at Hoerber Bros., is kept very busy looking after the many orders that are received. This firm is now cutting a fancy grade of Killarney, White Killarney, Richmond and Bride roses, also a large quantity of sweet peas of good quality.

Manager Pyfer of the Chicago Carnation Co. says that the demand for

rooted carnation cuttings was never better than at present. Washington seems to be the favorite, as nearly every order that is received includes this new carnation.

Zeech & Mann are, as usual, supplying their customers with a splendid grade of roses, carnations and bulbous stock of all kinds. The snapdragons that this firm is receiving are of good quality and are quickly disposed of to the best trade.

Wietor Bros. are filling a large number of orders for a splendid grade of long stem American Beauty roses, of which they are receiving a good supply. The Brides that this firm is supplying to their customers are also of good quality.

Weiland & Risch are cutting a large quantity of Killarney roses of splendid color, foliage and stem. Carnations at this house are of their usual high

quality and a good supply of magnificent blooms are sold daily.

C. P. Mueller & Son, of Wichita, Kan., visited the trade this week. They attended the meetings of the Illinois State Florists' Association at Champaign, coming to Chicago on their way home.

W. F. Duntermann, the well known violet grower of Bensenville, is shipping a splendid grade of California and Dorsey violets to this market.

Pehrson & Marine, the enterprising florists on Bryn Mawr avenue, enjoyed a large trade on St. Valentine's day, when a large quantity of cut flowers were sold.

Sam Pearce is able to be about the greenhouses again and is now wrestling with the problem of getting his Easter lily crop right on time.

John Muir is spending a few days at West Baden, Ind.

# VAUGHAN & SPERRY

LONG DISTANCE PHONE  
CENTRAL 2571

52-54 Wabash Ave., CHICAGO.

Cliffor Pruner, of E. H. Hunt's supply department, says that the St. Valentine Day trade was very good and exceeded that of former years. One of the many novelties that is being offered for Washington's birthday is a paper hatchet about three inches long. The novelty is meeting with great favor with the trade and many florists have already ordered a large number with the intention of placing them in bouquets or boxes, whichever the customer may order.

It will no doubt be a great surprise to many of the friends of Harry Garland to hear that he is about to join the ranks of the benedicts. The young lady is Miss Helen Yeager of Crete, and it is understood the wedding is to take place February 18. The young couple will spend their honeymoon with relatives at Marinette, Wis., and upon their return make their home at the residence of the parents of the groom at Des Plaines.

The J. B. Deamud Co. is receiving a large quantity of sweet peas of as fine quality as can be found in the market, also a splendid grade of cattleyas, for which the demand is heavy. Stollery Bros. are sending in some very fine tulips to this house from their greenhouses on Southport avenue.

Schiller's enjoyed a very brisk trade at their store on West Madison street on February 14. The demand for flowers on St. Valentine Day being exceedingly heavy. A neat profit was realized from the sale of plants of which a large number were sold.

Chas. W. McKellar is showing an exceptionally large assortment of orchids this week, 16 different varieties being included in the daily shipments. The cattleyas and gardenias that this firm is receiving are of good quality and sell readily at good prices.

## Fancy Carnation Blooms

### THE PLEASING KIND

Our Carnations are arriving in splendid condition, and give satisfaction.

Remember we are growers and ship our customers strictly fresh stock, properly packed. We can please you when all others fail.

## CHICAGO CARNATION CO.

A. T. PYFER, Manager.  
Phone Central 3373.

35-37 Randolph St., CHICAGO

There is a well-defined rumor circulating around the flower market that a new wholesale house will be opened about March 1, and that the parties interested will lease the quarters formerly occupied by the E. C. Amling Co. Frank Vogt, who formerly conducted a store on Cottage Grove avenue, was removed from his home on West Lake street to a local hospital where he is receiving treatment for a severe attack of pneumonia.

At the Bassett & Washburn greenhouses at Hinsdale a large crop of American Beauty and other roses will soon be on. This firm is still cutting a large quantity of Easter lilies of extra good quality.

L. M. Leveson, of the Palace Floral Co., North Clark street, reports business as brisk with plenty of funeral work.

The Foley Mfg. Co. has been given the contract for a range of 13 houses for the Poeschlmann Bros. Co., in addition to the range now under construction.

Prof. E. A. White of the Massachusetts Agricultural College, Amherst, Mass., visited some of the large growers of this vicinity on his way home from the convention at Champaign.

George A. Kuhl, Pekin, believes in the Chicago Tribune as an advertising medium through which to dispose of Japanese air plants.

# BEAUTIES!

## CHAS. W. McKELLAR

51 Wabash Avenue.  
**CHICAGO.**

### Yonkers Horticultural Society.

A regular meeting of this society was held February 3. The dinner committee reported that all arrangements were made for a good time Tuesday, February 7. About one hundred and twenty good men and true intend to vindicate a gardening appetite at the Park Hill Inn. A vacancy has to be filled in the executive committee owing to the departure of J. Houghton to Chicago. H. Scott received first prize for some very fine callas, H. Wells second for some excellent California violets. It was de-

cided to hold a social session every second month, members donating good things to the one to be held in March. The president stated that two members are sick, Secretary Nichols having sustained a bad fall and J. Canning suffering from the after effects of an operation for appendicitis. A sick committee was appointed to visit all members who are ill, reporting to the society at regular meetings.

H. M. BLANCHE, Sec'y.

WESTBROOK, CONN.—Brook Bros. are erecting a water tank to increase the water supply at their greenhouses.

**WIETOR BROS.,**

L. D. Phone, Randolph 2081.  
51 Wabash Avenue,

**CHICAGO.**

**St. Louis.**

**STOCK SCARCE.**

The weather has been cloudy and stock has become quite scarce, roses, especially, and carnations are also high. St. Valentine's day has already influenced the violet market, the public was getting used to violets at 10 cents per bunch and do not like the idea of paying higher prices for inferior grades. Jonquils are plentiful and sell slowly. Sweet peas are increasing but many of the colors are poor sellers.

**NOTES.**

The Florists' Club met February 8, there being 40 members present. The

feature of the meeting was the display of new varieties of carnations. The awards of the judges were: Chicago Carnation Co., Chicago, Washington, 81 points; Nic Zweifel, North Milwaukee, Wis., Bright Spot, 90 points; Henry Eichholz, Waynesboro, Pa., Princess Charming and Christmas Cheer, 80 points; P. M. DeWitt, Bridge-water, Pa., Pennsylvania, 80 points. The Horticultural Society met and resolved to give a show next fall at the Coliseum and entertain the Chrysanthemum Society of America, which meets here.

Sixty growers of Kirkwood, with a band of music, visited the wholesale house of the Wm. C. Smith Wholesale

Floral Co. February 11 and were entertained by Smith & Osbeck with refreshments, cigars, music and songs. They remained till early morning having a good time, giving rousing cheers for the boys who entertained them.

The retail stores are now making special decorations to push St. Valentine's business.

Geo. Hecht is now bringing his flowers to market in an automobile.

Visitors: William Skinner, Springfield, Ill.; R. A. McPherson, Litchfield, Ill.

ROCHESTER, N. Y.—The Florists' Association have rented new quarters at No. 95 Main street east.

## -SEND FOR PRICE LIST.

**76 Wabash Avenue, CHICAGO**

Stock at a whole clears up daily. In many cases the supply is completely ordered up before it arrives. While the flowers, as a whole, are in first class shape, the stems of some do not stand up as well as they did, and thus show the effects of the almost continuous bad weather we have had for some time. Prices seem to be holding up nicely. The demand for roses is in the main steady. The request for the short and medium grades for work has been especially strong. Pink is at present writing very short and red can scarcely be had. In American Beauties the receipts sell readily. Carnations, too, were among the best sellers last week. All colors sold rapidly and more could have been used. The call for red and St. Valentine's day was very strong. There was, however, no demand from those who to draw. The supply of double and single violets was large for St. Valentine's day and they found a good call, especially the early shipments, which alone can be told of at this writing. Lily of the valley moves slowly and February 14 has apparently created no particular stir in this line. The demand for white and pink geraniums is in the colors, *lily longiflorus* are in good supply and find a ready sale. The receipts of callas are stronger. Narcissus are arriving regularly and selling well. To the list of bulbous stock has been added Dutch hyacinths and southern outdoor jonquils, but even these do not come in to meet the demand for them. The supply of decorative greens is adequate to all demands. The quality of the fancy fern is holding up nicely.

### Philadelphia.

#### AN INCREASE IN SUPPLY.

The market is better supplied with stock, there being a perceptible increase in the supply in the past few days. This applies to almost all kinds of flowers, although American Beauties are still short of the demand. White roses, which were almost unobtainable, being gathered in by the handful here and there, are now sold again in lots of twenty-five. Some choice Killarneys are seen but considerable of the stock is light in color. Sweet peas are now to be had in quantity and the quality is much improved, some really first class stock being seen. Freesia is now a staple, all grades being offered daily. Violets are blooming freely in spite of the dark weather. The demand appears to increase with the supply, as they are selling freely. Some very fine carnations are offered, and the supply appears about equal to the demand at very good prices. Tulips and daffodils are carried largely by all the stores, who find a good demand for all of these spring flowers. Cattleyas are held at 50c, with a ready market for all that are cut. St. Valentine's day, as usual, was a very busy time. The commission houses had their hands full, from Sunday afternoon until late Monday, getting off their out of town orders, which, together with the local trade, exhausted their resources and cleaned up everything saleable. The store windows were gay with the heart-shaped boxes and hampers filled with violets, lily of the valley, forget-me-nots, roses, pansies and spring flowers in all kinds of combinations. There was a large run on violets and sweet peas, which, together with roses, were the favorites. There was also quite a run on flowering plants, azaleas, primulas, daffodils in pots, cyclamens, cinerarias and other plants in bloom sold well. Taken altogether the Valentine's day of 1911 was a little in advance of any that have gone before.

#### NOTES.

Wm. J. Baker was given a surprise party last Thursday evening when, on arriving at home, he found a number of his friends in the business who had called to congratulate the "young" gentleman on his 70th birthday. To say he was surprised was not enough. He was, however, delighted to see so many of the old guard and spent the evening with them going over the busy events of the past twenty-five years. Each of the party was given a souvenir in the shape of a pipe. Warren and Miss Baker were in the secret, and lent not a little to the enjoyment of the evening.

Robert Craig is sending from the Isle of Pines some very fine dracena canes of choice varieties which have grown wonderfully during the past two years. He is expected home in about ten days.

Sweet peas were one of the features at Niesсен's, where special stock was seen in quantity. American Beauties were also in good supply.

Berger Bros. are proud of their Lady Campbell violets from the Hightstown district. They are top notchers.

Ed Reid sent out thousands of Marie Louise violets. He has a great trade in these flowers. K.

### Washington.

#### DISAGREEABLE WEATHER.

The business of the past week was very fair but not extraordinary. For several days the weather was very disagreeable, which had a depressing effect on trade. As a matter of course, the dinners and luncheons that have been set for certain dates must be carried out, regardless of weather, but counter trade has suffered. There are indications of considerable business for St. Valentine's Day and it is hoped that it will turn out well.

#### FLORISTS' CLUB MEETING.

The regular monthly meeting of the club was held in the store of the A. Gude & Bros. Co., February 7, with Wm. F. Gude as host. President Robertson occupied the chair and excepting the nomination of officers it was largely a social session. The following officers were nominated for the ensuing year: Elmer C. Mayberry, of Mayberry & Hoover, president; David Grubert, vice-president; O. A. C. Ohmer, secretary; Wm. F. Gude, treasurer. As a host, W. F. Gude is always a success and he entertained the club in an appropriate manner.

#### NOTES.

One of the events of the past week was a dinner given by a number of officers of the engineering department of the government to Admiral Endicott, who was chief of construction of the great dry dock. Devereux, J. H. Small & Sons furnished a most appropriate decoration of the dry dock, containing a battleship.

The Gude Bros. Co. and Z. D. Blackstone have in their show windows very elaborate and appropriate St. Valentine's decorations.

W. W. Kimmel has completed his conservatory. A. F. F.

MT. PLEASANT, IA.—The weather conditions have been very favorable and there has been a good cut of carnations as well as vegetable crops. Last year was a record season for flowers and vegetables but fruit was light. If weather conditions continue favorable there will be a heavy crop of fruit as fruit spurs are numerous and plump.

## New York.

## NORMAL CONDITIONS.

Owing more perhaps to the very inclement weather prevailing than to anything else, business fell off very perceptibly for several days, more genial conditions have reached us again however, and seasonable normal weather is the rule, business in most lines being quite satisfactory. • Roses are not plentiful, and this refers to all varieties, consequently prices are firm and considered from a retail standpoint, very high. Carnations are moving very satisfactorily, they do not become too numerous for the regular demand and, like the prices of roses, they remain quite firm. While cattleyas still continue plentiful really top notch flowers are in a minority, consequently a slight increase in price has been possible for flowers of first grade quality. Violets shortened up in quantity for a few evenings, possibly through being held in reserve for St. Valentine's day, and slightly better figures were realized for the time being. Lily of the valley has been selling poorly, street peddlers are handling it extensively which is a sure sign of over-abundance and low prices. Sweet peas, not getting plentiful as yet, continue to bring good figures. White narcissus and Roman hyacinths are clearing up well. Yellow narcissus is getting more plentiful yet no serious tumble in values has occurred as yet, the variety Barrii, always a favorite, is now coming in regularly. Tulips are moving fairly well and there are a good many coming in every day, they are useful for all purposes though and in season out in fairly good order from day to day. Gardenias are in steady supply though at no time very numerous, prices remain almost stationary. Freesia becomes more plentiful and it is a favorite and sells quite satisfactorily. Marguerites, wall-flowers, pansies, snapdragons and forget-me-not are all in the miscellaneous list, always to be had in limited quantities. Asparagus continues to be the favorite in green material with adiantum fronds a good second, smilax being the slowest green to move.

## CLUB MEETING.

The monthly meeting of the Florists' Club was held February 13. There was a large attendance, and promptly at 8 o'clock President Vincent called the meeting to order. Following the adoption of the minutes of the previous meeting, read by Secretary Young, C. B. Weathered, on behalf of the dinner committee, announced that preparations had been made to hold the annual dinner at "Shanley's," and urged that all those who expect to attend that function notify the committee at once. P. O. Connelley, of the legislative committee, told of having been notified that it would be necessary to go to Albany February 15, as the matter of the appropriation would be in the hands of the state committee on that afternoon, he would be there and asked any other club member to go along. In response to the letter sent out asking other societies and individuals to join in the movement, several favorable replies had been received, and it looked as though there might be a fairly representative delegation at Albany on Wednesday, to help bring about the much needed appropriation of \$50,000 for building greenhouses and the carrying on of indoor experimental work. If the bill passes it is proposed to build the glass at Cornell University. H. A. Bunyard, for the transportation committee, reported that those who visit the show in Boston next month can get a rate of one fare and three-fifths on the certificate plan, either by boat or rail. Some discussion ensued as to which route would be preferable and finally it was de-

cided to go by boat, leaving here on the evening preceding the opening of the exhibition. H. R. Scamman, W. F. Maynard and C. R. Russell, were elected to membership. Mr. Maynard, being present, was introduced to the members, as were also two other recently elected members, A. Hanig and W. Tate. A letter was read from the Philadelphia Florists' Club, inviting the members to join them in a visit to the H. A. Dreer establishment at Riverton March 7. On motion the invitation was accepted, and the secretary instructed to notify the Philadelphia Club to that effect. Wm. Kleinheinz, Ogontz, Pa., exhibited a very fine scarlet carnation named Miss Dimple Widener, a cross between Lawson and Lady Bountiful, a good sized flower, long stem and clear scarlet color. It scored 87 points and was awarded a preliminary certificate.

The feature of the evening was, of course, the illustrated lecture by Richard Vincent, Jr., White Marsh, Md. The slides thrown upon the screen gave a very vivid description of the bulb industry in Holland, plant and flower cultivation in Belgium, and things of horticultural interest in England. Of equal interest was the lecture accompanying the views. Mr. Vincent is peculiarly gifted as a speaker, and when, after showing the beauties of foreign countries, he showed his home and flowers in Maryland, and pathetically reminded his hearers that there were beautiful things also at "Home, Sweet Home," he fairly brought down the house. A rising vote of thanks was tendered Mr. Vincent, his most interesting lecture, and the meeting adjourned.

## NOTES.

Ben Johnson, colored, for 23 years head driver for Chas. Thorley, died after a very brief illness February 7, interment was in Cypress Hills cemetery and Mr. Thorley furnished many beautiful floral tokens for the occasion. All who knew Mr. Johnson speak highly of him as a man and as a faithful worker, through his long experience as a driver, he knew every street, hotel and apartment house in the city and by his employer he will be sadly missed.

The bill (No. 77) which provides for floricultural greenhouses at Cornell University is now before the senate at Albany, where a hearing was scheduled for February 15. Every florist in the state should follow up the hearing by bombarding his state representatives vigorously and persistently, urging the passage of the bill.

The annual dinner of the Yonkers' Horticultural Society took place at Yonkers on February 7. Those who were in attendance from here report that it was the biggest dinner of the year, over 150 persons participated. A. Herrington was toastmaster and filled that office most acceptably.

The annual dinner of the New York Florists' Club is going to be at Shanley's, near Forty-second street, Broadway, March 18. Tickets are \$4 for men, \$3 for ladies. This is the twenty-fourth annual dinner of the club and without a doubt there will be a large attendance.

The Retail Florists' Association of Brooklyn will hold their annual banquet sometime within the next few weeks. A committee has the matter in charge and a more definite announcement will be made in the near future.

All of the flowers used at the Decies-could wedding were delivered after the ceremonies to the officers of the National Plant, Fruit and Flower Guild, 70 Fifth avenue, and by them were distributed among the sick poor.

The Growers' Cut Flower Co. are going to move to a store on the ground floor. Option on two places has been

### Cleveland.

#### STOCK INCREASING.

The weather is opening up nicely, and the sun shows his face a little more each day, with the result that flowers are arriving in ever increasing quantity and better quality. The past winter has not been remarkable for its being cold, so much as the dark cloudy weather, which has retarded the growth of stock, and the opening of flowers, with the result that it has been a rather poor season all through for the grower, from a financial standpoint. Sweet peas are beginning to arrive in quantities and the stock is exceptionally fine. Callas are abundant and the demand for these flowers at present seems very good. Easter lilies also are selling readily at fair prices. Lily of the valley is having a slightly better call, and violets have been cleaning up daily. Roses are still in short supply. Carnations are good, but also short of the demand. Dutch hyacinths are coming in quite plentifully. Stock of all kinds is improving.

#### FLORISTS' CLUB MEETING.

A good time was had by all who attended the club meeting February 13. There were 25 new members admitted. H. Knoble made a very interesting speech on advertising, making a strong plea to have the florists write in some way and systematically advertise for the benefit of all. A feature of the evening was a bowling match between Adam Graham and Mrs. Ella Grant Wilson, the former winning, 84 to 57. The committee judging the exhibits made the following report: The committee beg leave to report that they had a very fine display of cut flowers from the growers in this vicinity, and also from the E. G. Hill Co., of Richmond, Ind. Carnation Bonfire commendable both as to color and stem. Rose Mrs. Aaron Ward, a saffron color, an improvement on the old Saffron. Carnation Washington by the Chicago Carnation Co. an improvement on Lawson. Carnation Dorothy Gordon by Joseph Heacock Co., very fine. Your committee wishes to make special mention of a fine display of cut flowers from the J. M. Gasser Co., consisting of Pink and White Killarney roses, White Perfection, Beacon and Lawson carnations and a remarkably fine vase of antirrhinums. The Cleveland Cut Flower Co. a fine display of carnations, including an excellent seedling of Enchantment, also a fine vase of lily of the valley and a vase of beautifully colored La Reine tulips. John Blechschmidt shows a fine assortment of all the well known varieties of carnations. R. Hoffman shows a good vase of a sport from Prosperity. G. H. Barber, Eclair, vase of sweet peas. R. Wasiko shows a very good vase of Princess of Wales

WM. STADE,  
CHAS. E. RUSSELL,  
Committee.

#### NOTES.

The Schneider Floral Co., 426 Euclid avenue, have added a Jackson delivery automobile which will run between the greenhouses and the store.

The Cleveland florists who went down to Alliance to bowl, had a most enjoyable time, and also won the game. Score follows:

| Cleveland.              | Alliance.              |

**FRANK F. CRUMP,**

Wholesale and Retail Florist.

Columbus, O.

At the meeting of the Florists' Club held January 10 a committee was appointed to take steps toward holding a flower show, and as some firms are not members of the club, an invitation was extended to all to meet at the Livingston Seed Co.'s greenhouses at a social February 5. The weather was inclement and the houses a mile and a half from the car line, but about 40 growers were present. F. C. Vierick read a paper outlining the proposed chrysanthemum show which met with general approval. James Underwood, superintendent of Franklin Park, promised to do all in his power to aid the exhibition and several gardeners of the state institutions promised to assist. H. M. Munk spoke of the advisability of forming an association to be called the Columbus Floral Association for the purpose of promoting the show. The interest was high and it took but a few minutes to get \$500 subscribed toward the proposed exhibition, employees being as anxious to do their part as the employers. An excellent lunch was served. Gus Ackermann acting as toastmaster, and music was enjoyed throughout the evening, furnished by the musicians. A general florist meeting will be held February 7 at the Chittenden Hotel, to determine the course of action to be taken.

## The Seed Trade.

### American Seed Trade Association.

E. L. Page, Greene N.Y. President; L. H. Vaughan, Chicago, First Vice-President; M. H. Durvee, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.  
Annual convention at Milwaukee, Wis., June 20-22, 1911.

A. H. GOODWIN and wife, Chicago, are at Biskra, North Africa, which Mr. Goodwin says is the most interesting place he has ever visited.

SWEET CORNS have dried slowly and some are growing poorly; tests of Stowell's showing 70 to 80 per cent only, are not uncommon.

MRS. CHAS. P. BRASLAN is reported as taking active and tactful direction of the affairs of the Braslan Seed Growers' Co. since the death of Mr. Braslan.

CHICAGO.—Prices on the board of trade February 15 for grass seed were noted as follows: Timothy, \$10 to \$11 per 100 pounds. White clover, from \$22 to \$30.

VISITED CHICAGO: B. F. Brown, Fitchburg, Mass., returning from a 17 weeks' trip to the Pacific coast, reporting the trade in excellent condition; Chas. Schwake, representing Chas. F. Meyer, New York.

CONTRACTS for 1911 crops of peas are reported as well closed up to the stock seeds in hand. White cabbage growers predict a short Long Island acreage because of lice and drought. Vine seed contract prices are being advanced.

A BILL has been introduced in the Iowa legislature which, if it becomes law, will permit seedsmen to sell insecticides and fungicides. The sale of insecticides and fungicides in that state, it is said, has been in the hands of the drug trade exclusively for the past 25 years.

NEW YORK.—Among the stores it is reported that business (mail orders chiefly) is gradually assuming normal conditions, a steady increase from day to day being apparent. With snow on the ground and general winter conditions prevailing, the counter trade has not yet become very active.—Representatives of most of the seed houses attended the annual dinner of the Yonkers Horticultural Society, which took place in that suburb on Tuesday, February 7.

## Braslan Seed Growers Co.

Lettuce, Onion, Sweet Peas,

Growers for the Wholesale  
Trade Only.

**SAN JOSE, CALIF.**

## Ask Your Congressman Where He Stands.

Now is the time to ask your representative if he has read the corrected hearings on seed bill H. R. 29163 and if he is now satisfied that the garden and flower seed dealers should not be legislated against or put under a prison penalty law. It is very important that you know now and know how your senators stand. Communicate that knowledge to Chairman Woodruff at Orange, Conn.

## Federal Regulation of Corns.

FROM SEEDMEN'S WASHINGTON HEARINGS.

Mr. White—Is congress ready to embark on the field of federal regulation with regard to saying that the purchaser of every 5-cent packet of seeds, or every \$2 pair of shoes, or every ice-cream freezer, or anything of that kind, shall get his money's worth?

Mr. Adamson—We have already entered upon it, and in less than 25 years they will trim the corns and toe nails and name the babies. (Great laughter.)

## The Cannerns Convention.

The unanimous opinion of the membership appears to be that the convention closed at Milwaukee, Wis., February 10, was the most successful in the history of the cannerns' association. The seed trade and allied interests were represented by: N. B. Keeney & Son, Le Roy, N. Y. (C. N. Keeney and Frank Stair); Rogers Bros., Alpena, Mich. (A. L. Rogers); John H. Allan Seed Co., Sheboygan, Wis. (E. M. Parmelee, W. B. Lucas); Leonard Seed Co., Chicago (S. F. Leonard, John Leonard, Sam Sibley, John Gary); Jerome B. Rice Seed Co., Cambridge, N. Y. (W. C. Langbridge, C. P. Gueff); Hogg & Lytle, Toronto, Ont. (A. O. Hogg, J. F. Garfat); S. D. Woodruff & Sons, Orange, Conn. (Watson S. Woodruff); The W. W. Barnard Seed Co., Chicago (W. W. Barnard, Arnold Ringier); D. M. Ferry & Co., Detroit, Mich. (C. B. Cole, Theo. Cobb); Madison Seed Co., Manitowoc, Wis. (C. L. Kunz); Manitowoc Seed Co., Manitowoc, Wis. (Albert Guttman); D. Landreth Seed Co., Bristol, Pa. (S. Phillips Landreth, P. M. Minter); Livingston Seed Co., Columbus, Ohio (R. S. Strader); The Everett B. Clark Co., Milford, Conn. (Mr. Clark); Stecher Lithographic Co., Rochester, N. Y. (W. P. Hilton, H. R. Kinsey, A. G. Schneider, C. A. Boller); Brown Bag Filling Machine Co., Fitchburg, Mass. (B. F. Brown); A. T. Ferrell, Saginaw, Mich.

## Sweet Corn Stalk Ensilage.

This subject was treated at the recent Cannerns' convention, Milwaukee, Wis., by N. I. Kelson, secretary of the Lake Mills Canning Co. of Lake Mills, Iowa. The speaker quoted the following analysis of G. W. Patterson, dairy expert of the Northern Iowa Dairy Improvement Association: "Percentage of digestible nutrients in sweet corn stalks—Protein, .94; carbohydrates, .14; fat, .5; dry matter, 22.3. Per cent of digestible nutrients in mature dent corn silage—Protein, .9; carbohydrates, 11.3; fat, .7; dry matter, 20.9." He said in support of this argument: "You will observe that in point of digestible nutrients the sweet corn stalk without the ears exceeds that of the dent corn, including the ears. We find that 100 tons of sweet corn silage contains as much digestible nutrients as does \$261.50 worth of shelled corn at 40 cents per bushel, or \$300 worth of oats at 25 cents per bushel. Again, 100 tons of sweet corn silage contains 27,792 pounds of digestible nutrients. To make these figures are most interesting, and they surely explode the now prehistoric contention that sweet corn stalks are worthless as ensilage."

## Imports.

During the week ending January 7, imports were received at New York as follows:

McHutchison & Co., 118 cases plants. Peter Henderson & Co., 14 packages, one case seed.

Weeber & Don, two packages seed. H. Frank Darrow, two cases trees. To others: 929 bags, 385 packages, 90 barrels and 25 cases seed; 217 cases plants, eight packages ferns, five boxes ferns.

During the week ending January 14, imports were received at New York as follows:

Peter Henderson & Co., 200 cases and 71 bags seed.

H. Frank Darrow, 153 packages, and 16 bags seed, 105 bags peas, 20 cases plants.

McHutchison & Co., 100 cases plants, 15 cases trees, two cases trees and shrubs.

Aug. Rolker & Son, 100 cases plants. F. D. Woodruff & Sons, 34 bags seeds and peas.

Vaughan's Seed Store, 18 packages and 15 bags seed, six cases trees.

Wm. Elliott & Sons, 13 bags seed. Reed & Keller, three crates dried plants.

Weber & Don, one case seed. J. M. Thorburn & Co., one case seed. To others: 2,062 bags, 522 barrels, 365 packages, 289 boxes, 216 cases and 202 sacks seed, 248 cases plants, 18 packages and 13 cases trees, 10 cases bulbs, one box ferns.

# Dreer's Seasonable Bulbs

The Begonias and Gloxinias we handle are produced for us by a specialist of many years' experience. You can buy cheaper, but not better stock.

## TUBEROUS BEGONIAS

Single In Separate Colors. Scarlet, Crimson, Rose, White, Yellow and Orange, 40c per doz.; \$2.50 per 100. \$22.50 per 1000.  
 Single In Choicest Mixture. 35c per doz.; \$2.25 per 100; \$20.00 per 1000.  
 Doubles in Separate Colors. Scarlet, Rose, White and Yellow, 60c per doz.; \$4.50 per 100; \$40.00 per 1000.  
 Doubles in Choicest Mixture. 50c per doz.; \$4.00 per 100; \$35.00 per 1000.  
 Frilled in Separate Colors. Scarlet, White, Pink and Yellow. These have wavy and frilled petals like some of the newer Petunias. \$1.00 per doz.; \$7.00 per 100; \$60.00 per 1000.  
 Duke Zeppelin. Rich scarlet 85c per doz.; \$6.00 per 100.  
 Frau Helene Harms. New yellow. \$2.00 per doz.  
 Lafayette. Crimson-scarlet. \$1.50 per doz.; \$10.00 per 100.

## GLOXINIAS

Choicest Mixture, or in Separate Colors, as Blue, Red, White, Red with white edge, and Blue with white edge, 60c per doz.; \$3.50 per 100; \$30.00 per 1000.  
 New Emperor (Gloxinia Hybrid Imperialis). A new type, a cross between Sinigla Regina and the best types of Hybrid Gloxinias. This not only covers a full range of colors as in the ordinary type of Gloxinia, but the foliage also is very ornamental, the leaves being of a rich bronzy red color with strong projecting white veins. The flowers all stand erect, thus showing to best advantage. We offer in choice mixture, \$1.25 per doz.; \$3.00 per 100.

## FANCY LEAVED CALADIUMS

We have the largest stock in the world. Over 400 varieties, including not only all the good standard sorts but many new varieties never offered in quantity before.

This is one of the most valuable plants for decoration of the florists' store window during the summer months and during recent years we have sold many thousands for this purpose. We especially recommend the choice rare and new varieties at \$15.00 per 100 for this purpose.

We offer special selections according to variety as follows:

Choice Standard Varieties. The finest collection ever offered at the price. \$1.75 per doz.; \$12.00 per 100; \$100.00 per 1000.

Choice Rare and New Varieties. A splendid assortment, especially valuable for the retail florist. \$2.25 per doz.; \$15.00 per 100; \$140.00 per 1000.

Rare New Varieties. The most recent introductions. \$3.50 per doz.; \$25.00 per 100.

Choice Mixture, \$1.50 per doz.; \$10.00 per 100; \$80.00 per 1000.

Dreer's Select Gloxinia.

Gladiolus, Tuberoses, Ismene, Montbretias, Tigridias and other Summer Flowering Bulbs are offered in our **QUARTERLY WHOLESALE LIST**, and also a full list of Seasonable Plants, Seeds, etc. Write for it if you have not already received a copy. **THE ABOVE PRICES FOR THE TRADE ONLY.**

**HENRY A. DREER, Inc.,** 714 Chestnut Street, Philadelphia, Pa.

## NEW RED DAHLIA MRS. MINNA BURGLE.

A cross between Joe Thomson and Clown, originated by Mr. J. Burgle of Fruitvale, Calif. and named after his wife Mrs. Minna Burgle is the best Red Corative Dahlia ever produced, and will precede every other red variety now grown for cut flowers here or abroad and will draw your attention instantly when planted in a collection of dahlias: one of the most showy flowers ever created.

True decorative, bright scarlet showing a darker shading in center, bold, erect flowers 6 to 8 inches in diameter with excellent stem: foliage remarkable substance; height 5 to 6 feet; good keeper and will not burn in hot weather and more freely blooming than either parent. This variety has been tested by me for three years and has shown no weak points. A vase of 50 blooms shown by me and a basket of Mrs. Minna Burgle Dahlias exhibited by Sievers Floral Co., of San Francisco, both received first prize in the Fall Flower Show in San Francisco and caused more comment among gardeners and visitors than any other exhibit. Cut flowers sold for the first time last year brought 50 per cent more than any other variety of dahlias, including Joe Thomson.

Strong tubers, \$1.00 each; \$9.00 per dozen.

**PAUL H. ECKELMANN,** San Rafael, Calif.

**HENRY METTE'S TRIUMPH OF THE GIANT PANSIES**, (mixed), the most perfect and most beautiful in the world. \$5.00 per oz.; \$1.50 per 1/2 oz.; 75c per 1-16 oz. postage paid. Cash with order.

All seeds offered are grown under my personal supervision on my own vast grounds, and are warranted true to name, of strongest growth, finest stocks and best quality.

I ALSO GROW LARGELY SEEDS ON CONTRACT.

## Market Gardeners

### Greenhouse Vegetable Growers and Market Gardeners' Association.

B. L. Watts, State College, Pa., President;  
H. F. Hall, Grand Rapids, Mich., Vice President;  
S. W. Severance, 508 Illinois Life Building, Louisville Ky., Secretary; M. L. Ruetenik, Cleveland, O., Treasurer.  
Annual meeting at Boston Mass., 1911.

DAVENPORT, IA.—A proposition for the erection of an immense greenhouse plant in which to grow cucumbers and tomatoes was submitted to the citizens' committee of Bettendorf by J. W. Davis, and they have the matter under consideration. The project involves the outlay of \$60,000.

### Prices of Indoor Fruits and Vegetables.

New York, February 11.—Mushrooms, 50 cents per pound; cucumbers, 20 cents each; lettuce, \$1.25 per dozen heads; tomatoes, 40 cents per pound; radishes, 85 cents per dozen bunches; asparagus, \$7 per dozen bunches; rhubarb, 75 cents to \$1.25 per dozen bunches; grapes, \$1 per pound; beans, 25 cents per quart; peas, 35 cents per quart.

Chicago, February 13.—Mushrooms, 15 cents per pound; cucumbers, \$1.75 to \$2.00 per box, small; lettuce, 25 cents to 30 cents per pound; radishes, 20 cents to 40 cents per dozen bunches; rhubarb, 30 cents per dozen bunches.

### Sweet Corn.

At the recent canners' convention, Milwaukee, Wis., problems incident to the growing of sweet corn were touched upon by C. H. Smith of Faribault, Minn. He told the canners "How to Grow Sweet Corn," and advised that the corn be planted in checks, as this system allowed of cross-cultivation, a thing not possible where the seed is planted in drills. He advanced the following: "I think many growers make a mistake in planting too far apart, especially the early varieties. Three feet six inches or three feet eight inches will not give the heaviest crop in early varieties. I should plant three feet or three feet two inches at most for early varieties, especially on sandy soils. Since for the corn alone the grower will not usually receive as much for a crop of sweet corn as the cash value of a crop of field corn grown on the same soil, and given the same care, we have another reason for this closer planting."

### Early Tomatoes.

"Growing of tomatoes for early market" is the title of Bulletin No. 144 issued by the Experiment Station of the University of Illinois and treats of the experiments carried on during the last four years in the uses of different fertilizers and manner of growth, with instructions on making hotbeds, spraying the plants and picking and packing the fruit. The following are the principal deductions as the result of the experiments: large, well developed plants are essential to the production of large yields of early tomatoes; mature hotbeds are more cheaply constructed than fire hotbeds, but are less reliable in cold weather; for early tomatoes, the seed is sown in February; the plants must be carefully hardened off before they are set in the field; the

pruning and training of plants to single stems reduces the yield, and does not increase the sizes; tomatoes for shipment should be picked before they are fully colored; rigid grading is essential, and smooth fruited varieties should be grown for the trade.

### Experiments With Asparagus Rust.

In the circular issued by the Massachusetts Asparagus Growers' Association for the benefit of its members, the results of the plant breeding experiments which have been carried on at the station in Concord are reported as very encouraging. Although the rust played havoc with seedlings all over

the bed during the season of 1910, yet there were little rows of seedlings from special matings which grew strongly and remained green throughout the season, and it is hoped by Professor Norton who has conducted the experiments, to develop a strain that will be resistant to the rust.

## A Grand New Carnation

## Bright Spot

Outclasses everything heretofore grown in the dark pink class.

Won first honors in the 100 class for the best dark pink at the A. C. S. meeting, Pittsburg, January 1910, also at the Chicago Flower show, November, 1909.

It is a pure bright dark pink of even shade, size  $3\frac{1}{2}$  inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

## The Nursery Trade

### American Association of Nurserymen

W. P. Stark, Louisiana, Mo., President;  
E. S. Welch, Shegandosh, Ia., Vice Presi-  
dent; John Hall, Rochester, N. Y., Sec'y.  
Thirty-sixth annual convention to be held  
at St. Louis, Mo., June 14-16, 1911.

HELENA, MONT.—The latest additions to the membership of the Florists' and Nurserymen's Association include: H. M. Sloan, Hamilton; S. Hansen, Butte; V. Van Catz, J. Hocking and F. Baugert, Helena, and Senator Fred Whiteside, Kalispell.

ROCHESTER, N. Y.—At the annual meeting of the Western New York Horticultural Society held in this city the following officers were elected: Wm. C. Barry, Rochester, president; Albert Wood, Carleton; S. W. Wedhams, Clarkson; Edward Van Alstyne, Kinderhook; D. K. Bell, Rochester; W. P. Rogers, Williamson, and J. B. Anderson, Geneva, vice-presidents. Samuel Fraser, Geneseo; S. T. Bush, Morton; A. L. Whitbeck, Sodus; Lloyd S. Tenny, Hilton; T. H. King, Trumansburg, executive committee. John Hall was elected secretary-treasurer for the 23rd time.

### Planting Black Walnut Trees.

Twenty-five years from today Griffith park, Los Angeles, Calif., will contain one of the finest groves of Eastern black walnut trees on the Pacific coast, and if the policy of the park commission of that time is in accordance with the ideas of the present board the rising generation will be permitted to gather nuts every fall.

The park board had such a program in mind today when it instructed the superintendent to make a trip to Pomona this week to purchase 3,000 tiny black walnut trees which have been sprouted in the nursery there and which have been offered to the city for 5 cents each—\$150 for the lot. The trees will be set out in Griffith park, which is an ideal location for them. They will be large enough for bearing in ten years, but it will be 25 years before they will be at their best.—Los Angeles Express.

### Davenport, Ia.

Business has been very good, with enough stock to fill all orders. Carnations and roses are not what they ought to be owing, no doubt, to so many cloudy days during January. Plenty of good bulb stock of all kinds and lilies are more plentiful and find ready sale.

### FLORISTS' CLUB MEETING.

The Tri-City Florists' Club met at the home of H. M. Bills February 9 with nearly every member present. Everything points to a grand affair at the coming banquet. The present officers were renominated for the coming year, but several, however, decline to longer serve. Bulbs and Easter was the topic for the evening. During the discussion it was brought out that the Moline people were taking to red for Easter, one florist having a number of advance orders for salvias. Happy Anderson's invitation to meet with him on March 9 was accepted, after which a fine hot luncheon was served and a talk feast took place.

### NOTES.

Everybody was glad to see Uncle John Temple about again after a three weeks' siege of Ia gripple, and sympathized with him in the loss of Old

AMERICAN FLORIST.

# Roses for 1911

## Dark Pink Killarney.

A sport of Killarney, similar in habit, but more highly colored than Killarney at its best. When Killarney is pale, Dark Pink Killarney is bright and cheerful.

Grafted plants only, from 24-inch pots.  
\$20.00 per 100; \$180.00 per 1000.

## Lady Cromwell.

A shell pink sport of My Maryland that for pleasing color is unsurpassed. A wonderful producer and a color that sells.

Grafted plants only, from 24-inch pots.  
\$30.00 per 100; \$250.00 per 1000.

## Radiance.

Strong in growth and making plenty of stem. Cerise pink in color.

Grafted plants, \$18.00 per 100; \$150.00 per 1000  
Own root, 10.00 per 100; 90.00 per 1000

## Double Pink Killarney.

Originating with Robert Scott & Sons, who supply us the wood for grafting. Stronger growth than Killarney and with at least ten more petals. A wonderful improvement.

Grafted stock only.  
\$30.00 per 100; 250.00 per 1000.

## Mrs. Aaron Ward.

By far the most pleasing of the yellow roses now on the market. A general favorite, and one which will be widely grown, for yellow roses are in demand.

Grafted plants, \$25.00 per 100; \$200.00 per 1000  
Own root, 12.00 per 100; 100.00 per 1000

## Melody.

We have reserved for our orders own root plants of this choice novelty. No grafted plants.

From 24-inch pots,  
\$30.00 per 100; \$250.00 per 1000.

## Prince of Bulgaria

The best prices for cut flowers should be the standard for judging roses, and this rose has been the money getter. Strong and vigorous in growth, and with its beautiful shell pink bloom it has sold on sight. One of the best roses grown.

Grafted plants, \$20.00 per 100; \$180.00 per 1000  
Own root, 15.00 per 100; 120.00 per 1000

## Killarney, White Killarney, Richmond, My Maryland, Kaiserin Augusta Victoria.

These are the old standards, and we are headquarters for young stock.

Grafted plants \$15.00 per 100; \$120.00 per 1000  
Own root, 2 1/2-in. 6.00 per 100 50.00 per 1000

## ROOM! ROOM! ROOM!

We Want to Spread Out Our Extensive Easter Stock

Therefore we sell—just look!—a fine selection of Decorative Plants, such as Araucarias, Ferns, etc., at bargain prices. Such stock is always in demand.

## Araucarias

### OUR SPECIALTY.

We are the largest importers of these lovely decorative plants, the Araucaria Excelsa, Robusta Compacta and Glauca. 6,000 of the choicest last spring importation now ready for immediate shipment. It is of no use to look elsewhere for cheaper prices. We now control and will control the market of the Araucarias in the future.

Araucaria Excelsa, raised from top cuttings, no seedlings. Plants, 5-5 1/2-6 1/2 in. pots, 15-18 20-25 30-in. high, 3-4 5-6 tiers, 2-3-4-5 years old, 50c, 60c, 75c, \$1.00, \$1.25 to \$1.50 each. We give big value for your money. Just think! An elephant, 6-in. pot, 4 years old, 4-5-6 tiers, 20-25 in. high, for only 60c to \$1.00; a jumbo, 6-in. pot, 5-year-old, 25 in. and over, as wide as a bushel basket, 5-6 tiers, for only \$1.00; and what do you think a boly terror, 30 in. and over, 5-6 tiers, worth \$200, for only \$1.25 to \$1.50.

Robusta Compacta, Excelsa Glauca, 6-in. pots, \$1.00, \$1.25, \$1.50 to \$2.00 each.

We also have the nicest Araucaria Robusta Compacta and Excelsa Glauca, a house full, for only \$1.25 to \$1.50, worth double.

Adiantum Hybridum, 6-in. pan, 25c to 30c.  
Asparagus Sprengeri, 2 1/2-in. 3c; 4-in., 10c.  
Spiraea Cladstone, started, in 5 1/2-6 in. pots, at 15c, 20c to 25c.

Draena Bruni, 25 to 30 in. high, 6 in. pots, 40c to 50c. Highly recommended for store and house decoration: stands heat, cold and dust.

Latania Borbonica (Chinese Fan Palms), 30 to 35 in. high, 6 to 7 in. pots, 50c, 75c to \$1.00 each.

Lilium Multiflorum, our own importation from Japan, raised from 9-10 in. bulbs, started in 6-in. pots last October; have kept cold; now about 5 to 8 in. high, just right for Easter, 25c to 30c each, by the dozen or hundred.

Ipomoea Noctiflorum, our so well-known pure white, waxy Moonvine, bearing flowers very fragrant and as big as saucers, 2 1/2-in. pots, will make good stock for you to propagate from, \$5.00 per 100.

Washington's birthday is before the door. The public is accustomed to buy a cherry for this occasion. We have it raised on purpose for that day. Jerusalem Cherries, big plants with ripe, red berries, 6-in. pots. Look! only 25c, 35c to 50c each.

Azalea Indica, Easter forcing; Vervaneana Professor Wolters, Empress of India, Schryveriana, double variegated, 60c, 75c \$1.00 to \$1.50; Mme Van der Cruysen, Simon Mardner, pink, Niobe, white, Apollo, red, 60c, 75c, \$1.00, \$1.25 to \$1.50. In large plants we have Niobe, Helena Thielman, Bernard Andreas Alba, white, Mme. Van der Cruysen, and others, \$1.50, \$2.00 to \$2.50.

Azalea Indica, with buds advanced, showing colors, Deutsche Perle, Vervaneana and Simon Mardner, 60c, 75c, \$1.00 to \$1.25.

Primula Chinesis, mostly white, 5 1/4-in., \$2.50 per doz.

Kentia Forsteriana, in fine shape, 6-in. pots, 30-35 40-45 in. high, 4-5-6 years old, 75c, \$1.00, \$1.25, \$1.50, \$2.00 to \$2.50 each.

Kentia Belmoreana, 30-35-40 in. high, 5-5 1/2-6 1/2 in. pots, 5-6 7 years old, \$1.00, \$1.25, \$1.50 to \$2.00 each.

Kentia Belmoreana, combination plants, 25 to 30 in. high, made up of 3 plants, 6 to 7 in. pots, \$1.00, \$1.25, \$1.50 to \$2.00; 4-in., 20 in. high, 20c to 25c.

Our Ferns this year are exceptionally very fine Boston, Scottii, Whitman and Scholzei, 3 1/2 and 6 in., 35c, 40 and 50c; 7-in., large bushy plants, 75c to \$1.25. As big as a bushel basket, \$1.00 to \$1.25. Remember, all our Ferns are pot grown, not lifted from benches.

Neph. Glauca, a new beautiful fern, an improvement on Scottii, much shorter and bushier than Scottii, 5 1/4 in. pots, 50c; 3-in. pots, 25c.

Pteris Wilsonii, 3 large bushy plants in 6-in. pan, 30c to 35c per pan.

Ferns for Dishes, big assortment, 2 1/2-in. pots, at \$4.00 per 100.

Cineraria Grandiflora Hybrid, Aschmann's so well known superior strain, brought as high as one dollar a plant wholesale last season. Now is the best time if you want good plants for Easter. We have a very large stock of 4-in., at \$1.00 per 100; 6-in. at 25c, 35c to 50c, just right for Easter blooming.

Crimson Rambler Roses, 6-in. pots, 3 feet high, nicely staked up and bent down, 50c to 75c.

Mention if ship with or without pots.

Cash with order, please.

All plants must travel at purchaser's risk.

## THE STANDARD

## VENTILATING MACHINERY

The old reliable machines are the most powerful, least complicated of any on the market

## The Standard Steam Trap

Ask someone who is using a Standard for his opinion of it.

Write for catalogue.

E. HIPPARD CO., Youngstown, Ohio.

Always mention The American Florist when you order stock. : : :

## Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

## Morehead Steam Traps

1 The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

The majority of florists are using Morehead Traps If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO.

Department 'N'

Detroit, Mich.

## WHAT THE USERS SAY

## Use Soft Coal==The Kroeschell Works Like a Charm.

The No. 2 Kroeschell boiler has been in operation for some time. We are using soft or bituminous coal, and it works like a charm. We are very much pleased with it indeed.

J. T. LOVETT, Little Silver, N. J.

## Used a Sectional==Prefers Kroeschell.

Have no trouble to keep up temperatures in my houses with the No. 10 Kroeschell boiler. The boiler has given entire satisfaction. We had a cast iron sectional boiler—I wouldn't have one for a gift any more.

LOUIS OTTO, Neenah, Wis.

## Are You Going to Build or Rebuild One or More Houses This Summer?

Write us when making your plans, we can give you satisfaction.

The above range, Dreer's second last addition, was built with our material, and our material again went into Dreer's last addition, the largest block of houses erected last season. Remember that it pays well to place orders early, there will be much building this year and it is advisable not to come into the heaviest rush.

Buffalo.

AN OLD TIME BLIZZARD.

We had what one might call an old time blizzard February 6, consequently business of all kinds suffered. Considerable snow fell during the week, making fairly good sleighing. Stock supply remains about the same; plenty of bulb stock, roses and carnations showing some improvement. Several funerals the past week gave plenty of work to the florists.

## FLORISTS' CLUB MEETING.

The meeting last week was well attended for two reasons. First of all was the nomination of officers for the ensuing year. After several bursts of oratory and the rulings of Cushing's Manual and New York State Senate as to powers of nominations, the following were nominated to guide the destinies of the club for 1911: George W. McClure, Jr., president; R. A. Scott, Jos. Sangster, vice-presidents; Chas. Sandiford, treasurer; Wm. Legg, secretary; Jerome Deutscher, financial secretary. There may be an opposition ticket later, but it is doubtful. The only apparent contest is for the arduous office of vice-president.

The next event was the debate: Resolved, That the use of artificial flowers by the florists is a detriment to the trade. The affirmative was ably handled by Fred Brown and Chas. Guenther. The negative was in the able hands of Wm. Grever and L. H. Neubeck. The judges were W. F. Kasting, J. R. Cloudsley and E. D. Savage; critic, W. A. Adams. The arguments, so ably put forth by both sides, made it rather hard for the judges to decide. After some time they decided in favor of the affirmative. The modesty of Messrs. Brown and Guenther would not allow them to accept the victory, and after a motion by Mr. Brown, seconded by Mr. Neubeck, and several points of parliamentary law relating to the rulings of President Street, it was declared a tie and everyone was satisfied. The club was honored by the presence of Mr. Miller, of Skidelsky & Irwin, who gave a very able talk on fertilizers, also reading a paper on their use, which was very instructive to the grower, showing in very strong terms that more papers on live subjects are very beneficial to all. W. F. Kasting spoke on the bill that is before the state legislature asking for an appropriation of \$50,000 to Cornell University at Ithaca, N. Y., to establish a horticultural school at the college where the young man of today could educate himself in that department as well as law, medicine or agriculture. The bill has the support of the leading growers who will have representatives from the larger cities at the hearing before the ways and means committee on February 15. W. F. Kasting, S. A. Anderson and Geo. McClure will represent Buffalo and the secretary was also instructed to send a letter to the representatives from Erie county in the

## This Is That House We Built for D. C. Blair at Bar Harbor, Maine

It has four compartments, one of which is a grapery. A fine compact house it is, without an inch more wood in it than absolutely necessary. Its Iron Frame takes all the strain. Some owners of our houses claim they will last 100 years. Maybe they will. That's a long time. You get your money's worth, that's sure. Going to build? Then we ought to build it.

**Lord & Burnham Co.,**

Boston  
Tremont Building.  
Chicago.  
The Rookery.

Can't you just see a duplicate of this house located right on your grounds and picture in your mind the hundred and one things you could grow in it. It is 50-ft. long with three compartments, a work room, and row of cold frames. It will cost you— but hold on, let us talk it over first then you will understand why we can build it so reasonably. We will gladly send you photos showing other points of view.

**Hitchings & Company** Elizabeth, N. J., and  
1170 Broadway, N. Y.

senate and assembly urging their support in behalf of the bill. Resolutions were adopted on the death of Jacob Boehler, formerly manager of the Buffalo Cut Flower Co., who started with W. J. Palmer & Son, working his way until he had the management of the Cut Flower Co. He had been ailing for the past year and while his death was a shock it was not unexpected.

## NOTES.

There was a rumor in Buffalo the other day of the possible removal of Supt. Seymour of the Park Department, and was quickly proved to be without foundation, which was good news to all, as the park department

has never in many years been handled as ably as by Superintendent Seymour, who is wide awake and always planning for the city's welfare in the laying out of flower beds and all things for the pleasure of the citizens.

John Fiebelkorn, who for several years has been an employee of S. A. Anderson, and seeing the fortunes made in the retail trade, has decided to start in business for himself. The store will be known as the Broadway Flower Shop. The best wishes of all are with John in his new venture.

Visitors: E. B. Sage and wife, Red Rock, Pa., and more bulb men.

BISON.

Omaha, Neb.

Business has been very fine, especially in funeral work. Roses are extremely scarce, but bulbous stock holds out immensely, especially callas and lilies. Violets are now plentiful but no surplus. Potted plants sell well except cinerarias which are on the decline, but cyclamen are good sellers. Valentine business will be heavy. There will be plenty of violets and bulbous stock, but American Beauties are scarce and of poor quality.

Mr. Huxhold, the father of Mrs. G. Swoboda and Mrs. A. Lange, passed away February 8. Mr. and Mrs. Lange and son attended the funeral. Hess & Swoboda are to build seven new greenhouses, six 22x15 and one 15x200. J. C. Moniger Co. furnish the material and Winandy Bros. are to erect the houses.

Visitors: H. Kusik, Minneapolis, Minn.; W. W. Silliman, of Wertheimer Bros., New York; Myra E. Bronson, Burlington Willow Ware; J. F. Dayton, Madison Basketcraft Co., Madison, O., and representatives of H. A. Dreer Co., Philadelphia, and Lion & Co., New York.

Also Thomson's Special Chrysanthemum and Topdressing Manure,  
An Excellent Stimulant.

Freight paid on quantities; liberal terms to retailers. Write  
for our special offer to the American trade. Agents' cir-  
culars, pamphlets, etc. to sole makers.

Also Exporters of Pure Scotch Soot Write for prices, etc.

Wm. Thomson & Sons, Ltd., Tweed Vineyards,  
Clovenstone, Scotland.

## The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.

The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods,

and the Mastin Whitewash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

J. G. MASTIN & CO., 3124 West Lake St., CHICAGO, ILL.

## Nikoteen

The most effective  
and economical  
material there is  
for spraying plants and blooms.

## Nikoteen

Is skillfully extracted  
from leaf to bacco and carefully  
refined; it is clean and easy to apply.

## Nikoteen

does the work when  
vaporized either on  
pans or pipes or  
over a flame. Full Pint Bottles, \$1.50.

## Nikoteen Aphis Punk

Specially prepared for fumigating closed  
houses. It vaporizes the Nicotine evenly  
and without waste. Nothing keeps a house  
free from Aphis so cheaply.

Price \$6.50 per case of 12 paraffined boxes.

All Seedsmen.

## Garman's Antipest

INSECTICIDE AND FUNGICIDE

For the Garden, Orchard and Greenhouse

Non-poisonous and harmless

to vegetation.

Kills Green Fly, Aphides, Bark Lice,

Thrips, Mealy Bug, Red Spider, Scale,

Wire Worms, Ants and Slugs.

This is the Grower's Friend. Handy to

use, cheap and effective, mixes readily in

water. Destroys all insect pests and

keeps down mildew. Circulars on applica-

tion, \$1.50 per gallon. Also in

quarts, half gallons and in bulk.

PERFUMED CHEMICAL CO.,

FLUSHING, N. Y.

Approved by the New York State Agricul-

tural Dept. Certificate No. 223, July 8, 1910.

Guaranteed under insecticide act 1910.

Serial No. 91 of U. S. Agricultural Dept.

## Cattle Manure in Bags Shredded or Pulverized

Pure - dry - uniform and reliable!  
The best of all manures for the  
greenhouse. Florists all over the  
country are using it instead of  
rough manure.

## Pulverized Sheep Manure

Absolutely the best Sheep Manure on  
the market. Pure manure and  
nothing else. The best fertilizer for carnations and for  
liquid top-dressing. Unequalled for all field use,  
Write for circulars and prices.

The Pulverized Manure Company

32 Union Stock Yards.

# Saves Your Printed Matter and Postage.

**T**HE American Florist Company's Directory saves many times its price to every one who catalogues or circularizes even a small part of the trade. Fully revised to date of publication, it puts the mail only to live names, avoiding waste of postage and printed matter, time and labor. Contains 570 pages, lists of Florists, Seedsmen and Nurserymen of the United States and Canada by states and towns, also alphabetically; firms that issue catalogues, foreign merchants, horticultural societies and much other up-to-date information which makes it a reference book of daily utility wherever a wholesale trade is done.

## AMERICAN FLORIST COMPANY

324 Dearborn Street, CHICAGO.

Sent postpaid at \$3.00 a copy by the publishers.

### Pittsburg.

#### STOCK MORE PLENTIFUL.

The prospects for a good St. Valentine's day are very bright. Advance orders are coming in nicely and stock of most all kinds has loosened up to a great extent which precludes all worry as to taking care of the orders. Violets are going to be very plentiful. They have been quoted as low as \$5 per thousand in this market. American Beauties, orchids and gardenias are about the only real scarce flowers. These have a very strong demand with few to be had. Sweet peas and lily of the valley are coming in fine shape now, and are right in line for Valentine's day, which is becoming a more popular day for the florists.

#### NOTES.

In the English Room of the Fort Pitt Hotel February 28 R. Vincent, Jr., of White Marsh, Md., will deliver an address before the Florists' and Gardeners' Club on the subject, "Bulbs and Growing Plants as Seen in Europe." Mr. Vincent is a very interesting speaker, and also has a very fine collection of lantern slides which are used to illustrate his talk and which will be a revelation to many. A lunch will be served afterwards. Tickets have been sent to all members that are in good standing. Additional ones can be secured at cost for those who desire to bring their wives or friends. Every member should be present as Mr. Vincent's talk will be both interesting and instructive.

An error occurred in last week's notes regarding the carnation exhibit at the club. F. Dörner & Son were credited with what should have been Pittsburg Cut Flower Co.

G. & J. N. Ludwig, North Side, have their new store about completed and will open up shortly.

Geo. Marshall, of the Pittsburg Cut Flower Co., is reported on the sick list. J. L. Geisey, Wilkinsburg, says he is well pleased with his new store.

J. J. Fuchs reports he is working overtime on funeral work lately.

Southern daffodils have made their appearance in this market.

A. W. Smith Co., Pittsburg avenue, are having a run on a special Valentine box of violets. J.

### Baltimore.

#### UNFAVORABLE WEATHER.

There is not much improvement in conditions of the cut flower market as yet, but the carnation supply is improving, and there is a pretty big stock of small stuff, like fressias, sweet peas, bulbous flowers, etc. The weather is mixed and very unfavorable to the growers, and whilst the cold has not been intense, almost every day for a month has been such that firing for several hours was a necessity, and the coal piles have diminished rapidly.

#### NOTES.

A decoration of the ball and supper rooms at the Belvidere hotel for the Junior Assembly attracted much comment. The assembly rooms were hung with vines glowing with myriads of electric lights glistening from the center of pink roses. Along the walk were placed palms and other fine plants of tall nature. The walls were festooned with smilax and illuminated by other hundreds of electric globes. The supper room had been transformed to represent a greenhouse with glass roof and long tables filled with blooming plants in pots, while one or more courses were served in flower pots of red clay. The whole scheme was an innovation. Black & Bro. were the designers of the decorations.

You may depend on it for positive results, without fear of failure or dissatisfaction.

\$2.50 per gallon; \$1.00 per quart.

## FUNGINE

An infallible remedy for mildew and other fungus diseases. A clean, safe and easily applied spraying material, particularly adapted for the greenhouse.

\$2.00 per gallon; 75c per quart.

For Sale by Seedsmen.

MANUFACTURED BY

Aphine Manufacturing Co., Madison, N. J.

Miss Isabelle Cook, daughter of John Cook, who, with Mrs. Cook is spending the winter near the Gulf, has gone to Florida to keep her mother company while he goes on a trip to Cuba.

Mr. Green, of the firm of Kerr & Green, a well-known and respected florist of Hampden, died very suddenly last week from heart failure.

J. K. M. L. Farquhar of Boston addressed the Gardeners' and Florists' Club February 13, his subject being "Gardens of Italy." S. B.

SUMMIT, N. J.—Preparations are in progress for two greenhouses to be built for Valentine Hamman.

#### BUSINESS ACTIVE.

Business is very active now and there is a scarcity of all sorts of stock excepting bulbous flowers, of which there appears to be an abundance and of first class quality; the range of colors in tulips leaves nothing to be desired. Proserpine and Cottage Maid are the two most valuable varieties for this city; in daffodils Golden Spur takes the lead over all competitors in its class; in hyacinths we have all the various colors but yellow do not meet with much favor; there are some jonquils and other odd bulbs forced, but the varieties named are the principal bulbs in the local market, with the addition of Roman hyacinths and Paper White narcissus. Freesias are also grown for cut flowers and pot plants.

#### NOTES.

The annual dinner of the Gardeners' and Florists' Club was held January 2. It being a severe night the attendance was not as large as usual, but, nevertheless, those present enjoyed themselves just as much as ever. President West presided and introduced the following speakers: "Our Country" was responded to by H. L. McConnell of Toronto. G. A. Robinson in behalf of the florists dwelt especially on the rapid strides the florists' trade has made and prophesied a bright future, especially for the growers. He also mentioned the National Flower Show to be held in Boston next March and urged everybody to attend. J. A. Bowles spoke in behalf of the Montreal Horticultural Society and finished with a recitation. J. Luck had something to say for the retiring officers and R. Pinkerton for the seedsmen. James McKenna having lost a daughter, Sister Marguerite of the Congregation of Notre Dame, a vote of condolence was passed and the secretary instructed to convey the same to the bereaved. **LUCK.**

**HANCOCK, MICH.**—The stock at the A. M. York Estate is in particularly fine condition, and the quality of flowers that are cut is the equal of the best growers in the large centers. The lilies for Easter are in especially good shape and promise well. Foreman Dale is to be congratulated on the elegant condition of everything.

## GREENHOUSER'S OBSERVATIONS

### Concrete Gutters.

The reply to a correspondent, in THE AMERICAN FLORIST, issue of January 7, page 1198, by W. N. Rudd, gives rather a formidable list of objections to cement used in the form of greenhouse gutters. And it must be admitted that every one of the reasons given for not using this material is sensible and practical as one would expect from a horticulturist of Mr. Rudd's calibre. Still many things that formerly seemed impossible, or at least not feasible, are now numbered among our every day conveniences and directly it could be shown that there was an advantage in using cement for greenhouse gutters, then interested experimenters would begin working, and before long we should have cement gutters in use.

In the present condition of greenhouse construction, the attaching of the greenhouse bars to a cement or concrete gutter certainly does seem to be a serious difficulty in the way in the use of this material. But have the sashbars necessarily to be attached? There are many reasons why an independent gutter would be a good point in construction. In many systems the gutter, especially the gutter of wood, is the weakest point. It also keeps out a great deal of light from the plants growing in connected houses and is usually the place where decay sets in first. In houses connected beneath the supports, a properly constructed iron gutter carried on pipe supports and itself carrying the framework of the house, seems to the writer to be as near a perfect method as we are likely to get. But with cement walls as described by Mr. Rudd there seems absolutely no reason why a cement gutter could not be used. Properly reinforced there would be no danger of cracking, the gutter would not absorb more water or rather hold more in suspension than the walls, while it would surely be more mechanically correct than anchoring either a wood or iron gutter to the wall. A light wooden apron or sill would take care of the drip, while the weight of the house would be picked up by center supports under the ridge, preventing

any tendency to side thrust. In such a case an independent wall and gutter combined would be at once practical and easy of construction, but by its very nature would not appeal to constructors who had in view the extra light house of modern commercial florists.

### The Traveling Salesman.

Big business concerns have long appreciated the fact that nothing so makes for success as a competent sales force, and the stress of modern times has rendered the "drummers'" vocation less and less of a sinecure, notwithstanding the greater facilities for travel nowadays. Indeed the old road man may often be heard regretting the "good old days" when, although he may have had to put up with rough and inconvenient methods of travel, yet he and his kind were not so thick on the road. With all due respect to the many excellent knights of the grip that represent American nursery, seed and other allied business houses, the fact cannot be lost sight of that, as a rule, we have not kept in line with other businesses, either in the personnel of the travelers or the sales methods employed.

There are even now too many men on the road who think the proper way to approach a prospective customer is with a "Hullo, Old Man Smith," and the offer of a cheap cigar. The same gentlemen usually interlace their conversation with stories of a questionable character, talk about the poor stock seen in rival establishments, and laud the stock of the prospective one far above its merits. This is not salesmanship. A man who has goods to sell must first of all know his goods. He need not be an accomplished botanist because he is engaged in selling plants, but the least he can do is to keep posted on how certain varieties, that are sure to be in demand, are doing in the principal places around his home town and others, so as to be able to give sensible, workmanlike replies to the man who wishes to buy if the thing is good, but has no desire to be "stung" and have a worthless variety

on his hands. It may be that some florists expect too much of the traveling salesman in the way of information about new varieties, and their suitability or otherwise for the individual growers' circumstances, but it will be a great aid in other directions, if the salesman can give the information desired.

The best salesman, in short, is he who can, while maintaining his own individuality, so appear to lose himself in his prospective customer's needs and business that it would seem to the latter that the traveler had made a trip to his town or district simply with a view of his trade only. Some men have a peculiarly attractive habit of drawing a man out and sympathizing with him, of taking an interest that is not all feigned in the topics discussed. To use a slang phrase they "get next" to their customer quickly, not by appealing to the worst side of his nature by the methods indicated above, but by an intelligent and honest interest and by helpful hints along the lines that the customer's inclinations lie. There is, of course, the discursive, talkative customer who things nothing of wasting an hour or two of the traveler's time to no benefit, but the tactful salesman soon knows his man, and finds a way to cut him short without offense. Tact in short is a little word that means much. A man who has it and exercises it, will go farther and do better on the road than one who is far better posted and even better educated than himself, and has not this attribute.

Few experienced and successful travelers suffer from swelled head. It is the inexperienced traveler of the "cub" order who thinks it is he and not the house he works for that is important. The sooner this class of traveler learns to sink as far as possible his own identity in the house he is working for, the better for him and his house. By doing this a man loses nothing of his own individuality or self respect. If he is working for a good house his superiors will respect him the more if he leaves instructions that all his mail is opened at once in his absence. If he is not then let him use his own sales ability and sell his own services to another house who will appreciate him.

#### The Lath House.

The grower in any southern point who has not at least one lath house is certainly neglecting an important cultural aid. Even in the north where much forcing of hardy stock goes on it is of great value, though it has of necessity to be made stronger than where the snow fall is light. In the south it is most difficult to hold stock back for certain dates. No matter how heavily shaded or well ventilated the greenhouse may be, in warm weather it is simply impossible to cool off plants sufficiently. But the lath house is always cool and pleasant and never has that stuffy feeling so common to heavily shaded greenhouses. Light frosts are warded off entirely by the lath, while even in the hottest summer weather the sun's rays cannot concentrate long enough on any given spot to cause any damage. By due attention to dampening and plunging the pots in suitable material, plants of all descriptions are kept in perfect health with a minimum of trouble and expense and the list of species that can be so grown is large indeed.

The cost of building a lath house is so inconsiderable in comparison with that of a greenhouse, that it would be worth building if only used three or four months in the year, but it can be used every month of the twelve and every day of each month by a properly considered routine, just the same as the greenhouse. There is no better place, for instance, for growing the various lilies of the auratum and speciosum classes, to say nothing of longiflorum and its varieties. The terrific heat of our summers takes the very life out of lilies in unshaded places, but under the broken light of the lath house they simply enjoy life to the full, and push up grand flowers that keep their color until the end. Such palms as *Cocos flexuosus*, *Phoenix Roebelenii*, *Latania Borbonica* and many kentias simply revel in the light, yet cool quarters while for greens like *asparagus plumosus*, *smilax* and many ferns, the situation is perfect. "If you have not a lath house and live in the south build one by all means," is the best advice we can give to anyone who is striving to make the most of his place.

GREENHOUSER.

#### Dahlias Changing Color.

ED. AMERICAN FLORIST:

Last year I purchased some dahlia plants, one of which produced flowers of mixed colors. This root was divided, and this year one of the plants has flowers that have different shades in different lights in the daytime, and pink at night, and others are of a cream color and of a different habit. Can you inform me what caused the change? Will they be of the same color and habit again? G. H.

Replying to G. H. with reference to dahlias changing color, would state that his experience is usual, rather than unusual, as even suggested by the name *Dahlia Variabilis*. From mixed colors, we presume he means what we term fancy dahlias. All fancy dahlias, that is, those containing two or more colors, are apt to sport in every conceivable way, and if they sport, they will change in habit accordingly. According to the rules, a cream-colored plant should not be so strong as the darker colored. As for the different colors under different lights, this is to be expected, as the cerise, lavender or even light purple, will show decidedly pink under artificial light, and yellow will show almost pure white. As to the sport being permanent, time alone can tell.

The writer has seen *Souvenir D. Gustav Doazan* sport, every plant having a broad, white tip, but so far, have not heard of the type being perpetuated, yet a permanent sport is liable to be procured at any time.

If your correspondent would give the name of the variety I could give more definite information about the possibility of the sports remaining permanent. Would, however, feel almost safe in saying that the sport in question would be permanent if the entire plant was of the same color.

L. K. PEACOCK.

OWOSSO, MICH.—Owing to disagreements as to the manner of conducting the business and not being able to agree to buy or sell, Hermann Thielman and W. Stewart Beebe, doing business as the Owosso Floral Co., have had L. A. Saundorhoff appointed as receiver and he will take full charge of the business.

## THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

#### A Floral Panel.

The very beautiful and elaborate design which we illustrate was made by A. I. Simmons of 342 West Sixty-third street, Chicago, and is a tablet, 34 by 36 inches, upon an easel, and was composed of bronze galax leaves ornamented with American Beauty roses, freesias, white carnations, orchids and Mexican ivy. It was ordered by the Get Rich Quick Wallingford Co., a theatrical company playing at the Olympic Theatre, and sent to Cohan & Harris in New York to the opening of their new Forty-seventh street theatre and arrived in excellent condition.

#### A Notable Banquet Decoration.

For the Sheriff's banquet, which took place in the grand ballroom of the Hotel Astor, on Thursday evening, Chas. Thorley executed a floral arrangement that will long be remembered as a beautiful picture by those who were fortunate enough to see it. Messrs. Humphrey and Slattery of the Thorley staff had charge of the work. They commenced at 1 a. m. Thursday and together with their assistants kept continuously at it until 4 p. m. when the job was finally completed in all its details. Rather strenuous work certainly, but such are the conditions expert decorators meet quite often. Some idea of the size of this room may be gathered from the fact that 60 tables, each with eight covers, were arranged on the floor. There are two tiers of boxes along both sides, and both ends of the room. We mention this to give some idea of the height of the room.

The principal feature of the decorative scheme was an immense old and gnarled apple tree that seemed to be growing out of the floor at one end of the room, its trunk reaching well up to the second tier of boxes, its branches spreading about 20 feet in each direction, fully clothed with foliage and heavily loaded with almost ripe apples. The effect of this gorgeous apple tree, loaded with its luscious fruit, while all outdoors is a mass of snow and slush, can better be imagined than described. The entire front of each box on both ends and sides of the room were filled with flowering plants, azaleas in white, pink and red; marguerites, lilac and spiraea. Suspended between the two tiers and from the front of each box in the upper tier, was a single specimen Boston fern. The effect produced was two heavy, undulating streams of flowers encircling the entire room, the suspended ferns appearing like miniature green islands dotted between the two margins. On the floor and directly under each box a large stand filled with American Beauty roses was placed; each table was adorned with roses of the same variety. At the end directly opposite the apple tree and immediately under the orchestra, an immense mound of flowering plants in light colors was raised. This was effective in emphasizing the red roses used on the tables and in the tall vases. It was a beautiful decoration, the roses used were seemingly innumerable and it cost \$5,000.

A FLORAL PANEL.

### New Shasta Daisies.

The free flowering nature of some of the newer forms of Shasta daisies is very remarkable and is well shown in the accompanying cut of one of Burbank's latest. Single plants of this variety have been frequently known to produce as many as 350-375 open flowers at one time. Such plants are an ornament to any garden and fine for cutting.

BURBANK'S HYBRID CAMMASSIAS IN THE FIELD.

### The Florists' Experiment Station.

The carnations at the Florists' Experiment Station at Urbana, Ill., are looking better than ever before and show quite a large number of buds. The flowers are large and the stems of good length for this time of the year. The roses are also doing nicely. Both the grafted and own-root stock are growing vigorously and promise a good crop of first-class flowers in the near future. The plants in the sunken garden were taken by the frost during the early part of the week. It is possible that several changes will be made in the general plan of the garden. Several beds will be added and a number of the old ones will be enlarged.

A storage house 10x50 feet is in the process of construction. This is being built for accommodation of such dormant stock required in the floricultural work. Announcement has been made by Dean Davenport as to the registration in the college of agriculture. Up to the present time 637 students have been enrolled, which is 17 more than at the end of last year.

Louis Brandt, a graduate of the Massachusetts Agricultural College, has been appointed instructor in landscape gardening to succeed H. F. Major, who went to the University of Missouri as instructor of landscape gardening and superintendent of the grounds.

The following gentlemen were recent visitors at the Florists' Experiment Station: W. N. Rudd, Morgan Park; F. L. Washburn, Bloomington; C. W. McKellar, Chicago; D. S. Dysinger of the Ionia Pottery.

A. H. N.

BEAUMONT, TEX.—The Southeast Texas Floral Co. have leased a piece of property adjacent to Magnolia cemetery, and are erecting greenhouses thereon, under the direction of C. J. Oleson, the manager.

## THE PERENNIALS.

### Sowing Seeds.

One of the most remarkable signs of the times in which we live is the development of all out-doors, and the many clubs and societies organized with the view to improve and beautify cities, towns and homes, make it possible for all to help along the work which is as it should be.

him varieties of paeony, phlox, or other hardy plants, that he has seen mentioned in periodicals, and wants to add to his garden in order to have the best. There was a time not so long since when these plants were sold mixed, or at most in colors, and all remember the attempt made to revise the names amidst the hopeless confusion that had arisen, especially among the paeonies. This was the result of the efforts of those who had read the handwriting on the wall, and knew that plants unvouched for with an authentic name, resemble some others also nameless. The editor may think this is enough of preamble, but he is responsible for the whole, and it is intended again, the year coming, to review the possibilities of plants that are hardy and good, keeping strictly to such as may be sold with satisfaction to both seller and buyer, for it is true that there are many plants that are much enjoyed by enthusiasts, mostly because they have succeeded with them. These we propose to leave out for the present. They are not good for the beginner and we will let the post graduates study them as they often do with success.

We are now in the midst of an epidemic of seed catalogues which remind us that it is time to choose, and with those who have glass at their disposal it is time to sow. Perennial seeds come slower than annuals, always, as in the nature of things they must. Many indeed need the action of frost to get the best germination, and this is true of most of our beautiful native plants and shrubs. If any one doubts this, it is only to save seed of say *Aquilegia coerulea* and sow it at once to note how few appear during the season, and look again in early summer, if sown out-doors as it should be, and see how every seed has seemingly appeared. The same is true of the trilliums, dodecatheons, *Lobelia cardinalis* and a host of other fine plants which have the reputation of being "hard to get up under glass." It would take too much space to attempt the telling which to freeze, but if failures occur after sowing, blame the seedsman last of all, and in the meantime get knowledge.

More years ago than the writer is inclined to tell, he, in the pursuit of an acquaintance with this class of

ONE OF BURBANK'S NEWER SHASTA DAISIES.

VIEW OF SUNKEN GARDEN AT AGRICULTURAL EXPERIMENT STATION, URBANA, ILL.

plants, scanned all catalogues he could find and finally exchanged native seeds with a German firm who listed the most in number of perennials. It was a very interesting experiment because most all grew; some were weeds, others not hardy, but all were new in the sense that he, at least, had never seen them before. Furthermore, this is not in any sense a joke, and there is no better way today to get acquainted, than to begin with acanthus and go through to *zauschneria* in a list published by a reliable house, order the whole of those listed as perennial and hardy and test them out. There will surely be a lot of surprises, and a liberal education besides for those who want to learn. Seeds may be sown as soon as received under glass, or kept until later and sown in hotbeds after the spring rush is over, and the bedding plants are out of the way, there being ample time then to take care and give room to the seedlings which will be strong enough in late summer to plant out-doors and become established before winter. Most kinds will be fit to sell in the spring and will flower the summer following. Such plants readily become established and give better satisfaction than older ones or those propagated by division.

There are many that are not readily raised from seed, such as paeonies, dictamnus and German iris. These must of necessity be purchased in order to secure a stock to commence with, taking care to get only those that are of first quality. Especially is this true of the iris, for there are so many sorts today that are undesirable as to color, and these often become a burden to the possessor. Some of these one would hate to give away.

The foxglove and Canterbury bell are usually classed as perennials, but are best treated as bi-ennials. Sowing some seed each year rather late in the season, preferably in April, the plants then do not become too large to move with safety, and in the colder states, these winter better than the large succulent growth produced by earlier sowing, for these, if planted in rich soil, do not winter well out-doors, and if wintered in frames require valuable

Wm. Toole, Baraboo, Wis.

space and very careful handling to hold them back in spring for sale.

Most florists have shady corners where it is possible to grow lily of the valley out-doors with profit. The flowers thus obtained are far superior to indoor culture in lasting qualities, and the roots spread rapidly if well nourished in fall with a good blanket of manure. If any pips are to spare in spring after forcing time, plant them out under trees, shrubs or other shady situations, remembering that the best grade is none too good for the purpose. If necessary to buy for this purpose, it will pay large profits on the investment as the beds are in every sense permanent.

E. O. ORPET.

CHARLESTON, S. C.—Chas. M. Newman has now one of the largest greenhouse plants in the south. Beside the fifteen acres under cultivation, he has twenty greenhouses and a large number of hotbeds.

## PEOPLE WE KNOW.

### William Toole, Baraboo, Wis.

At the annual recognition exercises of the College of Agriculture of the Wisconsin University, special testimonials of recognition of the eminent services in the development of agricultural thought and practice were conferred upon William Toole, of Baraboo, Wis., who was selected for particular recognition because of his important work in the development of Wisconsin agriculture.

William Toole of Baraboo is well known throughout Wisconsin and many other states as one of the leading horticulturists of the country. While he has been particularly a specialist in the improvement of the pansy, he has also advocated better methods of farming in all lines, and has also been instrumental in organizing a better type of social life in the community in which he resides.

Mr. Toole was born in Lancashire, England, in 1841, and came to Rhode Island a few years later. In 1859, his father moved to Sauk County, Wisconsin. In 1887, he moved to his present homestead known as Pansy Heights, two miles from Baraboo. He has built up an important business as a dealer and grower in flower seeds and plants, with special attention to the development and cultivation of the pansy. He has been a leading prize winner at many shows with this flower, and has originated a number of varieties of high quality. His most valuable service to his community has been through his work for better educational facilities, and as a prime mover in the Wisconsin State Horticultural Society. He was an early advocate of the strong college of agriculture. He has held numerous offices of farmers' organizations and for the past two years has been president of the State Horticultural Society, and for the past five years has been president of the Skillet Creek Farmers' Club, a social organization of farmers, which has secured country wide notice because of its work in aiding the im-

provement of rural social conditions. The influence of Mr. Toole has been state wide in favor of permanent and substantial agriculture, and it was for this unselfish service that he was recognized by the university.

## THE CARNATION.

### Carnations of Today.

Paper read by W. H. Taplin before the Florists' Club of Philadelphia, February 7, 1911.

Those of us whose memories reach back to Pres. Degraw, Crimson King, Peerless, Portia, Astoria, and other carnation names of that period (and varieties were quite numerous even then), will readily see that great advances have been made both in flower, that is in form, in colors, and in size. It is now many years since the late John Thorpe mentioned his ideal in size for the carnation as a diameter of four inches, and such a flower to be produced on a strong, stiff stem. That ideal has been reached in several varieties, though the ideal size has not always been found in combination with the other good features that are demanded by a discriminating grower. A new variety, at the present time, is exposed to keen criticism, for a very high standard has been reached, and it is not enough for a new seedling to simply show good size and fair color; for the trade demands that a large flower of good form and pleasing color shall be produced on a good strong stem, but also that the plant shall be of good constitution and free in growth and flower; and last, but not least, the retail man, who after all seems to be the supreme court of the cut flower world, declares that the flower must be a good keeper, and of such a shade that he can use it to advantage. With such requirements as these constantly before him, the carnation hybridizer has much to work for, and much work to do, and that some of them do appreciate the size of their task is evidenced by the care with which they select the candidates for popular favor, from among the hundreds, or even thousands, of seedlings from which they may make a choice.

The carnation world has lost much in the passing of the late Frederick Dörner, of La Fayette, Indiana, a man who devoted much of his busy and useful life to the improvement of commercial carnations, and one who was so careful in his selections that he could only find two or three varieties each season out of some thousands of seedlings, that he considered were worthy of introduction to the trade. Father Dörner had some ideals, and he worked toward those ideals with painstaking fidelity, but yet it was only occasionally that he produced a Wm. Scott, a White Perfection or a Pink Delight. Then we have to take into consideration the fact that varieties are likely to depreciate after having been grown for several years, possibly owing in part to some inherent weakness of the stock from which they sprang, and in part to the artificial conditions under which they are grown, for under the present conditions of commercial cut flower growing, our carnations are grown along under comparatively high pressure, having no season of natural rest such as most plants demand. In fact the seasons are too short to allow of any rest period, so we keep on propagating and growing on a variety until

its constitution gives out, and then look for something of similar or better color and habit to take the place of the older varieties.

Continued indoor culture of carnations seems to bring about the failure of a variety as soon as anything, though in making this assertion I am fully aware that there are differences of opinion on this subject. There are arguments in favor of indoor culture, not the least of which is found in the fact that the bench-grown plant is likely to produce a large flower on a long stem at an earlier period in the season than may be had from a field-grown plant, but the total number of flowers from a field-grown plant is likely to greatly exceed the result from the bench-grown specimen, and taking the season as a whole, the net returns

H. P. Joslin.

Secretary Pittsburg Florists' and Gardeners' Club.

will probably be in favor of the field-grown plant, without taking into consideration the greater vitality that is retained in the stock by the outdoor system. Those three months in the open air count for much in the preparation of a plant that is to endure a long season of forced growth under glass.

Then in the race to produce a given number of plants, some of the new varieties are over-propagated, all the possible shoots, and some that we might term impossible, are put in as a cutting, with the natural consequence that many deficient plants are put out each season, and many disgruntled customers are made. It is not necessary at this time to specify instances of this practice, but that such is frequently the case will be readily admitted by anyone having much experience in the trial of novelties in the carnation line. And while speaking of novelties, it must be admitted that every hybridizer is liable to view his own productions with a somewhat lenient judgment, which makes it the more necessary that these novelties should be passed upon by a qualified committee, and scored in a somewhat similar manner to that in use by the Rose and Chrysanthemum societies. The more general adoption of such a plan would possibly lessen the number of varieties that may be introduced, but would also save quite a

sum to those growers who find it needful to try out a batch of novelties each season, with a view to keeping up with the procession. It is not merely the original outlay for a limited number of plants that counts in these experiments, but there is also the loss of so many feet of bench space that ought to be productive.

Now in regard to varieties of the present day it must be taken into consideration that all sorts do not grow equally well in the same locality, and it therefore requires the exercise of judgment on the part of the grower as to the proportions of his stock. There are also the market peculiarities of different localities to be considered, for some varieties that grow well and sell well around Boston may not be equally satisfactory and popular in New York and Philadelphia. For example, Enchantress originated in Massachusetts, but yet Boston does not seem to be hungry for that variety, popular though it is in so many places, while crimson varieties, owing to the proximity of Harvard to the Hub, are good sellers in Boston, but find few friends in Chicago. But taking all things into consideration it is generally admitted that Enchantress and its various sports are the most popular and most satisfactory all around varieties that we have today, from the fact that they have color, size and stem, in addition to freedom of growth and floriferousness. All delicate colored carnations vary to a greater or less extent at certain seasons of the year, and Enchantress is no exception to the rule, and differences in soil may also affect the color of the flowers in a measure, but allowing for these variations, there is no other variety in the market today that has so many friends. This variety, as everyone here knows, has sported in many different localities, and in several shades of color, but nearly all the sports have proved valuable to the trade. White Enchantress is the best white for trade purposes today, and is in many places a stronger grower than its parent, but it must be borne in mind that White Enchantress has appeared in several different localities, and that some of the sports are much better than others. Rose Pink Enchantress is a strong-growing and free-flowering sport, but is unfortunately quite liable to variations in color, especially in mid-winter. Selection of cuttings will do something toward correcting this color fault, though not doing away with it altogether. Dorothy Gordon bears a strong resemblance to the last named variety, but seems to be a little more even in color, though in form, size, stem and general characteristics it is extremely difficult, and as a matter of fact is well nigh impossible to distinguish the one from the other. Then there is the dark sport from Pink Enchantress that has been named Washington, and if this variety looks anything like a colored cut supposed to represent it that has recently been issued, it is a flower that would not appeal to the writer, but it is more charitable to blame that on the printer rather than the flower, and it would be better to suspend judgment until a later period.

In scarlet there does not yet appear to be a better than Beacon, this variety being so extremely free that most growers are ready to forgive its serious fault of splitting badly in mid-winter. Scarlet Glow is a fine flower, and very bright and cheerful in color, but thus far does not equal Beacon in

growth and number of flowers.

Pink Delight is a variety that has received much favorable criticism during the past year, the flower being of fair size and even in color, and the stem unusually good. It is not pink in a strict interpretation of the color, there being rather too much salmon to be called pink, but it is a beautiful carnation just the same. Admiration is a fine colored variety and a good sized flower, but unfortunately it has no constitution, and thus seems to be out of the race. Princess Charming as shown the past fall is a variety of much promise, but as to whether it will replace Enchantress remains to be proved. Mrs. C. W. Ward is making many friends among the growers, this variety having a good sized flower of pleasing color and produced on a particularly good stem. It is somewhat liable to bleach as the sun grows stronger, but withal is a fine carnation. Alma Ward is a fine exhibition variety, but not free enough for the average grower. Some of the Lawsons

are still grown, but most commercial growers require more size and stem than is found in Mrs. Lawson and the numerous varieties that have been derived from that prolific source, and while many are still growing Winsor for color, yet it scarcely reaches up to the standard of the large city markets.

Variegated varieties are not in large demand and Mrs. Patten and Variegated Lawson occupy a considerable proportion of the space that is devoted to those of fancy marking. It can scarcely be said that there is a standard crimson variety at this time, for although there are many that are being tested in various parts of the country, there seems to be something lacking, either in constitution, size, stem or color, and there still seems to be room for a good variety of this color.

But after such a feast of carnation matter as has been produced by the trade papers during the past few weeks, I fear that this prosy paper may prove tiresome, and rather than

have you all go to sleep so early in the evening, will close by saying that though the advances have been great in the past decade in carnation history, yet there is room at the top, and I hope that many of you will get there.

BOSTON, MASS.—Articles of incorporation have been filed by the W. E. Doyle Co. Capital stock \$20,000. The directors are W. E. Doyle, president; John J. Cassidy, treasurer, and G. B. Doyle.

SAN DIEGO, CALIF.—Lanier Bros., a new firm here, are going considerably into the wholesale growing of cut flowers and greens, mostly under lath. Three lath houses, one 30x150 feet, one 16x200 and one 40x50 feet, have been recently built, also a new greenhouse 16x100 feet. This is only a commencement and both the glass and lath area will be considerably added to. Violets, carnations, roses and chrysanthemums are the leaders at present but Messrs. Lanier may add orchids later. Their establishment is at Third and Nash street.

### Palms in California.

That there are more species of palms used in outdoor gardening in the southern states and on the Pacific coast than are grown in many of our eastern greenhouse establishments, may seem to be a startling statement at the first glance, but this is doubtless true, for many of our florists do not grow more than a dozen species and varieties of palms, while the gardens of southern California include more than double this number of species among the palms that are successfully grown. Of course, the California fan palm, *Washingtonia filifera*, is one that is very largely grown, in some cases being used to line out an avenue in much the same way as the royal palm, *Oreodoxa regia*, is used in Brazil and Cuba, and, judging from photographs of such scenes, these palms must be wonderfully effective, the tall straight trunks surmounted by a head of large fan-shaped leaves giving a distinctly tropical effect. Possibly the fringe of old foliage that surrounds the trunk below the head may look better in a photograph than it does at short range, but after all it is natural and as such is worthy of admiration. Next to these in popularity and perhaps even ahead of the *Washingtonias* in point of numbers, are the various species of phoenix, these being much in favor in the gulf states as well as in California. *P. Canariensis* is the species most common, and the easiest to manage of the genus, being comparatively hardy, a rapid grower, and highly ornamental.

We are all reasonably familiar with the handsome young specimens of this phoenix that are imported from Belgium for decorative purposes, but these last are quite immature in comparison with the grand specimens that are grown outdoors in the south and southwest. The date palm, *P. dactylifera*, is also grown in California to some extent, and has been naturalized in parts of Arizona, where the national government has been endeavoring for some years past to found colonies of this palm. But of these two species *P. Canariensis* is the finest, the date palm being stiffer and less graceful, and also somewhat slower in growth. Several other members of the phoenix group are also used more or less for outdoor gardens, among them being *P. reclinata* and *P. rupicola*, and in all probability the dwarf Phoenix *Roebelinii* will be similarly used in the near future. The members of this genus are, however, quite a variable race of palms, there being many seedling forms that differ from the original types, and, in addition to these, there are many garden hybrids, so that it is not always an easy matter to identify a plant of this genus.

Another genus of palms that is frequently represented in the outdoor garden in the warm portions of our country is cocus, the ordinary coconut, *C. nucifera*, being frequently met with under such conditions, and it is also found in a semi-wild condition on some of the Florida keys. *C. plumosa* is admirably adapted for the garden in favored climates, and, as an example of its effectiveness, the accompanying picture of a beautiful specimen in front of a residence in Los Angeles is given, this plant being probably the finest specimen of *C. plumosa* in that favored city. *C. nucifera* is less graceful than *C. plumosa*, but throws some very fine leaves when well established and in good condition, and like all palms in the outdoor garden, these must be given quantities of water if they

PALMS IN CALIFORNIA.

*Cocos Plumosa*, Coarse Leaved Variety, Thirteen Years Planted.

are to be kept in good order. It may also be said in favor of *C. plumosa* that this palm makes a straight trunk, a feature that is quite the opposite of the coconut palm, the latter species having the peculiarity of very seldom producing a straight trunk. It would be of interest to know if *C. plumosa* has fruited in Los Angeles, for the tree is rendered even more attractive when bearing several long drooping clusters of orange colored nuts.

Several other cokes are used outdoors for decorative purposes, in fact, almost any species of this family may be so used except the one that is most grown in eastern greenhouses, namely, *C. Weddelliana*, this last giving but little satisfaction in California gardens. Another magnificent palm in southern California is our old friend *Livistona australis*, the same that in our early years was known as *Corypha australis*, a palm that was more frequently found in plant collections of 30 years ago than it is now. One scarcely needs to be told that this is an effective palm for the outdoor garden when we see such a specimen as that pictured herewith, this grand tree being also located in Los Angeles; it is now about 35 years old. *Livistona australis* is quite a tough palm and does well outdoors during the sum-

mer in the east also, provided that a sufficient supply of water be given it. *L. Chinensis*, the common fan palm, does not make such rapid progress when planted outdoors as its harder brother, but apparently develops a stem more rapidly under glass than it does outdoors; it also fruits quite freely, it having been a regular annual crop on several of the plants of this species in Horticultural Hall, Fairmount park, Philadelphia, Pa., for many years past. The tropical *livistonas* are rather tender for the outdoor garden in this country, such species as *L. humilis*, *L. rotundifolia* and others of that character not being adapted for that use, but there are enough others for all ordinary purposes without having to coddle these tender species.

### Shipping Plants and Flowers.

Paper read by J. F. Ammann before the joint meeting of the Illinois State Horticultural Society and State Florists' Association at Champaign, Ill., February 2, 1911.

In treating this subject one of the important questions to consider is I think transportation. While lacking a great deal in what might be termed satisfactory transportation, especially from an economic standpoint, we must, however, admit that express is the best we have at present. So, in discussing this subject, it should be borne in mind that packing is done with a view of shipping by express.

In packing plants the most satisfactory way is to remove the same from the pots, both for convenience in packing and economy in transportation. First of all, however, the plants to be packed should be given a thorough soaking of water about three to five hours before dumping out of pots, to insure enough moisture at the roots to carry them to their destination. In packing large plants, both blooming and decorative, where it is not safe to remove such soil, it will be found very convenient to use the paper or Neponset flower pots which hold the ball of the plant nicely together. These paper pots can be purchased in any size from seed stores and are inexpensive. Such plants as mentioned above should always, regardless of the

weather conditions, be wrapped in separate paper and in cold weather the box containing the same should also be wrapped with paper and burlap on the outside. In packing smaller plants, say from two to four-inch pots it is best to always remove all the soil possible, just leaving enough to form a good ball to hold the roots together. In many cases, especially among the smaller sizes, two to four plants can be safely wrapped in one parcel, and where plants are to be shipped a long distance, it is well to use sphagnum moss moistened to help the plant retain its moisture. Packing such plants in mild weather can be safely done in baskets or open crates, in severe or even moderate cold weather, it is however best to always pack in closed wooden or heavy corrugated paper boxes well lined with several thicknesses of old newspapers. The one principal thing to be borne in mind, is to always pack as light as possible, also using light packages for this purpose; many times you will receive a shipment of plants from some good-natured florist packed nicely and properly, but lo and behold, in a box made of boards one inch thick and the express charges are a real scare. There are many more such little errors that really create hard feelings between shippers and buyers I might call attention to, but for fear of tiring you,

and to leave more space for the other part of my subject, I will sum this plant packing up by saying, as the judge does about the law in construing it, use common sense, consider what would be fair to you, then do the same for the other fellow; don't put 50 pounds of plants in a 100-pound box.

Now to the other part of my subject, "the packing of flowers," I shall treat this later as cut flowers. Flowers to be packed for shipping should always be cut, put in water, and kept in water as long as it takes them to reach their destination; in other words, if they are to remain packed 12 hours, they should be kept in fresh water at least that length of time before shipping. I have always found this a safe rule to follow, and with very little loss. Flowers should never be cut from the plant and immediately put in a box for shipping even for an hour; always put them in water first, so the flowers can absorb some moisture through the stem. This process is, of course, slower in hard wooded flowers such as roses, than in soft wooded kinds as carnations, geraniums, lilies, violets, etc. In packing flowers, paper boxes should always be used. In long distance shipments, the corrugated paper boxes are the best. The box should be lined with several thicknesses of paper according to weather conditions. Some lining should always be used, even in the most moderate weather, and where flowers are to remain packed over 10 hours, ice should be used even in severe cold weather, as the first thing the express messenger will do to a box marked flowers is to set it near a heater to keep it from freezing; hence the necessity for ice. Flowers should be packed in layers, one row nearly on top and a little in rear of the other; pack in this way from both ends of the box towards the center. Then they should be fastened down. A good way is to have a large needle (such as is used for sewing up bran sacks) threaded with a heavy twine, run it through the sides and bring around the bottom of the box, then tie by pulling the string very tight. This answers as a cleet and keeps the flowers from shifting, thereby avoids bruising of the flowers in transit. Ice can be put in a small bag and fastened in the same manner, in about the same place, to have it on the stems of the flowers only. There are many more good points to be considered in the successful packing and shipping of plants and flowers, such as condition of stock to be shipped and way of transportation. No stock, either plants or flowers, should ever be shipped or sent out unless it is in perfectly healthy condition. In this respect plant life differs largely from human life, for the latter is sometimes benefited in health by traveling, while this is never the case of the former. Inferior stock never carries well and anyone sending out such stock, in either plants or flowers, does an injustice to not only the party receiving them, but to himself as well. In shipping to a given point, inquiries should always be made at the local express office as to the most direct route, and, if possible, over one line of express, only thereby limiting extra charges. In closing, I wish to express my hope that all organizations interested in transportation of plants and flowers especially, get in touch with and assist the Railroad and Warehouse Commission in the making of a fair schedule of rates to the customer, as well as to the express companies. This I consider very important.

SPHAGNUM moss, of florists' grade, for immediate shipment, is scarce in the west.

SEVERAL western growers who force Dutch tulips and Guernsey narcissi are complaining bitterly of the quality of blooms this year, some stating that not more than 15 per cent are of first quality.

ILLINOIS Freight Classification No. 10 reads as follows: "Bulbs, garden, in packages, must be prepaid." Some railroads are holding that the guarantee is not good and that all bulbs shipped in Illinois by freight must be prepaid.

### For the Gladiolus Experts.

Who is responsible for the renaming of Geo. Paul?

What is the difference between Alice Carey and Snowbank?

### American Rose Society.

Four parties from Philadelphia have sent notices that they will make exhibits at Boston, and that they are after the first prizes. The application blanks for exhibits are now available and Eber Holmes of Montrose, Mass., is right on the job. The mayor of Boston has expressed his interest in the coming show, and Mayor Fitzgerald is a national character. Ex-president Newbold writes, "From all I hear, the show this year in Boston is going to be fine and I only trust it may prove a decided success."

These shows of fine flowers do more benefit in the general uplift than is, at first sight, always discernible. Anything that brings out the lovely and the beautiful, always tends to encourage tidiness and thrift, two conditions that add materially to the comfort of human beings. The National Flower Show is to be an advent whose influence will be widely felt. We want to gather together, if possible, a finer show than we had in Chicago, a larger show than we had at New York, as choice a show as we had at Buffalo and as beautiful a show as we had at Washington.

BENJAMIN HAMMOND, Sec'y.

### The Help Question.

The procuring of help of the necessary quality and knowledge in nurseries or greenhouses at the present day is a serious problem. A proprietor of a large nursery, desiring a young man possessing executive ability and a knowledge of trees, shrubs and perennials a short time ago, wrote to a prominent horticulturist requesting him to recommend a suitable candidate for the position. He was informed by his correspondent that he was unable to do so, saying that men with ability and possessing such knowledge were very scarce, and added that in his opinion, the trouble originates in the fact that gardening, in comparison with the mechanical trades, is so poorly paid in Europe, that few men of ability enter the work. This is a very grave question and becomes more so every year, and the same state of affairs exists in this country. The American boy is not attracted to the work in nurseries and greenhouses, which seems to him so laborious and uninteresting, and so often requires the close association with the cheaper foreign labor, which in many cases seems unavoidable, and looks for work in the other trades where the wages are higher and the hours shorter.

Although the true gardener regards himself as a professional, yet the compensation, in but few cases, is that which is received in the professions, and the majority of young men reared at the present time, near the greater cities, regard the employment as menial. The graduate of the colleges and botanical schools is not attracted to the practical part of the work, owing principally to the poor recompense, and endeavors to establish himself in some school, or as a landscape gardener, or to obtain a position with such. The opportunities for such a young man to venture into business for himself are so great that, rather than accept a position that is so generally regarded as a humble one, makes such an attempt or accepts a position in some other line, where his knowledge may be of use, that furnishes more lucrative em-

ployment. If the European gardener of ability is a growing impossibility, the nursery and greenhouse man will have to establish an apprenticeship with the menial features removed, and a wage remunerative enough to compare with the other trades, before he can expect to induce the young man of the desired ability to take up gardening as his profession.

### Society of Horticultural Science.

This, the official society of the experimental station and college horticulturists of the country, met in conjunction with the American Pomological Society at Tampa on February 9. The attendance was larger than usual, numbering some thirty-five. In the absence of President W. A. Taylor and Secretary C. P. Close, Col. G. B. Brackett of Washington and Professor Craig of Ithaca acted as president and secretary, respectively. The Society elected S. A. Beach of Ames, Iowa, president; C. P. Close of College Park, Md., and H. J. Eunance, East Lansing, Mich., secretary and assistant secretary, respectively.

A paper was read by Prof. W. R. Lazenby of Columbus, Ohio, on studies in the germination of seeds, which emphasized the desirability of securing fresh, viable seeds in crop growing, and drew attention to the vast losses caused by the use of poor seeds. M. A. Blake of New Brunswick, N. J., gave the results of experiments in determining the influence of the factor of light on the color of roses. He showed that light was not uniform in its effects. This study is of special interest to florists. The varieties studied were American Beauty, Killarney, Bride, Pridesmaid, My Maryland and Richmond. These varieties represent three colors, namely, red, white and pink. Mr. Blake made the point that the trade prefers pink and white roses to all other colors. The deep pinks are the most popular. In the variety Killarney, which is now replacing Bridesmaid, the deep, rich pinks represent the desired types, but this variety has the defect of showing considerable variation. In this respect it resembles My Maryland, the latter is influenced by the conditions under which it is grown. The New Jersey Station has studied Killarney and My Maryland, and has ascertained that the characteristic tints vary from light to a deep pink, according to the environment under which they are grown. In the case of My Maryland, the experimenter discovered that lettuce is essential to the development of characteristic deep tints. Whether this was the only factor necessary to the development of the desirable tints is still an open question. It was found that in the poorly lighted months of December and January, that if the soil was kept wet and the ventilation insufficient, the growth was soft and the flowers of both Killarney and My Maryland under size and poorly colored. Applications of high grade sulphate of potash upon My Maryland roses at the New Jersey Experiment Station showed no influence upon the color of the roses in cases where sufficient quantities of nitrogen and phosphoric acid were supplied, coupled with other suitable greenhouse conditions. Other papers were "Self-Sterility of the Rotundifolia Grapes," F. C. Reimer; "Experiments with Preservatives for Retaining the Shape and Color of Strawberries," W. R. Ballard; "Importance of the Subject of Vegetable Gardening in the College Curriculum," L. C. Corbett, Washington; "The Rest Period of Plants," W. L. Howard, Columbia. H. E. B.

## Meetings Next Week.

Albany, N. Y., March 2, 8 p. m.—Albany Florists' Club, 7173 State street.

Baltimore, Md., February 27, 8 p. m.—Gardeners' and Florists' Club of Baltimore, Florists' Exchange Hall, St. Paul and Franklin streets.

Chicago, March 2, 8 p. m.—Chicago Florists' Club, Union Restaurant, 111 Randolph street.  
Cleveland, O., February 27, 7:30 p. m.—Cleveland Florists' Club, Progress Hall, 2610 Detroit avenue.

Lake Geneva, Wis., March 4, 8 p. m.—Lake Geneva Gardeners' and Foremen's Association, News building.

Lenox, Mass., March 4.—Lenox Horticultural Society.

Milwaukee, Wis., March 2, 8 p. m.—Milwaukee Florists' Club, Quiet House, Mason street and Broadway.

New Orleans, La., March 1, 8 p. m.—German Gardeners' Club, 624 Common street.

Newport, R. I., March 1.—Newport Horticultural Society.

Pasadena, Calif., March 3, 8 p. m.—Pasadena Gardeners' Association, Board of Trade rooms, West Colorado street.

San Francisco, Calif., March 4.—Pacific Coast Horticultural Society.

Utica, N. Y., March 2, 8 p. m.—Utica Florists' Club, Genesee Hall, Onondaga square.

A small ship launched upon an unknown sea,  
A small seed planted from an unknown tree,  
Such is this strange new year to you and me.  
Wither the vessel goeth  
And how the seed upgrowth  
God may know.

But sail the ship and plant the seed,  
What's done in faith is done in deed.  
—Thomas Farmer's Almanac.

## Wants, For Sale, Etc

**One Cent Per Word, Cash with Adv.  
For Plant Advs., See Ready Reference Section.**  
Where answers are to be mailed from this office,  
enclose 10 cents extra to cover postage, etc.

**Situation Wanted**—Gardener, expert in vegetables, fruits, flowers, shrubs, viticulture, etc.; wishes position as head gardener or foreman on private place.  
Address Box 542, Whiting, Ind.

**Situation Wanted**—Young man, 26, thoroughly experienced florist and gardener, offers his services to flower stores and nursery; best references. Address  
EDMUND VOHS, 81 Broad St., New York.

**Situation Wanted**—As foreman by a practical grower of cut flowers and plants in a modern place, capable of taking entire charge; a life experience; single; references O. K. FLORIST,  
59 W. Ontario St., Chicago.

**Situation Wanted**—Practical gardener on private place; experienced in flowers, vegetables, fruit, greenhouse and lawn. First-class references. Ready April 1; single; age 35. Address  
Key 392, care American Florist.

**Situation Wanted**—Man of general experience in all lines of work, greenhouses, fruit, flower and vegetable gardening, is open to engagement on private place. For further particulars address  
ERNEST GRANT, 122 Marengo St. Forest Park Ill.

**Situation Wanted**—By practical, middle-aged florist; life experience in growing roses, carnations, violets, mums and bedding plants; single, sober, industrious; state wages. Address  
A. G. Florist, Progress Hotel,  
12 Chatham Square, New York City.

**Situation Wanted**—By experienced seed salesman to the trade who can also fill any inside position; young, single and can give best references; position calling on trade in central states preferred. Address  
Key 393, care American Florist.

**Situation Wanted**—By gardener, Scotch, married, age 49; life experience in greenhouse, fruit, vegetable and general estate work; can grade and lay out grounds; one year in U.S.; wishes private place, New England preferred. Address  
Key 399, care American Florist.

**Situation Wanted**—As a grower of cut flowers and plants in general; life experience; capable of taking charge; state of Washington or Oregon preferred. Please state full particulars in first letter when writing. Address "FLORIST,"  
214 S. Washington, Spokane, Wash.

**Help Wanted**—Man for retail store; also man for greenhouses connected with store.  
Key 401, care American Florist.

**Help Wanted**—Man for city retail store with greenhouses in connection.  
Key 396, care American Florist.

**Help Wanted**—At once, greenhouse hands—good potters and for bedding out later in the season.  
MT. GREENWOOD, CEMETERY,  
Morgan Park, Ill.

**Help Wanted**—At once, man to raise vegetable plants and take care of small greenhouse; \$40.00 per month.  
A. A. ST. GERMAIN, Kankakee, Ill.

**Help Wanted**—An energetic young man of good appearance as assistant store clerk; one who has had experience as designer and decorator; must be strictly sober; send references from previous employers and state wages expected in first letter.  
Key 397, care American Florist.

**Help Wanted**—At once experienced grower of all lines of commercial greenhouse stocks, bedding plants and vegetables; wages \$60 per month, increased to \$75 next fall, when will be expected to take charge of small up-to-date plant.  
SASKATCHEWAN GREENHOUSE,  
Prince Albert, Saskatchewan, Canada.

**Help Wanted**—A practical grower as foreman, one who can assume the responsibility of growing No. 1 pot plants for the holiday trade also bedding plants, lining porch boxes and assist in making designs, etc.; wages \$15.00 per week to start; more if found satisfactory.  
M. BLOY, Wholesale and Retail Florist,  
880 Van Dyke Ave. Detroit, Mich.

**Help Wanted**—A good practical florist, married, preferred; one who knows the business and can be working foreman; one who can water, pot, propagate all fancy hampers artistically and posted in floral decorations; we do not grow roses or carnations, but handle thousands of them; have 25.0 feet of glass; city of ours is 151,000; state wages and references in first letter.  
W. G. MATTHEWS, Dayton, Ohio.

**Partner Wanted**—Capable, sober and strictly honest young man with some capital, to engage with us in florist business in a No. 1 growing town; no competition; climate and healthfulness unsurpassed; investigation courted; that we are willing to put up money is evidence of our faith.  
SLOAN BROS., Greenville, S. C.

**For Sale**—Greenhouse property of 2500 square feet of glass, ground 100x557 feet; good business; reason for selling, will sell on easy terms.  
F. W. WEIDMANN, Fort Morgan, Colo.

**For Sale**—Greenhouses containing 3000 feet bench room; hot water heat; complete cold water system and irrigating system; eight lots, 4-room bungalow and out buildings; everything first class and practically new; town of 8,000; no competition; first-class shipping facilities; fine climate; terms: investigate.  
EDGAR PHINNEY,  
Livingston, Montana.

## Wanted

An agent for the Nurseries of L. GAARKEUKEN, Nurserymen, Hazerswoude, Holland, as soon as possible.

## Wanted Greenhouse at Gary

The population of Gary is 25,000 and is increasing every day. Not a single greenhouse in the near Gary. Great demand for flowers and a greenhouse goods. We also have several good lots for sale on easy terms. For information write  
GARY SALES COMPANY,  
524 Broadway, Gary, Ind.

## Wanted...

A first class grower to take charge of about one hundred thousand and square feet of glass in a prominent Southern city. Must be sober and understand thoroughly the cultivation of roses, carnations and a general line of cut flowers. In answering this advertisement, give your reference in first letter. Address  
Key 389, care American Florist.

## GREENHOUSE FOR SALE.

Because of death of owner, 17,000 feet of glass, up to date, thoroughly built, prime condition, 7-room dwelling, two acres of land; half mile from University; 100 yards from stop on electric railway to Cleveland; established trade; fine opportunity for any line of greenhouse business; price \$18,000, terms easy. Address  
Wooster Forcing Houses,  
Wooster, Ohio

## For Sale.

**11 Up-to-Date Greenhouses.** Cover over 20,000 feet of glass. Heat, one 15 horse power; one 25 horse power hot-water Turman boilers; one 25 horse power steam boiler tubular—all new. All houses furnished with both systems giving perfect control and safety. Water from well 178 feet deep, pumped to steel tower. All houses built to overflow with spring trade stock. In part thus: 10,000 geraniums; 800 Easter lilies; 500 Gladstone spiraea; about 20,000 hyacinths tulips etc., roses, bellis, carnations; 4 houses carnations; 2 houses terms, etc. Estimated inside stock \$5,000; outside about 2 acres ground, 150 sash 356 cold frames, etc. Price \$8,000 cash \$7,000 on mortgage; if sold now will buy entire plant. It cost \$21,000. Fairly healthy; must sell quick; 2 stores buy entire outfit. Location 2 miles from Harrisburg, Pa. Write me quick.

JNO. A. KEPNER, Box 3, Harrisburg, Pa.

## Trade Directory For Names

THE AMERICAN FLORIST COMPANY'S Trade Directory for 1910, fully revised to date, with thousands of new names and changes of address now ready for distribution. It contains 570 pages, including complete lists of the Florists, Seedsmen and Nurserymen of the United States and Canada, arranged both by states and towns and all names alphabetically. Also lists of Foreign Merchants, Firms which issue catalogues, Horticultural Supply Concerns, Parks, Cemeteries, Landscape Architects, Experiment Station Horticulturists, Botanical Gardens, and much other conveniently indexed and invaluable trade information.

# SANGAMO

The Variety That Has Made Good

and Is Pleasing Everybody Who Bought It Last Season.

**Sangamo** is a beautiful brilliant pink (rose pink class); nicely formed flowers on long, stiff stems that are never weak, and the calyx never splits. Will produce two to one of any other variety.

If in doubt, ask any of the growers around Chicago.

**Strong rooted cuttings, ready for immediate delivery, at special price of \$5.00 per 100; \$40.00 per 1000.**

**CHICAGO CARNATION CO.,**

**A. T. Pyfer, Mgr.,  
35-37 Randolph St.,**

**Chicago**

## OBITUARY.

**W. A. Denison.**

It is with profound sorrow that we announce the death of W. A. Denison of Ellisburg, N. Y., the founder of the W. A. Denison Seed Co., which has been conducted under his name for more than a quarter of a century.

He was devoted to the interests of his business and none the less to the high principles upon which he conceived his business should be carried on. A tireless energy, together with a sincere desire to be of service to those with whom he dealt, enabled him to build up a large enterprise and to win for himself the honor and respect of his fellows.

The business will continue under the same name, conducted by A. P. Denison and E. A. Denison, brother and nephew of the deceased, who have been associated with him for several years.

**Edward L. Coy.**

Edward L. Coy, the veteran seedsmen of Melrose, Mass., formerly of West Hebron, Washington County, N. Y., passed away at his home, February 10, Mrs. Coy having preceded him by just one year. The confidence and esteem in which Mr. Coy was held by the seed trade was voiced by the late James J. H. Gregory, his life-long friend, on the occasion of Mr. and Mrs. Coy's golden wedding anniversary which was celebrated three years ago:

The golden crown, made from the Almighty's plan  
Fits the brow only, of the honest man.

No chartered right to wear it is your need,  
We found that right in every bag of seed.

Edward L. Coy was born in Greenfield, Mass., April 4, 1831, and was therefore nearly 80 years old. For more than 60 years of this time he was engaged in the growing of seeds, cucumber seeds being his specialty. In 1893-94 he was commissioned by the United States Department of Agriculture to make expert tests on about 100 named varieties of cucumbers, the object of the tests being to weed out the synonyms. At the annual convention

of the American Seed Trade Association, held at Niagara Falls in 1909, he was honored by being elected to honorary membership in the association, a distinction which he highly prized.

Mr. Coy leaves three children who mourn his loss, Mrs. J. B. Sievwright of Brooklyn, N. Y., Dr. S. Willard Coy, East Boston, Mass., and C. Herbert Coy, seedsmen of Valley, Douglas County, Neb.

[An extended account of the late Mr. Coy and his lifework will be found in our issue of April 18, 1903, page 470, where Bernardston, Mass., is given as the birthplace of the late seed grower.—E.D.]

**James F. McConnell.**

James F. McConnell, the well known sales manager for Noe & Noe, 57 West Twenty-sixth street, died after a brief illness of pneumonia at midnight Thursday, February 16, at his residence, 180 West Eighty-first street.

Mr. McConnell suffered with blood poisoning about a month ago, but fully recovered, subsequently taking cold which resulted so fatally. He was about 43 years of age and had been sales manager for Noe's for 15 years. He was a nephew of Alex. McConnell, and at one time was in the retail business with his father, Andrew McConnell, they having a store in Madison avenue, Staten Island was his birthplace, and with the exception of a short period, his life was spent in the flower trade. He leaves a widow but no children. The funeral services were held at the residence Sunday afternoon, February 19, the interment being in Woodlawn Cemetery. He had a host of friends in the trade and will be sadly missed.

**Baltimore.**

**SUPPLY SHORT.**

Weather dull, no sunshine, no brightness, only clouds, fogs, mists and rains. Trade would be pretty fair if there was more good material, but the supply is short and quality not at all up to the mark. Roses are still in short supply. Carnations are more plentiful, but many are weak-necked,

though fine flowers. Violets continue in excess, and Saturday evening saw the curbstone merchants filled up with the stock that had accumulated through the week. Gardenias are short, but of bulbous stuff there is no end. St. Valentine's day counted for less, probably, than for many years. Some few thousand violets, freesias and other small stuff went into the boxes, but the day's total seems to indicate that Cupid's holiday observance was abandoned or adjourned.

**NOTES.**

The illustrated lecture of J. K. M. L. Farquhar of Boston before the Gardeners' and Florists' Club February 20 was one of the most interesting and instructive ever delivered before it. He not only was fully acquainted with his subject, which was "The Gardens of Italy," but he knew how to impart his observations in a way to make his audience understand it too. The illustrations, many of the photographs having been taken by himself, were new, clear and enjoyable. S. B.

**Pittsburg.**

**GOOD BUSINESS.**

St. Valentine's day proved quite a feature in the past week's business. Reports from the various florists show it as away ahead of last year. Stock was very plentiful, spring flowers being in abundance, which ruled over other stock excepting violets, they having a very heavy call. A number of customers were disappointed as some of the violets came in very poor condition, hardly fit to take out of the box. The present outlook is for a shortage in everything, as the weather has turned to the worst, a typical blizzard, which is tying up all trains.

**NOTES.**

T. P. Langhans has been reported on the sick list.

South View Floral Co., Carrick, are planning to put up some more glass.

S. Green, H. Bayersdorfer Co., Philadelphia, was a business caller in town today.

T. Malbrano, Johnstown, is figuring on two new houses in the spring. Anton Krut, Butler, has been having a heavy run on funeral work. J.

## "Expect to Grow Dorothy Gordon Next Year—Good Size and Color"

—writes one of our friends who gave Carnation "Dorothy Gordon" a thorough trial last year. This customer is a prominent florist of New England, catering to a particular class of trade. The letter expressing this opinion was in answer to an inquiry which we sent him and many other growers a few weeks ago, asking about their success with "Dorothy Gordon." These replies varied in their tone, of course—but most of the growers expressed satisfaction with its good qualities and many voluntarily stated their intention of growing it again.

"Dorothy Gordon" is a money-maker; is succeeding for growers in many states. The plant is unusually vigorous and productive, the stem is generally long and stiff and the flower is a clear bright pink, quite uniform in shade. These and many other good qualities make "Dorothy Gordon" a carnation of rare merit—your trade wants it and will gladly pay a good price to get it.

We offer Choice Rooted Cuttings, \$6 per 100; \$50 per 1000 for delivery now or later. Let us hear from you: particulars on request.

Jenkintown

When in Philadelphia,  
Be Sure to Look Us Up

## Our Palms Are Now Making a Better Showing Than Ever Before

Better stock, larger stock, more room to grow it in—these features are going to make 1911 a banner year for Heacock's palms, and for dealers handling them.

We're pretty proud of the palms we grow, and if you've ever sold any of them, you know why:—healthy, vigorous growth, plants fine and stocky; in our home-grown palms you get a quality that lasts.

Wherever used, Heacock's Palms please your customers—on the porch or lawn in summer, or indoors in cold weather. There's a fine opportunity, too, for you to do a good business renting them for decorative purposes.

You can handle Heacock's Palms at a profit—

hundreds of dealers have been doing it for years.

Remember, all our stock is home-grown—started from the seed in our own houses. They cost no more than foreign-grown plants,

though, and your trade will quickly appreciate the difference. Let us know your requirements at once; we'll gladly quote prices.

**Joseph Heacock Company**  
Wyncote, Pa.

### Cincinnati.

The market Monday started vastly different from what was apparent last week. Everything dragged, while last week almost everything sold up nicely. It is to be hoped that the balance of the week will be better than the start and the rule that you can gauge the trend of the week's business by the Monday's sales falls flat. Monday is generally the replenishing day for the retailers and when they do not use much stock to refill their ice boxes, it is hard to tell how the market will run the rest of the week. The particular feature of the market last week was the sudden influx of single violets a few days after St. Valentine's day. On Saturday they sold slowly in the wholesale houses and the Jabez Elliott Market, and at the close many were sold in job lots. Carnations appear to be coming in stronger. The call is especially for white and Enchantress. Red moves next and deeper pink last. Roses are in fair supply. The number of white in Bride and Ivory greatly exceeds the number of pink, and are of very fine quality. Killarney and White Killarney are somewhat off crops. This is also true of Richmond and Rhea Read. The request for Beauties and the supply are about even. Bulbous stock is coming in very much stronger and the choice finds a very good market. Lily of the valley drag. Callies are more plentiful while Liliun longiflorum have shortened somewhat in supply. Sweet Peas and marguerites clean up daily. The green goods market is more than amply supplied, box after box of choice stock arriving, but it moves out slowly.

Wm. Murphy has leased the four story building at 309 Main street, and will occupy the same on March 1.

The Flower Show committee has completed the schedule and it is now in the hands of the printer.

O. B. Murphy has been cutting some very fine sweet peas. C. E. Critchell is handling them.

L. H. Kyrk has been getting in some very fine callas.

Visitors: J. T. Herderger of Amora, Ind., Wm. Lodder of Hamilton, Wm. Gardener of New Castle, Jos. Goldman of Middletown, and Simon J. Hyder of Hillsboro.

Ray Murphy won the box of silk-aline offered by E. G. Gillett for the best score in two games.

### St. Louis.

The weather has been very warm but we have had a heavy fall of snow with a prospect of cooler weather. Violets and sweet peas are more plentiful. Quite a number of jonquils are in and they are not cleaning up well. There will be a rush of entertainments and receptions the week before Lent and a good demand is anticipated.

#### NOTES.

It is rumored in the local press on advices from Edwardsville, Ill., that J. F. Ammann has received an offer for his plant, and it is understood that he will sell and retire. He has been a very successful grower, and his advice and methods have been frequently talked over at our meetings. He is an ex-president of the Florists' Club.

W. J. Pilcher returned from Chicago and was pleased with all that he

saw, and is satisfied that Chicago has a market. He stated the stock looked very fine and remarked upon the beauty of the E. C. Amling store.

The Mullanphy Flower Co. was very busy all week at their beautifully furnished and arranged store on Grand avenue.

St. Valentine's day created a demand for violets, sweet peas and jonquils arranged in Valentine boxes.

Will Osceck of the Wm. C. Smith Wholesale Floral Co. has been doing jury duty the past week.

C. Young & Son's Co.'s windows are prettily arranged with primroses, cyclamen and ferns.

Otto Sander had a specially decorated window for St. Valentine's day.

At H. G. Berning's a nice stock of roses was seen. W. F.

JAMESTOWN, N. Y.—Lawrence Cotter filed a voluntary petition in bankruptcy February 11. He owes \$1,500.79 and has no assets.

HASTINGS, NEB.—C. W. Winkler has completed the new greenhouse that he has been building. It is of iron construction and one of the largest in this section of the country.

IRONDEQUOIT, N. Y.—Edward Brockman reports a very satisfactory business. The carnations are doing finely and he has about 20,000 bedding plants for spring trade. A new greenhouse is to be added this spring to be built by the Lord & Burnham Co.

ROCHESTER, N. Y.—The first meeting of the Florists' Association in their new quarters at 95 Main street was largely attended. An address was made by George Arnold on "Plant Breeding." The association will entertain the Buffalo Florists' Club March 8.

Buy Direct of the Grower and Get Fresh Stock

## BASSETT & WASHBURN,

Office and Store: 76 Wabash Ave., Chicago

Greenhouses: Hinsdale, Illinois

### Chicago.

#### TRADE SOMEWHAT LIGHTER.

The condition of the market is but little changed from last week. The stock continues to arrive in comparatively small quantities but the quality, in many cases, is not as good as has generally been seen at this season of the year, owing, no doubt, to the weather which has prevailed ever since the first of the year. The trade for the last week has been considerably lighter than it has been in the weeks past, so the shortage is not as apparent as it really is, for with a rush of business everything would be picked up at once and the market would be bare. Roses are still rather short in quantity, and many that are sent in are of poor quality, there being very many bull-headed American Beauties and light colored Killarneys, but there are also some flowers that are of first quality, but all the growers claim that they will soon be in crop, and with a few bright sunny days the quality will improve very rapidly. Carnations are also far short of the usual supply, but the quality is very good and the prices remain firm and of first quality the prices are, in the minds of the average retailer, too high; but with the market in the condition that it is, the growers seem to have no difficulty in obtaining the figures that they ask. Lilies and callas are receiving a good call, and with the scarcity of other flowers that are ordinarily used for funeral work, many are used for that purpose. Sweet peas are a little more plentiful and some fine long stemmed flowers are seen, but even these show the effect of the dark weather in the lack of color. Lily of the valley of fine quality can be found and the prices remain firm. Violets are getting quite plentiful and large

## "The Busiest House in Chicago"

We are receiving a fine line of Tulips, single and double Daffodils, besides everything else in the cut flower line.

### J. B. DEAMUD CO.

Long Distance Phone  
Central 3155.

51 Wabash Ave., CHICAGO

shipments are received. Bulbous stock is now coming in quantity and there are plenty of tulips, narcissus and hyacinths. Many of the bulb growers are complaining of the quality of the blooms that they are getting, some of the growers saying that but few of the blooms are of first quality, in some cases not more than fifteen per cent are A 1, the balance being seconds. This being especially true of Von Sion narcissus and tulips, the tulips not being well formed and the Von Sions having split and uneven flowers, and beside, they were unusually late in coming into bloom. Paper Whites are still in good quantity and help out the cheaper grades of work. Cattleyas are arriving in quantity enough to meet all demands and the prices are such that they can be used in the better work. Snapdragons, marguerites, freesia, calendulas and lilacs are of good quality and the supply is fair. Asparagus meets with a good demand, and the new crop is being marketed by some, although still a little soft. Hardy greens are of good

quality but the price has advanced and is firm.

#### NOTES.

When we visited the Kennicott Bros. Co.'s store on February 20, the manager handed us a letter which he had received from a prominent florist in Grand Haven, Mich., in which the writer stated that he read in one of the trade papers that his brother, G. H. Pieser, was interested in the new wholesale house and wanted to know if he (E. E. Pieser) was also interested in the new concern. We wish to state in behalf of Mr. Pieser that no member of this firm is interested in the new wholesale house and that the G. H. Pieser mentioned is a nephew, and not a brother of the manager, as so many seem to believe.

Weiland & Risch received word from a customer in Douglas, Wyo., that the roses which they ship them every Saturday arrive in good condition after being on the road for four days. This is due, no doubt, to the quality of the stock and the manner in which they are packed.

**POEHLMANN'S FANCY VALLEY  
EXTRA FINE HARRISII LILIES**

We make these a specialty.  
Can supply them all the year.  
Once tried you will have no other

Manager Pyfer of the Chicago Carnation Co., says they have already booked a large number of orders for rooted carnation cuttings for delivery March 1. The demand for rooted cuttings this year has been exceedingly heavy, and, from the present outlook, it seems as if there will not be enough to fill the demand. Most of the growers placed their orders early, and have already received their cuttings.

Albert A. Sawyer is making preparations for the first sowing of aster seed which is usually made in February. The pansies, another specialty, have come through thus far in good shape.

John Kruchten is filling a large number of orders for a choice grade of gardenias, which are now included in his daily receipts.

Henry Van Gelder, of Percy Jones', has received five different offers for space on the second floor of the building they now occupy, from parties not

interested in the florist business. Mr. Van Gelder takes possession of the place May 1, but as yet has not accepted any of the offers.

Vaughan & Sperry are showing a splendid assortment of bulbous stock of all kinds as well as a large quantity of eupatorium of extra fine quality. This firm is enjoying exceptionally good business and Sunday proved to be a very busy day for the shipping trade.

The Fraternal Order of Eagles of Gross Point, of which N. P. Miller is a member, intend to erect a \$7,000 club house the coming year. The club consists of only 100 members and was organized two years ago.

E. H. Hunt is offering for sale a large quantity of potted shamrocks for the St. Patrick's day sales. A large quantity of carnations and lilies of good quality are the chief offerings at this store this week.

**U S Budlong's  
E Blue Ribbon Valley.**

George Propps, with George Perdikas, corner of Dearborn street and Jackson boulevard, returned from Boston, Mass., where he spent the past few weeks visiting an uncle, who has been seriously ill.

Zech & Mann are receiving a large supply of carnations in all the leading varieties and some splendid blooms can be seen at the store this week.

George Fisher will leave February 18 for Kalamazoo, Mich., on a business and pleasure trip combined.

# VAUGHAN & SPERRY

LONG DISTANCE PHONE  
CENTRAL 2571

52-54 Wabash Ave., CHICAGO.

W. S. Garland is another of the prosperous growers in this vicinity who will enlarge his plant this spring. A new house 27x250 feet will be built and an addition made to one of the others. Mr. Garland grows a large number of carnations which he consigns to one of the leading wholesale houses in Chicago. The plants are in splendid condition and some splendid blooms of Enchantress, White Enchantress and Rose Pink Enchantress are shipped daily to this city. The proprietor speaks very highly of the Evans Challenge ventilators, which are installed here, and says they run so smoothly that a child can operate them.

Frank Garland will in the near future rebuild one of his greenhouses and equip it with Garland gutters that have been in use here for 20 years. The gutters are in very good condition and will, as one of the employees says, "last a century." Mr. Garland grows a large quantity of roses, carnations and bulbous stock which is all consigned to the local market. The employees at present are very busy grafting Killarney and White Killarney roses.

Miss A. G. Sawyer, of the Pansy Garden Flower Shop, 4042 West Madison street, is meeting with such success in her business that continued extension is necessary and more space has been added recently for plants and general store purposes. A balcony has been installed for the storage of supplies.

John Muir returned February 19, from a ten days' stay at West Baden, Ind. Mr. Muir says it was quite a change to be back in the Windy City, after spending some time in that famous resort, where the thermometer registered 60 and 70° above zero.

J. A. Budlong is indeed fortunate in having a much heavier crop on at

Phone Central 3373.

35-37 Randolph St., CHICAGO

present than for some time past, as they are enabled to fill all orders, the supply of roses and carnations is much larger than is seen at most of the other places.

The Phoenix Nursery Co., of Bloomington, Ill., are sending out their spring catalogue, which seems to be well distributed among the wholesale florists in the local market.

Kyle & Foerster's chief offering this week is a splendid grade of Killarney roses which are sold at an early hour. The violets that this firm is receiving are of good quality.

Wietor Bros. are cutting a good supply of carnations, American Beauties and other roses, which are of their usual good quality.

## U S Budlong's E Blue Ribbon Valley.

The E. C. Amling Co. is offering a splendid grade of sweet peas and a large quantity of bulbous stock of all kinds.

E. E. Pieser and wife will leave March 6 for West Baden, Ind., where they will remain for a few weeks.

# CARNATIONS ROSES BEAUTIES

We are cutting a splendid grade of **Carnations** in all the leading varieties, and are now prepared to fill all orders.

**PETER REINBERG,** <sup>35</sup> Randolph St., **Chicago**

Bassett & Washburn are cutting from 500 to 1,000 lilies a day of extra fine quality. Business has been very good and the demand for red roses for Washington's birthday was exceedingly heavy. The rose crop has not been as forward as was expected, but a heavy cut of American Beauties and other roses is looked for by the first of the week. Mr. Washburn informs us that a number of pussy-willows were gathered in the woods near Hinsdale on Sunday which is the earliest that he remembers since he has made his home there. A carbuncle, which may possibly be a reminiscence of Champaign, has been a source of annoyance to him the past few days.

Upon the tenth anniversary of their wedding day, February 20, H. W. Rogers, the well known salesman at Weiland & Risch's store, and his wife entertained 16 couples at their home, 4425 Prairie avenue, and were the recipients of many beautiful presents. The evening was spent playing cards and dancing. Prof. C. H. Hamilton of the Chicago University entertained the party with musical selections. Luncheon was served and all participated in an enjoyable evening.

At the Peter Reinberg greenhouses the propagating and potting is keeping all hands busy. The American Beauty propagation this year has been very successful, for notwithstanding this rose is difficult to root, Foreman George Collins states that they are getting 90 per cent of those placed in the sand. The roses are in fine condition with good crops in sight.

Mrs. K. N. Cooper, the genial manager of the Auburndale Goldfish Co., 920 West Randolph street, is very busy preparing the new catalogue which will be placed in the printers' hand as soon as completed.

W. L. Sullivan, with the Woodlawn Floral Shop, 863 East Sixty-third

The Foley Manufacturing Co. will furnish the material for the new range of 11 houses for George Weiland of Evanston which will be equipped with Foley steel gutters. This firm has also booked an order for a carload of greenhouse material for Tracey & Co. of Bozeman, Mont., and a similar order for Trimmer & Son of Denver, Colo.

Poehlmann Bros. Co. is now receiving a fine line of bulb stock. Some very handsome Kalzerkroon tulips and Golden Spur narcissus are coming in large quantities. The sweet peas are bearing very heavily now and are of exceptionally good quality. A fine lot of cattleyas are also daily arrivals.

F. H. Henry of Henry & Lee of New York, during his stay in this city visited the Bassett & Washburn greenhouses at Hinsdale and took several photographs of the lily houses which are now in full bloom.

The Chicago Rose Co. is filling a number of orders for a choice grade of sweet peas and hyacinths. Joseph Kocha has accepted a position with this firm and entered upon his duties last week.

Victor Bergmann, with the Ernst Wienhoeber Floral Co., is the proud papa of a baby boy which was born on the morning of February 21.

Buchbinder Bros., manufacturers and dealers in store and office fixtures,

have placed a large sign 3x13 feet over the main entrance of their store at 713 Milwaukee avenue.

E. H. Cushman of Sylvania, O.; C. E. Schaefer of La Crosse, Wis., and F. Manke of Milwaukee, visited the greenhouses of the Chicago Carnation Co. at Joliet the past week.

Hoerber Bros. are supplying their customers with a splendid grade of Killarney, Richmond and Bride roses. The carnations that this firm is cutting are of extra fine quality.

John Welsh, Jr., is enjoying a brisk business at his store on Evanston avenue and Montrose boulevard which was opened a few months ago.

The American Metal Box Co., successors to the Illinois Heater and Manufacturing Co., is now comfortably located in their new store at 33 Dearborn street. This firm manufactures window, veranda, and lawn boxes equipped with their patented self-watering device. C. A. Woolley, the secretary, has just completed the new catalogue which is now in the hands of the printer and will be ready for distribution very shortly. Any florist desiring a copy can obtain one by sending their name and address.

The presentation of the drama, "The Rosary," by the St. Francis Dramatic Club at St. Francis' Hall February 19, was a great success, and Miss Martha C. Guntenberg, who played the character of the leading role, has been heartily congratulated by her many friends for the excellent manner in which she fulfilled her part. A large number of the trade were present, prominent in one of the boxes being a well-known employee of O. J. Friedman.

At a meeting of the Horticultural Society, February 21, reports of the officers were presented and the executive committee was given authority to arrange for an exhibition next fall if that course is considered expedient. The election of officers was deferred until April. There was some talk of a June rose show and a committee was appointed to investigate and advise in the matter.

C. L. Sherer, the representative of the Wells-Fargo Express company, on February 20 accidentally slipped while going up the stairs leading to the Bassett & Washburn store and but for the timely arrival of John Horstman would have met with serious injury, for he was falling head-first down the

long flight of stairs and was unconscious when picked up.

The regular meeting of the Florists' Club will be held at the Union Restaurant next Thursday, March 2, at 8 p. m. This will be rose and carnation night, and exhibits for the new varieties should be shipped to A. T. Pyfer, 35 Randolph street.

Chas. W. McKellar has acquired the agency for a metal adjustable twine holder that is meeting with the favor of the trade, as it holds any size of spool and is just what the florist needs.

Vaughan's Seed Store is taking in a large shipment of cecus stems and a car of caladium bulbs this week.

C. L. Washburn will celebrate another birthday anniversary next Monday, February 27.

Frank Kadlec is in the Evanston hospital for an operation.

Visitors: S. W. Coggan, Battle Creek, Mich.; C. E. Schaefer of the La Crosse Floral Co., La Crosse, Wis.; F. Manke of Manke Bros., Milwaukee, Wis.

## Boston.

### ZERO WEATHER.

Another week of almost sunless weather has passed. One and a half rain sun was the record for the week, rain, snow and zero weather mixed in. Greater Boston experienced temperatures from 0° to 14° below. Roses have not as yet got into their stage of blooming fast. Firing night and day does not produce the goods like Old Sol. White roses are the scarcest article—funeral work seems to have taken up the supply, there having been a great number of deaths here lately. There is no scarcity of other material. Gardenias, that used to be the star of the zenith, are jostled along beside the plebeian carnation and violet. Business is not rushing. The views of various salesmen make the conclusion that with the event of good spring-like weather there would likely be a big slump. What is coming in goes out fairly well, but with the market in the present condition any increase would be bad. If the florists had got flowers on the free list to Canada what a boon it would have been to Boston. In times of overproduction there would have been an avenue for a big shipment of the surplus of good stock. The Weeks Forestry bill just passed will please a great many of our millionaire florists, who spend their summer vacations among the waving spruce and pines of the White Mountains, but I hope if the bill carries appropriations for inspectors for forests, that men will be employed who know a spruce from a scrub oak. The various retail stores are taking on a spring-like appearance, which reminds us again of the welcome robin. Cinerarias and other spring plants are making their debut. There are tulips coming in which wear the look of a child reared in a city tenement house. It would be much better to have them a few weeks later, and have the flowers as nature intended they should look, considering the cost of the bulbs, water, heat, care and all the other incidentals. I cannot see that there is a fortune in them. The National Show here is causing favorable comment. I hope we will have roses enough to make a record showing. Now that the carnation show and the rose show are to be held the same week, why wouldn't it be possible to have them together each year, with the advent of so many new roses, both would be a greater attraction than one.

### NOTES.

At Welch Bros. we saw a nice shipment from Joseph Fuller, Leominster,

Laurel Wreaths, 10-inch, \$1.75 per doz.; 12-inch, \$2.25 per doz.; 14-inch, \$3.00 per doz.; 16-inch, \$4.50 per doz. Laurel Trimming, 4 and 5c per yard.

of acacia pubescens, in long sprays. The old Lawson carnation as grown by him is as good as the Lawson of former years. Good American Beauties are in the diamond class, but a shipment of the above flowers received by Welch Bros. from one of their growers would make many of our growers walk miles to see how it is done. Their orchids, Odontoglossum crispum, Lycaste Skinnerii and Dendrobium Wardianum are fine.

Edward Winkler of Woburn is making an extension to his already growing plant. It is wonderful what grit and perseverance can do for a young man if he starts right.

H. M. Robinson & Co. handle an extra fine grade of lily of the valley, and their Killarney roses and gardenias are good.

The violets grown by Charles Cummings of Woburn are certainly of high-class order.

Visitors: F. R. Pierson, Tarrytown, N. Y. MAC.

WOODSTOCK, CONN.—Frank H. Miller is erecting a large greenhouse.

## New York.

## POOR WEATHER CONDITIONS.

The weather we are having is not conducive to good growing conditions, nor to the best of business conditions; too much wet and slush and too little sunshine. A very severe snowstorm struck us early Monday morning, seriously impeding all traffic. Roses are anything but plentiful, and they continue high-priced on that account. All varieties seem to be about alike, though the two kinds possibly in shortest supply are Richmond and American Beauty. The demand for carnations is falling off materially and prices are weakening. This, we believe, is not so much owing to an increase in the supply, but more owing to the vast quantities of bulbous flowers that are beginning to pour into the market, and which, naturally, come quite a little cheaper than has been the rule for some time now, with carnations. Tulips, in all the popular colors, are getting very plentiful, and while a fair price can yet be obtained for some of the special pink sorts, the rank and file are undergoing a general reduction in values. None of the narcissus family have got very crowded as yet, consequently prices remain about as they were last week. Roman hyacinths are getting a bit more numerous, and clearances are more difficult with slightly lower averages. Lilies are still selling fairly well as also are callas and lily of the valley. Freesia, when long-stemmed, goes all right; the short stock is at a great disadvantage because there is plenty of the other to be had. Sweet peas, when good, sell at a slight advance in price is noted. Violets are doing a little better than has been the rule for some weeks; the supply seems to have shortened up to some extent. The best grade blooms of cattleyas can be disposed of satisfactorily, but the smaller and inferior blooms, and they are in the majority, are quite a hard proposition, and the quantity required is the chief element in fixing the price. Single white stocks are coming in in quantity, but they do not seem much in demand. Asparagus continues to clear out well, and often strings are cut up to make bunches of sprays. Smilax is plentiful and does not clear out satisfactorily.

## NOTES.

Circulars are being received among the trade announcing a ball at the Amsterdam Opera House April 23, under the auspices of a natural and artificial flower association. The circular also requests that men in the trade join a committee, the object of which is to make arrangements for a grand natural and artificial flower exposition in Madison Square Garden, some time next fall.

Chas. Smith, a grower of Woodside, L. I., who also sells his own flowers in the Cut Flower Exchange, has leased the greenhouses of the late Wm. Amos estate, and will run them in conjunction with his own, which are adjoining. The combined glass area of the two establishments gives Mr. Smith a total of 70,000 square feet. The entire place will be devoted to cut flowers.

The bowling match which took place in the alleys of the New York team February 17 between New York and Rutherford, N. J., resulted in a victory for the home team, they winning two straight games, making the playing of the third game unnecessary. Chadwick of the New Yorkers made 225 in one of the games.

C. A. Schaffer, who for some time has been located with H. Nelson, 57 West Twenty-sixth street, selling his own products, is now with A. Moltz & Co., of the same address.

Paul and Henry Dilledouze are back from their Porto Rican trip. Souvenirs in the form of real Panama

hats were brought back and presented to some of their friends.

At the funeral services of J. F. McConnell February 19, many members of the craft were present and there was an abundance of beautiful floral offerings.

Chas. H. Totty, Madison, N. J., has been at Cornell University, where he gave a lecture on the practical side of growing, to students.

The plant auction sales are scheduled to commence about March 14, one of the sure signs that spring is approaching.

Washington's birthday was generally observed as a holiday throughout the city.

Visitor: W. H. Grever of Palmer's staff, Buffalo, N. Y.,

## Washington.

## BUSINESS ENCOURAGING.

The condition of business during the past week, relating to the retail trade, was decidedly encouraging and there was an abundance of good stock. The retailers are supplied from various sources. Some of them are extensive growers as well as retailers, while others buy wherever they can secure good stock under the most favorable conditions. Many good roses and carnations are sent here from New York and Philadelphia, but several of the local growers are at present showing excellent stock, not only in cut flowers, but in such plants as azaleas, rhododendrons, lilac and primroses. Both white and purple lilac is on the market in fair quantity. While the plants of lilac are taken to the retail stores, they are as a rule, broken up and the flowers used in various decorative or design work. The tulips and narcissus are now very abundant, many of both being attractively displayed in flats and cut as occasion requires. Violets seem to be the most plentiful stock on the market. On Saturday, February 18, we noticed quite a number of Afro-Americans peddling them on street corners. There is here a good local supply of single violets and they seem to go better in the leading stores than the double varieties that have been shipped a long distance. There are plenty of good orchids and gardenias; very noteworthy in gardenias, being the output of the range of Gude Bros. Co. During the past week there has been many very fine decorations for dinners and luncheons calling for a large amount of good stock.

## NOTES.

George H. Cooke executed a very notable wedding decoration on February 18, the occasion being the marriage of Miss Carrie Louise Munn of this city to Reginald Boardman of Boston. St. John's Church, where the ceremony was performed by the Bishop of Washington and Rev. Roland C. Smith, was very beautifully decorated with lilies, palms and smilax, being also appropriately used. There was also most artistic decoration at the home of the bride's mother, where the reception was held, where a great variety of choice flowers were used. Mr. Cooke and his entire force have of late been very busy with decorations for dinners and luncheons.

Among the many decorations which J. H. Small & Sons have been called upon to execute this month, a very fine one was at the New Willard Hotel on February 16, when Secretary of Agriculture Wilson entertained the President and Mrs. Taft and a select company. The finest roses and carnations, very artistically arranged with asparagus plumosus nanus, formed the leading features of the decorations.

All the Washington retailers are enthusiastic over the fine gardenias that are coming in from the range of Gude Bros. Co. This firm now cuts sev-

eral hundred per day and some of the largest blooms range from four to five inches in diameter. In addition to these, they have their usual supply of American Beauty roses and all other cut stocks.

Harry R. McCabe, son of M. J. McCabe, the well known grower and dealer, was 17 years old on February 11. In honor of the event his parents gave a party to which a large company of young folks were invited. There was dancing and general merrymaking and in addition an abundance of good things to eat.

O. A. C. Oehmle, decorator for Gude Bros. Co., and secretary of the Florists' Club, was recently so unfortunate as to have one of his wrists fractured. He was "cranking up" the automobile when something slipped and he received a hard blow.

J. R. Freeman, who is a specialist in lily of the valley, is offering very fine stock neatly arranged in pans. His store is also headquarters for the best lines of narcissus and tulips.

Z. D. Blackstone had a fine line and was well equipped for filling orders.

At both of F. H. Kramer's stores there was abundant evidence of business.

Leapley & Myer had a very attractive display and their business was good.

Geo. C. Shaffer had a splendid stock and a great run of trade. A. F. F.

MORE BLIZZARDS AND RAIN.

The past week has been a repetition of the previous one as to the weather, more blizzards and more rain. Tuesday being St. Valentine's day the florist naturally used his best endeavors to have a choice stock for the occasion and succeeded, but such a day! it was a mixture of everything but sunshine. Notwithstanding the bad day trade was good, but not what it would have been had the day been bright and clear. Violets, lily of the valley and orchids found ready sale for corsages, while carnations, roses, daffodils, lilac, etc., in prettily arranged boxes, artistically decorated with hearts, cupid's darts, etc., were sent as gifts. Palmer, Anderson, Stafford and the Lenox Flower Shop had very attractive windows for Lincoln's birthday and Valentine's day. Palmer's window at the lower store being very beautiful. As is well known hearts are always very prominent on February 14. They were in different sizes, some gold in color, others red, one flower shop having some of the larger ones hanging in an unused ice box, were mistaken by a customer, either in jest or earnest, they asked the salesman how much he charged for "Liver." "Hi, there!" he said to another party, "they think they are funny but it is no laughing matter."

### NOTES.

John Schweichler of North Tonawanda has grown another two inches. It is a "boy." He has a child for every day in the week now. Should the infant get his days and nights twisted it will greatly aid John to keep awake and do his night firing.

Schwerdt & Berner, located at Forks, are very much pleased with the looks of their Easter stock. Mr. Schwerdt says it means a busy spring for them. Easter coming so late makes it hard to get their immense stock of bedding plants ready for their trade.

Thursday will be a lively one, as the Buffalo florists will have as their guests the Rochester florists, when the different clubs will each have a team of five men to bowl a friendly match.

Paul Berckowitz of H. Bayersdorfer & Co., Philadelphia, was a visitor last week, accompanied by Mrs. Berckowitz. They were on a pleasure trip.

W. H. Grever, of Palmer's, is in New York partly for pleasure and also in the interests of the Every Ready Pot Cover Co.

L. H. Neubeck has a fine lot of lilies at his Williamsville greenhouses.

S. A. Anderson was in Rochester last week.

BISON.

ALBANY, N. Y.—The banquet of the Albany Florists' Club will be held March 2.

E. A. BEAVEN,

Evergreen, Ala.

Nashville.

The floral trade in this city was given quite a boost by St. Valentine's day and the leading florists report a better trade than at any previous time. The supply of flowers was abundant, except possibly roses, which have been off crop for some little time. Violets, the Valentine flower, were in abundance; they are blooming in the open now, but such violets labor under the disadvantage of having very short stems, the glass-grown being much more desirable. The trade in potted plants was phenomenal and the supply superb. Carnations were in fine form, while mignonette, snapdragons, allysum, swainsonia, added a beauty to the larger and more pretentious flowers, and were used in making up valentine boxes. Lilies have been plentiful all winter and as funeral work has held up well have been in great demand, and served for decorative purposes for festive occasions. The spring-like weather of February brought out not only the violets but the Von Sion and Trumpet Major narcissus as well. Spring vegetation is well advanced, much ahead of former seasons.

Geny Bros. cut 15,000 violets from their pits for St. Valentine's day.

The Joy Floral Co. had a beautiful and attractive valentine window.

**FRANK F. CRUMP,**

Wholesale and Retail Florist.

Columbus, O.

At a meeting of the florists held February 7 at the Chittenden hotel the trade was well represented, there being at least 75 present, and it was decided to form an organization to be known as the Columbus Florist Association for the purpose of holding a chrysanthemum show the coming fall. A constitution was adopted and the following officers elected: H. M. Munk, president; J. Underwood, secretary; F. C. Viereck, corresponding secretary; Gus. Ackerman, treasurer; H. W. Kropp, Paul Halbrook, C. Roth, O. Munk, Ormonde Grice and C. Jones, executive committee. The membership fee was fixed at \$2.00, and any one who has contributed more than that amount to the guarantee fund, the same shall be deducted for the membership fee. The fund has reached the amount of \$301. Memorial hall, one of the finest in this section of the country for such a purpose, can be secured for a nominal sum. A meeting of the executive committee and board of directors will be held, when the committees provided for by the constitution will be appointed. The show will probably be held November 13, 1911.

## The Seed Trade.

### American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Durrea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.  
Annual convention at Milwaukee, Wis., June 20-22, 1911.

WITH the decline in jobbing prices on onion sets, buyers develop a "welching" tendency.

IN general the mail seed trade houses report the early winter trade slower than usual.

SHORTAGES so positive that jobbers are scarcely quoting: Turnip, carrot, Mammoth White Cory sweet corn, spinach and some celeries.

CHICAGO.—Prices on the board of trade February 22 for grass seed were noted as follows: Timothy, \$10.50 to \$12 per 100 pounds. White clover, from \$22 to \$30.

LILIUM MULTIFLORUM fields in Japan are, it is said, being more thoroughly rogued and a more satisfactory stock can be expected in the future. We shall want to be shown.

LILIUM HARRISII has done better than usual this season, but some growers complain of blighting of the flower buds on strong, full-grown stalks; cause unknown, mites suspected.

ENGLAND uses one-third of all Japan lily bulbs exported. The coming crop of L. giganteum is estimated 10 to 15 per cent larger than in 1910. England is well supplied with cold storage lily bulbs for forcing but there is a shortage of the 7-9 size in America.

NEW YORK.—A. R. Kennedy, of Kennedy & Hunter, is just recovering from the effects of a dislocated arm sustained while boarding a trolley car two weeks ago.—C. W. Scott, of the Yokohama Nursery Co., is back from an extended western trip.—Although there is no great rush so far, business generally is on the increase.

VISITED CHICAGO: John C. Bodger, of John Bodger & Sons Co., Los Angeles, Calif.; Fred H. Hunter, of the German Seed & Plant Co., Los Angeles, Calif.; Frank H. Henry, of Henry & Lee, New York; J. S. Michael, representing the Sioux City Seed & Nursery Co., Sioux City, Ia.; J. W. Edmundson, representing the Braslan Seed Growers Co., San Jose, Calif.

### Onion Seed Industry in the South.

The exports of onion seed from the Canary Island to the United States during the year 1910 declined approximately 35 per cent as compared with the quantity exported in 1909, according to Vice-Consul Ross J. Hazeltine of Tenerife.

The declared exports from the island of Tenerife during the past three years have been as follows:

|            | Pounds. | Value.   |
|------------|---------|----------|
| 1908 ..... | 25,570  | \$29,546 |
| 1909 ..... | 59,888  | 55,417   |
| 1910 ..... | 35,971  | 35,549   |

The exportation of onion seed from the Canary Islands to the United States began about 15 years ago, when a trial shipment of 30 pounds was consigned to a Philadelphia seed dealer. Since

The Late Edward L. Coy.  
See Obituary, Page 204.

then the exports have steadily increased, and with the decline of the drawn-work industry the trade in onion seed has become the most valuable item of export from these islands to the United States. Practically the entire crop is sold to the agriculturists and seed dealers in the southwestern part of the United States.

The year 1909 was the banner year as regards the quantity exported. The prevailing prices, however, were slightly lower than those of the preceding and present years. The American im-

porters purchased larger quantities than they could dispose of, with the result that the opening of the present season—July and August—found them with considerable quantities of old seed on hand. Consequently, contract orders for this season's crop were canceled and the export figures show a remarkable decrease.

The exports for the coming year should show an increase unless the reputation of the Canary onion seed has been injured in the United States by the mixture of old and new seed.

The quality of the Canary onion seed is unexcelled and the exporters maintain a high percentage of germination which is usually guaranteed. In order to protect the planter in the United States, as well as the reputation of seed, it has been suggested that the local exporters inclose in or stamp on the cases a written guaranty or statement as to the age of the seed contained therein, together with a certified statement as to the percentage of germination ascertained by actual test where this is possible. This course has been considered advisable for protecting the industry, owing to the fact that onion seed one year old shows only a small percentage of fertility.

The chief varieties exported from Tenerife are known as the Red Bermuda, White Bermuda, Crystal White Wax, and a few special varieties bearing the name of the exporter. The onions grown from these seeds in the United States are known in the market as large Bermudas. The average price of the seed per pound varies between 15 cents and \$1 f. o. b. Tenerife.

### Imports.

During the week ending January 28, imports were received at New York as follows:

Vaughan's Seed Store, 93 packages and one case seed, four cases plant wash.

J. M. Thorburn & Co., 48 bags seed. A. T. Boddington, 39 bags and two packages seed.

H. Frank Darrow, 33 bags and one barrel seed, 20 cases apple seedlings and one case plants.

Wheeler & Don, 32 bags seed. Henry Nungesser & Co., 22 bags seed.

McHutchison & Co., four cases trees and shrubs.

Peter Henderson & Co., three cases and two bags seed.

To others: 2,004 bags, 907 packages, 150 barrels, 20 sacks, 16 double bags, two cases and one box seed, 78 cases and eight packages plants, 45 cases and four packages trees, 23 cases and six packages bulbs.

## NEW RED DAHLIA MRS. MINNA BURGIE.

A cross between Joe Thomson and Clew or named by Mr. J. Burgie, of Fruitvale, Calif., and named after his wife Mrs. Minna Burgie, is the best Red Decorative Dahlia ever produced and will precede every other red variety now grown for cut flowers here or abroad and will draw your attention instantly when planted in a collection of dahlias: one of the most showy flowers ever created.

True decorative, bright scarlet, showing a darker shading in center, bold, erect flowers, 6 to 8 inches in diameter, with excellent stem; foliage remarkable substance; height 5 to 6 feet; good keeper and will not burn in hot weather and more freely blooming than either parent. This variety has been tested by me for three years and has shown no weak points. A vase of 50 blooms shown by me and a basket of Mrs. Minna Burgie Dahlias exhibited by Sievers Floral Co., of San Francisco, both received first prize in the Fall Flower Show in San Francisco and caused more comment among gardeners and visitors than any other exhibit. Cut flowers sold for the first time last year brought 50 per cent more than any other variety of dahlias, including Joe Thomson.

Strong tubers, \$1.00 each; \$9.00 per dozen.

**PAUL H. ECKELMANN,** San Rafael, Calif.

Detroit.

### GOOD ST. VALENTINE BUSINESS.

St. Valentine's day trade was very good and easily maintained the growing importance of this annual event to the florist business, which this year exceeded by far that of the same day a year ago, and in some cases the increase exceeded twenty-five per cent, and this, too, regardless of the most miserable weather that prevailed, and which must have deterred many from contributing to the volume of business actually transacted. It rained almost constantly the whole day, with accompanying high winds to add to the discomfort. Violets were probably in demand more than any other cut flower, though many roses and carnations as well as forget-me-nots and bulbous flowers were sold. The day before many plants were sold, the purchases seemingly being prompted by the spirit of the Valentine day. The supply of most items easily cared for the increased demand of the day, and no fancy prices were realized except for extraordinarily fine stock.

### CLUB MEETING.

The club meeting, February 20, brought out a good attendance to listen to the address of S. S. Skidelsky, on "The Drummer as a Factor in Horticulture." The essayist himself was unavoidably absent, but his paper was read by M. Bloy and was received most favorably. A resolution was unanimously adopted expressive of the club's appreciation of the author's valuable contribution, and a committee was appointed to convey to him the action of the club. A discussion of the paper followed to considerable length, many members participating, also the following travelers for horticultural establishments: J. J. Cairns, representing Henry A. Dreer, Philadelphia; A. Miller, representing S. S. Skidelsky and Irwin, Philadelphia; C. H. Twinn of the King Construction Company, North Tonawanda, N. Y.; and G. Oud, representing Mulder and Schoorl, Lisse, Holland. Our venerable ex-president, E. A. Scribner, who recently retired from the florist business, was made an honorary member amid much rejoicing. A few echoes of the report of the committee on trade paper reports at the last meeting added some life to the proceedings of the evening, which were cut short, due to the approaching late hour, for adjournment.

### NOTES.

E. A. Scribner has sold his business at 604 East Fort street to Robert W.

# Dreer's Snowball Double White Petunia

## Market Gardeners

### Greenhouse Vegetable Growers and Market Gardeners' Association.

B. L. Watts, State College, Pa., President;  
H. F. Hall, Grand Rapids, Mich., Vice-President;  
S. W. Serenace, 528 Illinois Life Building, Louisville, Ky., Secretary; M. L. Kutenik, Cleveland, O., Treasurer.  
Annual meeting at Boston, Mass., 1911.

BULLETIN No. 82 issued by the Department of Agriculture on "Insects injurious to truck crops," deals with the cucumber beetles and describes the different kinds which not only feed upon cucumbers but many other truck crops as well as flowering plants and orchards and contains biologic notes and observations and remedies.

### Prices of Indoor Fruits and Vegetables.

New York, February 18.—Mushrooms, 50 cents per pound; cucumbers, 20 cents each; lettuce, \$1 per dozen heads; tomatoes, 40 cents per pound; radishes, 85 cents per dozen bunches; asparagus, \$7 per dozen bunches; rhubarb, \$1.25 per dozen bunches; grapes, \$1 per pound; beans, 25 cents per quart; peas, 35 cents per quart.  
Chicago, February 20.—Mushrooms, 20 cents per pound; cucumbers, \$1.75 to \$2.00 per box, small; lettuce, 30 cents per pound; radishes, 10 cents to 40 cents per dozen bunches; rhubarb, 25 cents to 35 cents per dozen bunches.

### Tuxedo Horticultural Society.

This society held a meeting February 8 with President Miller in the chair. It was customary, he said, for a newly elected president to deliver an address, but he felt sure that they were more eager to participate in the bowling match, which was to follow the meeting, than to listen to a lengthy speech. However, he would take this opportunity to thank them all for the honor of electing him president, and assure them that he would do everything in his power for the welfare of the society. He spoke very highly of the officers elected with him. With such an energetic government and the renewed interest shown, was ample proof that the society was in a flourishing condition. The alteration in the by-laws admitting assistant gardeners free of initiation was passed. The executive committee reported that James Scott, of Elmsford, would deliver an address at the meeting March 1. It was agreed to have an exhibition of reasonable flowers at the same time. Twelve were elected to membership in the society. They are as follows: Associate, C. B. Oram, H. M. MacLachlin, R. Pringle; head gardeners, George Thomson, William Noonan, Alphonse Anthelot; assistant, Alfred E. Townsend, Hugh Lyons, Wm. Sturrock, E. Bartt, Geo. Pulin, Thomas Henderson. An enjoyable evening was spent in bowling.

ALBERT FISCHER, Secy.

### Westchester and Fairfield Hort. Society.

The regular monthly meeting of the society was held in Royal Arcanum Hall, Stamford, Conn., February 10, with President James Stuart in the chair, having an attendance of sixty members, this making a good showing and giving proof that the society will flourish. The main topic of the meeting was the establishing of the by-laws as presented by the executive committee, with few changes.

One of the most interesting features was the worthy exhibits. Scott Bros., Elmsford, N. Y., were awarded a certificate of merit for a vase of their

scarlet carnation William Eccles, a cross between Victory and Beacon, fully as large as Beacon, and much fuller in the center than Victory, a rich glowing scarlet color, and has the perfume of the clove carnation. The stems are long, holding the flower perfectly erect. A Broschke, gardener to Wm. Ziegler, Noroton, Conn., was awarded a certificate of merit for a plant of oncidium splendendum. A vote of thanks was accorded to James Atchison, gardener to M. J. Borg, Stamford, Conn., for three plants of cineraria hybrid, and to James Stuart, gardener to Mrs. F. A. Constable, Mamaroneck, N. Y., for a vase of carnations May Day. The next regular monthly meeting will be held at 8 p. m. March 10.

MARTIN M. BENEDEK, Sec'y.

### Syracuse, N. Y.

Local dealers report unusually heavy sales during the past week, the stimulus being attributed to St. Valentine's Day. Roses and carnations seemed to be most popular. Violets this year, one dealer said, to be properly in the Valentine class, were packed in the new fiber baskets, the lid being fastened with a big violet and green gauze bow. "I do not know why," said one of P. R. Quinlan's men, "but the average man likes to see ribbon decorations as well as the average woman."

Rev. Dr. Edmund M. Mills has been elected president of the newly organized Syracuse Rose Society. Other officers are: First vice-president, James M. Gilbert; second vice-president, J. D. Pennock; third vice-president, Mrs. Frank H. Hiscock; fourth vice-president, Mrs. F. R. Hazard; fifth vice-president, Mrs. Robert Dey; recording secretary, Earl A. Bates; treasurer, George E. Thorpe; executive committee, Sam T. Betts, David Campbell, John W. Menelly and Frank E. Ainslee. The organization starts with a membership of one hundred. The basis of membership is made so broad that it embraces all cultivators and lovers of flowers in this city and vicinity. All the officers are prominent in Syracuse. Regular meetings will be held the second Tuesday of each month. The first of the series of three exhibitions to be given by the society will be the rose fair at the State Armory next June.

A. V. B.

### Cleveland.

#### STOCK SHORT OF THE DEMAND.

There is very little change in the conditions. Stock of all kinds is short of the demand, with the exception of bulbous flowers, of which there seems to be plenty of all grades and varieties. The past week has been dark and wet with very little sunshine. Lilies and callas are plentiful and sell readily. Lily of the valley and violets of exceptionally good quality are selling well. Adiantum is rather short and asparagus is cleaning up quickly.

Watch for our Trade Mark stamped on every brick of Lambert's

### Pure Culture Mushroom Spaw

Substitution of cheaper grades is thus easily exposed. Fresh sample brick, with illustrated book, mailed postpaid by manufacturers upon receipt of 40 cents in postage. Address

Trade Mark. American Spawn Co., St. Paul, Minn.

smilax being not much in demand. Boxwood is selling well and the quality is of the best. Roses, especially are short, pink and white for funeral work are very short, at no time since Christmas has there been a sufficient supply to fill the orders. Beauties are off crop as yet, as are Richmond roses. Carnations remain about the same, as to price and quality, with not enough to go around. Sweet peas have been short of the call. Freesia of good quality is coming in.

#### NOTES.

Hammell Bros. have opened a retail store at 1525 Woodland avenue, near East Fifty-fifth street. They will do a general cut flower business.

Chas. A. Woodman, of the Cleveland Florists' exchange, has been on the sick list for a few days the past week.

Miss Nettie Heideman entertained a number of girl friends at her home on Decker avenue Saturday afternoon and evening. This was a George Washington party and all declared they had spent a most enjoyable time. C. F. B.

PEEKSKILL, N. Y.—Fully one thousand persons visited the opening of the new flower store of C. E. Haines & Co. in the Wolff building, every visitor receiving a floral souvenir. The firm has a branch at Mt. Kisco and greenhouses and nursery at Bedford, and are at present constructing a new greenhouse.

## A Grand New Carnation Bright Spot

Outclasses everything heretofore grown in the dark pink class.

Won first honors in the 100 class for the best dark pink at the A. C. S. meeting, Pittsburg, January 1910, also at the Chicago Flower show, November, 1909.

It is a pure bright dark pink of even shade, size  $3\frac{1}{2}$  inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

## The Nursery Trade

American Association of Nurserymen

W. P. Stark, Louisiana, Mo., President;  
E. S. Welch, Shenandoah, Ia., Vice-Presi-  
dent; John Hall, Rochester, N. Y., Sec'y.  
Thirty-sixth annual convention to be held  
at St. Louis, Mo., June 14-16, 1911.

VISITED CHICAGO: Martin Kohan-  
kie, Painesville, O.

THOMASVILLE, GA.—At the annual  
meeting of the Georgia State Horti-  
cultural Society, R. C. Berckmans, son  
of the late P. J. Berckmans, the only  
president the society has had since its  
organization in 1876, was elected presi-  
dent of the organization.

### American Pomological Society.

The thirty-second biennial meet-  
ing of this society was held at Tampa,  
Fla., February 9-11 and was most suc-  
cessful in every respect. The attend-  
ance was much larger than the last  
meeting at St. Catharines, Ont., and  
the programme was crowded with  
items of interest during each session.  
Delegates from twenty-six horticultu-  
ral organizations were present and  
twenty-five states represented. Ex-  
cursions were provided to the leading  
orange and grape fruit regions in the  
vicinity and to the famous Tarpon  
Springs sponge industry by the Tampa  
board of trade and the Florida State  
Horticultural Society. The following  
officers were elected: L. A. Goodman,  
Kansas City, president; G. L. Taber,  
Glen Saint Mary, Florida, vice-presi-  
dent; John Craig, Ithaca, N. Y., secre-  
tary; L. R. Taft, Lansing, Mich., treas-  
urer; C. L. Watrous, Des Moines, Ia.,  
W. C. Barry, Rochester, N. Y., W. T.  
Macoun, Ottawa, Can., C. W. Garfield,  
Grand Rapids, Mich., and W. S. Hart,  
Hawks Park, Fla., executive commit-  
tee. Invitations were received from  
San Francisco, Portland, Chicago, St.  
Louis and Washington for the next  
meeting of the society, but the matter  
was referred to the executive commit-  
tee for later consideration. H. E. B.

### Nassau County Horticultural Society.

The regular monthly meeting of the  
Nassau County Horticultural Society was  
held in Pembroke hall, Glen Cove,  
L. I., February 27. President Treppes  
was in the chair and there was a good  
number present. A very hearty vote  
of thanks was accorded the dinner  
committee for the admirable way in  
which they performed their duties and  
made the affair such a success. A letter  
was read from the New York Florists'  
Club, asking the support of this  
society in their endeavor to procure  
an appropriation of \$50,000 from the  
legislature of New York, to erect  
greenhouses at Cornell for the advance-  
ment of horticulture. Mr. Ebel of  
the Apine Co., was elected to become  
an honorary member of the society.  
James Murray and Herman Butcher  
were elected to active membership.  
There was also one application for  
membership. A. MacKenzie and J.  
Livingstone and J. MacDonald were  
appointed judges of the monthly ex-  
hibits, and their decisions were as fol-  
lows: Pot of cyclamen, certificate of  
culture, H. Matz; Roman hyacinths,  
certificate of culture, J. Ingram; car-  
nations, Rose Pink Enchantress, hono-  
rable mention, J. Ingram; vase of mix-  
ed carnations, honorable mention, J.  
Ingram; for the society's prize, the  
awards were as follows: 12 pink car-  
nations, V. Cleres, first; 12 white car-  
nations, V. Cleres, first. There was  
also another competition for a book on  
carnations by C. W. Ward, which was  
presented by the Cottage Garden Nur-  
sery Co. for 25 carnations, Alma Ward.

It was won by Wm. Eccles, with a  
very fine vase of blooms. The Cottage  
Garden Nursery Co. exhibited a new  
carnation, a seedling of a light red  
color, which was awarded a certificate  
of merit. It was decided to hold a  
euchre and dance in Pembroke hall,  
February 27. It was also decided that  
at the March meeting the society's  
prize would be for cinerarias, cyclamen  
and stocks, one pot of each. The  
"Buds" Company of New York is pre-  
senting a silver cup for the best col-  
lection of spring flowering bulbs, which  
will also be competed for at the March  
meeting. The collection to consist of  
six varieties, 12 of each, lily of the  
valley to be excluded.

ERNEST WESTLAKE, Sec'y.

### Horticultural Society of New York.

A meeting of the society was held  
in the East Assembly Hall, American  
Museum of Natural History, February  
8. There was a good attendance, and  
those present listened to a lecture by  
George V. Nash on "Some Common  
Orchids and Roses," illustrated with  
colored lantern slides.

The special feature of this meeting  
was the inauguration of the monthly  
exhibitions. This exhibition was held  
in the West Assembly Hall. A de-  
cided success was scored and it is ex-  
pected this will lead to still more suc-  
cessful exhibitions during the coming  
months.

The schedule was planned to give  
non-commercial growers, gardeners and  
others interested in the growing of  
plants and flowers for pleasure, an op-  
portunity to exhibit where they would  
meet in competition only those of their  
own class. That this was appreciated  
by the gardeners was attested by their  
attendance.

The society is desirous of impress-  
ing upon gardeners and other plant-  
lovers, that here is an opportunity, in  
these monthly meetings, that has never  
before been theirs in this vicinity—an  
opportunity each month to exhibit  
plants and flowers.

The next exhibition and meeting will  
occur March 8. Announcement of the  
schedule will be made shortly.

The following is a list of the prize-  
winners at the exhibition held on Feb-  
ruary 8: Dendrobium plant in bloom,  
C. C. Moore, Hackensack, N. J. (John  
P. Mossman, gardener) first; Cyri-  
pedium plant in bloom, Miss M. T.  
Cockcroft, (Adam Patterson, gardener)  
first; plant of any other orchid in  
bloom, C. C. Moore, first; hybrid  
orchid plant in bloom, C. C. Moore,  
first; collection of cut orchids, C. C.

Moore, first; best vase of a new rose,  
not yet in commerce, The F. R. Plym-  
son Co., silver medal; three vases of  
roses, three kinds, 12 flowers of each,  
R. Delafeld, (Wm. Brock, gardener),  
first; vase of 12 Pink Killarney, Mrs. F.  
A. Constable, (James Stuart, gardener)  
first; vase of 12 White Killarney, Miss  
C. A. Bliss, (J. T. Burns, gardener)  
first; Mrs. F. A. Constable, second; vase  
of 12 Richmond, Mrs. F. A. Constable,  
first; vase of American Beauty roses,  
Chas. Stuart Smith, Jr., (Anthon Ped-  
erson, gardener) special; collection of  
orchids, Laker & Hurrell, special, sil-  
ver medal; dish of mushrooms, Miss C.  
A. Bliss, special; two vases of carna-  
tions, Miss C. A. Bliss, special; pot of  
lily of the valley, Miss C. A. Bliss,  
special; vase of Acacia longifolia, Mrs.  
F. A. Constable, special; collection of  
cut orchids, Julius Roehrs Co., special,  
bronze medal.

Hardy as a oak tree; canes grow 30 to 50 feet in one season;  
cropped in Michigan last season at rate of 1042 crates to the acre;  
wood never dies; crops from old wood as well as new every year;  
Blooms end of June; fruit ripe in August and September; fine for  
table dessert, pies, jam and jellies. Drop a card for our New Berry  
Book; it's free. Over 100,000 plants sold since Jan. 1, 1911.

Berrydale Experiment Gardens, Florist Avenue,  
HOLLAND, MICH.

# Roses for 1911

## Dark Pink Killarney.

A sport of Killarney, similar in habit, but more highly colored than Killarney at its best. When Killarney is pale, Dark Pink Killarney is bright and cheerful.

Grafted plants only, from 2½-inch pots.  
\$20.00 per 100; \$180.00 per 1000.

## Lady Cromwell.

A shell pink sport of My Maryland that for pleasing color is unsurpassed. A wonderful producer and a color that sells.

Grafted plants only, from 2½-inch pots.  
\$30.00 per 100; \$250.00 per 1000.

## Radiance.

Strong in growth and making plenty of stem. Cerise pink in color.

Grafted plants, \$18.00 per 100; \$150.00 per 1000  
Own root, 10.00 per 100; 90.00 per 1000

## Double Pink Killarney.

Originating with Robert Scott & Sons, who supply the wood for grafting. Stronger in growth than Killarney and with at least ten more petals. A wonderful improvement.

Grafted stock only.  
\$30.00 per 100; 250.00 per 1000.

## Mrs. Aaron Ward.

By far the most pleasing of the yellow roses now on the market. A general favorite, and classed as will be widely grown, for yellow roses are in demand.

Grafted plants, \$25.00 per 100; \$200.00 per 1000  
Own root, 12.00 per 100; 100.00 per 1000

## Melody.

We have reserved for our orders own root plants of this choice novelty. No grafted plants.  
From 2½-inch pots.

\$30.00 per 100; \$250.00 per 1000.

## Prince de Bulgarie

The best prices for cut flowers should be the standard for judging roses, and this rose has been the money getter. Strong and vigorous in growth, and with its beautiful shell pink bloom it has sold on sight. One of the best roses grown.

Grafted plants, \$30.00 per 100; \$180.00 per 1000  
Own root, 15.00 per 100; 120.00 per 1000

## Killarney, White Killarney, Richmond, My Maryland, Kaiserin Augusta Victoria.

These are the old standards, and we are headquarters for young stock.

Grafted plants \$15.00 per 100; \$120.00 per 1000  
Own root, 2½-in. 6.00 per 100; 50.00 per 1000

## ROOM! ROOM! ROOM!

We Want to Spread Out Our Extensive Easter Stock

Therefore we sell—just look!—a fine selection of Decorative Plants, such as Araucarias, Ferns, etc., at bargain prices. Such stock is always in demand.

## Araucarias

OUR SPECIALTY.

We are the largest importers of these lovely decorative plants, the *Araucaria Excelsa*, *Robusta Compacta* and *Glaucia*. 6,000 of the choicest last spring importation now ready for immediate shipment. It is of no use to look elsewhere for cheaper prices. We now control and will control the market of the *Araucarias* in the future.

*Araucaria Excelsa*, raised from top cuttings, no seedlings. Plants, 5½-6-7 in. pots, 15-18-20-25-30 in. high, 3-4-5-6 tiers, 2-3-4-5 years old, 50c, 60c, 75c, \$1.00, \$1.25 to \$1.50 each. We give big value for your money. Just think! An elephant, 6-in. pot, 4 years old, 4-5-6 tiers, 20-25 in. high, for only 60c to \$1.00; a jumbo, 6-in. pot, 5-year old, 25 in. and over, as wide as a bushel basket, 5-6 tiers for only \$1.00; and what do you think a holy tree, 30 in. and over, 5-6 tiers, worth \$200, for only \$1.25 to \$1.50.

*Robusta Compacta*, *Excelsa Glaucia*, 6 in. pots, \$1.00, \$1.25, \$1.50 to \$2.00 each.

We also have the nicest *Araucaria Robusta Compacta* and *Excelsa Glaucia*, a house full, for only \$1.25 to \$1.50, worth double.

*Adiantum Hybridum*, 6 in. pan, 25c to 30c.

*Asparagus Sprengeri*, 2½-in. 3c; 4-in., 10c.

*Spiraea Cladstone*, started, in 5½ to 6-in. pots, at 15c, 20c to 25c.

*Dracena Bruni*, 25 to 30 in. high, 6-in. pots, 40c to 50c. Highly recommended for store and house decoration; stands heat, cold and dust.

*Latania Borbonica* (Chinese Fan Palms), 30 to 35 in. high, 6 to 7 in. pots, 50c, 75c to \$1.00 each.

*Lilium Multiflorum*, our own importation from Japan, raised from 9-10 in. bulbs, started in 6-in. pots last October; have kept cold; now about 5 to 8 in. high, just right for Easter, 25c to 30c each, by the dozen or hundred.

*Ipomoea Noctiflorum*, our so well-known pure white, waxy Moonvine, bearing flowers very fragrant and as big as a saucer, 2½-in. pots, will make good stock for you to propagate from, \$5.00 per 100.

*Jerusalem Cherries*, big plants, with ripe, red berries, 6 in. pots. Look! only 25c, 35c to 50c each.

*Azalea Indica*, Easter forcing; *Vervaeana*, Professor Wolters, Empress of India, Schryveriana, double variegated 60c, 75c, \$1.00 to \$1.50; *Mme. Van der Cruysen*, Simon Mardner, pink; *Niobe*, white, Apollo, red, 60c, 75c, \$1.00, \$1.25 to \$1.50. In large plants we have *Niobe*, *Helena Thielman*, *Bernard Andreas Alba*, white, *Mme. Van der Cruysen*, and others, \$1.50, \$2.00 to \$2.50.

*Azalea Indica*, with buds advanced, showing colors, *Deutsche Perle*, *Vervaeana* and *Simon Mardner*, 60c, 75c, \$1.00 to \$1.25.

*Primula Chinenis*, mostly white, 5½-in., \$2.50 per doz.

*Kentia Forsteriana*, in fine shape, 6 in. pots, 30-35-40-45 in. high, 4-5-6 years old, 75c, \$1.00, \$1.25, \$1.50, \$2.00 to \$2.50 each.

*Kentia Belmoreana*, 30-35-40 in. high, 5-5½-6-7 in. pots, 5-6 years old, \$1.00, \$1.25, \$1.50 to \$2.00 each.

*Kentia Belmoreana*, combination plants, 25 to 30 in. high, made up of 3 plants, 6 to 7 in. pots, \$1.00, \$1.25, \$1.50 to \$2.00; 4-in., 20 in. high, 20c to 25c.

Our Ferns this year are exceptionally very fine *Boston*, *Scottii*, *Whitmani* and *Scholzii*, 5½ and 6-in., 35c, 40 and 50c; 7-in., large bushy plants, 75c to \$1.00. As big as a bushel basket, \$1.00 to \$1.25. Remember, all our Ferns are pot-grown, not lifted from benches.

*Neph. Glazrasi*, a new beautiful fern, an improvement on *Scottii*, much shorter and bushier than *Scottii*, 5¼ in. pots, 50c; 3-in. pots, 25c.

*Peris Wilsonii*, 3 large bushy plants in 6 in. pan, 30c to 35c per pan.

*Ferns for Dishes*, big assortment, 2½-in. pots, at \$4.00 per 100.

*Cineraria Grandiflora Hybrida*, Aschmann's so well-known superior strain, which brought as high as one dollar a plant wholesale last Easter. Now is the best time if you want good plants for Easter. We have a very large stock of 4-in., at \$10.00 per 100; 6-in., at 25c, 35c to 50c, just right for Easter blooming.

*Crimson Rambler Roses*, 6 in. pots, 3 feet high, nicely staked up and bent down, 50c to 75c.

Mention if ship with or without pots.

Cash with order, please.

All plants must travel at purchaser's risk.

## THE STANDARD

## VENTILATING MACHINERY

The old reliable machines are the most powerful, least complicated of any on the market

## The Standard Steam Trap

Ask someone who is using a Standard for his opinion of it.

Write for catalogue.

E. HIPPARD CO., Youngstown, Ohio.

Always mention The American Florist when you order stock.

## Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

## Morehead Steam Traps

¶ The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

¶ It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

¶ The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

¶ By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department 'N' Detroit, Mich.

## WHAT THE USERS SAY

The Kroeschell Does Our Work Easier Than Cast Iron Boilers and Saves 20 to 25 Per Cent Fuel.

The No. 4 boiler is heating 10,000 square feet of glass—it would take care of 13,000 square feet easy. Have no trouble to keep temperature of 50° and 60° in coldest weather. The boiler has given perfect satisfaction. We had two cast iron boilers. These boilers never did the work at their best and when the greenhouses were new. According to our experience with yours, we will save 20 to 25% fuel.

HILD BROS., Lake Forest, Ill.

# This Is the Boiler for You

**HITCHINGS & COMPANY, ELIZABETH, N. J., and 1170 Broadway, N. Y.**

When a boiler is made especially to do a special thing, it stands to reason it will do that thing best. That is exactly where this Hub Boiler of ours stands. It is an 'honest injun' boiler. Every inch of it from base to top was designed to meet greenhouse needs. It is easy to put up—easy to fire. Keeps its fire and holds its heat for long intervals without any attention. It is free from the usual grate complications. Of course it is economical—that is the first thing we attended to. If you are the man looking for a dependable boiler made by a dependable firm—here it is. Buy it and stop fussing.

## GOLDFISH.

Gold Fish, Aquarium plants, Castles, Globes and all Supplies. Send for catalogue. ALBUERDALE GOLDFISH CO., 920 Randolph St., Chicago, Ill.

## GLAZING POINTS.

Glazing points: See the point? Hold glass firmly. Peerless glazing points are the best. No rights or lefts. Box of 1,000 points, 75c. Postpaid. Henry A. Dreer, 714 Chestnut St., Philadelphia.

**VAUGHAN'S**  
**SEED STORE**  
Chicago New York

Des Plaines, Ill.

Blewitt & Prickett, proprietors of the Des Plaines Floral Co., have placed an order with the Foley Manufacturing Co. of Chicago for material for four houses which will be rebuilt this spring. This firm has 30,000 square feet of glass devoted mostly to the growing of carnations, the product of which is consigned to two of the wholesale houses in Chicago. The senior member of the firm in speaking of carnations states that the seedling which they are growing as No. 8, a cross of Enchanteress and Aristocrat, proved to be the best money maker on the place, being a very prolific bloomer with splendid keeping qualities. Another seedling, No. 48-6, a cross of Enchantress and White Perfection, the color of which is a shade lighter than Lawson, also brought good prices. This seedling is also a prolific bloomer, having long stems, and it is said that the calyx never splits. This firm is filling a large number of orders for rooted carnation cuttings of which they have a large supply, and orders for Washington are also being booked.

The Geo. M. Garland Co. recently made a test of a single set of rafters of their iron frame house by suspending 6,000 pounds from the ridge, which is considered the weakest part of the house. The test was successful, considering that the weight was placed in the position that it was, and Mr. Garland says that with the weight evenly distributed on the entire set, it would easily have stood 8,000 pounds. Arrangements are being made to give the entire house a test just as it will stand when erected, when several sections will be given a test at the same time, as it is desired to know what the house will stand with the purlines all in. Mr. Garland considers that the test on a single set of rafters does not conclusively show the strength, and feels sure that when several rafters are erected that they will stand more weight; then the arrangements will be such that a much more complete test may be given. The house will then be tested as well as to its collapsing weight, and an endeavor will be made to obtain the effects which would result from a heavy wind storm.

H. C. Blewitt is still confined to his home with a severe attack of rheumatism from which he has been suffering considerably of late. Mr. Blewitt is indeed fortunate in having two such sons as Arthur and Charley, who so successfully look after the business during his illness.

Part View of the New Chicago Factory Now Under Construction.

SOME of Our Grower Friends Growled a Bit at us Last Year Because Deliveries Were not More Prompt. And We Didn't Blame Them. To be Truthful, the Factory's Capacity Was Strained to Its Very Limit, and Finally we had to Run Night Shifts to Catch up.

That thing won't happen again this year, because we have greatly enlarged our factory and simplified the shipping, so things go straight from the machines to the store room, from which they can be loaded directly on a string of ten or more cars at a time. Car load shipments are the thing these days.

Then there's the new Chicago Factory which will be filling all the Western orders. That means a let up on the Eastern Factory. So, you see, we are now ready to make quick shipments. The materials will be better than ever, because of our new machinery—the prices will be better because it will cost us less to manufacture and ship. But, mind you, we are not blowing about how big we are—all we are trying to do, is acknowledge our faults of last year and tell you why they won't be repeated this.

Send along your orders and see.

### Yonkers Horticultural Society.

A most enjoyable evening was spent at Park Hill Inn, where the society held its second annual dinner, February 7. About one hundred and thirty members and friends sat down to a splendid repast that did credit to mine host, Arthur Herington very ably filled the post of toastmaster, his fund of anecdote and humor adding in no slight degree to the evening's pleasure. Mayor Lennon spoke of the beauty of Yonkers, due chiefly to the gardener's craft, and presented the charter of incorporation granted the society. Other speakers were: Wm. Duckham, representing the Morris County Horticultural Society; J. E. Johnson, the Yonkers Horticultural Society; J. A. Shaw responded for the press and Messrs. Lee of Dobbs Ferry, Maynard, Sperling, Melliott and Rennison. Songs were rendered by W. McDonald of Yonkers. H. M. BLANCHE, Secy.

SPRINGFIELD, O.—A project of planting a rose garden from three to five acres in extent which has been under consideration of the park board and the Florists' Club, met the approval of the members of the club present at the meeting held February 13.

## Chicago Pump Co.'s System of Intermittent Vacuum Heating

## Use Sunlight Sash and be first on the market

Get the benefit of the big prices. Use Sunlight Double Glass Sash—see how much faster your plants grow—how much larger the crops!

The double layer of glass does it.

Between the two layers of glass is a 1/2 inch layer of dry, still air. This forms a transparent blanket that lets in all the light from sun-up to sun-down.

**You never cover Sunlight Sash.** You can throw away all mats and boards. The air cushion between the two layers of glass affords ample protection in all kinds of weather. Glass is held in place without putty. Can't work loose, easily replaced.

Agents wanted. Write for propositions.

Send for these two books

1. Our Free Catalog, containing freight prepaid and guaranteed delivery proposition.

2. Send 4c in stamps for a valuable booklet on hotbed and cold frame gardening by Prof. W. F. Hasey. There is no higher authority in the country.

## Florists' Refrigerators

Write us for catalog and prices, stating size you require, and for what kind of cut flowers you wish to use the refrigerator; also state whether you wish it for display or only for storage.

**McCray Refrigerator Co.**

269 Lake Street,

KENDALLVILLE, IND.

Indianapolis.

STOCK SCARCE.

Roses are still very scarce, especially Bridesmaid and Brides. Bulb stock is coming in quantity. Sweet peas are still scarce owing to bad weather. There is quite a demand for azaleas, lilacs, primroses and cyclamens. The florists experienced a very busy St. Valentine's day, stock being short of the demand, especially violets. The weather was fine during the middle of the week, the temperature outdoors at 70°, but Friday we were surprised with a snowstorm.

NOTES.

A. Wiegand & Sons are having "trouble of their own." Both their autos were smashed last week. It will cost them about \$150 to put them in order again.

S. Green of Bayersdorfer's and—Dykes of Jenson's were in the city a few days ago and report business very good.

Baur & Smith are cutting fine carnations and plenty of them, which meet with ready sale.

Bertermann Bros. Co. have opened a stand in the city market, with Mrs. Orton in charge.

Homer Wiegand took dinner with friends in Greencastle Sunday.

E. A. Nelson is cutting fine roses considering the weather.

### Alban., N. Y.

Many floral pieces of more or less elaborate design were ordered from local florists for the funeral of Michael E. Higgins, chief of the Albany fire department, which took place on February 14 from the Cathedral of the Immaculate Conception. The supply wagon of the fire department had to be ushered into service to contain the pieces. Among the contributions were: a maltese cross of roses from the New York State Association of Fire Chiefs, standing wreath of galax, orchids and lilies from the officers of the Albany fire department, broken column from the International Association of Fire Engineers, cross of carnations and roses from the permanent firemen of Schenectady, and maltese crosses from Chief Byron of Troy and Chief Allen of Cohoes.

Patrick Hyde, treasurer of the Albany Florists' Club, has been appointed by the state department of public buildings, gardener at the residence of Governor Dix on Eagle street. Mr. Hyde succeeds George King, who has held the position for some years. He expects to continue his greenhouses on upper Hudson avenue.

Frederick A. Danker, at the poultry and pet stock show held a short time ago in the state armory, was awarded first prize for a cock, second for best pullet, second for best pen of five birds and third for a cockerel for White Plymouth Rocks. Mr. Danker is very fond of this breed of fowl and has an exceptionally fine strain. The ribbons denoting the winnings are on view in his store.

H. G. Eyres covered himself with glory again by his work for the decorations at the annual banquet of the Republican county organization held on the evening of February 11 in Odd Fellows' hall.

R. D.

SCHENECTADY, N. Y.—A greenhouse on the George Mark place in Colonie, one of the largest in this vicinity, was blown down by the wind.

## SUGGESTIONS FOR PLANT GROWERS.

### Delphiniums.

Among the showier garden flowers are the improved varieties of the old larkspurs, and not only is it a great favorite in the gardens, but is now to be seen during the summer and fall as a commercial flower. Seed planted in the greenhouse in March or earlier will produce plants that will bloom the following autumn. The seed is slow in germinating and the best varieties are often to be found in the later and the weaker ones that come up in the seed pan. As soon as the leaves form they should be potted, and as early as possible placed outside in cold frames and given constant attention. By early summer they can be planted in the garden and if the place selected is to be a permanent position the ground should be well prepared, deeply cultivated and a liberal quantity of rotted manure added. Choose a place having a deep rich sandy loam in a sunny location. From the two year old plants two good crops of blossoms may be secured in one season by cutting away the flower stalks from the first crop as soon as they have done blooming.

### Dutch Bulbs.

As the spring approaches the forcing of the bulbs will not require either as much heat or as long a period to bring them into bloom as was the case in early winter. From three to four weeks, if the bulbs are in good condition, are ample to bring them into flower at this season. It is better when they are first brought into the houses to keep them partially shaded for a few days, either by placing them under a bench or some similar location, that the stems may acquire proper length. It often happens at this season that the demand will fluctuate and there will at times be more than are needed. In this case they can be easily retarded by moving into a cooler house, and then if wanted, a few days extra heat will bring them along very quickly. By careful watching, much of the waste so often experienced in growing bulbs may, to a great extent, be overcome. In the ma-

jority of cases the bulbs after blooming are thrown away, being regarded as worthless. While this is true to a great extent with tulips, yet the narcissus that are forced in March and later can be made of use for another season. They are not strong enough to force another year, but if taken a little care of and watered occasionally, they can be set out in the ground and given a chance to regain some strength, and will give a number of good flowers in early spring next year.

### Lilies for Easter.

Six weeks to Easter, and the ordinary grower of lilies has reached the date when he can accurately determine the condition of his plants. At this date the plants should be showing their buds, in order to bring them along in a good even temperature and have them in fine condition by April 16. While there is no doubt that these plants can be bloomed in from four to five weeks from the date at which the buds are to be seen, yet it requires a great deal of forcing, and this is done at the expense of the flower, which will not begin to have the body that is possessed by the blooms that are grown cooler. As soon as the buds are standing out from the foliage, the plants should be gone over and spaced out and sized, having the shorter ones all together on the front or south side of the bench, and the taller ones behind and staking and tying should be commenced. Do not wait too long on this necessary part of the work, for the plant with a good straight stem is the one desired, and after the buds are formed they are apt to become crooked unless staked and tied. It is next to impossible to bring along a crop of lilies evenly, and some are sure to be more advanced than others, and will have to be moved into a cooler temperature, but do not attempt this until the first bud begins to turn white, when they can be checked. If checked before this, they are very apt to stop entirely, and it is very difficult to get them to make another start. If the plants can have a week in a night temperature of 45° or 50° before Easter they will be

greatly benefited, and the flowers be of much heavier texture. Keep the fumigation going regularly, for the aphids multiply rapidly and soon spoil a crop of lilies. Remove the pollen from the flowers as early as possible without injury to the blossom, so as to have the blooms white and untarnished.

#### Antirrhinums.

The antirrhinums should now be sending forth splendid long spikes of bloom, and as they are growing very rapidly will need considerable attention. Keep the shoots tied up straight all the time, for if they bend away it will take but a few hours' sun to turn the bloom or stalk at an angle, and a crooked stem is the result, and the appearance and value is ruined. If the plants are in pots or benches, they will need frequent waterings of liquid manure to keep up the size and quality. Great care should be taken in working with these flowers as well as in the cutting and shipping, for the flower shoots are very brittle, and it takes but a very gentle rap to break them off, so they must be handled with great care. In cutting, it is advisable to bunch them a dozen in a bunch and tie them together, not only at the base but in the center and close up to the flowers, not tightly but compact enough to keep them straight in the jar, for the stems will grow crooked after they are cut and are standing in water just the same as they will on the plants. If there are, by chance, some extra fine blooms, it is best to take cuttings of them for next year's growing, and secure a select strain of extra quality. After the blooms are cut keep the plants thinned to five or six spikes each, if the quality is to be maintained.

#### Starting Dahlias and Gladiolus.

##### ED. AMERICAN FLORIST:—

I have procured a quantity of dahlia roots and gladiolus bulbs to grow for summer cut flowers. Will you kindly advise me how to start them?

W. S. M.

The dahlias, if desired for summer blooming, would be better started in the greenhouse. The roots can be divided, care being taken that each division has at least one eye, and potted and as soon as all danger of frost is passed, planted in the open ground, which should be well enriched and deeply spaded or tilled. The gladiolus can be planted in the ground as soon as the soil can be worked and by making a succession of plantings the season of blooming can be extended until late in the fall, the flower being produced in about three months from planting. The bulbs should be planted about four inches deep and from two to four inches apart in the row. W.

HUNTINGTON, N. Y.—The cold weather was responsible for the small showing at the seventh annual carnation exhibit of the horticultural society, but the quality of the exhibits was, however, of the very best.

PITTSFIELD, MASS.—Rudolph Mauersberger has leased the Cutting greenhouses and garden connected with Miss Hall's school on the Holmes Road, and will conduct a commercial greenhouse, taking possession March 1.

## THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

#### A Church Decoration.

One of the very prettiest wedding decorations we ever saw was that executed by Alex. McConnell, the Fifth avenue florist, in St. Bartholomew's Church, February 7, for the marriage of Miss Vivian Gould and Lord Decies. It was a truly floral decoration. The color scheme was white and green, very faintly relieved with yellow of the forsythia, and pink of the peach blossom. No other colors were used and there was no ribbon.

The church has a very beautiful interior, with its massive granite col-

moniously, for English ivy and Southern smilax were hand in hand.

From the entrance to the church and running its full length, clear to the chancel, and almost thirty feet above the floor, was hung a heavy garland of *Asparagus plumosus*. At equal distances of about 10 feet along this heavy green line, other garlands of the same material were swung, reaching clear across to the side arches, thus forming a graceful canopy of greenery most beautiful, the center of which was directly over the center aisle. Down this center aisle on both sides and at distances about eight feet apart, were huge clusters of lilies, arranged in the so-called "Torches" standing six or seven feet from the floor, making a typical avenue of lilies. On each of the granite pillars

VASE OF MRS. C. W. WARD CARNATIONS.

Arranged by Marche & Co., Washington, D. C.

umns and wide sweeping arches, but when the last finishing touches to its adornment had been given it was one grand picture. Some little sentiment was worked into the decorative plan also; the uniting of American and English families at the altar rail had their counterpart amid the decorations, where the vines native of both countries were blended together har-

moniously, for English ivy and Southern smilax were hand in hand. Along the side aisles torches of lilies also were placed at the ends of the pews and between the windows along the side walls pockets were hung in

which plants of marguerites in full bloom were suspended.

In the chancel, each side held an immense mound of blossoms, lilies, callas, white lilac, daisies and a few sprays here and there of peach wood in bloom. Behind the altar rail were mounds of similar white blossoms, with a pair of palms of specimen size, for background. The choir stalls were hid behind palms and forsythias and the organ was similarly enshrouded behind a veil of flowers and foliage.

At the home of the bride's parents, Sixty-Seventh street and Fifth avenue, Mr. McConnell also assembled handsome decorations for the reception and dinner that took place after the wedding ceremony at the church. A dais six inches high was constructed and on which Lord and Lady Decies received. Towering over them were the graceful fronds of Australian tree ferns, *Dicksonia Antarctica*, with hundreds of white orchids, *Coelogyne cristata*, hanging from the branches and clinging to the massive stems of the giant ferns. In the rear of this tropical arbor was a background of flowering plants, prunus, apple, cherry and lilac being chiefly used, and throughout the reception room large vases of white lilac were a conspicuous feature.

In the hall-room the musicians' stand was draped with asparagus with cattleyas freely intermingled; palms and white flowering plants were also distributed profusely throughout the room. The Regency, an immense room, was done in white lilac and lily of the valley exclusively. Fronds of *Adiantum Farleyense* being the only green used, the effect of such a culmination can easily be imagined. In the salon an arbor of wild smilax, palms and forsythia was formed; directly underneath the musicians' stand were vases of American Beauty roses.

In the dining room the bride's table was 24 feet long. At each end was a standard, about six feet high, covered with spring blossoms. The center of the table was occupied by the immense wedding cake, said to have cost \$1,000. The rest of the tables in the dining room were round and they were all plentifully adorned with white lilac and other spring blossoms. Mr. and Mrs. Gould's rooms, also the rooms of the children, were lavishly ornamented with Mme. Abel Chatenay roses, lilac, lily of the valley and lilies. Around the portrait of Jay Gould, which hangs in the salon, was a crescent of American Beauty roses at the base of which was tied a bow of wide red ribbon.

#### The Sleeve Bouquet.

According to a fashion writer, a very pretty floral idea has come into vogue in London and Paris. The up-to-date girl is wearing a bouquet on her sleeve. Combined with pretty ribbon favors of harmonious colors these sleeve bouquets are very effective, and permit the wearer to show her allegiance in whatever direction it may happen to lie. If she is a college girl, she wears the colors of her college, if a suffragette, the insignia of that movement. The sleeve bouquet may be worn on either arm, and being worn near the shoulder does not interfere with the free movement of the arm.

#### Tall Vases for Decorations.

The adaptability of flowers in tall vases is strikingly shown in the illustrations which we publish of two such features arranged in Washington, D. C. The vase of American Beauty roses was one of nine, each being seven

feet high that are of good height is necessary to preserve the proper balance. In many cases the principal part of the decoration is placed in one part of the room and lower decorations such as mantels are in another part, palms and decorative plants being banked between.

AMERICAN BEAUTY ROSES ARRANGED BY J. H. SMALL & SONS, WASHINGTON, D. C.

Nine of These Seven Feet High Were Arranged for a Dinner Decoration.

feet high, that were arranged by J. H. Small & Sons for a dinner decoration at the residence of Mrs. J. R. McLean, the other is an arrangement of Mrs. C. W. Ward carnations with Asparagus Sprengeri by W. Marche & Co.

These tall vases in which to arrange long-stemmed flowers are very effective, either solitary or in conjunction with heavier decorations. It is often found desirable in making decorations, especially in halls or churches or in high studded rooms, that an arrangement of

The flowers are carried to the ceiling in the main feature, and it becomes necessary, in order to bring about the proper decorative effect, to have an arrangement of flowers at good height amidst the foliage. Table or stands with vases of flowers placed upon them are often used for this purpose, but tables are many times in the way and inappropriate in many locations, and stands are difficult to conceal and make decorative. Tall vases of flowers of extra quality, artistically arranged, are very effective

in such locations. The designer who is in possession of these will find numerous places where they can be employed to great advantage. The flowers used must, of necessity, be long-stemmed and of fine quality and well arranged, chrysanthemums, American Beauty and other long-stemmed roses, lilies and callas, in fact, any of the large prominent flowers, are especially adapted to this work as well as vases of carnations intermingled with which are sprays of *Asparagus Sprengeri* with longer sprays hanging down over the neck of the vase.

#### Preservation of Cut Flowers.

The Revue Horticole gives the results of some thousands of experiments on something like a hundred species of flowers. Lilies, lilac and pelargoniums do better in water than in sugar solutions, but are improved by addition of five per cent of common salt, viz., one pound in two gallons of water. Sweet peas do best in pure water only. Chrysanthemum maximum, tulips and other bulbous flowers do as well in water as in sugar solutions. Carnations live longest in a 10 to 15 per cent (one to 1½ lbs. per gallon) of sugar. Roses, of which 45 varieties were tested, responded to 7½ to 10 per cent sugar solutions (¾ to one lb. per gallon.) Chrysanthemums like 15 per cent (1½ lbs. to gallon), 35 varieties were tested. Orchids, 10 to 20 per cent sugar (one to two lbs. per gallon.)

In most of the above cases, not only is the life of the flower lengthened (in some cases tripled) but roses, carnations, peonies, etc., can be induced to open their buds; the colors are in some cases deepened and improved.

In the experiments using varying strengths of salts, such as nitrates and chlorides of soda and potash plus sulphate of the latter salt, it was found that the results were no better in most cases and much worse in the others.

Phosphate of potash, on the other hand, will considerably lengthen the life of orchids, in some cases twice as long, one ounce to six gallons being the quantity used; but the results were no better than the sugar solution.

The actual increase in the life of the flower depends largely on its age and condition, but enough has been said to make it worth while to experiment in these matters when flowers are scarce and valuable.—E. C., in the Horticultural Advertiser.

#### Fumigating With Hydrocyanic Acid Gas. ED. AMERICAN FLORIST:

I have a span roof greenhouse, 18x75 feet, 11 feet to ridge, which I wish to fumigate with hydrocyanic acid gas. Will you inform me the right quantity to use and the best manner in which to perform the fumigation? What is the best thing to use with iron filings to make rust joints? ENQUIRER.

You have neglected to state the height of the side walls, so it is impossible to figure the cubic feet of the house. In THE AMERICAN FLORIST, issue of October 15, 1910, page 572, are given full directions to compute the contents of a greenhouse and the use of cyanide of potassium.

Sal ammoniac is what is most generally used with iron filings to make rust joints. W.

## ORCHID NOTES.

#### The Value of Orchids and the Tariff.

"Every trade has its tricks but mine; I am going to prove it." There is a duty on orchids, not for protection but for revenue. It is well to start by affirming that commercial orchids do not grow in the United States, and that the duty is for revenue only. The tariff is dry and sweet, it says: Par. 263—Orchids—25%. This means 25% ad valorem; here is the difficulty: "It is the duty of the appraiser by all reasonable ways and means in his power to ascertain, estimate and appraise the actual market value, and wholesale price of the merchandise at the time of exportation to the United States in the principal markets of the country whence the same has been imported." It is natural that the market value assigned to the plants under no circumstances shall be less than the cost price. For many years a standard price has been charged for cattleyas, and a standard case is considered to contain forty plants. Cases of cattleyas are generally of 32x20x20 inches in size. Duty is paid on the accepted value. This appears simple enough, but frequently the appraiser finds that all plants are not invoiced at the same price. That two importations of Cattleya labiata, for instance, are valued differently, although they come from the same port and on the same ship, and that perhaps the plants valued at the least price are the best. How can this be

paid on this price, and in selling the plants in the United States, the dealer has to charge for the duty paid and for the risk he has had in handling such perishable goods. When he goes to sell his plants he finds that he is undersold by the representatives of the English firms, and his customers ask him why it is that he cannot sell as cheap as his English competitor. Let us do some figuring. Suppose we buy a certain plant and pay four shillings for it. We have to pay twenty-five cents duty on every plant, dead or alive. The same firm has a representative in the United States and makes invoicing them at what they claim is a shipment to him, of the same plants, the cost price to them, say twenty cents. That firm pays a duty of five cents, and so has an advantage of twenty cents over the American competitors. Twenty dollars in a hundred plants or two hundred in a thousand gives the English firm room to undersell and put out of business any American competitors. This also seems unfair, but when the custom house officials are approached on the subject, they answer, "There is no remedy for it, that is the law." The only protection the American firms have is to put up the goods and make a very small profit.

Let us go back to the imported cattleyas. The ways to get the plants are different, and from this, the difference in prices arises. Some firms have their own collectors. Some collectors are themselves dealers, and some firms buy from dealers or col-

RICHMOND ROSES AT J. A. BUDLONG'S, CHICAGO.

possible? Either one of the importers is a fool and puts a high value on his plants for the sake of paying duty, or the other is beating Uncle Sam. Apparently it seems just to raise the value of the plants invoiced at the lower figure, much more so if the plants are better.

This difficulty shows itself to a much more marked extent when the importations of orchids are made from England. The American firms have to buy in the market and pay the profit of the English merchant, which is generally large; then the duty has to be

lectors. The collectors do not all deal in the same way. Some of them bring the plants to New York and sell them around, while others take orders and sell their plants f. o. b. at the port of shipment. This is as far as the business in the United States is concerned. The next difficulty comes from the way in which the collector acquires his plants. Some collectors gather all their plants; others collect some themselves and buy from collectors that have gone broke, or from native dealers. In this way prices are all different, and it is rarely that the same price is paid for the same plant by

A WELL FLOWERED SPECIMEN OF CATTLEYA MOSSIAE.

two of them. But by far the greatest variation of the price of the plants comes from the quality of the goods bought, and the ability of the collector. Two collectors may be working close by each other, and one of them is paying half the price the other is paying for the same plants, and the assertion, that at times the fellow who pays the lower price gets the best plants, sounds like a yarn. In the first place, if two collectors work in the same district, and one of them gets the cheap plants, the man who pays more gets the pick. In the second place, a collector may be buying rubbish at a high price, while the other fellow discovers a new district and picks and chooses, for half or one-third of what the other is paying. So, in orchids, it is not the price paid at the markets that makes quality, but the ability of the collectors. How can it then be possible to fix a market price for orchids? The firm that employs its own collectors risks its money, as there are many enemies of orchids. The firms that buy from dealers risk nothing. They pay if the plants reach them in good condition, and therefore, have to pay a much higher price for them. This explains why plants of the same variety, on the same steamer, are invoiced at different values. One firm collects them, the other buys them, naturally, they pay different prices.

Now there is another question. If the firms that buy their plants from dealers invoice them at the standard value, apparently they are beating Uncle Sam, but if they would invoice the plants at the price they pay f. o. b.

at the port of shipment, they would be undersold by the firms that have their own collectors, or by the collectors themselves. Again, the collectors sell their plants at a much higher price than what they are invoiced at. If he sells f. o. b. Colombian, Brazilian, or Venezuelan ports, the invoice is made at the standard value and duty is paid on it. Should it be done otherwise, all the firms would be forced to have their own collectors, and all the collectors would have to establish a place of business in New York, a thing that would put some people out of the business at once. So, it is self evident that the standard price is the only solution out of the difficulty. Of course, all the plants do not cost the same price; besides, some of them come from inaccessible districts, and it is necessary to transport them for long distances on the backs of men or mules; others grow near big navigable rivers, and transportation is far easier. But, again, the same trouble arises; some people pay less than others for transportation, and the very same plant is collected at different places, which makes this item vary in an appreciable way. No doubt a man of great experience can give an approximate value of transportation, and price of every commercial orchid, but this is not an easy job and some injustice might be done. Very few experts are living who would distinguish the cattleyas when imported, and pick them out and give their proper name. Some of them resemble another like one drop of water resembles another drop of water, al-

though they are of different varieties. So, a cattleya is a cattleya, and for Uncle Sam an aurea is the same thing as a trianae. After all this writing we are at the starting point—What is the market value of orchids? Answer: "Who invented the boats?"

COLLECTOR.

#### Cattleys Mossiae.

The accompanying illustration shows a fine specimen of *Cattleya Mossiae*, certainly one of the best in existence for cutting from. *C. Mossiae* is more easily grown to specimen size than most other species owing to its neat habit and ease of culture. Specimens may, of course, be made up by massing together a number of plants, but there is always the risk of the varieties not being alike. Indeed, one might almost say they are certain to be different for, like French beans, there are hardly two exactly alike in all particulars. There are probably more named varieties of *C. Mossiae* than of any other cattleya and it is very rare indeed to find a *Mossiae* that is not well worth keeping.

When kept in a good light it is not at all unusual for *C. Mossiae* to flower twice a year and it seems to have no ill effect upon the plants—on the contrary, if well looked after, they go on and increase in size of bulbs and plants almost indefinitely. The writer has had charge of plants that were known to have been in cultivation over 30 years and were still healthy and thriving, so it is easy to see that some at least of the stories about cattleyas

deteriorating are not true. But if one wishes to grow this species to specimen size they must keep it always healthy. A newly imported plant may be shrivelled badly and be apparently of little or no value but it has all the innate vigor of the wildling and only needs the stimulating influence of heat and moisture to plump up the growth and restore it to complete health.

It is quite different with plants that have got into a bad way under cultivation. They cannot "come back" and a cattleya that has been kept around an orchid house for eight or ten years and become badly rooted and has its bulbs shrivelled may just as well be thrown away. This shows the importance of always looking after the plants and never letting them get out of track. If this is done with a healthy, clean growing variety of Mossie we believe there is no reason why it cannot be grown for 20 or 30 years or for an indefinite period and continue to increase in bulk and therefore value annually. There are, it is true, weak growing varieties and varieties that it seems impossible to keep in health for any length of time, but these are the exception. Unfortunately, it often happens that the best color varieties and also the albino forms are the weakest in growth and the most difficult to keep in health. With regard to the cultural details these are practically the same as for all the labiata group, but it is well to give C. Mossie the warmest end of the house, in autumn at least, as it is usually late in making its growth and requires warmth and light to properly consolidate it before the winter's rest.

#### Horticulture at National Institutions.

The landscape and horticultural features at the U. S. Government Hospital for the Insane at Congress Heights, Washington, are worthy of extended mention. It may be said in passing that there are about three thousand inmates of this institution, many being old soldiers and sailors.

The entire grounds comprise an area of about 500 acres, a large part of which is most beautifully situated, from which all the best features of the capital city are seen. The grounds and landscape features are in charge of Alvah Godding, an experienced landscape gardener. James White is the florist in charge of the greenhouses, which comprise about 10,000 square feet of glass.

In the line of trees and shrubs, there are many fine specimens. A feature that attracts visitors at this season is the large number of beautifully berried holly trees on the grounds. There are a number of fine specimens of *Magnolia grandiflora*, 30 feet in height and from 25 to 30 feet in diameter, measured from the spread of the foliage. These trees bloom continuously from June to October, being most prolific in June. There are splendid specimens of *Cedrus deodara*, Norway spruce and *Sequoia gigantea*, the last named being of the family of the great trees of California. The white oaks, maples, beeches, sycamores and many other varieties are noteworthy features of spring and summer. The finest and best trained growth of English ivy that we have ever seen covers the north side of one

of the principal buildings. In the greenhouses many fine cut flowers and plants are grown, a feature at present being the growth of bedding plants. It is gratifying to note that the unfortunate men and women who of necessity have been committed to this institution, are surrounded by so many pleasing features.

## THE CARNATION.

#### New Carnation Pocahontas.

Among the carnation novelties which are being disseminated this year, the crimson variety, Pocahontas is attracting a great deal of attention wherever shown. This variety was originated and is being disseminated by Baur & Smith, Indianapolis, Ind., who comment upon it in the following manner.

Pocahontas is the result of a cross between two of our own seedlings. The very best of the crimsons and scarlets being represented in its pedigree. The flower is very large, many blooms measuring four inches in diameter under ordinary culture, and the extraordinary keeping qualities of the blooms enables them to develop to their fullest size and still remain salable. The stems are very strong, carrying the blooms erect and always holding them upright. The growth is free and rapid, producing blooms early in the fall, and keeping up a steady succession throughout the season. Its freedom and its size together make it a very profitable variety to grow, and it has proved a good seller over the counter. The color is a lively deep crimson, which holds its glow like old Harry Fenn.

Our experience with this variety has proven to us that when quality is offered in a crimson carnation, the blooms sell much better than is commonly supposed. There is no more striking combination to be had, for a funeral bunch or in a decoration of table or mantel, than a good shade of crimson and flesh pink. This combination invariably attracts attention, and we have known customers, after seeing it, to call for it, while before

they could not be persuaded to buy crimson alone. We feel further, that Pocahontas, on account of its large size and keeping qualities, will stand a better chance of becoming popular than any of its predecessors of this color, which were too small to use in combination with the larger light varieties.

#### Pink Seedling Carnation.

The accompanying illustration is of a pink seedling carnation now seen in the greenhouses of the Bureau of Plant Industry, U. S. Department of Agriculture. This seedling is now in its fourth year and is a cross between the original Enchantress and Lady Bountiful. It is a beautiful bright cerise pink, surpassing, in our estimation, every pink carnation that has yet been brought out. The blooms are very large, averaging  $3\frac{1}{2}$  inches in diameter and stems two feet long can easily be cut without injury to the plants. In appearance the blooms to some extent resemble the camellia, instead of the general run of carnations. The petals are very broad and they completely cover the heart of the flower. In addition to the qualities already enumerated it is an excellent keeper. Until this season it has been grown on side benches, but E. M. Byrnes, superintendent of the greenhouses, is now trying it on a bench in the middle of a house and very satisfactory improvements have resulted. It will be distributed among commercial growers as soon as a sufficient stock is worked up.

A. F. F.

#### Carnation Breeding.

This summary of the late Fred Dörner's views and experiences is reprinted from *The American Florist* of April 13, 1907.

Carnation breeding, as it is carried on among the florists at the present time, is altogether for commercial purposes. Its object is the production of new varieties which are improvements over existing forms. The gradual deterioration of the standard varieties has naturally increased the demand for others to replace them. The greater prevalence of disease among carnations at the present time has

PINK SEEDLING CARNATION, ENCHANTRESS × LADY BOUNTIFUL.

Raised at Bureau of Plant Industry, Department of Agriculture, Washington, D. C.

also caused a demand for disease resistant varieties.

As the carnation is a plant which has been under cultivation for centuries, it is necessary to know something of its primitive characters to understand the significance of its development.

The original carnation, as we are told, was a small single flower of a flesh or pinkish mauve color. The more one studies the carnation of today the more one is inclined to believe that the latter was the more common color, as a mauve or purplish color may be detected in most varieties of today. It bloomed but for a short season each year and was of a very grassy habit.

The first noticeable improvement was probably made through breeding and cultivation, in France, during the sixteenth century. However, it was not until the year 1840 that our present monthly and, later, everblooming variety made its appearance. This was also in France. The most noticeable improvement in this type came 30 or 40 years later, in this country. Today its culture has been taken up by many specialists and it is a stable product with most florists.

Judging from present achievements, the result of this development from its original state is due to accidental and artificial breeding and cultivation. Cultivation gave us the double flower, but it required the aid of breeding to give color, size, and longer and stronger stems. To this it also added a more desirable habit and freedom of bloom. These latter qualities have given us our present everblooming varieties.

A third factor, for the improvement of a race, is selection. By its aid a variety may be raised to a much higher standard. Selection is naturally used in breeding on the ground of the "survival of the fittest."

This now brings us to our present methods of cross-breeding. The first thing to be considered is the elimination of many of the objectionable characters which belong to the primitive form and which cling very tenaciously to the race. In addition to these are other characters incorporated during later stages of development which must also be eliminated. It is these undesirable habits which retard the work and make progress slow.

The tendency to revert is very great. Favorable cultural conditions, in connection with careful selection in breeding, help much to eliminate undesirable characters. A neglect of these two facts will encourage reversion. The natural laws of reproduction are too strong to eliminate, at once, all the objectionable hereditary traits.

This is well illustrated by the results of carnation breeding at our own place. The work was begun in 1889 and the varieties used were those then at my command. They comprised all the principal colors. For two or three years all new varieties obtainable were also added to the stock. After this time the work was confined mainly to the seedling stock, which from year to year developed better qualities.

The tendency to revert is well shown here. In the first lot of seedlings fully 50 per cent were single; 15 per cent had split calyces; 20 per cent were croppers or annual bloomers. This left only 15 per cent of the lot which were considered worthy of a second year's trial and if they had been selected with the same degree of care as at the

present time, there would only have been about 5 per cent.

The number of single flowered varieties has decreased from year to year with a corresponding increase in good doubles and those having split calyces. The past season showed only about 20 per cent of single flowered forms. The croppers and annual bloomers have also diminished at the same rate.

At the same time a great improvement was noted in habit, length and strength of stem, size of flower, greater range and purity in color, better form, and greater freedom of bloom.

best corresponds with our present mode of culture.

The commercial grower hardly exercises the same degree of care, for the prevention of contamination by foreign pollen, as the scientist. By not using sterilized implements it is impossible to exclude all chances of error. Yet where records are kept, the work should be done with the greatest care possible. These records, although they may not be entirely accurate, by their great number are still accurate enough for the drawing of conclusions which may be used for the

CARNATION POCAHONTAS.

To better understand the results obtained, something should be known of the methods employed in breeding. With us the months of December, January and February are considered the best to carry on the work. The carnation, as it is now grown under glass, is then at its best. It will be found that work is a little more difficult, at this season of the year, owing to the fact that there is less pollen produced in these three months than at any other time. However, as this is the time of best development, it should also be the best time for selection and crossing.

There is also another factor which makes this time desirable. The absence of insects makes the protection of the flowers unnecessary. In a commercial establishment where from 700 to 900 flowers are pollinated during the season, this means a great saving of time.

The entire time required from the growing of the seed to the time of benching of the selected plants is less than a year. The seedling plants are allowed to bloom in the field and the first selection is made from there. This

foundation of scientific research. The commercial grower's work must pay and his results are best shown in dollars and cents.

The first step in the mechanical operation of pollination is the preparation of the flowers. These are selected before the pollen is ripe and the anthers are removed. At the same time some of the inner petals are also trimmed out to allow room for the development of the pistils. The remaining petals will always tell, if fertilization has been effected, by closing up around the pistils in from one to four days after pollination.

The pistils are mature within a few days after emasculation and are receptive when the upper or inner surface has a hairy appearance. The pollen is best when fresh and is transferred to the pistil by means of a camel's hair brush. If left too long on sunny days it becomes dry and is difficult to handle. Old pollen should not be used as pollen is short-lived and soon loses its vitality.

As a result of the high state of breeding, certain lines of work are often terminated by the production of va-

rieties which are entirely sterile, producing neither pollen nor seed. Some varieties may develop seed freely but produce no pollen, while others produce an abundance of pollen but develop no seed. In some of the cases where no seed is produced the pods, to all appearance, develop normally but when broken open contain a number of smaller pods, each with its pistils, in the place of seed.

These points must all be taken into consideration by the breeder who often finds that a valuable strain which he is trying to develop may receive a serious check.

The selection of the best and the use of none but the best is the first rule to be observed in the work of breeding carnations. The use of all annual bloomers, croppers and varieties showing any hereditary tendencies toward disease must be avoided. The use of any of these is, in fact, a step backward. In some cases where the variety has some desirable feature which is worth transmitting these may be used, but it is with the risk of introducing again the undesirable characters which one desires to eliminate.

The requirements of a good carnation, such as the breeder is striving for, are many. The true everbloomer, which is the best of our present type, has in contrast to its predecessors, a long-jointed and open instead of a short-jointed and densely grassy growth. In the former not so many shoots are formed at one time, but each as it is formed elongates and develops a bud. In the case of the latter many shoots are formed at the same time with the result that there is a period of many flowers followed by one of few or no flowers.

A variety soon shows its characteristics whether it is a seedling or a plant grown from a cutting. If the young seedling is an everbloomer it commences to bloom when only two or three months old and a cutting from it blooms as soon as it is fairly established. The flower stem and side branches should appear at the same time. In other words the plant should have branches in all stages of development at the same time. This will give a well formed plant, which blooms continuously and has no superfluous foliage. In general the leaves are broader and shorter and the stems longer and stronger than its predecessors. This should be the general appearance, and there is much room for improvement by selection and breeding in the varieties of today.

Among the free bloomers there are strong growers and weaklings. Some have a bluish green foliage while that of others is a soft light green. The latter also have a more succulent stem. Those with the bluish-green foliage are much to be preferred as they generally have the stronger constitution. Both may have equally good flowers.

In breeding, then, only those varieties which are approaching the ideal habit should be used. Following this method each year brings us less and less of the old time croppers and more of the everbloomers.

One must work, then, for a well balanced, strong growing plant, continually producing new shoots so that a bench of them will always have approximately the same number of buds and flowers.

In a good flower we look first to purity of color. The bloom must be moderately and not over-filled with pet-

als, must have size, symmetrical form, fragrance and a non-splitting calyx.

In selecting the parents for a crossing we first consider color. We must look to the development of purity and brilliancy by the elimination of undesirable undertones, shadings, and stripes and also to the creation of new and desirable shades.

With the following rules have been employed to secure these results: Pure white is secured by working white on white; yellow by working yellow with yellow or white. Yellow with scarlet will intensify the scarlet or may produce deeper yellow or orange. Scarlet with crimson intensifies crimson and gives the scarlet maroons. All shades of pink may be used together but for the development of clear pink,

The Late John Bauscher, Sr.

For Obituary See Issue of February 11, Page 107.

all those with scarlet or mauve undertones are not to be used. All pinkish lavenders, mauves and purples are kept in a class by themselves and should not be used with other colors as they dull them. Nearly all the variegated forms have either yellow or white for their ground color. When used with a self, the self should correspond either to the ground color or stripe. When two variegateds are used the markings should belong to the same color class.

Next to be considered is the calyx. There are numerous varieties which habitually split the calyx and are worthless. There are also some which under certain circumstances split what appears to be the strongest kind of a calyx, while on the other hand some large flowers are held intact by an apparently weak one. It is not so much the calyx that counts as the rapid pushing of the petals out of it. The growth of the flower should be completed outside when the flower expands.

Form must also be considered. Any recurving of the outer petals is bad, as it makes the flower look small and ragged. Incurving of the petals is also to be avoided as it gives the flower the appearance of sleepiness. The outer petals should expand horizontally well above the calyx. The inner ones may be arranged more or less sym-

metrically, but must not leave an open center. Discard, then, all forms with incurving or reflex petals.

The shipping qualities of the flower should also be considered as the carnation of today must stand much handling. A flower with a fine symmetrical form, broad petals, and smooth edge will seldom ship well. The petals break or slip one in under the other and the flower becomes deformed. On the other hand, one with narrower petals, irregularly arranged and with serrated edges, is the shipper. To hold the two side by side, the former is an aesthetic beauty, but the latter is better in massing and can stand handling without being easily spoiled.

Whatever the result striven for, success seldom follows in the first crossing. It may come in the second or third year if the same line of work followed. The union of two long stemmed varieties is likely to give short stemmed forms, but the progeny of the second or third year may have long stems.

It took sixteen years to develop an equally good growing habit in all colors, with good stem and freedom of bloom. During this time many varieties with fine flowers were discarded as they would have been failures commercially on account of being shy bloomers.

To secure our ideal carnation, then, we must work, first for purity and brilliancy in color; second, strength in calyx to prevent bursting; third, sufficient length of stem and strength to carry the flowers; fourth, a well-rounded form with an evenly divided and fairly smooth petalage; fifth, a strong habit resistant to disease and capable of producing a continuous crop of flowers.

In conclusion one might say that carnation breeding has been, and is yet, to a certain extent, very unstable. With such a mass of hereditary properties and traits, results may be secured which would surprise even a scientific breeder. The intricacy of this work and the manifold results obtained, leads one into a maze of conclusions only to get lost. Yet these conclusions help to lead us on to better results. As the work advances our ideals are raised, thus adding new stimulation to spur us on.

#### Diseased Carnations.

ED. AMERICAN FLORIST:—

Herewith I enclose three leaves of carnations which are affected with some kind of disease. I have tried kerosene emulsion, tobacco dust and solution of tobacco, but they apparently have no effect. Only about one dozen plants are affected and it does not appear to spread. Can you kindly tell me what it is and also if there is any cure? It does not appear to affect the flowering of the plants but detracts from their general healthy appearance.

Utah.

J. O.

An examination of the specimens submitted show that the plants are affected with the common carnation rust, *Uromyces Caryophyllinus*. This is a fungus disease and is best handled by picking off and destroying all the affected leaves. In addition to this, if so desired, the plants may be sprayed with some fungicide. The sprays used by J. O. were insecticides and have no effect upon any of the fungi. With careful picking there is little danger of the disease spreading over much territory.

H. B. DORNER.

## National Flower Show.

The schedule of premiums of the National Flower Show, to be held by the Society of American Florists at Boston, March 25-April 1, is issued and includes the special premiums offered by the several donors. The meetings of the societies co-operating at this exhibition will be held as follows: Society of American Florists, March 31-April 1; American Rose Society, March 27-28; American Carnation Society, March 29-30; Sweet Pea Society of America, March 28 at 3 p. m.; Gladiolus Society of America, March 30; National Association of Gardeners, March 29. In addition to the floral exhibit there will be an immense trade exhibit, all the principal firms of the country having made preparations to show their products. The exhibits of the Rose, Carnation and Sweet Pea Societies will be under the supervision of the following: Eber Holmes, Wakefield, Mass., the rose exhibit; E. A. Pierce, Waltham, Mass., the carnation exhibit, and William Sim, Cliftondale, Mass., the sweet pea exhibit.

The scales of points by which exhibits will be judged are as follows:

| SINGLE SPECIMEN FOLIAGE PLANTS. |    |

In the miscellaneous plant section premiums aggregating \$3,110 are offered, including the premium for 12 plants of flowering shrubs offered by the Massachusetts State Board of Agriculture. For bulbs in bloom the prizes amount to \$720. For orchids, premiums to the value of \$1,145 are listed, and for roses in pots \$740 are offered. The prizes for ferns amount to \$400, and for palms and foliage plants \$1,870. In the cut flower rose section the premiums offered by the S. A. F. and the Rose Society aggregate \$1,515, beside the medals and certi-

ificates, and they will be judged by the following scale:

|                      | Competitive classes. | Novelties for certificates. |
|----------------------|----------------------|-----------------------------|

The premiums for carnations offered by the S. A. F. and the American Carnation Society, which exhibition will be held March 28, amount to \$804, and additional special premiums have been offered as follows: Silver cup valued at \$30 by Hitchings & Co. as a sweepstake prize; \$25 in gold by F. Dorner & Sons Co. for 100 blooms Pink De-

iums, the Zvolanek premium for eight or more varieties, 100 blooms each, first \$25, second \$10. Ten or more varieties, 25 blooms each, \$10 first, \$5 second; the A. T. Boddington prize of \$25 for display of not less than 10 varieties 50 blooms each; a gold medal by Lord & Burnham for display of not less than 1,000 blooms and \$10 by R. & J. Farquhar Co. for bouquet with foliage for private gardeners or amateurs. The scale of points to govern judges is as follows:

|                                |    |
|--------------------------------|----|
| Length of stem.....            | 25 |
| Color.....                     | 20 |
| Size.....                      | 25 |
| Substance.....                 | 15 |
| Number of flowers on stem..... | 15 |

The judges are G. W. Ker, Doylestown, Pa.; James Wheeler, Natick, Mass.; William Duckham, Madison, N. J.; Frank H. Traendly, New York, and Chas. H. Totty, Madison, N. J. The premiums for cut blooms of orchids amount to \$181; for forced blooms of gladiolus \$100, and for other cut flowers \$203.

## OBITUARY.

## John H. Taylor.

His many friends, throughout the trade, will be shocked to hear of the sudden death of John H. Taylor, which occurred at the Hotel Martinique February 25. Mr. Taylor had returned from Europe, evidently enjoying his usual health, on the Wednesday previous. The cause of death was bronchitis and tonsillitis. Formerly Mr. Taylor was well known as a rose grower at Bayside, L. I. Last June he leased his growing establishment to a realty company and on June 11, 1910, he sailed for Europe, where he remained until last week.

Mr. Taylor was born in New York City in 1858. Ten years of his younger life was spent in Switzerland, Italy and Germany. He graduated from Harvard in 1881 with degree of bachelor of agricultural science. Soon after his graduation he became associated with his father as nurserymen and florists. The elder Mr. Taylor died soon afterward, and John H. Taylor bought out the interests of the other heirs in the Oakland Tree Nursery at Bayside, of which his father had been the owner. In 1883 Mr. Taylor married Miss Julia Armstrong. She died ten years ago, and five years later he married Miss Mary Stow, of New York. Mr. Taylor maintained the Oakland Nursery until about six years ago, when he sold it. He was prominent among and favorably known by the florists of the country, being an attendant at the conventions of the Society of American Florists and serving on the executive board of that society in the years 1898-99 and 1900.

As the organizer and first president of the Oakland Golf Club Mr. Taylor gave a part of his estate at Bayside, which was known as the Oaks, to the club to be used as part of the course. He was also one of the organizers of All Saints' Episcopal Church in Flushing. Besides he was a member of the University, Lawyers', New York Florists', Nautic and New York Athletic clubs, Cornucopia Lodge, F. and A. M., and the New York Horticultural Society.

Mr. Taylor was a nephew of Mr. William Taylor, proprietor of the St. Denis Hotel, and a cousin of Mr. Charles Leigh Taylor, proprietor of the Hotel Martinique. He was survived by a widow and two children of his first wife, Mrs. Adele A. Manning and Reginald Taylor.

Funeral services were held at Bayside Monday afternoon, interment being private at Flushing cemetery, Flushing, L. I.

The Late John H. Taylor.

light; a gold medal or \$25 in gold by Kroeschell Bros. for the 12 blooms, each bloom to measure not less than five inches; Berterman Bros. Co., \$25 in two prizes for vases of J. Whitcomb Riley; a \$25 silver cup or \$25 in gold by Jos. Heacock Co. for 100 blooms Dorothy Gordon, and first prizes of six dollars and second prizes of four dollars by the following named for 50 blooms of the respective varieties: A. C. Brown for Sangamo, Chicago Carnation Co. for Conquest, Baur & Smith for Shasta, F. Dorner & Sons Co. for Scarlet Glow, Jos. Heacock Co. for Dorothy Gordon, The E. G. Hill Co. for J. W. Riley, Geo. E. Buxton for Bon Ami, Cottage Gardens for Mrs. C. W. Ward and for Alma Ward. The judges elected are W. N. Rudd, Morgan Park, Ill.; R. Witterstaeter, Cincinnati, O.; Wm. Nicholson, Framingham, Mass.; Eugene Dailledouze, Brooklyn, N. Y.; Jos. H. Hill, Richmond, Ind., and E. A. Stroud, Stratford, Pa. The following scale will be used in judging the carnation exhibits:

|                |    |
|----------------|----|
| Color.....     | 25 |
| Size.....      | 20 |
| Calyx.....     | 5  |
| Stem.....      | 20 |

The date of Easter in 1912 will be April 7.

RENEW subscriptions promptly so that no copies of the papers may be missed.

WHAT has come of all those climbing American Beauty roses that the cut flower growers complained of so bitterly in the years that are over? Perhaps the mail plant trade can find use for them now.

## Personal.

Benjamin Connell, was that you we met not a thousand miles from Philadelphia a week or two ago? If not, it was a man very like you.

Another inquiry for P. F. Hemer, lately about mid-continent, whether going or coming is not stated—how many times across is it for Peter?

## Florists' Hall Association.

John G. Esler, secretary of the association, is again at home, having left the hospital on February 21. With the exception of the injuries to his upper lip and a dislocated hip, his injuries have healed. The doctors prescribe crutches and canes for the next two months at least.

The twenty-second assessment of the association will be levied on April 1, 1911. Members will be duly notified.

## National Flower Show.

Arrangements are well under way for the National Flower Show to be held in Boston March 25-April 1. The space both for competitive and trade exhibits is being rapidly taken, and from present indications it will be the most stupendous affair ever seen in connection with the florist trade. The final schedules have been printed and sent to all the members of the different societies under whose auspices the exposition is held. Manager Chester I. Campbell has had designed one of the most attractive art advertising cards for the exposition ever seen, and these will shortly be sent to all the larger cities in the country.

Advertising seals, or stickers for stationery, are also being prepared, and they too will be sent to all the exhibitors and members of the society. Manager Campbell has had long experience in the exposition business and realizes fully the importance of such advertising. Among the many expositions of which he has charge, are numbered the Boston automobile show which has the reputation of being the largest in the world, the National motor boat and engine show, the Style show, Office appliance, Textile machinery, Electric, Exhibition of aerial craft, and he will also guide the destinies of the great Boston Chamber of Commerce industrial and educational exhibition which will be held in October.

Every mail is now bringing in applications for space from those who intend making what may be classed as show exhibitions. A number of Boston florists, while not entering in the competitive classes, intend offering novelties in artistic decorative effects, and it may safely be predicted this exposition will long be remembered as portraying the acme of floriculture.

## American Rose Society.

President Elliott called a meeting in New York City to arrange for the appointment of judges and the arrangement of the programme. At the general business meeting Monday, March 27, at 2:30 o'clock, it is planned to have August F. Poehlmann and Wallace R. Pierson present two fine papers. Tuesday morning, election of officers and a general discussion of new roses. Tuesday, 2:30 P. M., a meeting designated by President Elliott, the amateurs' meeting. Papers by Richard Vincent, Jr., of White Marsh, Md., on what he saw in Belgium; Rev. Dr. Spencer S. Sulliger of Vancouver, Wash., on his visit to the National Rose Show in London, England, and William G. McKendrick, an extensive amateur rose grower, whose aim is to make Toronto beautiful.

## REGISTRATION OF ROSES.

A. N. Pierson, Inc., file the following described new roses for registration: Double White Killarney—A sport of

White Killarney, originating with the J. A. Budlong & Son Co., Auburn, R. I., in January, 1910. It is stronger in growth than the parent, with the same general characteristics of foliage and growth. The flower is pure white in color, with an average of from forty to forty-five petals. It is a wonderful improvement over the parent, having size and substance in summer, when White Killarney is comparatively single. The variety will be disseminated by A. N. Pierson, Inc., in 1912.

Killarney Queen—A deep pink sport of Killarney, originating with the J. A. Budlong & Son Co., Auburn, R. I., in 1909, that has the high color of Dark Pink Killarney with an increased vigor in growth. It compares among Killarneys as American Beauty does with other varieties, the stem and foliage being much heavier, and the petals nearly twice the size of the petals of Killarney. The variety will be disseminated by A. N. Pierson, Inc., in 1912.

Entries are coming in for the exhibition. BENJAMIN HAMMOND, Sec'y.

## American Carnation Society.

### REGISTRATION OF NEW CARNATION.

Miss Dimple Widener—Mrs. Thos. Lawson X Lady Bountiful. Scarlet. Size, 3 1/4 inches. Clean grower, and very free bloomer. Long stiff stems and free from disease. Never splits and every flower comes perfect. Raiser, Wm. Kleinheinz, Ogontz, Pa.

Members of the American Carnation Society will please bear in mind that all entries for the Boston show should be in the hands of Secretary A. F. J. Baur, Indianapolis, Ind., by March 18. \$2.00 will be charged for each entry made after that date. Only members of the A. C. S. are eligible to compete in the general carnation classes, excepting section G. If you are not a member now, send in your application either now or with your entries, including \$3.00 to cover the first year's dues and entrance fee. The fact that you may not be a member now need not prevent you from competing at the show, but you must become a member before your entries will be accepted.

Send for a premium list. Copies have been mailed to all the members.

Members may now secure A. C. S. buttons. The price of these is 75 cents each. A very wide distribution of these is desired. When you send in your dues, just include 75 cents extra for a button. Why not send your dues to the secretary now, to save him some work at the convention?

In section H, class 51, the donors request that the requirement of 5 inches in size be omitted. The \$25.00 gold medal, or \$25.00 in gold will be awarded to the 12 largest blooms, one or more varieties, regardless of size. Make a note of this. A. F. J. BAUR, Secy.

## Meetings Next Week.

Buffalo, N. Y., March 7, 8 p. m.—Buffalo Florists' Club, 385-87 Elliott street.  
Butte, Mont., March 10.—Montana Florists' Club, Columbia Gardens.

## Buffalo.

## STOCK EQUALS DEMAND.

Weather conditions are still unsettled and trade is fair. Stock is equal to all demands with the possible exception of American Beauties. Carnations still hold their price, for good ones \$1.00 per dozen, not that they are so scarce, but for the quality. Bulb stock being so plentiful makes demand for them uncertain. Balls and receptions were either prominent last week or S. A. Anderson having the decorations for a ball at the Country Club, also two receptions of goodly proportions. Palmer and Stafford each were busy with receptions, the former also having a big dinner at the Ellicott Club.

## NOTES.

The event of last week was the visit of the Rochester boys. They were met at the depot by a committee composed of Palmer, Anderson, Street, Sandiford, McClure and after that they were ours in every sense of the word. First they were our guests at dinner at the Hofbrau. Then we adjourned to the bowling alleys, where they were our victims in the bowling game. These games were rolled and they were ours. Then a match game was rolled by Brad Phillips and Geo. Jenny, of Rochester, vs. Sam Wallace and Geo. McClure, of Buffalo, with the following result:

| Rochester.                 | Buffalo.                  |
|----------------------------|---------------------------|
| Phillips . . . 125 139 151 | Wallace . . . 212 158 189 |
| Jenny . . . 135 156 159    | McClure . . . 100 145 147 |

That was just a little contest. The main event was the three games of five men each with the two teams. It was a fine game and won by Buffalo on our own alleys. The return match may be different when we see them in their town. The score was as follows:

| Rochester.                 | Buffalo.                    |
|----------------------------|-----------------------------|
| Jenny . . . 159 171 174    | Neubek . . . 165 191 150    |
| Phillips . . . 100 125 129 | Street . . . 150 150 150    |
| C. Vick . . . 127 137 148  | Kasting . . . 175 156 153   |
| Ham . . . 105 143 130      | Cloosler . . . 129 130 160  |
| A. Vick . . . 134 134 143  | Sandiford . . . 169 188 155 |

691 744 733 754 824 778  
M. Keller scores in place of C. Vick—157, 148.  
J. Keller in place of Ham—130.

After the bowling a lunch was served in the alleys, where all had a good time and voted the Rochester boys a good bunch. It is needless to say that without Charlie Vick, they would be lonesome. His game with "Scots Wa Hae" McClure was a grand game, Scots winning by one pin. That was one time that "Oatmeal" was higher than "Seeds and Bulbs." "Jenny," like the quadruped by that name, had his ears up for anything and was dead game. Allie Vick was faithful, but had father been here to play for him it might have been different. They say he bows to music—not chin music. Kasting has his National reputation to keep up and he was equal to it. The cares of President made Joe Street nervous the first game but he cooled down. Lord Danbury Sandiford was his dignified self as usual and bowled a steady game; of course, he was not bothered by his hair falling down in his eyes and could see well on that account. One of the many shades of Brown was on the foul line, but was not over worked. McClure scored, was well watched, still we won. Palmer and Anderson astonished all by remaining until it was all over. Excitement is everything at times. The Rochester boys were the following: Chas. Vick, J. M. Keller, P. J. Keller, Geo. Keller, E. Albers, Geo. Kramer, P. Ham, A. Vick, Geo. Jenny, Barth Phillips; also M. Miller, of Roehrs and Koenig, of bulb fame. About 35 sat down to the dinner and had a good time. We may not have as much to say about our score when we return from Rochester, but we will have a good time.

Recent visitors were Philip Breitmeyer, Detroit, jovial as ever; Jas. Kairns, of H. A. Dreer Co., Philadelphia. BISON.

# FUNGINE

## The Newly Discovered Fungicide

An Invaluable Remedy for Mildew, Rust and other Fungus Diseases.

IT ERADICATED RUST.

"BLANTYRE" GARDENS,

Thomas Proctor, Supt.

Lenox, Mass. Feb. 24, 1911.

APHINE MANUFACTURING COMPANY, Madison, N. J.:

Dear Sirs,—Replying to your letter of the 21st, in which you request me to advise you as to the results of my trials with your FUNGINE, I have not had an opportunity of testing its merits on mildew, but I can, however, unqualifiedly recommend it as being a very effective remedy for Carnation Rust. I brought in some new carnations some time ago that were in a bad state with rust on their arrival; their leaves were completely covered, and after two applications, at proportions of one part FUNGINE to forty parts water, I found it had the desired effect. For this reason I gladly endorse it.

Yours very truly,

THOMAS PROCTOR.

IT DESTROYS MILDREW.

Farmington, Conn., Feb. 23, 1911.

APHINE MANUFACTURING COMPANY, Madison, N. J.:

Dear Sirs:—In reply to yours of the 21st inst., I would say that my experience with FUNGINE for Mildew has been very satisfactory. I think it is much better and easier than the old way of dusting the plants and painting steam pipes.

The first time I used it I was rather disappointed, as it turned the woodwork in the houses, wherever the spray hit it, a dirty yellow, but this all disappeared in a few days.

I have not tried it for rust, but cannot see why FUNGINE is not going to be to the florists and gardeners what the lime and sulphur was to the pomologists.

For Black, Green and White Fly, Mealy Bug and Thrip, I have not used anything this season but APHINE. The greenhouses have not been fumigated, and plants are in a fine healthy condition.

Yours respectfully,

WARRAN S. MASON, Grd. to A. A. Pope.

IT CURES ROOT ROT.

ZIEGER & SONS,

Growers of Decorative Greens and Flowers,

Germantown, Philadelphia, Pa.,

Palms—Ferns—Novelties

February 23rd, 1911.

APHINE MANUFACTURING COMPANY, Madison, N. J.:

Gentlemen:—Concerning the FUNGINE, we may say that we have not had much occasion to use it. However, we had one delightful experience with it. We had quite a few thousand chrysanthemum cuttings inserted in old sand which had been left in one of our cold houses. As our propagator is accustomed to do, he saturated the sand and kept the cuttings very wet, which caused rot and fungus. The writer, noticing this apparent loss, went for the FUNGINE purchased from you. We used one part to twenty-five parts water, and sprayed the entire lot of dampened and partly rotted cuttings, thinking that these cuttings (of which there were several thousand) might as well die one way as another; but, to our great surprise, these cuttings, after the single application—a thorough one at that—turned the cuttings to a light green color and seemed to extract the fungus, which sort of foamed up and separated from the decay (similar to peroxide on a healing wound).

Now, these cuttings at this writing have nearly all made good healthy roots, although a few cuttings rotted in the sand, but made roots above the decayed part which seems remarkable to us. It is not necessary to state that for this experience alone we are highly pleased with the results obtained with FUNGINE used as above, which is far more than we have ever expected.

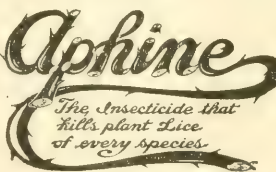

We beg to take the liberty to state that APHINE does all it is recommended to do in a very satisfactory manner.

Yours very truly,

ZIEGER & SONS, Ernest J. F. Zieger, Sec'y.

FUNGINE—\$2.00 per gallon; 75c per quart.

For  
House

and  
Garden

KNOWN AND USED THE WORLD OVER.

Entebbe; Uganda (Central Africa), 16th January, 1911.

Sirs:—Kindly supply me with sufficient APHINE to insure a fair trial. I should be glad to experiment with this insecticide.

W. GOWDEY, Government Entomologist.

FRITZ BAHR says in his article on Lilies in The Florists' Exchange of February 18th, 1911:

"We have given our lilies a weak dose of APHINE once a week since they have occupied space on top of the bench, and thus far we haven't noticed even a trace of the pest; that ought to prove that green flies are not very fond of the stuff, for if there's anything they do like it is to get into the tops of the lilies, and it takes an awful lot of coaxing to get them out."

APHINE—\$2.50 per gallon; \$1.00 per quart.

FOR SALE BY SEEDSMEN.

# When in Philadelphia Be Sure to Look Us Up

SOMETIMES when you get out and look around and see what other folks in your line of trade are doing, you get some good ideas for running your own business—which prompts us to suggest that you might be decidedly interested in our establishment at Wyncote and in the work we are doing here.

So this is a cordial invitation to you to come out to Wyncote to look us over whenever you have a couple of hours to spare in Philadelphia—you can do it, comfortably, in that time, though when you get out here you may possibly be interested enough to conclude to prolong the visit!

We're easily reached—only 25 minutes from Reading Terminal, 12th and Market Streets, Philadelphia. We have fine train service—fifty trains each way on week days—so you can suit your convenience both going and coming.

Our ranges aggregate 130,000 feet of glass; here we grow the Palms, Carnations, Orchids and Roses about which we've told you so often in our advertisements.

Call on us; we're always ready for visitors, and will make you welcome.

#### MORE STOCK ARRIVING.

The last week has been very pleasant and there has been more bright sunlight than any other week since the first of the year, and beside the sun is now getting high enough so that the rays are making themselves felt upon the growing plants, consequently, the stock is increasing rapidly in quantity and improving greatly in quality. It takes but a few days of bright sunlight, after a long dark cloudy spell, to make the roses, especially the pink varieties, improve in color and take on a much brighter shade, and the carnations have a much stiffer and stronger stem. American Beauty roses are now in better shape and the quantity of first class stock is increasing rapidly. Killarneys are much better and the quantity is increasing, the pink is now coming with the beautiful color which this variety has at its best. My Maryland is fine, some very handsome flowers being received and Mrs. Jardine is of elegant quality. Although the cut is increasing, the call has been good, as one of the wholesalers puts it, "Trade is very good and taking all the stock that comes in." So the prices remain very firm as there is no surplus, and roses especially clean up well. Carnations are coming in very plentifully in all colors and the prices are a little lower, but the best grades still hold up well. Violets are very plentiful and the prices lower. Orchids are being received in quantity enough to meet all the demands. Lilies and callas are now being received in much greater quantities. There is plenty of bulbous stock of all kinds and at times more than the market has call for, and some low sales are reported. There is the usual amount of spring flowers coming and white and colored stock are added to the supplies of snapdragon, mignonette, pans-

## "The Busiest House in Chicago"

We are receiving a fine line of Tulips, single and double Daffodils, besides everything else in the cut flower line.

ies, white lilac, marguerites and calendulas. Lily of valley is being received in good quantity and of excellent quality and is finding good sales. There is plenty of all greens to meet the call.

#### NOTES.

Chas. W. McKellar is offering a splendid grade of single and double stocks in white and other colors. A shipment of dog wood blossoms was received this week and sold to local florists, who used it quite extensively in decorations. This house is now receiving a good supply of Oncidium splendendum which are now coming in crop.

J. A. Budlong is cutting a large quantity of roses with Killarney and My Maryland, showing up exceptionally well, a large crop of the latter is now on and some magnificent buds of splendid color can be seen at the store this week.

Carl Hirsch, of Hillsdale, Mich., paid the city a visit February 25, returning home the same evening. Mr. Hirsch

was recently discharged from a hospital, where several operations were performed upon him and he is much improved.

John Zech and Mathias Mann, members of the well known firm of Zech & Mann, are attending the Mardi Gras at New Orleans this week. Wm. Graff is assisting at the store during the absence of the members of the firm.

Wietor Bros. are featuring a splendid grade of Mrs. Jardine roses this week, some having stems fully three feet in length. This firm is also cutting a good grade of American Beauty, Killarney and Bride roses.

Victor Morgan, representing Boblink & Atkins, the well known nurserymen, florists and planters of Rutherford, N. J., was in the city this week on his annual business trip.

A. F. Keenan, 1306 East Sixty-third street, filled several large orders that were delivered to the Chicago University on February 22, when the junior prom was held.

**POEHLMANN'S FANCY VALLEY** } We make these a special  
**EXTRA FINE HARRISII LILIES** } Can supply them all the year.  
Once tried you will have no other.

A. D. Martin, with the James H. Rice Co., reports a good demand for greenhouse glass this year, many growers taking advantage of the low prices that were offered this season. In recent years there have been low prices at times, but it has not been so constantly low for such a long time as at present, which was due to the over production of glass. Mr. Martin has sold glass for 22 years and says that they have received 70 more inquiries this year for 16x24 glass than in any of the three previous years. The demand the past four years has been for glass 16x18, but the larger size requires fewer laths and casts less shade and the growers have evidently come to the conclusion that it is better to spend a little more money and get better results.

G. Goebel, the representative for the Adams Express Co., says that their business has increased wonderfully since February 1, when the new fast

express service was inaugurated from Chicago to St. Paul, Minneapolis and all North-Pacific coast points via the C. E. & Q. R. R. The fast exclusive express train leaves Chicago at 9:45 p. m. and is due at St. Paul at 8 a. m., and at Minneapolis at 9 a. m.

W. W. Randall, with A. L. Randall Co., is devoting his time to calling on the trade, drumming up business for the well known house.

J. E. Lapes, of Cedar Rapids, Ia., was seen in the local market on February 23, buying stock for a large order which he had received. Mr. Lapes says the St. Valentine day trade was very good and that there was also a good demand for red carnations and roses for Washington's birthday.

The Chicago Carnation Co. has made arrangements whereby large consignments of home-grown orange blossoms are now received and is now prepared to fill orders for this flower, so much in demand for weddings. This firm is

**U S Budlong's**  
**E Blue Ribbon Valley.**

cutting a fancy grade of carnations in all the leading varieties.

Kyle & Foerster are showing an exceptionally fine grade of Killarney roses with excellent color, foliage and stem. This firm is also receiving a large quantity of violets of good quality.

John Huebner, 72 East Randolph street, arranged the table decorations for the banquet which was given by the Chicago Athletic Club at the club rooms on February 22.

# CARNATIONS ROSES BEAUTIES

We are cutting a splendid grade of **Carnations** in all the leading varieties, and are now prepared to fill all orders.

**PETER REINBERG,** <sup>35</sup> Randolph St., **Chicago**

The carnations that are being offered at the Percy Jones store are of exceptionally fine quality and large quantities are sold daily. Some fine boxwood was also seen at the store this week. F. J. Simon, formerly with the A. L. Randall Co., has accepted a position with this firm.

Peter Sgoros, of the Chicago Florist, and his brother, William, with the Madison Floral Co., purchased a lot 27x121 feet at 4200 West Harrison street for \$1,000. The brothers intend to erect in the future a three-story building, which they will occupy when it is completed.

Will Hoerber on February 26, took a trip to Des Plaines to look over the stock in their large range of greenhouses which is located there. The roses and carnations will soon be in full crop and they have already commenced to cut both quite heavily.

Fletcher James, the well known grower at Des Plaines, has purchased a quantity of greenhouse glass with the intention of building a new house 54x150 feet. Mr. James grows Boston ferns extensively and they are at present in splendid condition.

Julius Zschau, the well known florist of Roseland, informs us that his brother, Moritz, who is now the head gardener at the Patterson home at Libertyville, has leased the Fischer place in Evanston and will take charge in the near future.

Foehmann Bros. Co. is cutting a large quantity of lilies and callas of exceptionally good quality. A large crop of roses is now coming on, and it will be but a short time that they will again be receiving a heavy supply.

W. S. Garland of Des Plaines enjoyed a most prosperous year, and in addition to enlarging his plant it is rumored that he will invest several thousand dollars in an auto.

## GREEN CARNATIONS

**W**E have a very strong powdered coloring which will dye many white flowers a beautiful emerald green in a few hours by absorption, or instantly by immersion. This dye is combined with a very powerful and harmless chemical agent which helps to preserve and color the flowers. We have the coloring in Red, Blue, Yellow and Green. Directions with each package, which will make two to three quarts of coloring. Don't be fooled with cheaper dyes, but get the real article, cheap.

**PRICES: 1 package 75c.; 6 packages \$4.00; 12 packages \$7.50**

Sent postpaid on receipt of price. Address

**THE PHILADELPHIA CHEMICAL CO., Philadelphia, Pa.**

The regular meeting of the Chicago Florists' Club will be held at the Union Restaurant, 111 Randolph street, March 2 at 8:00 p. m. The transportation committee will report in favor of the Lake Shore railroad for the National Flower Show at Boston, leaving Thursday, March 23, at 5:30 p. m.

Bassett & Washburn are in with a large crop of American Beauties and other roses, and a large quantity of stock can be seen at the store. This firm is also receiving a good supply of carnations with O. P. Bassett showing up exceptionally well.

Frank Vogt, 923 West Lake street, formerly in business on Cottage Grove avenue, has recovered sufficiently from his recent illness to be able to leave the hospital.

**U S Budlong's  
E Blue Ribbon Valley.**

Some of the finest carnations and sweet peas to be seen in the market are found in the J. B. Deamud Co. store, the product of their successful growers.

The C. C. Pollworth Co. of Milwaukee, Wis., have placed an order for a carload of glass with the James H. Rice Co. of this city.

H. E. Wallace, the well known English grower of carnations and roses on the American plan, located at Dunstable, Bedfordshire, visited some of the leading growers here this week under the guidance of E. G. Hill and J. A. Evans, of Richmond, Ind. Mr. Wallace, who is accompanied by Mrs. Wallace, is making a tour of the United States and Canada, speaks very favorably of American methods of growing, which he has adopted, including American style greenhouses and Challenge ventilating apparatus, with most gratifying results, his carnations, especially, comparing very favorably with the product of our best growers.

Tim Matchen, the hustling manager at the Peter Reinberg store, is filling a large number of orders for a fancy grade of long-stemmed Killarneys. Roses in general are coming in in very good shape as are also carnations, which are now nearly in full crop.

Peter Reinberg is being congratulated upon the manner in which he, as chairman, directed the campaign of Carter H. Harrison, the successful candidate for mayor on the democratic ticket, at the primaries held this week.

The Masonic Temple and Briggs House Florist are enjoying a splendid transient trade, and also report a good call for funeral and wedding work.

The Des Plaines Floral Co. have lately received a shipment of rooted cuttings of Mrs. C. W. Ward carna-

tions from the Cottage Gardens Co., of Queens, L. I., that arrived in excellent condition.

visited New Castle and Indianapolis, Ind., Columbus and other cities in Ohio. While in Dayton they were the guests of George Bartholomew of the Miami Floral Co., who evidently informed the trade of their arrival, for they were treated to a genuine old-fashioned charivari. Mr. Garland, while on his honeymoon, did not forget that there was business in sight and secured several large orders which aggregated to an amount in the neighborhood of five figures.

C. L. Washburn, on February 22, celebrated the fifty-third anniversary of his birth and was the recipient of many presents, among which were an

apple strudel and a large birthday cake upon which were 53 candles. The years sat lightly upon his shoulders and he received letters from his many friends far and near wishing him congratulations and that he may live to celebrate many more.

Chas. J. Glaser, a son of A. L. Glaser of Dubuque, Ia., spent a week in the city, returning home February 27. Charles says his father is enjoying a brisk retail trade, there being a good call for funeral and wedding work.

Vaughan & Sperry's chief offerings this week are a splendid grade of Killarney roses and carnations of good quality. The bulbous stock is arriving

price. Bulb stock, mostly trumpets  
and daffodils, are arriving in quantity.  
American Beauties are still scarce.  
Lily of the valley and lilies enough to  
supply the demand. There are some  
very good sweet peas and plenty of  
short-stemmed which are being used  
to good advantage for funeral work.  
Plenty of green goods.

### NOTES.

Holton & Hunkel Co. have a fine crop  
of Killarney roses coming on which  
are being cut heavier every day. The  
lilies at their Brown Deer plant are  
fine and are selling readily at good  
prices. This firm is receiving some  
long-stemmed Killarney roses from A.  
Zender of Rogers Park, Ill.The Bowling Club has arranged a  
match with a picked team from Chi-  
cago which will take place at Steink's  
Alleys March 10. Quite a delegation  
from Chicago is expected.C. C. Follworth Co. is cutting heav-  
ily from their carnations and some  
good Killarney and Richmond roses.  
Currie Bros. Co. had a large number  
of funeral orders, among which was a  
casket cover of orchids and valley.

## Philadelphia. STOCK IMPROVING.

The bright sunny days of the past week are proving an important factor in the market, the increase in the quantity and quality of the stock being very apparent. Killarney roses, which are such a feature, are much improved, the color being several shades darker; in fact, all the roses are looking better and the increase in quality is at least 50 per cent. Carnations have also felt the impetus of the bright days, and the increased output has affected the price considerably, they being at least 25 per cent cheaper than last week. Violets are seen in quantity but so far have sold very well at perhaps a third less. All kinds of bulbous stock is offered at bargain prices. The daffodils are coming in large quantities, probably to get in before the southern stock makes its appearance and lowers the price. All the store windows are featuring blooming plants, choice Belgian azaleas, lilacs, Ghent and Japanese azaleas, dwarf apples, genistas, primulas and all kinds of bulbous stock in pans giving the stores an Easter appearance. Business the past week has kept the trade moving quite lively, the late social entertainments and balls being crowded in before the ashes of Wednesday were scattered about. Last Friday night the second assembly was held at the Bellevue-Stratford. Habermehls had the decorations, which were quite elaborate, as were those of a number of dinners given previous to the ball, at which there was quite an extensive use of flowers. Several important funerals also made a demand for choice flowers, so that there was not much for the street gentlemen on Saturday, who, by the way, were out ready to catch on to the first surplus in sight. With the advent of Lent all eyes will be on the lookout, or should be, for a grand Easter season, it is not too early to prepare for it, so as to have every line in working order for the event. A look among a few of the growers shows that they expect a big demand, there being a splendid stock in all the popular plants being brought forward. The middle of April is probably the best season to insure perfect stock without much forcing. We believe the assortment of plants to be offered for this season will exceed that of any other year in the history of the business, and the effort should be made by the retailer and grower to wake up the public mind to a more general observance of this flower festival of the year.

### NOTES.

The old and at one time famous carnation "belt" of Chester Co. has of late gone largely into mushrooms, in fact, it is stated on good authority, that at least half of the fresh mushrooms used in this country are supplied from this district. Many large and well built plants are owned by some who grow these esculents exclusively, while many carnation growers have taken them up as a side line, growing them at first under their carnation benches and later building sheds for their exclusive culture. So large has their production become, that at times in favorable weather the market is flooded, and very poor prices are the result. At a meeting of a number of those in-

terested in the industry, who had gotten together to see what could be done to improve the situation, it was concluded that it would be better to have a selling committee whose business it would be to regulate the shipments and also their destination, as at times some markets are much better than others, and if they were better distributed the returns were likely to be more satisfactory. It was stated that when the price fell below 25c per pound, there was but very little if any profit, and it was determined when this condition developed, shipments should cease until a demand was created at a better price. Official government reports show that over one million dollars worth of canned or bottled mushrooms are imported from France annually, and it is proposed to form a stock company and erect a factory for this purpose in the vicinity of Kent Square, which town is about the center of the industry, and have the surplus bottled or canned to compete with the imported stock. They see no reason why this is not entirely feasible as it will, if successful, not only strengthen the market, but widen it very materially, as the preserved stock can be shipped all over the country, and if it can be sold as cheaply as the imported will crowd it out of the market. Another innovation is the forming of a company for the manufacture of spawn. This has been largely imported, and of late has been grown successfully in this country. As so much is used in this neighborhood, enterprising men interested in the business, see in this a profitable venture, and before long it is thought the company will be organized and have a plant in working order, turning out high grade spawn. K.

TRADE QUIETER.

Business has dropped a few points, and material is more plentiful. Roses, although not in crop yet, are not so scarce and trade on them has fallen off a little. White roses still continue to be short in supply. There has been quite a few Bridesmaid this winter which have sold well, they have even held their own since last fall, and in the dark weather have had a wonderful color. If a perfume could be given the Bridesmaid, it would give the others a hard run. The Bride roses have been remarkable for the large full heads and the pink tinge so often seen in a well grown flower.

NOTES.

The mid-winter show of the Massachusetts Horticultural Society was held February 24-26. The exhibits were contained in one hall. The time was when it was hard to even get a brass medal, now bronze and silver medals seem to be quite plentiful—only rare or new flowers received the honor, but it seems the importance of a medal has been overlooked. Some of the exhibits noted were: Cinerarias, Mrs. J. L. Gardner; cyclamens, Wm. Whitman. Mrs. J. L. Gardner, Mrs. Fred Ayres; well-grown Primula Kewensis from Winthrop Ames and Mrs. Fred Ayres; Primula Obconica were good, Winthrop Ames and J. L. Gardner; narcissus, Wm. Whitman and Mrs. J. L. Gardner; orchids, from Dr. C. G. Weld, J. T. Butterworth and E. B. Dane; roses, from Montrose Greenhouses. Bronze medal for a nice display of hard-wooded plants from Mrs. Fred Ayres. Wm. Sim, nice display of sweet peas and violets. A nice display of apples and pears. Display of spring flowers from Wm. Whitman. A very nice collection of orchids was put up by W. A. Manda, South Orange, N. J. A handsome plant of Cymbidium Traceyanum received a silver medal for culture. This came from J. R. Leeson, Newton Centre, and was a credit to the grower.

President Butterfield of the Massachusetts Agricultural College, along with the trustees of the school, appeared before the committee on agriculture February 21 and spoke for appropriations to more than the \$400,000. President Butterfield said the college desires \$232,000 under its regular appropriation bill, an increase of \$90,000 over the amount appropriated last year, and \$187,000 for special purposes not included in the regular budget. That is quite a bunch of money for one school to have, whether

or not it is worth it is a question that has agitated many minds. I never have heard whether the florists or the farmers get that amount of good out of it.

It is reported in the daily papers that robins have been seen in Greater Boston in large numbers, with the breaking up of the weather, we are liable to have an early spring, which will make it more pleasant for the visitors who come to the welcoming arms of the Hub. Every person in the trade and allied trades ought to do all they can for the comfort of visitors who may come at that time. Boston has been declared by some to be a cold frigid place in which to get acquainted, but in the florist trade visitors, I am sure, have always found it hospitable, and let us hope next month will be no exception.

The glass situation is still booming. Talking with Wm. Burke, manager for the Boston Plate Glass Co., he informs me that he has already, within the past few weeks, sold 10,000 boxes of glass. Here is certainly a record for that time in Boston. Mr. Sanborn of the Stearns Lumber Co. states that his company is booking orders for more than their company ordinarily does at this season.

John McFarland, North Easton, is bringing in to the market some nice calandula. It is a novelty and sells at sight.

### New York. MORE STOCK.

Slightly warmer weather is prevailing, sunshine is becoming a bit more in evidence and flowers of all sorts are beginning to get a little more plentiful, not enough, though, to effect much of a break in the market values as yet. American Beauty roses are perhaps the scarcest flower in the market. Killarney, Bride, Bridesmaid, My Maryland and Richmond are all on the increase in supply. The best grades of white roses are not averaging as well as the pink. On the other hand, the short grades of the white roses will probably average better than the pink of same length of stem, owing, no doubt, to the demand being principally for funeral work. Carnations are on the increase and a tendency to corner prices is very apparent. White sorts seem to have the preference just now. There are a few more gardenias coming in than there were. The demand keeps up fairly good, however, and no change in values has occurred. Violets are much heavier in supply. They have not cleared out well for some days and prices have quite a wide margin. Sweet peas also are more numerous and, in many cases, the quality is improved also. There is a nice demand right along, however, and clearances are the rule. Lilies continue to sell well, the rubrums as well as the white being in good demand. Freesia is clearing out quite satisfactorily, averages will likely be better this week than last. Tulips are quite plentiful and a tendency to lower prices is noted, though they sell out fairly well from day to day. Narcissus of the various kinds are holding up their values quite well, and there are many coming in every day. Lily of the valley is rather too plentiful for the demand, and prices are variable. Cattleyas are plentiful, good sized blooms can be disposed of fairly well, but the smaller flowers cannot be quoted as having any fixed value. Callas, not being so numerous, clear out regularly.

### NOTES.

Matthew Sampson, who for 14 years has been one of the salesmen for "Noe's" in the New York Cut Flower Co., has been appointed manager to fill the place of the late J. F. McConnell. Mr. Sampson has the best wishes of his many friends over his preferment and his long experience with the firm qualifies him for handling his charge successfully. R. Contellon, of the office staff of the Cut Flower Co., has joined the "Noe" forces as salesman.

The New Jersey Plant Growers' Market Association will open their early morning market about April 1 under the Fifty-ninth street bridge, between First and Second avenues, a three months' lease of the quarters there having been secured. It is believed that holding the market there will be far more comfortable than being under a tent, as has been the custom for several years.

The approaching annual dinner of the New York Florists' Club is a chief topic of interest. There seems to be a general feeling of approval over "Shanley's" being selected as the place to hold this annual event. The committee is receiving many applications for entire tables and it looks as though this was going to be the best attended dinner the club ever had.

Kessler Bros. have leased from John Nicholas, the two stores, 111 and 113 West Twenty-eighth street. They will also have the greenhouses which are to be built in the rear of these two stores. The Growers' Cut Flower Co. have leased one of the stores from Kessler Bros. It is expected that the building will be ready for occupancy by May 1.

Fred Sander, Sr. Albans, Eng.

Revisiting the United States After Interim of Twenty Years.

Percy B. Rigley, manager of Pen-nock-Meehan's New York store, together with Mrs. Rigley, leave for Florida Saturday, March 4. Mr. Rigley will return in time to attend the Florists' Club dinner. His wife will remain for an extended visit with her parents, who are residents of that southern state.

A meeting of the American Rose Society was held in Traudly & Schenck's offices Friday, February 24. Among those in attendance were: R. Simpson, A. Farenwald, W. H. Elliott and Sec. B. Hammond.

C. F. Drawiel, who for the last 22 years has conducted a retail business in the block between Eighth and Ninth street, Fifth avenue, Brooklyn, has decided to sell out and retire from business.

### Washington.

#### FAIR SUPPLY.

Business is good. During the past week there were many high class decorations that called for a large amount of fine stock. The local supply of roses and carnations is rather light at present, but the stock that is shipped in from other points keeps up a fair supply. There are plenty of what are generally termed spring flowers on the market and the present mild weather promises to bring in more of them at an early date. In addition to a good supply of tulips and narcissus very fine stock of snapdragons is now seen. Primroses are plentiful and the blooms are frequently cut and used in table decorations. There are but few good white lilies on the market, but there are all the L. rubrums that are needed. The supply and quality of callas is fair and they are in constant demand. Orchids are off crop with the local growers, but there seems to be enough on the market to supply all demands. Sweet peas and single violets continue plentiful.

#### NOTES.

A. Gude & Bro. executed a very elaborate decoration on February 23, at the home of J. Van Vetchen Olcott, a retiring congressman from New York City. It was in the nature of a farewell entertainment. Many blooming plants and several thousand pink roses were used in the decoration in addition to other decorative stock. This firm has had many other decorations this season, a very recent one being for a wedding in which 1,000 Bride roses were used.

The Washington Florists Co., of which J. Louis Loose is president, and Otto Bauer, manager, has recently been showing very fine window decorations, for which the location of their main store is admirably adapted. At their other store, 14th and R streets, they also make a fine display.

It has been supposed that the ticket nominated at the Florists' meeting early this month would have smooth sailing, but it now develops that there are three independent candidates in the field for president, with a possibility of later returns coming in.

C. Ponnett, who has a large space in the Center Market and extensive greenhouses at Alexandria, Va., is showing fine stock in both cut flowers and flowering plants.

The Avenue Floral Co., which recently opened a nice store at 1734 Pennsylvania avenue, N. W., has nurseries at Congress Heights, where they grow privet and other nursery stock.

The lease, good will and fixtures of the American Rose store, 909 F street, N. W., are offered for sale. This store was formerly the retail department of the American Rose Co.

Satisfaction guaranteed.

E. A. BEAVEN, Evergreen, Ala.

Alexander E. Garden is particularly strong on carnations this season. His Beacons are acknowledged to be the best on the market and he has many others.

F. H. Kramer's greenhouses show very fine stock of Bride and Bridesmaid roses. A. F. F.

Brampton, Ont.

After a very long spell of dull, windy weather extending over a period of three months, we are at last enjoying a respite, and the sun accounts for the cutting of 50,000 violets per day at the Dale Estate greenhouses as against 15,000 on even the biggest day of the entire season. Such violets have never been seen in Canada before, many of them measuring 1 1/4 inches across with stems 13 inches long. Carnations are proving a great success this season, and complaints as to their keeping qualities have never been so scarce. The propagating section is particularly busy nowadays. The demand for all kinds of green has been heavy during the year. Roses are well on the way for the next holiday trade, and the present available supply is more in keeping with requirements than has been the case for many weeks past. The Dale Estate imported seven carloads of valley pips from Germany at the beginning of the year and has kept up its reputation as the home of the finest valley in North America. W. G. P.

NEW YORK.—The property owners in Columbus avenue between Sixty-sixth and Eighty-sixth streets have formed the Columbus Avenue Association, for the purpose of civic improvement, and have elected Charles A. O'Reilly, the well-known florist, president.

# The "Spencer" Type of Sweet Peas

## Burpee's Special Re-Selected Stocks for 1911

"Spencer" Sweet Peas are a great specialty with us! We were the first to grow the seed in America—the stock having been entrusted to us before introduction, even in England, of the original **Countess Spencer**. We have grown "the original Beauty" and its many "sportive" children with painstaking care each season since. There are but few other growers who can supply an equal assortment of **True Re-selected "Spencers"** that are uniformly of such choice quality. Seedsmen and Florists can see how superior our stocks now are by the trials at **Fordhook Farms** next June or July, while those who may be in California are invited also to inspect the growing crop at our **Floradale Farm** in the beautiful Lompoc Valley. Every planter's garden, however, is really a trial ground, and we shall be quite content if any "Doubting Thomas" will send us only a portion of his order and **note the difference** in character of flowers produced.

 You can buy so-called "Spencer" Sweet Peas at half our price—but the result will only be disappointment—and when in flower you will surely admit that you would gladly have paid **even double our prices** to have had the **Burpee-Quality** of the **True Spencer Type!**

|                                                                                                                       | Per pkt. | Per oz. | Per ¼ lb. | Per lb. |

**W. ATLEE BURPEE & CO., Philadelphia, Pa.**

# James Vick's Sons, Largest Growers of High Grade Aster Seed in the World, Rochester, N. Y.

We have grown Asters longer, introduced more varieties, grow larger quantities and sell to more Seedsmen and Florists than any other Aster grower in America.

## Vick's Imperial Rose

This illustrates one of the newest of half a dozen varieties from the same family as Daybreak and Purity. A deep rich rose color. One of the best recent introductions.

### Prices:

|           |        |
|-----------|--------|
| 1-16 oz., | 20c    |
| 1-8 oz.,  | 35c    |
| 1-4 oz.,  | 65c    |
| 1-2 oz.,  | \$1.20 |
| 1 oz.,    | 2.00   |

## Vick's Early Upright

Numerous readers of THE AMERICAN FLORIST will recognize this as a popular novelty of last year. Many Florists claim they got more flowers, larger blooms and longer stems than they could grow of other early kinds, because it grows as vigorously and yields as abundantly as many of the late Asters. The flowers are solid, ball shaped and considerably above the average in size. A medium early variety which has been a money maker wherever tried. Two colors, white and lavender pink.

### Prices:

|           |        |
|-----------|--------|
| 1-32 oz., | 25c    |
| 1-16 oz., | 40c    |
| 1-8 oz.,  | 60c    |
| 1-4 oz.,  | \$1.00 |
| 1-2 oz.,  | 1.75   |
| 1 oz.,    | 3.00   |

## Vick's Mikado Pink

The Rochester.

One of the most beautiful Asters ever introduced. Selected by the Chamber of Commerce as the official flower of Rochester, and renamed by us at their request. A mid-season, freely blooming large flowering variety.

### Prices:

|           |        |
|-----------|--------|
| 1-64 oz., | 20c    |
| 1-32 oz., | 30c    |
| 1-16 oz., | 45c    |
| 1-8 oz.,  | 75c    |
| 1-4 oz.,  | \$1.25 |
| 1-2 oz.,  | 2.25   |
| 1 oz.,    | 4.00   |

## Vick's Violet King

Introduced by us several years ago. Catalogued now by all leading seedsmen. Habit is similar to Vick's Late Branching, vigorous growth with long, stiff stems. Flowers resemble the quilled varieties, but much larger and broader, the inner petals being fantastically twisted, curled and incurved, completely covering the crown.

Prices: 1-16 oz. 20c; 1-8 oz. 30c; 1-4 oz. 50c; 1-2 oz. 80c; 1-oz. \$1.50

Our "Aster Book for Florists" containing full descriptions of these and all the other leading varieties, will be mailed free to Florists and commercial growers only.

Our booklet "How to grow Asters" price 10c. free with every order of Aster Seed.

Indianapolis.

Flowers are coming in more plentiful. This week finds the florists very busy on account of the automobile show. Every automobile salesman in town is having more or less decorating done. Some of them are very extensive, consequently all the decorators will be busy.

## NOTES.

Smith & Young Co. are cutting some fine sweet peas with stems 14 inches long and they will soon have plenty of roses, if the weather continues to be fine.

The new boulevard is to be built on the north edge of town. It will take about 25 feet of Baur & Smith's ground on Thirty-eighth street side.

Albert Pittet's new sweet pea is certainly fine, a very light pink with fringed edge, the flowers will bring three or four cents.

Albert Marshall, formerly with Pahud Floral Co., will take a position with A. Wiegand & Sons March 1. The Pahud Floral Co. expects to rebuild this summer with a probable cost of \$10,000.

Peter Wieland was a visitor last week. He reports business in his line very good. C.

SHEBOYGAN, WIS.—Otto Schucht, who has been in business for 42 years and is now nearly 83 years of age, conducts his business with as much vigor as ever. On February 21 he celebrated his golden wedding anniversary.

## The Seed Trade.

### American Seed Trade Association.

E. L. Page, Greene, N. Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duran, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.  
Annual convention at Milwaukee, Wis., June 20-22, 1911.

### Congressional Seedsmen.

#### PUBLIC PAYS SALARIES AND SUPPLIES SEEDS.

If the current custom of indiscriminate distribution shall indefinitely continue, if this congressional comedy shall drift into a continuous performance, we shall ultimately be driven to the mournful admission that we are not statesmen, but seedsmen; and it will be in order for some distinguished seedsmen, some sainted here of some memorable distributions, some legislative knight upon whose shield is blazoned a radish in its glory or a turnip in repose, to arise in his place with becoming gravity and move, Mr. Chairman that the American eagle be taken from the mace and supplanted by a package of vegetable seed as the supreme emblem of the genius, the character, and the principal occupation of American statesmanship.—*Morris Sheppard, of Texas, in House of Representatives.*

**LEMON SETS** is the new name for the odoriferous onion product.

**FOREIGN** demand for American grown tuberose bulbs has exceeded the supply this season.

**VISITED CHICAGO:** Kirby B. White, Detroit, Mich.; A. J. Brown, Grand Rapids, Mich.; G. Hylkema, representing Van Zanten Bros., Hillegom, Holland.

**LAWYER** legislators, mainly, are those who make laws providing easy jobs for the aforesaid lawyer legislators when their constituents "get on to them."

**CHICAGO.**—Prices on the board of trade March 1 for grass seed were noted as follows: Timothy, \$10.50 to \$12 per 100 pounds. White clover, from \$22 to \$30.

**THE** fool legislative contagion, purporting to regulate business in seeds and plants, is spreading to the various states and no doubt the city fathers will soon launch forth in ponderous ordinance to kill off the seedsmen and nurserymen forever.

**NEW YORK.**—Business continues to grow heavier in volume. Some of the French flower seeds only began to arrive this week.—C. W. Scott, of the Yokohama Nursery Co., spent a day in Philadelphia recently.—Vaughan's Seed Store employees have reserved a table to accommodate eight persons at the Florists' Club banquet, which will be held at Shanley's March 18.

## Braslan Seed Growers Co.

Lettuce, Onion, Sweet Peas,

Growers for the Wholesale  
Trade Only.

**SAN JOSE, CALIF.**

### Ask Your Congressman Where He Stands.

Now is the time to ask your representative if he has read the corrected hearings on seed bill H. R. 29163 and if he is now satisfied that the garden and flower seed dealers should not be legislated against or put under a prison penalty law. It is very important that you know now and know how your senators stand. Communicate that knowledge to Chairman Woodruff at Orange, Conn.

### Congressional Dutch Bulbs.

Secretary Wilson in his annual report for 1910 says: "An effort to propagate Dutch bulbs has been continued with encouraging results. Climatic conditions in the Puget Sound region, where the work is being done, appear to be favorable, and it is hoped that a sufficient quantity can eventually be produced to furnish the supply used for congressional distribution."

### Bringing in the Boar's Head.

Mr. and Mrs. Augustus Goodwin, formerly of Chicago, who have been traveling abroad for some time, have sent greetings from Algeria, where they have been spending the winter. Mr. Goodwin has been hunting wild boar and has just returned from an expedition. They are planning soon to enter the desert with their own tents and Arabs. Mrs. Goodwin has been in ill health for some time, and open-air life has been prescribed for her.

### Dammann & Co.'s Novelties for 1911.

Among the novelties in flower and vegetable seeds introduced this year by Dammann & Co., San Giovanni, a Teduccio, Italy, are noticed the following in the flower section:

*Cleome gigantea alba*, a white flowered *Cleome gigantea*, well known as a decorative plant of the highest value. The large tufts of splendid white flowers bearing long stamens are marvellously effective in large groups, or as single specimens.

*Helianthus helios*, dwarfier and more robust than *H. argyrophyllus*, producing large brilliant yellow flowers with two or three rows of petals on long strong stems.

*Ipomea imperialis collata*, four new colors, carmine with white border, purple, slate color, purple with white border, of this fine *ipomea*.

*Zinnia crista grandiflora*, new large flowering with double flowers, the petals are curled, resembling a cactus dahlia. The flowers are light and graceful and well adapted to bouquets.

Solicited.

### Iowa Legislator After Florists.

The seed dealers throughout the country have been having quite a little trouble during the past few years with bills which propose to regulate the sale of seeds, but heretofore no legislature has been sufficiently foolhardy as to undertake regulating the sale of geraniums, roses, and other greenhouse plants, bulbs, etc., but a bill just introduced by Senator Chapman in this state, if passed would make it necessary not only for the florist to take out a \$5 license but he would be compelled to take out a duplicate license costing \$1 additional for each employee, including the delivery boys. He would also have to guarantee each plant, root and bulb, sold to be true to name, to be free from insects and disease, and statement specifying whether seedling, grafted or budded, and he shall not misrepresent by picture or other words, every plant sold must be exactly like the picture in the catalogue.

A state inspector has the right to charge him \$10 per day for examining his stock, and apparently has the right to confiscate and destroy without recourse. It is really the most unwise and ill-considered law which I have seen, but from present indications, think there will be no trouble to kill it in the committee room.

Enclosed find copy for your inspection, and you will notice that this bill would also apply to potatoes, onions, etc.

CHAS. N. PAGE.

### Catalogues Received.

Florists and Seedsmen, Scratch or Poultry Food Sell Your Own

We will make it for you under your own brand, for \$25.00 per ton. Send today for sample 100 lb. bag \$1.50. Mr. C. E. Jensen, of Atlantic City, N.J., on Oct. 27th, 1910, writes as follows: "I want to state that your three grades of Poultry Food—Chick Starter, Developing Food and 'Square Deal' Scratch or Poultry Food—stands without an equal today. They are perfect mixtures and sound in grain and a pleasure to handle."

## NEW RED DAHLIA MRS. MINNA BURGLE.

A cross between Joe Thomson and Clown originated by Mr. J. Burgle of Fruitvale, Calif., and named after his wife Mrs. Minna Burgle, is the best Red Decorative Dahlia ever produced, and will precede every other red variety now grown for cut flowers here or abroad and will draw your attention instantly when planted in a collection of dahlias; one of the most showy flowers ever created.

True decorative, bright scarlet showing a darker shading in center, bold, erect flowers 6 to 8 inches in diameter with excellent stem; foliage remarkable substance; height 5 to 6 feet; good keeper and will not burn in hot weather and more freely blooming than either parent. This variety has been tested by me for three years and has shown no weak points. A vase of 50 blooms shown by me and a basket of Mrs. Minna Burgle Dahlias exhibited by Sievers Floral Co., of San Francisco, both received first prize in the Fall Flower Show in San Francisco and caused more comment among gardeners and visitors than any other exhibit. Cut flowers sold for the first time last year brought 50 per cent more than any other variety of dahlias, including Joe Thomson.

Strong tubers, \$1.00 each; \$9.00 per dozen.

**PAUL H. ECKELMANN,** San Rafael, Calif.

Baltimore.

CONDITIONS IMPROVED.

The past few days have seen a great change in the weather, and higher temperatures, sunshiny days and southern airs are in contrast with the forbidding fogs and mists which have prevailed since Christmas. It is yet too soon to note any change from the improved climatic conditions. Roses are, in quality, not yet up to the mark, but conditions are improving. Violets are in great supply and the merchants of the curbstone have had an abundance. Bulbous stock, sweet peas and freesia have been in excess of demand. It may be said that the conditions of trade have been far more favorable than since the panic of 1907. The drawback has been the insufficient supply.

### NOTES.

The officials of the Roland Park Company have been giving out some pretty big orders for trees and shrubs. This is one of the most attractive of our suburbs. Two new sections are now being developed by the company. Nearly 70,000 individual plants have been ordered for planting this spring.

The Park Board has purchased and will improve the Esaber woods on the Liberty road, about twenty-five acres in extent, with many of the noblest examples of aboriginal forest trees to be found in the location, and which will be a most desirable addition to our park system.

There is no frost in the ground and on light soils early crops are being planted and in the nurseries are apparent signs of activity.

S. B.

Frederickton, N. B.

John Ebbington reports that they are still pursuing the even tenor of their own way so far east. It has been rather quiet since January 1, although their stock never looked so well. They have an unusually fine lot of plants in bloom for this season, azaleas, cyclamens, cinerarias, primulas, daffodils, etc. Carnations never looked better. Easter lilies are in several stages of growth for provincial trade, mostly for cut flowers. The weather has been cold, some 30 below zero at times.

The reciprocity agreement is making quite a sensation here at the present time in the journals. In general they accept it with favor, although fruit men seem to think otherwise; but for the general good they think it will work out all right.

## Market Gardeners

**Greenhouse Vegetable Growers and Market Gardeners' Association.**

B. L. Watts, State College, Pa., President;  
H. H. Hall, Grand Rapids, Mich., Vice Pres-  
ident; S. W. Severance, 503 Illinois Life  
Building, Louisville Ky., Secretary; M. L.  
Ruetenik, Cleveland, O., Treasurer.  
Annual meeting at Boston, Mass., 1911.

### Prices of Indoor Fruits and Vegetables.

New York, February 25.—Mushrooms, 50 cents per pound; cucumbers, 20 cents each, lettuce, 75 cents per dozen heads; tomatoes, 30 cents per pound; radishes, 60 cents per dozen bunches; asparagus, \$6 per dozen bunches; rhubarb, \$1 per dozen bunches; grapes, \$1 per pound; beans, 25 cents per quart; peas, 25 cents per quart.

Chicago, February 27.—Mushrooms, 20 cents per pound; cucumbers, \$1.75 to \$2.15 per box, small; lettuce, 25 cents per pound; radishes, 10 cents to 40 cents per dozen bunches; rhubarb, 35 cents to 45 cents per dozen bunches.

### Cleveland.

#### STOCK MORE PLENTIFUL.

Stock is beginning to arrive in increased quantities. Single daffodils and Paper White narcissus were a little shy, but all other bulbous stock was quite plentiful. Carnations are coming in large bunches, due to a few days of warm sunshine, red being very much in demand the past week. White roses are still very short. The first cut of long stemmed American Beauties arrived this week and the quality was exceptionally fine. Sweet Peas are plentiful and of excellent quality. Lily of the valley is moving a little slow. Violets have dropped in price with only a fair call. Calla and lilies are abundant. Roman, Dutch and miniature hyacinths do not seem to be much in demand. Smilax, Asparagus plumosus and A. Sprengeri are plentiful but clean up daily.

#### NOTES.

About twenty-five representative wholesale and retail florists and growers of this city met at the Hofbrau, February 24, to form an advertising club. The plan decided upon is to appoint an advertising committee, to hold regular meetings at least once a month, and have regular club rooms. This committee proposes to hold a flower show in the near future, as a starter, to get the public interested, and to advertise regularly in the local papers. H. P. Knoke was appointed chairman of the committee. The next meeting will take place at the Hofbrau, March 3. All florists are welcome.

Miss M. Schueren has sold out her flower and seed business at 4493 Lorain avenue to Harry Dow. Mr. Dow will continue along the same line, only going in a little stronger on cut flower work.

E. A. Heepe, of Akron, W. A. Cogill, of Salem, F. C. Whithruhn, G. W. Smith and H. P. Knoke, of this city, are going to Rochester, N. Y., to testify in an automobile accident case.

Miss Jane Eadie has spent the last few weeks in Florida on a pleasure trip.

C. F. B.

JACKSON, MICH.—H. M. Burt, formerly of Burt & Coggan, Battle Creek, has a fine store in the Otsego hotel, which fronts on Main street. He has started building two large greenhouses, 28x157 feet about 1 1/2 miles from the heart of the city on the car line and expects to have them ready by April 15, if weather permits.

### Detroit.

#### SATISFACTORY CONDITIONS.

Trade conditions the past week were most satisfactory. Nearly all the good stock sold at fair prices. This was notably true of roses which continue to be in short supply and even the shorter stemmed ones found ready sale. Carnations showed a tendency to accumulate, but the best of them brought good prices, and the warm spring weather that prevailed most of the week gave the street fakir an opportunity to keep the tables in the wholesale house clear. Much of this stock was fortunate to escape the rubbish box and yield anything to the grower. The same may be said of the bulbous stock. Some of it was fine and sold at remunerative prices, but too much of it was poorly grown and still poorer varieties, and the result was the inevitable.

#### NOTES.

The next club meeting Monday evening, March 6, promises to be a most interesting one. Ferdinand Kolbe will read a paper on "Carnations" and Philip Breitmeyer, who just returned from an extended trip to Cuba, will address the members on his observations in that country as well as in Florida and the other coast states, through which he passed on his return home.

Stephen Taplin, the veteran florist, has been confined to the house since last November, suffering much from raptorial affliction that has troubled him for many years.

Frank Smith, who about twenty-five years ago conducted a greenhouse establishment on Gratiot Avenue above Mt. Elliott, died February 23, aged 62 years.

J. B. Dinser, Highland Park, will rebuild and enlarge four houses in April. When completed three of them will be 20x125 and the other 18x27.

G. H. Taepke, who had a slight attack of erysipelas, is rapidly regaining his health.

Herman Knope, who has been ill for some time, is now improving.

Visitors: C. S. Ford, Philadelphia; A. G. Pruyser, Holland; Mr. Henry, of Henry & Lee, New York. J. F. S.

### Cincinnati.

#### A GREAT SUFFICIENCY.

There is, as DeWolf Hopper would say, a sufficiency of nearly everything. Carnations and bulbous stock are coming in very strong, and the former shows a very strong tendency to accumulate. If the present bright weather continues they will undoubtedly be coming in stronger. White carnations alone, up to the beginning of this week, clean up every day. Enchantress is in very large supply, and although the demand is good the supply is so large that they do not clean up regularly. Roses are again coming into crop, and if the bright, warm weather continues within the next fortnight we will be able to obtain them in good quantities. Almost every order for them is being filled in full. Red still remains scarce. Easter lilies are increasing in numbers.

There is also a good supply of callas. Lily of the valley drags. Bulbous stock is in large supply, and the choice finds a ready market; violets move slowly; sweet peas sell readily. The supply of green goods of all kinds is more than ample.

#### NOTES.

Callers to the trade were: C. S. Ford of Philadelphia, Rupert E. Hall, representing Reed & Hall, of New York, and William Eisner, representing Newark Paraffine & Parchment Paper Co., of Newark, N. J.

J. W. Dudley and wife of Parkersburg, W. Va., Mrs. Buck of Washington Court House, and O. C. Heberling of Georgetown, Ky., came to town for the auto show.

The marriage of Frank Sonnenberg of the Hyde Park Rose Co. and Miss Marion Johnson Leighton was solemnized February 22.

Charles Bosworth, of the J. M. McCullough's Sons Co., is the happiest man in Cincinnati. It's a boy.

Gus. Adrian has been cutting some very fine Narcissus Victoria and Dutch hyacinths and tulips.

The death of S. J. Galloway of Eaton is reported and regrets are heard everywhere.

Peter Herb, of Mt. Healthy, is growing Dutch hyacinths for Otto Walke, Bowling March 6 at Finke & Craig's. H.

NEW CASTLE, IND.—Peter Weiland will build a range of 10 greenhouses 28x300 feet, using the Foley steel gutter. The Foley Mfg. Co., Chicago, has the contract.

JUNCTION CITY, KAN.—Thos. Keeshan, Jr., of the Junction City Floral Co., has purchased a four-acre tract three miles east of Topeka, and will erect a greenhouse thereon at once and will grow flowers for wholesale.

### A GRAND NEW CARNATION

## Bright Spot

Outclasses everything heretofore grown in the pink dark class.

Won first honors in the 100 class for the best dark pink at the A.C.S. meeting, Pittsburg, January, 1910, also at the Chicago Flower Show, November, 1909.

It is a pure bright dark pink of even shade, size 3½ inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

Price: Per 100 \$12.00; per 1000, \$100.00; per 5,000, \$400.00. 25¢ per 100; 250¢ at 1000 rates. Place your order now to be in on early deliveries.

## The Nursery Trade

American Association of Nurserymen

W. P. Stark, Louisiana Mo., President;  
E. S. Welch, Shegandosh, Ia., Vice Presi-  
dent; John Hall, Rochester, N. Y., Sec'y.  
Thirty-sixth annual convention to be held  
at St. Louis, Mo., June 14-16 1911.

VISITED CHICAGO: Adrian Van Leeuwen, Jr., Worcester, Mass.

MONTICELLO, IA.—Benjamin Hoyt, a well-known nurseryman, died at his home February 7.

### American Ass'n of Railroad Gardeners.

At a joint meeting of the executive committee and the committee of arrangements of the American Association of Railroad Gardeners, held in Chicago February 25, preliminary arrangements for the programme and entertainment of guests at the convention to be held in August were discussed. It was decided to issue a beautifully illustrated booklet as a souvenir to be the finest output of the printers' shop, containing illustrations of railway gardening on all the leading railroads in the United States and Canada. Each member of the association will be given a copy and each railroad represented 100 copies. The members of the executive committee are Patrick Foy, Roanoke, Va., president; J. S. Butterfield, Lee's Summit, Mo., secretary-treasurer; J. E. Smith, Ridley Park, Pa., chairman; H. A. Bode, Champaign, Ill.; F. W. Vail, Dunellon, N. J.; The members of the committee of arrangements are Geo. B. Moulder, Chicago; W. F. Hutchinson, Pittsburg, Pa.; C. H. Tritschler, Nashville, Tenn., and J. Gipner, Niles, Mich.

### Pittsburg.

#### PLENTY OF STOCK.

Old Sol is with us again and everything is lovely, plenty of stock of all kinds and a nice demand. Prices are coming down and a few days will find them about right. With this brand of weather the wholesalers will have a full hand in Lent, as the growers are doubling their shipments.

#### NOTES

Gustave & Julius Ludwig have opened their new store on Federal street, and it is one of the "classy stores" of Pittsburg.

Jack Frampton was suddenly called out of town on account of sickness, his mother being critically ill.

Geo. A. McWilliams, Natrona, was a business caller today and states business is very good up his way.

The McCallum Co. are featuring a fine grade of white and lavender lilac. J. B. Murdock Co. are receiving some very fine pink and white sweet peas. Pittsburg Cut Flower Co. are offering some fine tulips and daffodils.

Miss Freil, of Zeiger Co., has been laid up with a severe cold.

South View Floral Co., Carrick, are cutting very nice callas.

DANIELSON, CONN.—A fire causing damage to the barn of W. J. Schoonman to the value of \$400 occurred February 18. The fire department saved the greenhouse and other buildings.

ROCK ISLAND, ILL.—The business of H. H. Hensley has assumed such proportions that he has been obliged to enlarge his quarters at 330 Twentieth street, and has refurnished the store with new wall cases, window trimmings, etc., and a new refrigerator of special construction and the wood work finished in white enamel.

### Toronto.

#### STOCK OF GOOD QUALITY.

Business is one of the very best, and with brighter weather we are now better supplied with stock than at any time since last fall, roses of which there has been a decided shortage all season are again becoming plentiful, and the lowering of the prices for the better grades is welcomed. Richmond on strong sturdy stems. Killarney with a depth of color, and the other varieties all showing correspondingly good quality, are now plentiful enough to fill orders. Carnations are plentiful with the quality A1, and meet with ready sale. Lilac in quantity and orchids in variety give a tone of quality to the windows. Bulbous stock is plentiful and although Von Sion and Golden Spur narcissus are occasionally sold at low prices, the other varieties hold their own. Princess of Wales violets, about the only variety grown here, are now at their best, stems a foot long are common and flowers the size of pansies are not unusual, the sale of these is enormous. Lily of the valley is the very best ever seen here, which is making it strong for a section noted for quality in this flower, some of them are being consigned as far as Chicago.

#### NOTES.

The Gardeners' and Florists' association held a social evening February 21, which was a huge success and was largely attended, and a splendid opportunity was afforded to become acquainted with the officers for this year who are: F. Adams, president; S. Kirk, first vice-president; E. E. Turner, second vice-president; T. Mantion, Geo. Douglas, W. Jay, W. H. Foord, E. Dale, W. Wilsheire, J. Bryant, executive committee; Geo. Mills, treasurer; E. F. Collin, secretary.

J. H. Dunton, who was operated on for appendicitis, is again convalescent, an improvement which was welcome to his many friends. Taken ill out of the city, he was hurriedly removed to the General Hospital here, and for days his recovery was despaired of, his strong constitution and strict ways of living were in his favor and it is expected that he will return home in a few days.

The new palm house in Allan Gardens has been completed, foreman E. F. Collins has it nicely arranged with some very choice specimens. It is a

fine imposing building and was much needed.

Frank Duffert is marketing some well grown lilac plants, of which he makes a feature each season. H. G. D.

NEW ORLEANS, LA.—Plans to make this city one of the great points for the culture and shipment of orchids will be discussed at the March meeting of the New Orleans Horticultural Society. J. A. Nevsham, who has recently made several trips to Guatemala, investigating the possibilities for the importation of the plants, will read a paper on "Orchids and Orchid Culture."

Lager & Hurrell, Summit, N. J.

St. Louis.

LOWER PRICES.

Cold weather has ruled all the week, but it is now much warmer. Flowers are becoming more plentiful, roses are coming in more freely, the prices of carnations are lower, and bulbous stock moves very slowly. Violets are of poor quality. The price of hardy ferns has advanced.

NOTES.

George Schriefer, salesman for C. A. Kuehne was married to Miss Fedora Pribble February 22. It was a surprise to his friends, who extend to him and his bride their congratulations.

George Anceмуeller is handling a number of orchids, and is making a specialty of the green carnation dye. Fred Alves and Al Gunz, his two salesmen, are both hustlers.

Special sales are now being held. The Paris Floral Co. had a bargain sale of carnations and Grim & Gorley and Alex Siegel had special sales of violets.

It is announced by J. F. Ammann that three employees who have been with him from eight to sixteen years, have bought his greenhouses.

There were several window decorations commemorating Washington's Birthday, notably the Mullanphy Floral Co. and Otto Sander.

A fire at A. W. Murray's store on Union boulevard did considerable damage. The loss was covered by insurance.

George Kessler arrived here February 20 from Cincinnati to develop the city parks and playgrounds.

Mrs. M. L. Pelletier has a very nice store on Twelfth street and is enjoying good trade.

The little chickens among the plants and flowers in Young's window attract attention.

A. C. Brown, of Springfield, Ill., is shipping in some fine carnations.

W. F.

WOONSOCKET, R. I.—E. A. Chipman is reported quite sick with a heavy cold.

# EASTER PLANTS

## Prepare for Easter

And purchase your Easter supply direct from your old reliable friend, Godfrey Aschmann, of Philadelphia. Two more houses devoted this year to Easter plants, and we have an immense stock for immediate shipment.

Lilium Multiflorum.

Our own importation from our general grower in Japan, raised from 9-10 in. bulbs, started in 6 in. pots, last October, have kept cold. 25c to 30c each, by the dozen or hundred. Plant medium size, from 5 to 10 buds to the plant; 10c per bud; plants under 5 buds. 12c per bud. Just right for Easter. We have the finest lilies this year in Philadelphia and all over the country. is the town talk from florists and agents daily visiting our place. "We never have seen anything like it," said two well-known growers from Cincinnati and Short Hills, N. J., the other day, when visiting our place together. We have three houses full in 6 in. pots nicely staked up, and can supply all applications.

Two houses in Cineraria Hyb. Grandiflora, just right for Easter; in bloom now if desired. Our strain in size of plants and flowers are twice as large as the old varieties; flowers when open will last much longer than usual; perfect green foliage in fine brilliant colors, 5½ to 6 in., 25c. 35c. 50c to 75c, and as high as \$1.00 each; 4 in. ready for a shift into 5½ to 6 in., 10c each; \$1.00 per 100.

Our Hydrangea Otaka can't be beat; full of buds; right for Easter trade; every branch nicely staked up. 6 in. pots, 25c, 35c to 50c; 7 in. 75c, \$1.00, \$1.25 to \$1.50.

Hyacinths of our own importation, four best colors, Gertrude, best pink; King of the Blues, best blue; Grand Maître, light blue; La Grandesse, best white; 4 in. pots, now outside in cold frame, covered with leaves; two weeks will force them out into bloom; now \$10.00 per 100; when in bloom, \$12.00 per 100.

Von sion Daffodils (double nosed), best double Narcissus in cultivation, three bulbs planted in a 5½ to 6 in. pot, \$2.50 per doz. pots.

Tulips, Tourne-sole double, red and yellow variegated and Murillo, beautifully shaded rose pink, three bulbs in one pot (4 in.), \$15.00 per 100; \$1.80 per doz.

Ipomoea Noctiflora, our so well-known pure white, waxey Moonflower, bearing flowers very fragrant and as big as asparagus. 2½ in. pots, will make good stock for you to propagate from, \$5.00 per 100.

**GODFREY ASCHMANN**  
Wholesale Grower and Importer of Potted Plants. 1012 W. Ontario St., PHILADELPHIA, PA.

# ROSES ROSES

50 Sorts in Leading Varieties. Teas, Hybrid Teas and Hybrid Perpetuals. Nice healthy stock, or large 2-year old plants. Write for list.

Let us know your wants.

Wagner Park Conservatories, Sidney, O.

## Azalea Indica.

Remember we are headquarters for Azalea Indica, grown for us under contract in Ghent, Belgium under my personal inspection, by going abroad every year and looking them over.

Azalea Indica, Easter forcing: Veranoeana, Professor Wolters, Empress of India, Schryveriana, double variegated 60c, 75c. \$1.00 to \$1.50; Mme Van der Cruyssen, Simon Mardner, pink, Niobe, white, Apricot, red, 60c, 75c. \$1.00, \$1.25 to \$1.50. In large plants we have Niobe, Helena Thielman, Bernard Andreas Alba, white, Mme. Van der Cruyssen, and others, \$1.50, \$2.00 to \$2.50.

Azalea Indica, with buds advanced, showing color and partly in bloom, Deutsche Perle, Veranoeana and Simon Mardner, 60c, 75c. \$1.00 to \$1.25.

## Araucarias Our Specialty.

We are the largest importers of these lovely decorative plants the Araucaria Excelsa, Robusta Compacta and Glauca, 6,000 of the choicest last spring importation, now ready for immediate shipment. It is of no use to look elsewhere for cheaper prices. We now control and will control the market of the Araucarias in the future.

Araucaria Excelsa, raised from top cuttings, no seedlings. Plants, 5-5½-6-7 in. pots, 15-18-20-25-30 in. high, 4-5-6 tiers, 2-3-4-5 years old, 60c, 75c, \$1.00, \$1.25 to \$1.50 each. We give big value for your money. Just think! An elephant, 6 in. pot, 4 years old, 4-5-6 tiers, 20-25 in. high, for only \$1.00 to \$1.00; a jumbo, 6 in. pot, 5-year old, 25 in. and over, with as a bushel basket, 5-6 tiers for only \$1.00; and what do you think a holy terror, 30 to 40 in. and over, 5-6-7 tiers, worth \$2.00, for only \$1.25 to \$1.50.

Robusta Compacta, Excelsa Glauca, 6 in. pots, \$1.00, \$1.25, \$1.50 to \$2.00 each.

We also have the nicest Araucaria Robusta Compacta and Excelsa Glauca, a house full, for only \$1.25 to \$1.50, worth double.

Adiantum Hybridum, 6 in. pan, 25c to 30c. Asparagus Sprengeri, 2½ in. 3c; 4 in., 10c. Spirea Cladstone, two houses of our own importation, direct from Holland, full of buds, 5½ to 6 in. pots, at 25c, 35c to 75c. Dracena Bruni, 25 to 30 in. high, 6 in. pots, 40c to 50c. Highly recommended for store and house decoration: stands heat, cold and dust.

Latania Borbonica (Chinese Fan Palms), 30 to 35 in. high, 6 to 7 in. pots, 50c, 75c to \$1.00 each. Kentia Forsteriana, in fine shape, 6 in. pots, 30-35-40-45 in. high, 4-5-6 years old, \$1.00, \$1.25, \$1.50, \$2.00 to \$2.50 each.

Kentia Belmoreana, 30-35-40 in. high, 5-5½-6-7 in. pots, 5-6-7 years old, \$1.25, \$1.50 to \$2.00 each. Kentia Belmoreana, combination plants, 25 to 30 in. high, made up of 3 plants, 6 to 7 in. pots, \$1.00, \$1.25 to \$1.50; 4 in., 20 in. high, 20c to 25c.

Our Ferns this year are exceptionally very fine. Boston, Scottii, Whitman and Scholzei, 5½ and 6 in., 35c, 40c and 50c; 7 in., large bushy plants, 75c to \$1.00. As big as a bushel basket, \$1.00 to \$1.25. Remember, all our Ferns are pot-grown, not rooted from bushes.

Neph. Glatrasii, a new beautiful fern, an improvement on Scottii, much shorter and bushier than Scottii, 5½ in. pots, 50c; 3 in. pots, 25c.

Ferns for dishes, best assortment, 2½ in. pots, at \$4.00 per 100.

Crimson Rambler Roses, 6 in. pots, 3 feet high, nicely staked up and bent down, 50c to 75c.

Mention if ship with or without pots.

Cash with order, please.

All plants must travel at purchaser's risk.

## VENTILATING MACHINERY

The old reliable machines are the most powerful, least complicated of any on the market

## The Standard Steam Trap

Ask someone who is using a Standard for his opinion of it.

Write for catalogue.

E. HIPPARD CO., Youngstown, Ohio.

## Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

## Morehead Steam Traps

† The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

† It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

† The majority of florists are using Morehead Traps If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

† By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO.

Department 'N'

Detroit, Mich.

## WHAT THE USERS SAY

## Heats up Some and Quick.

ALVA, OKLA., Jan. 4th, '11.  
 Gentlemen:— I thought I had better let you know something about the heating plant you sold me. Well, we had a blizzard here the last three days and nights and the thermometer went down to 11° below zero. Most everything in town froze up and people lost all their plants, but we are doing business at the old stand. We had no trouble to keep on the water in the boiler to 170 and maintained growing temperatures in houses with part of the piping turned off. We are sure we can hold the temperature at 20 below zero. This boiler and piping system surely heats some and quick.

W. R. MAXWELL.

Tacoma, Wash.

The weather has been very favorable all winter and the business generally very good, there was a let up after the holidays but normal conditions followed. The cut flowers are of good quality, but there has been a scarcity of roses and carnations. Violets are in good condition but the demand does not equal former years. There are not so many Roman hyacinths, Paper White narcissus and lily of the valley as formerly. Blooming plants are scarce, there being but a limited variety of these grown. The mildness of the weather has resulted in a general saving of fuel.

NOTES.

Mrs. M. E. Hayden has returned from a trip to California. She is handling a fine grade of carnations grown by F. C. Smith.

A. A. Hinz has a very fine line of stock. He has installed a new boiler. The Northwestern Floral Co. have closed the store on Pacific avenue.

G. Ekstrand, owing to poor heating facilities, suffered a bad freeze.

Mrs. Watrous, in the public market, has had a very busy season.

H. W. Walker has two new houses, 20x108 feet, ready to glaze.

S. L. H.

MARIETTA, O.—Henry J. Weber died February 12 after a short illness, aged 27 years. With the exception of three years spent in Des Moines, Ia., he had been identified with the florist business here. A mother, one brother and several sisters survive him.

## A Word to the West about Our Western Factory.

We have come right out and camped in the enemy's country, because we put our ear to the ground, and listening, heard sounds that unmistakable meant that you want better material and are going to build better houses. Some of you had already tried to buy houses of our Eastern factory but freight from so far knocked us out. But now we have a factory at Des Plaines, just 17 miles from Chicago Post Office, or four miles beyond the city limits. It is a factory after your own heart—up-to-date in every way. The raw materials go in one end and the finished product comes out the other and is loaded directly on the cars. Not an unnecessary move—not an ounce of power that doesn't count. What will this do for you? It means that we can compete and will compete with any other concern turning out a high grade of materials. But there will be this difference our construction is better—and dollar for dollar you will get more for your dollars. Mr. Sykes will make this clear as day to you. He knows greenhouse building from A to Z. Get in touch with him, he is the kind of man you like. Write him at the Rookery building, Chicago.

The Rookery

Can't you just see a duplicate of this house located right on your grounds and picture in your mind the hundred and one things you could grow in it. It is 50-ft. long with three compartments, a work room, and row of cold frames. It will cost you— but hold on, let us talk it over first then you will understand why we can build it so reasonably. We will gladly send you photos showing other points of view.

## The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.

The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from  
start to finish.

When the machine is filled to within six inches of the top, a few strokes  
of the pump will compress enough air in the tank to produce a continuous  
mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods,  
and the Mastin Whitewash Nozzle for Bordeaux mixture.

Sold throughout Seedsmen, Dealers in Florists' and Poultry Supplies.

J. G. MASTIN & CO., 3124 West Lake St., CHICAGO, ILL.

## Nikoteen

for spraying plants and blooms.

## Nikoteen

## Nikoteen

over a flame. Full Pint Bottles, \$1.50.

The most effective

and economical

material there is

Is skillfully extracted

from leaf to

bacco and carefully

refined: it is clean and easy to apply.

does the work when

vaporized either in

pans on pipes or

over a flame.

## Nikoteen Aphid Punk

Specially prepared for fumigating closed  
houses, it vaporizes the nicotine evenly  
and without waste. Nothing keeps a house  
free from Aphid so cheaply.

Price \$6.50 per case of 12 paraffined boxes.

All Seedsmen.

## Cattle Manure in Bags Shredded or Pulverized

Pure—dry—uniform and reliable.  
The best of all manures for the  
greenhouse. Florists all over the  
country are using it instead of  
rough manure.

## Pulverized Sheep Manure

Absolutely the best Sheep Manure on  
the market. Pure manure and nothing  
else. The best fertilizer for carnations and for  
liquid top-dressing. Unequalled for all field use.

## SUGGESTIONS FOR PLANT GROWERS.

### Asters.

The last of June invariably sees the carnations approaching the end of their season and growing poor in quality, and something is necessary to take their place, especially in funeral work, and an early aster fills in very nicely, and can be very easily and cheaply grown. Seed sown the first of March and grown in flats until after Easter will make splendid plants to bench up at that time, and will be in bloom early enough to take the place of the waning carnations. Much of the bedding stock after the middle of April is far better off in cold frames, and there should be plenty of bench room in which to plant this young stock. Secure a good strain of the Victoria asters and as the demand will be mostly for white, have a large proportion of this color, as there is but little call for any but the lighter shades. If there is no room that can be spared in the houses the aster plants can be set out in cold frames and protected by sashes as long as required, and while these will probably not bloom quite as early as those benched in the houses, yet they will be much earlier than plants set out in the open ground.

### Memorial Day Preparations.

There is always a demand for a large quantity of the cheaper grades of flowers for Decoration Day, and the time for starting the different flowers wanted should be carefully noted, so that they may be in fit condition at that time. With the quantity of stock now coming on which will need repotting it is a great question where to find room for it all. The carnation crop will increase very rapidly after the middle of March and growers as a rule have a large number of flowers to throw away during the spring, and it is sometimes better to throw out part of a bench and plant something else that will give better returns. There are a number of flowers that can be brought along for this great floral day. Candytuft makes a very good crop to bring in for this purpose, and seed sown early in March will

produce plants that will be a mass of flowers by May 30, and they will take but little room until after Easter. Another crop that is very useful at that time is feverfew. Good strong plants benched the first or middle of March will be in full bloom at Decoration Day, and to the grower who has many bouquets to make, these flowers will be a great boon. White and colored stocks are also very useful, the variety Apple Blossom, producing flowers of light pink, is especially good. There is always a place for stock of this kind at that time, and after the flowers are cut the old plants thrown out and room made for other crops.

### Tuberous Begonias.

A bed of flowering plants is often desired in a location far too shady for many of the varieties of plants in use for bedding out purposes. While it is not advisable to attempt any blooming plants under trees bearing heavy foliage, yet, the tuberous begonia will grow and bloom much better in partial shade than in sunny positions. While they will do fairly well under trees, yet the north sides of buildings are more preferable. They can be raised from seed, which, if sown in March, will produce plants that will flower late in summer, but two year old tubers are more satisfactory for continual blooming. For early flowering, the tubers should be started in February and March, either in small pots or in flats. The soil should be of fibrous loam, with a liberal addition of sand and leaf-mold. They should be placed in a temperature of 60° to 65°, and carefully and sparingly watered until the growths appear, when they should be put in three and a half or four inch pots, and a little rotted manure should be added to the soil at this potting. When the roots have obtained a good hold in the new soil, they can be grown in a cooler temperature. They can be planted out during May and June according to locality. If it is desired to grow the tubers for another year, a fine strain of seed should be procured, which should be sown very thinly in a shallow box or seed pan. Sufficient cov-

ering will be given by firmly pressing the soil down level. The pan should be kept dark for a few days, by covering with a light of glass, which should be shaded, either by white-wash, paint or paper, and placed in a temperature of 75°. As soon as the seedlings appear, the covering should be removed, and when the plants have roots a quarter of an inch long they should be pricked off and potted in nicely prepared soil, the component parts to be the same as for starting the bulbs.

#### Sweet Peas.

An early crop of sweet peas is a great want by some growers, and in the northern sections of the country, the seed cannot be sown out of doors much before the first of April, which will not give flowers until well along in July. Seed sown in 3-inch pots the first of March will be in fine condition to set out in the ground early in April, and will produce fine flowers just as the greenhouse crop is about getting through. This seed should be sown five or six seeds in a pot about an inch deep and placed in a cool house. Water very carefully until the seed is about two inches high when more water can be given. As soon as the severe frosts are through, they can be planted in trenches outdoors, set rather deep, so that as they grow the soil may be hoed around them. They should be provided with something upon which they can climb at once, either brush or wire.

#### Verbenas.

There has been more or less trouble for the last few years with rust on verbenas and while the custom was to carry over some of the better strains and root cuttings, many growers, owing to the plants developing rust during the winter, depend upon plants raised from seed. The seed of very fine strains can now be purchased and excellent results obtained from plants raised in this manner. They can be purchased in either mixed or separate colors. The seed should be sown early and the plants potted off in two-inch pots and when about two inches tall the tip nipped out in order to make the plant branch and become bushy and they will be in bloom the first of June at the time wanted for bedding out. Plants raised in this manner are much preferable to the small, spindly, single stem plant with a small flower on the top so often seen on the market, and they are worth two of the latter and are much more satisfactory.

#### Geranium Leaves Being Eaten.

ED. AMERICAN FLORIST:

I send you samples of geranium leaves which are being eaten. Can you inform me what is causing the damage, and what to do for a remedy?

ENQUIRER.

The leaves arrived in a very dry condition, crumbling upon opening the enclosure, and it was impossible to ascertain where the leaf had been eaten. If the leaves are being eaten it is, however, very probable that it is being done by cut worms. These worms work at night and can be picked off by hand, or where upon plants such as geraniums from which flowers are not to be cut, the plants may be sprayed with a weak solution of paris green, which will be found very efficacious.

W.

## THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

### Stollery Bros., Chicago.

In the residential part of Chicago are some very nicely equipped and pretty retail flower stores, and one on the north side of the city on Wilson avenue, conducted by Stollery Bros., is especially so, being surrounded by homes and residences of well to do people, and in close proximity to cemeteries whose lot owners are among the wealthiest people of the city. This firm enjoys a very select and fine business. The store has in the rear a large room devoted to plants, which is lighted with large skylights giving a greenhouse effect, and here are always assembled a nice collection of decorative and blooming plants. The illustration shows how effective such a room can be made and how decorative it makes a store appear, for as one enters the door it looks as if he were entering a greenhouse and nowhere are well grown plants more effectively shown than under good light.

### St. Patrick's Day Suggestions.

#### BUFFET LUNCHEON.

Make a center piece of white orchids arranged in a cut glass vase, place this in a round hedge made of shamrocks in wreath form but thick and rounding, under which place the large leafed maiden hair fern; allow graceful sprays of the orchids to extend over from the center piece at different intervals touching the top of the hedge wreath. On either end of table place a good sized ball made of shamrocks; around this ball arrange a tiny wreath of white orchids. These balls must

#### GREETING CENTER PIECE.

A center piece mounded to a height of seven inches and covered with shamrock leaves is good—but must be made loosely and artistically, using a wide sash ribbon the shade of Killarney roses across the center on which the words "St. Patrick's Greetings" should be painted in silver, the ribbon extending across the table to fall over the edge. In the center of the ribbon which rests flat on the table arrange a garland of Killarney roses flat, using the shamrock as a fringe to finish—but leaving a suggestion of the ribbon at either side of the roses, not allowing the green to cover it. Around this center piece make a rather low wreath of Killarney roses, allowing it to break where the ribbon crosses the table. Corsages of Killarney roses arranged in Venetian style, that is, the tight set style, and in place of the gauze effect use shamrocks. Pink rosebuds surrounded with shamrocks are good for boutonnières.

#### PIPE CENTER PIECE.

This can be made very artistically by using three frames made in the shape to represent the old Irish clay pipe, but great care must be exercised that they are graceful in form. The pipes should be about fifteen inches long with a rather larger bowl than would be suggested in the ordinary comparison with size of pipe. Make the body and stem of white carnations; around the edge of the bowl arrange shamrock, filling the center with red carnations. About five inches from the end of pipe, tying them together, arrange a wreath of shamrocks. The bowl of the pipes should be at least seven inches across. Place this pipe arrangement on a basket of shamrock, using a garland of deep red

STOLLERY BROS.' STORE, CHICAGO, INTERIOR VIEW.

be made graceful and pretty with the shamrock in order to make them effective; under these place a mat made of maiden hair ferns. Garlands of orchids and shamrock can be draped around the edge of table cloth. To add to the effectiveness of the table use small green electric lights wherever they are most attractive.

carnations, a shamrock fringe as a finish. Small green baskets filled with growing shamrocks make good souvenirs tied with red gauze ribbon. A red carnation for boutonnières.

#### GRANDFATHER'S HAT CENTER PIECE.

Make a frame to represent the good old fashioned grandfather's stovepipe hat. Make the body of the hat of

PORTION OF A HOUSE OF EASTER LILIES AT POEHLMANN BROS. CO.'S, MORTON GROVE, ILL.  
Photographed March 5, 1910, Three Weeks Before Easter. Night Temperature 50°.

shamrock, filling in the top with lily of the valley and its foliage, also making a garland of lily of the valley for the band. Place this on a mat centerpiece of lily of the valley with shamrock fringe, using maiden hair to give it effectiveness as a foundation. The edge of the mat should be made on the garland order, using lily of the valley with shamrock combined and making it sufficiently full to allow tiny electric lights covered with green catgut to be arranged in it. Use grandfather hats of small size filled with growing shamrocks for favors and lily of the valley boutonnieres.

A. E. KLUNDER.

#### St. Patrick's Day Decorations.

Table decorations and other arrangements of flowers for St. Patrick's Day are of frequent occurrence, not only by those of Celtic blood, but by many others, who are always on the lookout for something new and novel in floral arrangements, and eagerly grasp anything that will prove attractive for this purpose, and the florist must be prepared to supply whatever may be required in its season. The color for St. Patrick's Day must, of course, be green, with just color or white enough to bring about the proper contrast. The little plants of shamrock or oxalis are used to a great extent at this time and are employed in different combinations. These can be procured specially grown for this day in very small pots, not over an inch in diameter and height or in low pans, and when well grown, are a very pretty plant for this occasion and expressive of the day. These can be arranged in

center pieces and the small pots distributed upon the table or beside each plate and with other greens upon the cloth, with a few flowers, either white or yellow, make a very effective decoration. The flag of Erin is also much employed, the golden harp upon the field of green, and can be arranged with flowers and is much used especially in window displays, to draw the attention of the approach of the natal day of Erin's patron saint. The small flags are also much used in conjunction with the shamrocks or flowers at this time, and can be so arranged sometimes in conjunction with small flags of the stars and stripes to illustrate the strong bond that exists between those of Irish birth who have made this land their home and the mother country. The design of the trefoil is often used, especially when the little shamrocks cannot be employed, or are not obtainable, and this will carry out the desired idea, both in table decorations or placed upon the walls. These can all be very artistically arranged and greatly appreciated by those who desire to commemorate this day.

TORRINGTON, CONN.—Henry Riller will erect a greenhouse 150 feet long as soon as the weather conditions permit.

ATLANTA, GA.—The Atlanta Floral Co. has inaugurated the idea of making every Saturday carnation day, with special prices and features. The plan has met with great success.

JERSEY CITY, N. J.—A bill introduced before the New Jersey legislature appropriates \$30,000 for the erection of greenhouses and the equipment of the same for floriculture.

#### Easter Lilies.

We now hear of Easter lilies all through the year from November to July, but in a large majority of the greenhouse plants of the country there are being produced plants of the different varieties of *Lilium longiflorum* for the Easter day. It is not so many years ago that the lily grown and used upon that great floral occasion was the *Lilium candidum*, so well known as the Ascension lily, but this smaller flower has been relegated to the background by its larger and more showy sister. Easter being a movable feast, occurring according to the phases of the moon between March 23 and April 25, is this year calendared for April 16, a date at which any grower should be able to have his crop in superb condition. The plants the first week in March, if properly grown, should be in a temperature of 60°, having the buds just showing, and from that date on will require the best of attention and culture to produce the bloom and splendid plant that is desired for the holy day. The bulbs when received are in different stages of maturity, especially those that come from Japan, for they must arrive here early in the fall and, owing to the long transportation and the haste to have them reach their destination early enough, are often not evenly matured when prepared for shipment. They, consequently, do not progress evenly, and some will under the same treatment, produce buds that have spread and taken a horizontal position before the buds can be seen in the later plants. To successfully produce a crop of lilies all to be in bloom at a certain time requires that

the grower should have houses which are maintained at different temperatures, in order to regulate and control the development of the plants. A grower of these plants whose annual output was in the tens of thousands once made the statement that he believed he averaged moving his plants not less than six times, in order to have them in the desired condition. While this may have been an exaggerated statement, yet the cultivator must fully understand that the more advanced plants must be retarded, and the later ones forced, and this can only be done by moving the plants where they will be in different temperatures. But this cannot be done too early, nor is it advisable to make the change too great at one time. It is better to wait, unless the plant is extremely forward, until the buds have spread from the centre before taking them into the cooler house. We have seen lilies that were taken into a lower temperature when the buds first formed and then when it was found that they had been moved too early, were taken back into the warmer house and for days they stood nearly still, and when forced into bloom did not produce nearly as good a flower as those that were treated correctly. The crop should be looked over every day, and those that are known to be too forward should be taken into cooler temperature. Here is the opportunity for knowledge and judgment and both will be required.

The plants should also be arranged according to height, the lower ones on the sunny side of the bench and the taller ones behind, so that all will obtain the requisite amount of light. This can be done as soon as the buds form for the proportionate height can be easily seen at that time. Another matter that will demand immediate attention is the staking. This should be done as soon as the buds begin to swell, for the plant begins to grow heavy at the top as the buds grow larger, and will need a support to keep the plants erect and the stem straight. If the plant bends over, it takes but a very short time for the sun to draw the flowering end up straight and the result is that a plant will have a crooked stem and no matter how much patience and perseverance is expended this can never be straightened out and the plant is practically ruined. Many growers use anything that they can obtain for staking their plants, short pieces of brush or any old thing. Plants are sometimes seen with cut branches larger in diameter than the plant itself, looking almost like a piece of cord wood stuck into the pot. In this case as in all others connected with the culture and marketing of the floral product, the necessary accessories can be made to add to, or detract from, the beauty of the product. A neat appearing and light stake strong enough to support the plant, is what should be used, personally we like the green-painted stake 18 to 30 inches long, but the smaller cane stakes are very serviceable and are a little cheaper.

As soon as the flower opens the stamens should be removed, and this should be done before the pollen begins to drop or the flower will be discolored. This must be done carefully so as not to injure the bloom. A little practice soon makes one an adept at this, and he will learn to pick the stamens out very rapidly without injuring or tarnishing the flower. If the plants can be far enough advanced to be placed in a house where the night temperature

will fall even as low as 40° for a few days before being sent out and good ventilation given them during the day, the quality of the blooms will be much improved. This can be done if one flower has begun to open and if they advance too rapidly shade may be provided during the daytime. It is wonderful how the petals will thicken up and the flowers become so much more solid under this cool treatment. Constant watchfulness and care will be required to have the crop at its best at the time required, but it is necessary, for the day has gone by when a grower can afford to lose a large portion of his crop either from not having them in on time or of too poor quality.

If the plants have been grown ever since they were potted last fall in the same pot the chances are that the pots are very full of roots and the necessary food supply exhausted. In this case liberal waterings of liquid manure will be required to have the flowers the requisite size. This is the case where can-watering is preferable to the hose, but, of course, where large numbers are grown the hose must be relied upon, but care should be taken not to touch the foliage for the plant to be in fine condition should have clean, bright green leaves clear down to the pot. Fumigation or spraying with insecticides must be assiduously followed up until the plant is in bloom, green anthesis are particularly partial to lilies and the temperature and conditions in which the plants are grown are very conducive to the production of these insects, and if allowed a hold will very soon injure the entire crop.

BOOTHWYN, PA.—Williams Bros. are making improvements in their greenhouses preparatory to the spring trade.

## CHRYSANTHEMUMS

### Stock Plants and New Varieties.

The finishing up work of the chrysanthemum season is the selection and caring for the stock plants. Choose the healthiest-looking stools for your stock plants, also such plants that have vigorous, healthy roots; it will make a great difference in the production of fine healthy cuttings, when judgment has been used in saving only the best stock plants for propagation. Enough plants should be saved, so that no weaklings will have to be used for cuttings. The proper place for the stock to winter over is a light, airy situation as near the glass as possible, and where a cool even temperature can be maintained, a few degrees below that to which they have been subjected during their blooming period. They also should be kept a little on the dry side, to guard against a soft spindly growth, and to allow for the plants to remain partially dormant. Particular care should also be taken to keep them free from insect pests of every description.

Our judgment of the new varieties that have come under our notice is as follows:

Smith's Advance. It was our privilege to grow a few of this variety during the past season so that we can testify to its worth. It is a free easy grower with light to medium foliage that will allow for close planting; the growth is straight and clean and it does not bud up every little while as does the Golden Glow. This will make it much more valuable to the very early section. The color is pure white, the texture of petalage is good, as is

POEHLMANN'S LILIES, THREE WEEKS BEFORE EASTER.

LILIES AT POEHLMANN BROS. CO.'S, MORTON GROVE, ILL.

Photographed March 16, 1910. Ten Days Before Easter.

also the form of the flower. Early planting is essential to get the very best results as to length of stem and good large bloom.

**Oroba:** A large pure white for commercial purposes. This variety is a fine addition to the second early whites, the flowers being well up to the exhibition standard, and the growth, stem and foliage are ideal for commercial work; it is at its best October 20.

**Donnatello:** Incurved yellow, ready to cut October 15. The form of the flower, its color, and the growth of the plant, give this variety great promise as an early commercial yellow.

**Naamah:** A fine addition to the large incurved whites for exhibition, resembling Merza in type of bloom, but a great deal easier to grow, and the flower has more lasting qualities.

**Randee:** A big bloom for exhibition purposes; takes a long time to mature but extra fine when well done; its only place is in the collections or classes of twelve.

**Adonis:** Pink Japanese of exquisite color grown from late August buds, a good exhibition variety.

**Elise Papworth:** A fine commercial white of ideal growth and habit; a valuable variety.

**W. Woodmason:** A very prominent variety in the prize-winning collection at the Chicago show; one of the very largest.

**Mrs. H. Stevens:** Also a very fine

exhibition variety for collections, a very showy and striking bloom.

**J. W. Molyneux:** A very showy exhibition variety for collections, a fine crimson and old gold variety.

The older and better known varieties still very conspicuous, and just as good as ever were Beatrice May, Mary Donnellan, Glenview, F. S. Vallis, Golden Eagle, O. H. Broomhead, Mrs. J. C. Neill and Merza. C. W. JOHNSON.

### Chrysanthemums and Carnations.

ED. AMERICAN FLORIST:

What is the best date to propagate Golden Glow chrysanthemums to have them bloom the first of November? Will lime and sulphur blown on carnation plants infected with rust assist to remedy the trouble? J. M.

Illinois.

To have Golden Glow chrysanthemums in bloom at November 1 the cuttings should be propagated in May and the late bud taken, that is, the bud that sets during August. But Golden Glow is a much earlier variety and by propagating the cuttings in April and taking the bud in July, can be had in bloom in September and early October. It would be much better to grow Golden Glow for an early chrysanthemum and for blooming in November grow some of the yellow varieties that do not bloom so early, such as Monrovia and Robert Halliday, which will bloom by October 15,

and Col. D. Appleton and others that will be in bloom early in November.

A light dusting of air-slacked lime over the plants will prevent the spread of rust on carnations, and careful cultivation will reduce the trouble. Give the plants all the air possible, and guard against a damp atmosphere and avoid wetting the foliage during cloudy weather or late in the day. In propagating the stock, do not take any cuttings from the afflicted plants. W.

**DES MOINES, IA.**—Harry Lozier is considering plans for the erection of a three-story building this spring on the property he now occupies at 510 East Sixth street. Mr. Lozier will occupy the ground floor and the upper floors will be fitted up for office purposes.

**JAMESPORT, N. Y.**—The Weir greenhouses with the addition completed last year is now a plant of nearly 20,000 square feet, managed by J. E. Weir, Jr. Thirty-five acres of land are devoted to growing plants, shrubs and vegetables, the product going to the retail store in Brooklyn.

**BAR HARBOR ME.**—The new greenhouses which John H. Stafford has been building, are now completed. The range comprises 11,000 square feet and will be stocked with palms and plants. The designing and erection was by the Lord & Burnham Co., of New York, of their semi-iron type. Two houses will be used during the summer for raising English melons. The establishment will be known as the Malvern Greenhouses.

VIEW OF H. A. DREER'S NEW RANGE, RIVERTON, N. J.

**H. A. Dreer's New Range, Riverton, N. J.**

At Riverton, N. J., the Henry A. Dreer, Inc., have recently completed a large greenhouse plant in addition to their already immense plant located at Riverview, and we illustrate this handsome range and the features embodied in its construction as well as some of the products now being grown therein. This range covers an area in the vicinity of 100,000 square feet and consists of 23 houses. In the center is erected the larger service building which is 34 feet wide and 203 long. This is built without posts and of iron frame and truss construction. In this building is ample room to receive and prepare the stock and as well to pot and shift the thousands of plants which are grown in this range. Part of this house is used for the storage of the plants that do not require a warm temperature and a magnificent lot of bay trees under this roof is herewith illustrated. On either side of this service building is a lean-to house connected with a range of 20 houses extending both ways, making a total of 20 houses and two lean-to in addition to the large central building. These houses are each 21 feet 9 inches wide and 203 feet long. On one side there are no partitions built under the gutters, and this arrangement gives one large piece of ground covered by an immense roof of glass an acre in extent. There are no benches in this area and the houses are run at low temperature and harder stock is grown therein. The houses on the other side of the service building are divided by partitions of glass under the gutters and also with benches, and in here are grown the beautiful specimens of palms and decorative plants for which this firm has acquired such notoriety. These houses are piped so that a temperature of 60° to 65° can be maintained at all seasons. These houses are filled with the finest of stock, including Kentias, Phoenix Reblenii, Areca lutescens, dracenas, nephrolepis, variegated pineapples and other commercial plants in splendid condition.

But a short distance from this range is a fireproof iron frame concrete building in which is installed the heating plant. Here are four 75 h. p. boilers of the ordinary tubular type and an auxiliary steam boiler for power purposes. These boilers are arranged so that a low grade of coal can be used, being equipped with blowers that will provide a forced draught. The

heating is done by hot water and as the boilers are set on the level of the houses the circulation is procured by the use of centrifugal pumps which keeps the water in rapid circulation throughout the range. The pumping plant is made in duplicate, so that in case anything should happen to cause the stoppage or breakdown of the pump in use the other will be all ready for operation and all damage of complete cessation of the circulation is

J. D. Eisele.

Manager H. A. Dreer's Plant Department.

obviated. A tall chimney in which the word "Dreer" is laid in the masonry towers over the boiler house.

The building of this range was awarded to the King Construction Co. of North Tonawanda, N. Y., and was one of the largest contracts let during last season for greenhouse construction. Everything is of most modern type and of the best workmanship, and is a great credit to the builders and will enable this enterprising firm to meet the requirements which their ever increasing business demand. It is intended, as it may become necessary, to add to this plant and in making the plans future additions were kept in mind and the construction was such that more glass can be economi-

cally added and the capacity increased, in fact, this is called the first block, and it is expected that the glass here will eventually cover an extended area. The firm has an extensive piece of property, recently purchasing an addition of 130 acres, and they intend to build more houses each year.

**Narcissi Failing to Root.**

ED. AMERICAN FLORIST:—

I am sending you some narcissi which failed to produce roots or if they did the roots were weak and very few. These bulbs were received last August for early blooming and I understand the growing season where they were produced was unusually wet. Any information you can give as to the cause of the trouble will oblige.

Illinois.

SUBSCRIBER.

The bulbs appear to have been injured by the attack of either millipedes or sowbugs, which have eaten off the young roots. These have been noticed previous to this time in bulbs sent from California. The bulbs may have been attacked either previous to or after planting in the greenhouse.

The trouble due to mites is usually unpreventable after these creatures have once obtained access to the growing bulbs. The bulb mite usually obtains access to the bulbs in the locality where they are grown to maturity, and while, at times, primarily injurious, is usually more dangerous from its habit of boring into fresh living tissue, thus giving access to spores or germs of various plant diseases and fungi, and weakening the constitution of the plant to such an extent that it falls an easy prey to the diseases. As these mites do not possess tracheae, fumigation is of little avail against them, and no known methods of disinfection at present are available. It is suggested that very finely powdered flowers of sulphur dusted upon the bulbs upon their receipt, or immersion for some minutes in a strong solution of nicotine sulphate, one part to 100 of water, with one pound of soap added to each 50 gallons of mixture, should prove effective. They may also be treated with kerosene emulsion, one part to six of water. The millipedes are amenable to the use of poisoned baits, using one to two tablespoonfuls of white arsenic to a bucketful of bran, sweetened with a quart of syrup or molasses. This should be sprinkled about the beds and will prove effective in the control of these creatures.

### Spraying Notes for Spring.

Among the most destructive insects and one which has been found until recently very difficult to eradicate, is the San Jose scale. With nursery men, as well as orchardists, this little pest has caused immense loss, but constant work and study has found a remedy, and those who are lovers of trees are only too happy to know that this destructive scale can be successfully combated. Prof. John J. Davis, of the University of Illinois, says: "During March, spraying for scale insects, especially San Jose, scurfy and oyster shell scales, should be commenced. The material to be used is lime-sulphur mixture, and spraying can be done in March or April, preferable as late in the spring as possible, but always spray before the buds have started to open, and never spray during freezing weather.

Spraying for the green apple aphid, as well as for the wooly aphid, and other plant lice infesting nursery stock, may be done now. The aphid is in the egg stage at this time (there are a few exceptions), the minute jet black eggs being deposited on the branches and trunk of the tree. Professors Gillette and Taylor (of Colorado), who have made extensive tests with various materials to kill the aphid egg—applications being made in late spring before the buds open as is the case of scale insects—report successful results from the use of lime-sulphur mixtures and black leaf (the latter used at the rate of one gallon to 25 or 30 gallons of water). In spraying for scale insects or aphid eggs always spray the entire trees thoroughly, for the insecticides recommended kill only by coming in contact with the egg or scale to be destroyed."

The materials for these washes are not costly, are easily obtained anywhere, are prepared for use by simply boiling them together according to the following directions until dissolved, and are applied with an ordinary spray-pump such as is commonly used in orchard work, states Dr. S. A. Forbes, state entomologist of Illinois, and experimental work has demonstrated the possibility of keeping this insect in check by occasional treatment, and, indeed, of almost completely clearing an infested orchard, under favorable conditions by two or three sprayings of trees with lime and sulphur wash. These facts bring the San Jose scale wholly within the control of the owner of infested premises and make it, in fact, one of the most easily managed of the serious pests of horticulture. On the other hand, our experience has emphasized the conclusion that, left to itself, it will make fruit growing impossible, and destroy completely any orchard which becomes infested with it.

The following directions for the preparation and application of the lime and sulphur wash will be found sufficient guide to its effective use. For 50 gallons of the spray, heat 12 gallons of water in a 40-gallon iron kettle, mixing, in the meantime, in a separate vessel, 15 pounds of sulphur with enough water to form a thin paste. Add this sulphur to the water in the kettle and bring the mixture to a temperature just below boiling. Then add 15 pounds of best lump lime, keeping cold water at hand to use as the mixture threatens to boil over. After the lime is fully slaked, boil for forty minutes with almost constant stirring.

Then strain into a 50-gallon spray-tank and fill with water, which had better be warm, although cold water will do. If a supply of steam is available for cooking the mixture this will be found a much more convenient source of heat. The cooking is then done in barrels or other vessels, from which the fluid is strained into the spray-tank. The disturbance caused by the introduction of steam makes stirring unnecessary.

Very large trees and those with bushy top should be pruned before spraying and thickets of plum, peach and the like should be destroyed as should Osage orange hedges as the scale breeds freely on this plant and it is difficult to spray such a hedge so thoroughly as to reach most of the scales. Use this wash on trees after the leaves are off, preferably late in the spring, before the buds have com-

Chester I. Campbell.  
Manager Second National Flower Show.

mented to open. Never use the wash on tree in leaf. Thoroughly coat the trees, being careful to cover the smaller twigs and branches and to get the mixture in all the crevices. Do not attempt to spray from one side only. If a heavy rain or severe cold weather follows soon after spraying, the treatment must be repeated. Do not spray the mixture against paint, which may be blackened by the sulphur. It is well to blanket horses, and avoid getting the spray upon the bare hands or face, as it is very caustic. The undiluted mixture should not be left in the kettle over night, as it is likely to harden and cake and is then worthless. See that all barrels and apparatus are thoroughly cleansed before using the mixture in them, otherwise the nozzles are likely to clog. Thoroughly clean kettles, hose-barrels, pumps, nozzles and all spraying apparatus when the work with this wash is over for the season.

Either bucket or knapsack pumps may be sufficient where only a few trees or shrubs are to be sprayed. The pump best suited for this use, however, will be a good hand-power pump, fitted securely to a barrel or tank. These pumps should have no copper about them, but working parts of brass, no valves of leather, but brass valves ground to fit perfectly are nec-

essary, having an agitator with both vertical and horizontal movement, jet agitators not being satisfactory with hand-power pumps. Two cut-off cocks with 25 to 35 feet of best black foot to five-ply half-inch hose attached to each cut-off and extension poles are necessary. Bamboo poles with iron or brass lining eight to 12 feet long with good cut-off valves at their base will be found best. Double Vermorel nozzles have given best satisfaction. A good hand-pump with fittings complete as described, may be bought for \$18 to \$25, depending upon the size and number of accessories.

In what particular manner the lime-sulphur acts as an insecticide and fungicide, no one has yet clearly demonstrated. What specific compounds are directly responsible for the effects produced are not yet certain. It is obvious, however, that its efficiency stands in some close and direct relation to the amount of sulphide compounds contained in it, or, in other words to the chemical composition of the solution. Extensive experiments in the manufacture of concentrated lime-sulphur wash using different proportions of the constituents, lime, sulphur and water, have been made by the New York experiment station and the result of these is thus briefly expressed. The combination that appears best to meet the desirable conditions is 36 pounds of pure lime, 50 pounds high-grade, finely divided sulphur, and 50 gallons of water. Lime containing less than 90 per cent pure lime should be avoided. In diluting concentrated lime-sulphur wash, Prof. P. J. Parrott has furnished the following information: In treating San Jose scale, one gallon of lime-sulphur wash (testing 33° B. hydrometer test) is diluted with eight gallons of water; for blister mite, one gallon with 11 gallons of water; and, for fungicidal work on foliage, the dilution is 40 gallons of water to one of lime-sulphur wash. Experiments have also been conducted at this station in the adaptability and economy of home-made concentrated lime-sulphur mixture, both at the station and by volunteer experiments. The latter were in the majority of cases very satisfactory in regard to the adaptability and in regard to the relative cost the home-made concentrates average less than 50 per cent of the cost of the commercial solutions.

### Society of American Florists.

#### NATIONAL FLOWER SHOW.

It has been ordered that each member in good standing, of the S. A. F. and allied societies holding meetings, and exhibitions in conjunction with the National Flower Show in Boston on March 25-April 1, shall be entitled to one members' season ticket, admitting the owner to the exhibition hall. Only one ticket, however, will be issued to any one person even though he belong to several societies. These tickets will be nontransferable and will be collected and canceled if found in hands other than the owners.

In compliance with the directions of the president, orders for members' season tickets are being sent to all members of the S. A. F. in good standing; that is to all those who have paid their 1911 dues or are life or pioneer members. These orders must be presented to the proper officials at the exhibition hall and be exchanged for regular members' tickets. These orders must be presented by the owners

NEPHROLEPIS ROOSEVELT.

in person, as all orders presented by others than the owners will be taken up and canceled.

Be sure and bring your order with you as the duties of the Secretary's office are such that it will be impossible for him to issue duplicate orders. This rule will be enforced.

Send your dues for 1911 so as to reach the secretary's office before March 20 and the order will be mailed to you. If your dues reach here after that date your order may be secured at the secretary's office at the Exhibition Hall. Kindly give this your attention now and save much confusion at the time of the meeting. All life and pioneer members and those annual members who have paid their dues for 1911 have received their orders for membership tickets. It has been decided not to have headquarters for the S. A. F. at Boston. The statement that the Brunswick hotel was selected as headquarters was not official.

A rate of one and three-fifths (1.35) on the certificate plan has been granted by the New England and Trunk Line Associations. The South Eastern and Western Associations have refused to grant rates owing to small numbers and two-cent rate now in existence. The Central Association and Eastern Canadian Association will report early in March and their decisions will be presented in the trade journals.

You cannot afford to miss the greatest flower show ever held. Come.

H. B. DORNER, Sec'y.

#### Nephrolepis Roosevelt.

In November, 1908, the first two plants of *Nephrolepis Roosevelt* were found on a bench of Boston ferns in the houses of The American Rose and Plant Co., of Springfield, O., and up to last October over 70,000 young plants had been propagated, not a single one showing any tendency to revert to the parent type. Several other sports from the Boston showing some difference in the character of the fronds have been previously introduced. These lack the graceful drooping habit which has made the old Boston famous and they have not been considered worthy competitors for the parent's fame, but in *N. Roosevelt* will be found all the points of value possessed by the Boston, with other attractive features. The fronds produced by *N. Roosevelt* are one-third to one-half wider than those of the Boston and handsomely tapered from base to tip. They are of better substance, with each pinnae distinctly undulated, giving a marked wavy effect to the whole plant. The ribs of the fronds are stronger than in the Boston but more graceful in drooping habit and show this feature prominently in finished 3-inch to 6-inch pot plants. A single plant of *N. Roosevelt* finished in a 6-inch pot will produce one-third more fronds than any other variety, forming a perfectly symmetrical plant with full, compact center and wide

drooping fronds, which completely hide the pot. It is a better producer of young plants than the Boston and for all purpose excels any other variety we have ever seen or grown.

JOHN GOOD.

SPRINGFIELD, MASS.—A fire in the greenhouse of Hans Marsden on New Bridge street destroyed a large part of the building and several hundred dollars' worth of plants.

FITCHBURG, MASS.—C. E. Lesure has purchased the business of C. E. Mansfield and taken possession of the Putnam street store and the Charles street conservatories.

DENVER, COLO.—The Elitch-Long greenhouses at Elitch's Gardens is an extensive establishment of some 125,000 square feet of glass, the product of which is handled at the Elitch-Long Flower Store on Fifteenth street.

ROCHESTER, N. Y.—Richard G. Salter, Charles Vick, George B. Hart and William L. Keller composed the delegation from the Florists' Association that went to Albany to support the bill appropriating \$50,000 for an experiment station at Cornell University.

PHILADELPHIA, PA.—The lectures at the H. F. Michell Co.'s seed store are very popular. 250 people assembled there February 27 to hear the lecture by J. C. Townsend of Merchantville, N. J., on "Old fashioned flowers, especially the hardy herbaceous perennials."

RENEW subscriptions promptly so that no copies of the papers may be missed.

THAT ILL WIND.—American brides of European aristocrats demand and insist upon American carnations and roses in their floral work.

SOME faraway residents who expect to attend the National Flower Show at Boston, March 25 to April 1, are James Forbes, Portland, Ore.; J. A. Valentine, Denver, Colo.; Samuel Murray, Kansas City, Mo., and J. J. Hess, Omaha, Neb.

PACIFIC PROSPERITY.—Martin Reukauf, the well known representative of H. Bayersdorfer & Co., Philadelphia, Pa., who recently returned from the Pacific coast, says Portland and Spokane are the most prosperous cities in that region just now.

## Society of American Florists.

### DEPARTMENT OF REGISTRATION.

As no objections have been filed, public notice is hereby given that the registration of the geraniums, Dr. E. M. Moore and A. B. Lamberton, by Robert Dukelou, of Rochester, New York, becomes complete.

Public notice is hereby given that A. N. Pierson, Inc., of Cromwell, Conn., offer for registration the roses described below. Any person objecting to the registration or to the use of the proposed names, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.
